INDEX

LIBRARY JOURNAL, Vol. 55, JANUARY-DECEMBER, 1930

Business libraries and other libraries especially well-known are entered under their own names, as are national, state, university, college, and U. S. department libraries. Other libraries are entered under name of city or town in which they are located. Appointments, resignations and other notes referring to changes of position, etc., only, will be found on pages 1050-1052. Other personal notes (authorships, deaths, marriages, etc.) are included in the body of the index.

A

- Abbreviations of titles of periodicals, code, (Thompson), 957-958.

HENRY HOLT & COMPANY

THE BOOK LEAGUE CHOICE FOR DECEMBER

JOE PETE

By FLORENCE E. McCLINCHEY

Here is a novel securely grounded on the bed-rock of fundamental human emotion. It is a genuine and peculiarly compassionate picture of life today among the Ojibway Indians of Northern Michigan. Miss McClinchey, writing with a depth of feeling which transcends mere literary craftsmanship, has portrayed with stark sincerity the appealing figure of young Joe Pete as he faces the grim spectre of conditions existing today among his people. \$2.50

**CROUCHBACK**

By CAROLA OMAN

Richard III, the mysterious humpback king of England, gives title to this full-blooded historical novel of the Wars of the Roses.

"CROUCHBACK is the best I have read in years"—Frances Lamont Robbins of The Outlook. \$2.50

THE TYRANT

By RAMÓN DEL VALLE-INCLÁN

"One of the most significant novels of contemporary Spain. The torches of revolution flicker through the terrifying spectres of Valle-Inclán's own vivid imagination." —N. Y. Herald Tribune. \$2.50

**THE GOLDEN ASSE
AND OTHER ESSAYS**

By MARY ELLEN CHASE

"Here are essays in the good old New England tradition with a demure sparkle and a delicate tang."—Florence Converse of the Atlantic Monthly. \$2.00

MAGIC SPADES

The Romance of Archæology

By R. V. D. MAGOFFIN and EMILY C. DAVIS

"I know of no better and more up-to-date, brief popular account of recent great finds of archæology for the cultured public."—David M. Robinson, Professor of Archæology in Johns Hopkins.

150 unusual illustrations. \$5.00

**THE PAGEANT
OF THE PACKETS**

By GARNETT LAIDLAW ESKEW

Here at last is the Mississippi book which will delight both the experts and the public. "Hugely entertaining." — Waterways Journal. "Simply swell."—United Press.

Illustrated. \$3.00

**IBSEN
THE MASTER BUILDER**

By A. E. ZUCKER

"An excellent biography."—Isabel Paterson. "A valuable addition to the altogether too slender list of informative and enduring biographies."—The Bookman.

Illustrated. \$3.50

Librarians* Agree

that the service given by the Putnam Library Department is remarkable in INTELLIGENCE, EFFICIENCY, ECONOMY and PROMPTNESS.

* "The promptness with which we have been able to get books to our public, especially those requested for purchase, is entirely due to the good service which you have been giving us."

"Your service has made it possible for us to have on the shelves many of the new books before our clients have read about them in the Saturday Review! I should feel helpless if I could not depend on 'Putnams.'"

PUTNAM'S SERVICE

*NAMES UPON REQUEST

NOW READY—

the long awaited *Supplement to Granger's Index to Poetry, 1919-1928*, has at last come from the press. Librarians are so thoroughly acquainted with Granger's Index, and its extreme importance in library work, that no further word is necessary about the Supplement except to say that it brings the work right up to date by covering 126 anthologies which were issued in the years 1919 to 1928. The price is \$8.00, special net.

***Libraries Can Save \$22.50
by ordering before January 28th***

THE ENCYCLOPAEDIA of the SOCIAL SCIENCES

To be Complete in 15 Volumes

THIS is the first comprehensive reference work on the social sciences ever attempted in any language. It provides a complete statement of the progress that has been made up to the present time in the various fields of anthropology, economics, history, law, philosophy, political science, psychology, social work, sociology, and statistics, in all their social aspects.

The Encyclopædia is under the general supervision of Edwin R. A. Seligman, Editor-in-Chief, and Alvin Johnson, Associate Editor, and will be the co-operative work of the most distinguished scholars here and abroad. In the soundness of its treatment, and the unusual quality of many of its articles, this will be an incomparable reference encyclopædia, filling a distinct need in the broad field of the social sciences.

The first volume will be published on January 28, 1930, and the remaining volumes will be issued at the rate of three a year. Until the first volume is ready, orders for the *complete set* of 15 volumes will be accepted at the price of \$6.00 each, \$90.00 for the set. After that date, the price will be \$7.50 each.

The regular library discount will apply on all subscriptions received before January 28. By ordering *now* you can save a total of \$22.50 on the set. Complete description sent anywhere on request.

Forthcoming Issues of THE LIBRARY JOURNAL

✿ We regret that the promised article on Branch Book Buying by Bessie Sargeant Smith of Cleveland did not materialize for this number. We hope the differences between the systems used in St. Louis and Cleveland will be taken up in a later issue.

✿ January fifteenth promises to be a building issue. The leading article in this issue will be on the new University of North Carolina library building.

✿ February first will cover book wagons with articles from Dayton, Ohio, where the book wagon is used within the City; Cincinnati, Ohio, where the book wagon serves the County; Tompkins County, New York; Haverhill, Massachusetts, and a general article entitled, "The cost of book-truck service—is it worth while?" by Edna Holden of Logansport, Indiana.

✿ An additional feature starting January fifteenth, and continuing in each fifteenth of the month issues following, will be a Department indexing library literature. Brief notes will be given about the most worthy books and articles and an attempt will be made to make this monthly index as complete as possible.

Buying Problems of the Bookshop and the Library

A Comparison of the Problems Faced by the Librarian and the Book Seller Made by One Widely Experienced in Both Fields

By Emma V. Baldwin

The Baker and Taylor Co., New York City

I HAVE been asked to discuss the problems which a bookstore faces in book buying, and, since this will be read principally by librarians, perhaps whatever may be peculiar in the bookseller's problem of buying can best be illustrated by a comparison of his situation with that with which the librarian has to deal. There is no essential difference in the psychological approach of the librarian to the reader whose need he wishes to meet, and that of the bookseller to the customer to whom he hopes to make a sale. Both are, in a sense, retail distributors. In other words, both are engaged in "selling" an individual person either an intangible *idea*, i. e., creating a desire for something which he did not know he wanted, or in meeting his known wants by supplying the thing he desires. Their point of departure lies in the fundamental purpose for which the two institutions are organized. The proprietor of the bookshop must bear in mind, always, that his bookshop can be successful only provided the returns from the books he sells exceed the cost of the books he buys by a fair margin. The librarian works for more intangible results and aims to render a service to the community without thought of pecuniary reward. Wise buying, for the bookseller as well as the librarian, is principally one of careful selection, of determining *what* to buy. This matter of selection is at least equally as important as that of terms and discount—important as those two

factors are to the retail seller—because a stock which will not sell may very quickly offset the saving effected by an extra discount.

Like the librarian, the bookseller buys to meet a demand which he either believes already exists or is confident he can create. In estimating this demand, both are wise if they rely upon carefully ascertained facts, wherever they can be procured, rather than upon vague impressions or optimistic hopes. At the outset, the funds of both will be limited and both must carefully budget their resources to insure the best possible distribution. Most libraries recognize the necessity of a carefully prepared budget, but the attitude of the bookseller in the preparation of his budget is somewhat different from that of the librarian. Libraries supported by taxation usually receive a definite amount for the expenses of operation for a definite period. The expenditure of this sum is a matter of cutting one's garment according to the cloth, making sure that the cutting is done to the best possible advantage. The bookseller can only *estimate* the amount of money he will have for the conduct of his business. Besides the capital he has for his original investment, the only items he will know definitely are the total of his chief overhead expenses (such as rent, wages, etc.) and his average gross profit. On the basis of these he must figure that merely to pay expenses, his gross sales must be three or four times his overhead

expenses. This estimate of the minimum which must be realized from sales if the business is to be on a sound basis, will also enable him to determine how much he may wisely spend for the purchase of his original stock. All of his available capital cannot be put in stock. A margin must be reserved to carry the charge accounts of customers, payment of which may be deferred from thirty to sixty days, and to enable him to increase his stock from month to month to meet current demands, and to keep the stock on hand at a proper level. These are contingencies which the enthusiastic neophyte often overlooks, but which must be taken into account in the making up of a budget. A conservative dealer will not invest more than one-quarter of his estimated gross sales in his original stock, and will count on having that stock "turn over" at least four times during the year.

Having made his estimates carefully, the bookseller must watch returns closely to see that both in buying and selling he is keeping close to his estimates. His success will depend very largely upon the wisdom and foresight he displays in the purchase of his original stock and the judgment he exercises in keeping that stock up to date. The librarian, however, may at the outset buy very cautiously, husbanding his resources until actual demands are made upon him. He may buy conservatively only a single copy of a book at a time, waiting to add more copies as they are called for. This the bookseller cannot afford to do. In the first place, his terms of discount depend upon his buying as large a quantity as he can at one time, for his percentage of profit on each sale will be larger if he has ordered a sufficient number of copies to insure a maximum discount. Furthermore, his customers will not be content to wait until he can reorder. They "want what they want when they want it." If he cannot supply the popular book they desire, possibly the bookseller around the corner can, and, in addition to having lost a single sale, the bookseller may lose a regular customer—a far more serious matter.

The active competition which a bookseller must continuously face keeps him alert. This is something of which the librarian is far less conscious, and so he is less directly influenced by the thought of it in shaping his policies, though it is a factor that the librarian must reckon with in these days of book clubs, rental libraries, scores of magazines and the host of other diversions which encroach upon time that, in a less hectic age, might have been devoted to reading. But while the bookseller must buy both to secure the best discount and the largest number of satisfied customers, he cannot afford to over-buy. Each book he purchases ties up just so much of his working capital and takes

up just so much of his space for storage and display. Space must be reckoned as part of the overhead cost of doing business, and the bookseller cannot lumber his shelves with books which do not move rapidly. What he aims to secure is a quick turn-over, both of his money and his stock—in other words, a quick sale for everything he purchases. The librarian, on the other hand, is not concerned about either of these two factors in anything like the same degree. In some instances the librarian may deliberately buy books for their permanent value as a contribution to the historical development of a subject, or because they cover a phase not adequately dealt with elsewhere. He may make purchases for which there will be but little demand, because he knows that to the occasional scholar or serious student that particular book will be invaluable. He can afford to tie up his capital and to provide the necessary shelf room because both will be justified when the book is ultimately or occasionally used. The bookseller is less concerned in meeting a prospective and special need of this sort. Such demands can usually be handled by special orders, and the customer's need is seldom so urgent that he cannot wait to have this book specially bought for him.

In the selection of the original stock, the librarian aims to cover as wide a field as possible, and so distributes his original purchases that he may be able to provide something on practically every subject. The bookseller does not aim to secure either completeness or balance in his original purchase. Having studied his community, he builds up his stock to meet the most obvious and urgent of the demands he believes will come from the people he hopes to serve. At the outset he will not venture far beyond these manifest interests. Booksellers are not without standards. They are free to limit their field in any way they may choose, either as to the subjects they will cover or the character of books they will stock. No one questions their right in this particular, nor are they required to justify their decision. Consequently they are saved the annoyance to which librarians are often subjected by those who question their decision either to include or exclude a particular book from their shelves. The bookseller may follow more closely and with less compunction the demands of the book-buying public for what is ephemeral or frankly sensational. The huge sales of material of that sort help him to carry a more diversified stock of better books for customers of a more discriminating taste. Once a book is added to the library's shelves it becomes part of the permanent collection, and it does not greatly disturb the librarian if it remains on the shelves for months unused or goes out of circulation

only a few times. The bookseller, on the other hand, must keep a close supervision of his stock.

In a well-conducted store there is available for quick reference a stock record of every book carried in stock, showing the date purchased, the number ordered, price paid, number in stock on a given date, with similar data for each reorder of that particular title. This record must be frequently consulted. During the height of a book's popularity, the stock must be watched closely, so that it will not be exhausted before the demand for the title falls off. On the other hand, the bookseller must be quick to detect signs of a decline in a book's popularity, so that he will not reorder a quantity just as it is on the point of giving way to the next best seller. This detailed stock record is also invaluable to him in placing his next order for a book by the same author, and will either enable him to place a larger initial order than he did for the last title or indicate that the past performance of the works of that particular author suggests a more conservative plan of procedure. Previous sales experience is the best possible basis for the development of sound judgment in buying, and the most lasting lessons in book buying are probably those learned through unfortunate experiences.

The periodic taking of inventory in a bookshop is a vital necessity because it is the index of the financial condition of a firm and reveals, before they become serious, stock conditions which demand attention. The book that does not sell cannot be allowed to take up shelf-

room and must be disposed of—at a sacrifice, if necessary. But, before disposing of it, the wise bookseller will follow the advice which Ruth Brown Park gives in her *Bookshops and How to Run Them*. "Give your wallflower an appraising farewell look. And do this in order that you may analyze just what constituted your mistake in this case. It isn't the fact that you made the mistake. Some buying mistakes are expected of all buyers. It is the fact that you may make them again that counts. So, to avoid this, analyze and ask yourself the following questions about the book: Was the jacket unsalable? Was the author unknown? Was the subject unpopular? Was the story unpleasant? Was the salesman overpersuasive? Did you have your clerks read it and try to push it? Did you read it yourself? Was it reviewed properly? Did you display it properly? Had it run serially? Was it the wrong type for your neighborhood? Was the author exploited without any real merit? Did you overbuy on the book—or did you reorder too many?" A careful consideration of such questions as these go a long way toward eliminating the possibility of making the same mistake again. Public taste is as uncertain and changeable as the weather. So the good book buyer, like the good sailor, must be prepared on short notice to trim his sails to catch the shifting breeze, or to change his course completely on occasion. This element of uncertainty is what adds zest to the bookselling business and makes of it the attractive venture so many have found it.

Book Buying for Branch Libraries

Branch Librarians in St. Louis Enjoy a Larger Degree of Independence in Book Selection Than in Most Public Libraries

By Arthur E. Bostwick

Librarian, St. Louis Public Library, Mo.

BOOK BUYING for branch libraries is simply one phase of the general problem of branch coordination, which seems to be perennial. Over thirty years ago I wrote for THE LIBRARY JOURNAL what I believe to have been the first article on this subject of coordination, and the conclusions then expressed I believe to be still true, namely, that systems of branch libraries might be arranged in order according to the degree of independence that is given to those in charge. At one end would be the system where an assistant, who is there simply to carry out the orders of the chief librarian, is the head of a branch library; at the other end is the one

where there is the very largest degree of independence. Of course, there are some things that must necessarily be done in the same way at all branch libraries, but experience has brought me to the conclusion that these are very few indeed and are largely matters of routine. Accordingly, my own library would be at the end of the scale where a large degree of independence is the rule; in fact, I do not at present recall any library in the United States where such independence is enjoyed by branch libraries to a large degree.

In the selection and purchase of books, the latter, of course, must be done from a central

point. It would be difficult, and I think useless, for every branch library to order and receive books like a separate institution. The selection of books, however, is a different thing. Here we may discriminate between the original selection of a book stock for a new library and the current selection of books from that time onward.

We need very much a suggested list of books for the original stock of a branch library. Lists like the A. L. A. Catalog cannot be used for this purpose since they are intended for a main library, although that main library may be the only one in a town. It is often absolutely necessary that there should be one copy of a certain book in a town, although it may not be consulted more than once a year; but to purchase a separate copy of that book for each of ten branch libraries would be simply a waste of money. This is not an imaginary instance. It has occurred more than once. There are certain books that must be bought for the original stock of a branch. In the absence of any good list, most libraries with branch systems have compiled lists of their own. We have such a list in St. Louis, which includes about 2000 titles. The remainder of a stock of, say, 10,000 volumes would be selected with greater reference to the character of the community around the branch. Selections for current purchase must also be made with the same thing in view, and it is for this reason that the branch librarian should be given large independence in selection. If she is the proper person for her job, she knows a great deal better than anyone else exactly what ought to be bought for her particular locality. If she has not this competence, she ought to be displaced by some one who has. I do not see how any chief librarian could possibly have it for all localities in his jurisdiction. The only check that can properly be applied to the branch librarian is that of purchasing ability, presuming that the library is operated on the budget system, or what amounts to the same thing. The first thing that the librarian should do when he knows the size of his budget item for books is to make a subordinate budget of his own, expressing his intentions regarding the way in which this sum will be spent. This will be divided both topographically and to some extent by subject. In other words, each branch library will be allotted a certain share, and this will be divided at least into adult and juvenile sections—possibly even more in detail if the librarian wishes. The branch librarian will be informed and cautioned to keep within a weekly or at least quarterly proportion of her allowance. She should then be given a free rein.

To give her this independence means that she should have free access to the necessary

lists, at least *The Publishers' Weekly* and the best of the newspaper literary supplements. At the central library there will be dozens more which she may wish to look at occasionally, but we find here that the selections for the central library, which are made after scanning a large number of general and technical current lists, will generally give her all the information that she wants. In addition, a truckload of the books of the week is displayed at our weekly meetings of heads of departments and branch librarians. Occasionally it is found desirable to discuss some book or books at this meeting, but that is not on the regular agenda list for the meeting. Experience has led me to the conclusion that the formal review of books in a large meeting is waste of time. Reviews are prepared in advance, and, on the whole, are not as valuable as those already to be found in print. Another purpose of these meetings, as sometimes carried out, is to decide at once on the total number of copies of a popular book to be purchased for the whole branch system. This, of course, greatly simplifies the work of ordering, but I do not believe that it is a good plan. If a branch librarian is doubtful whether she wants two or four copies of a book, and knows that she is having her last chance, she will order four, of course, which may be twice as many as she needs.

All requests, of course, go from the branch librarian to the librarian before reaching the Order Department, and receive his approval. Branch librarians, and department heads also, are encouraged always to send in a much larger number of titles than can be purchased. The ones that cannot be bought form a waiting list, and this is arranged in the order of desirability, being revised at least once a week. It is very rare for the librarian to make any change in the recommendations of the heads of his branches. At present, the two cases where this occurs most often are school and college textbooks and books in foreign languages. Our policy at present is to purchase textbooks very sparingly, and chiefly in cases where they may be used for independent reading or study. With regard to our foreign collections, some of which are located exclusively at branches that are near the corresponding foreign colony, our policy is to make these representative of the literature of the language in question, and the librarian, therefore, does not approve requests for translations from other languages. For instance, we want our Lithuanian collection to be one of Lithuanian literature and not of French, German, Italian, and English novels translated into Lithuanian. Exception is made, of course, in favor of the great world authors—Shakespeare, Goethe, Dante, etc.

Duplicates with us are purchased with refer-

ence to the number of names on the waiting list, the intention being that there shall be no more than five persons for each title in non-fiction and no more than ten in fiction. The number of duplicates that is bought is, therefore, automatically fixed, although it may be departed from in one direction or the other if there is good reason for so doing.

Finally, the ultimate authority, here as else-

where, in book selection is a committee of the board. We find, however, that it is sufficient to report to this committee at its monthly meetings lists of orders that have already been placed, so that there is no delay. If the committee should disapprove any title, it is perfectly easy to arrange for its return, but in many years of experience here I have not known this to occur.

Some Problems of the Mid-West Library Bookbuyer

How Can a Library, Far Removed from Eastern Publishing Centers, Have the Most Popular of the New Books on its Shelves on the Date of Publication? This Article Discusses Such Problems.

By Forrest Spaulding

Librarian, Des Moines Public Library

AS THE LIBRARIAN of a not unimportant city in the heart of the Middle Western corn belt, I have almost come to the conclusion that the views of Senator Grundy on the relative importance of the East and the Middle West are shared by the majority of publishers. Certain it is that the problems confronting the librarian far removed from eastern publishing centers in the selection and acquisition of new books are many and perhaps not entirely appreciated by their eastern colleagues.

In common with a few but not all of the public libraries in this section, the Des Moines Public Library has for some years past made every effort to have the more popular of the new books on its shelves on the date of publication or within two or three days thereafter. No policy that the library has adopted has resulted in so many favorable comments from its patrons and in the opinion of the library staff nothing has helped as much in their relations with the public. The reasons why the discriminating patrons of the library appreciate being able to get new books while they are still new are obvious. The advantages to the library, are three-fold:

1. Reserves on a popular book are spread over a longer period.
2. Inquiries about new books from those who follow the book-reviewing newspapers or magazines can be answered in much less time and with much less searching through records if the book is in the library and listed in the library's catalog.
3. The critical attitude toward the public library of those who used to obtain the newer books from the circulating libraries is no longer found.

To these three advantages might well be added a fourth; that of simplifying the process of book selection. Those charged with book selection in the Des Moines Public Library have divided the process into two parts, each part representing an entirely different group of books and each part handled in an entirely different manner. The careful selection of books, the weighing of one title against another to determine the relative value of each as a permanent part of the library's collection is still pursued, but in this type of book selection time is not the most important factor. Books in this group are mainly those selected for their permanent worth several weeks after publication and sometimes after they have been in circulation since their first acquisition by the other process of selecting current popular stock.

The other side of book selection, which is really not book selection at all, but the choosing and buying of stock to keep up with current demand, takes care of the ordering, generally several weeks or even months before publication, of books, the popularity of which is practically certain. It is more like the buying of books by the bookseller than any other library process. Done when only incomplete information about the book is available, mistakes are necessarily made but these are outweighed by the advantages of having books on the library's shelves while new. In buying a single copy of a novel by an unknown author the risk of only two dollars is involved. On the other hand an advance order for twenty-five copies of *Dodsworth* or a new novel by Temple Bailey or Zane Grey is hardly on a par with gambling on the stock market.

The travelers, representing about forty of the leading publishers, stop in Des Moines from two to six times yearly and with few exceptions make it a point to call upon the library as the largest book buyer in the city. The few exceptions are due, as nearly as can be ascertained, to instructions which the traveler receives from the sales manager. These are sometimes laughable. One traveler stayed away from us for years because his firm had been told by some one librarian that public libraries were not interested in their particular line. Another called up over the telephone to say that he was in town but could not call because library business was going to be handled by a different method through a separate department. In the latter instance, we have waited over two years for a call from the special library representative.

The travelers who call at the library are assured of a warm and enthusiastic welcome. Seldom is anything else so important that it interferes with granting an almost immediate audience to the man with books to sell. The assistant librarian, and several of the department heads as well as one of the desk assistants are called in and the fun of going over the advance line of dummies, proofs, jackets and what not begins. It is quite a long, drawn-out affair punctuated by much gossip about books and their authors, all of which is passed on to the members of the staff who deal with the public. We soon get to know the individual travelers and to rely on the judgment of most of them who have learned about our problems and advise us accordingly. If there were fewer changes in the personnel of the travelers, I believe that larger book orders would result.

Due to local conditions orders for new books chosen are placed through local book stores which offer the same discounts as publishers or jobbers with the added advantage that the books are delivered to the library without extra transportation charges. The book stores appreciate this business as it adds to their volume of sales and many times enables them to secure better discounts from the publishers than would be obtainable for their regular orders.

The first difficulty encountered in following this system is in keeping track of publication dates. Many publishers announce in advance only the approximate month of publication, others announce the exact date but frequently change it. A calendar of publication dates is kept in the Order Department and the Catalog Department, dates being taken not only from publishers' catalogs and announcements but from the advertisements in the *Publishers' Weekly*, the calendar in the *Retail Bookseller*

and other sources. If we are so fortunate as to secure our copies of a much advertised book a week or two before its scheduled date of publication, it is made ready for circulation and held for release on the exact date. Book stores, however, sometimes with intent and sometimes because they lack the exact information, often have the books on their counters in advance of publication and it is difficult for the library assistant to explain to a patron that a book he has seen on the counter of So and So's Department Store is not yet published. Then, too, some of the book review journals, particularly the *New York Times Book Review*, frequently print extended reviews of books some time in advance of publication with no mention of publication dates. The day after such a review appears, we are almost certain to have calls for the book.

More and more the publication of a book is being considered as interesting and important news. No doubt the advertising manager of a New York publishing house is much pleased when one of the New York papers carries a front-page story about a book his firm is publishing on that day. The book stores in the eastern centers of population have the stocks all ready and immediate sales result, but in these days news travels fast and the same story, via Associated Press wires, is published simultaneously in Des Moines. I have known instances where copies of an important book thus heralded by the newspaper have not been available either in the book stores or the library for a period of two or three weeks after the news story was carried in local papers.

Whenever I have talked to publishers or their representatives about these difficulties encountered in book buying in the Middle West they have cheerfully pleaded guilty but have passed the blame on to the author, the manufacturer or someone not then available to answer the complaint. And yet some publishing houses, notably some of the younger ones, unknown ten years ago, do manage to adhere to announced publication dates, with rare exceptions, and also manage to have the stocks distributed so that the book is on sale simultaneously in all parts of the country. Recognizing that there must necessarily be some exceptions when the publication of books is rushed to meet an unforeseen demand, it still seems to me that a little more careful planning might make it possible in many more instances to effect the nation-wide distribution of books previous to the announced dates. For years the *Saturday Evening Post* has been on sale each Thursday morning in the smallest towns as well as in the largest cities. Why cannot the same thing be done with most books?

If every publisher would revise his mailing list and maintain a separate list of libraries which make a point of getting books to their readers on time, I am confident that a sufficient sum could be saved by cutting out the many and duplicate announcements which do not interest librarians at all, except for the revenue derived from the sale of waste paper after the waste baskets are emptied, to publish special library bulletins at regular intervals. Such a bulletin should contain:

1. Announcements of new books forthcoming, with trade information as complete as possible in advance of publication and perhaps a brief note as to the contents.
2. A calendar arranged by date listing all books to be published up to the date of the next bulletin to be issued. This should include any known change in publication dates to enable the librarian to correct records previously made.
3. General news about books previously announced, such as changed titles, deferred publication because of book club selection or for other reasons, and news about the activities of the house, changes in the personnel of the travelers, etc., in which library buyers might be interested.

Some publishers may reply that they already issue such a bulletin. The Macmillan Company, for instance, has for years published a weekly list such as is described in paragraph one. This would be far more valuable, if it were received before instead of after the books were published. Other publishers have lately been sending calendars of their forthcoming publications and these have been most useful. If the publisher who believes that sales to libraries are worth while could see the amount of circulars and other second-class mail which comes to the library on every business day and check the number of duplicate catalogs and announcements from his own house which take

time in sorting even though they go directly to the waste basket, I believe he would be convinced that it would be good business to make some special provision to give the library buyer the sort of news and information he likes. To the publisher who claims that the presence of a book in the library hinders sales, I can only recommend a personal investigation of the sales of some titles that the library is actively pushing through its bulletins and publicity. Book-buyers in Des Moines use library announcements as a guide to buying. Every new book added to the library is announced in a news story printed twice each week in an evening paper. A particular book of wide, general interest or an unusual book treating of a special subject is chosen for the "lead" in these stories and more frequently than not, the story carries an eight-column headline. Every week at a stated time new books are reviewed over the radio and every month the library's own publication, "Book Marks," carries a selected list of the new books of greatest importance. The newspaper referred to has a large circulation throughout the State as well as in the city. The radio reviews reach an audience as yet uncounted, though we have letters to prove that they are followed by interested listeners in towns as far away as South Texas.

Following the meeting of the Lending Section of the American Library Association at Washington last June, Mr. Whitney Darrow of Charles Scribner's Sons, speaking to the librarians assembled, announced that he would call a conference of representatives of some of the larger libraries and publishers to discuss these problems of library book-buying. Thus far I have heard of no such conference, but if one is held I make a plea for some consideration of the problems of the Middle West library buyers which may not be recognized by the librarians in and near the eastern publishing centers.

A New Intermediate Department

By Clara Whitehill Hunt

Superintendent of the Children's Department, Brooklyn Public Library, N. Y.

A corner of the Intermediate Department of the Brownsville Children's Branch, Brooklyn, N. Y.

FIFTEEN years ago last September the Brownsville Children's Branch of the Brooklyn Public Library opened its doors to the children who had been patiently standing for hours on a line extending the length of the block. The library authorities, in opening this branch, were not inaugurating a policy, for Brooklyn, of making a wide separation of adults and children. They were merely bowing to the necessity of dividing the crowds that were bound to swarm into *any* library building in Brownsville, a district almost entirely Jewish. The first Brownsville Branch had been overcrowded from the day it was opened. When a second building was contemplated the only method of relieving congestion which seemed free from serious complications was that of sending the children under high school age to one, and everyone above the grammar grades to the other library.

A volume might be written about the rich

experiences of the fifteen years in the Children's Branch, but the occasion for the present news item is the beginning of new experiences under the same roof, due to the opening of the long-wished-for Intermediate Department.

On the third floor of the Children's Branch were four club or story hour rooms. Two of the largest of these could be made into one by opening the sliding doors between them. These two rooms, by careful planning, have been converted into a department for high school pupils, and the results have surprised us all. The rooms, far from seeming a makeshift, are so convenient and so pretty that one would suppose they had been intended for an Intermediate Department from the time the floor plans were made. Leaded glass casement windows opening out, framed by waving ivy and lit up by orange-colored side curtains, give a sunny and homelike effect. The city fathers granted

an appropriation covering the alterations and furniture and making possible a staff of trained children's librarians almost adequate to our expected demand.

There are nearly 15,000 pupils in the junior and senior high schools of the district. Of course, we have not books enough for all these children, but we have made a beginning. Selecting the books for the shelves offered, and will continue to offer, an interesting problem.

One of the things we found on consulting all the high school and "teens" lists we could lay hands upon was that the range of different titles recommended in these many lists was altogether too narrow for a library which had no large "adult department" to draw upon. It will be an interesting task for the staff to work upon the making of a long "approved list" for "teens"

which the young people will really use and like.

The new department was opened without any ceremony in August.

The average home circulation per month for the first three months has been over 7400. The reference room has kept two assistants busy much of the time. The members of the staff are enthusiastic in their tribute to the work of the high school teachers of the district. There has been no discipline problem. (Perhaps I'd better knock on wood!) The boys and girls are courteous, serious, businesslike, apparently quite above the childishness of attempting to play in a library.

On November seven the staff took occasion to express their appreciation of the teachers' influence by inviting the principals and department heads of the neighboring high schools to inspect the new department and drink afternoon tea with them in the pretty staff room. A delightful group of teachers responded, and the enthusiasm they expressed for

Showing the two rooms converted into the Intermediate Department

the new department was inspiring to the librarians who are working with the young people of the district.

A South African Library Opportunity

By Milton J. Ferguson

Librarian, California State Library

THIS CALL is not directed to those venture-some young librarians—all girls—who have asked me for a map of South Africa, and a key to a library position therein. Unfortunately for the realization of their ambitions to travel in far countries, library development south of the equator seems to be making slow progress. There is, however, little question that South Africa is alive to the needs of a modern system of book distribution, and will keep pressing the matter with reasonable insistence. No, this note is about a job which can be done from our own fireside.

Probably the most urgent demand for books in South Africa comes from the colleges. And among the schools of higher grades the most desperately book poor of them all was the University of the Witwatersrand, at Johannesburg.

It is a state institution, occupies a commanding position overlooking the "city of gold," and has some splendid buildings well equipped; but it has no library—not even a library building—and, until Nov. 1, 1929, no librarian. Now the university has a librarian in the person of Mr. Percy Freer, who has just resigned his post as assistant librarian of the South African Public Library at Cape Town and has taken up his new duties. It still lacks a library.

One of the schools at Witwatersrand which was unbelievably handicapped through lack of books was that of medicine. Here was a faculty laboring to prepare doctors to take care of the health of the people, men and women who would be charged with a high public responsibility, and yet these students were cut off in large part from the records of the experi-

ments and discoveries of the physicians of the world. The need was so urgent that a recommendation was immediately made to the Carnegie Corporation of New York for a grant to the Witwatersrand University of \$25,000 to be spent in building up a medical library. Only one condition was attached thereto, namely, that a trained librarian be appointed, not merely to be in charge of the medical collection, but to be university librarian.

Mr. Freer is hard at work. He has some money to spend for medical books, but not enough to permit him to be the least bit reckless. In America I am of the opinion there is much material which is not working but which if transplanted to Johannesburg would begin a

new life of usefulness. For example, somewhere there may be a set of the *U. S. Surgeon-General's Catalogue*, which Mr. Freer would find invaluable. Possibly there are files of American medical journals cluttering up the basement of our libraries; if they could be given to Mr. Freer he would put them to work.

My earnest request, therefore, is that in a spirit of professional helpfulness we American librarians extend hands across the sea. If any reader of this appeal can help, he is requested to send a memorandum of his offerings to Percy Freer, Librarian, Witwatersrand University, Johannesburg, South Africa. It would be inadvisable to ship anything without finding out whether it is desired.

An International Library

THE LEAGUE OF NATIONS Library in Geneva represents one of the most interesting and unusual international collections of books in the world. This library contains approximately 95,000 volumes. These divide up into three classes of material: (1) Books and pamphlets; (2) official government documents including all published statistics and official journals; (3) periodicals and daily papers (a complete collection of the outstanding judicial, economic, financial, political and social publications). Besides these, there is also a collection of reference books—encyclopedias, dictionaries, year books and special informative handbooks in every language. The archives which contain all documents published

by the League Secretariat and the International Labor Office are open to the general public.

The main object of the library is to serve the Secretariat and the Committees of the League of Nations. But the library is also at the disposal of outside readers who intend serious research.

The Brussels classifying system (known as the *Bibliographie de Bruxelles*) is used in the arrangement of the volumes on the shelves. An

alphabetical catalog classifies (1) authors, (2) subjects, (3) titles. There is also a catalog which reproduces the arrangement of the books on the shelves.

To Miss Florence Wilson, an American woman, goes much of the credit for the assembling and arrangement of this excellent library. She was the Chief Librarian for the

first seven years of the League of Nations from 1920 to 1927. Since that date Dr. T. P. Sevensma of Holland has been the Chief Librarian. Doctor Sevensma is known for having built up and reorganized the public library of Amsterdam, and later was director of the University Library in that city. He visited the United States in April, 1928,

making an inspection of our libraries.

At present the library is housed in the Palais des Nations, the office of the Secretariat, in Geneva. The new library building, which will be included in the group of League buildings now under construction, has been given by Mr. Rockefeller and will be known as the Rockefeller Library. This new building will probably be ready for use in five or six years, with a capacity for a million volumes.

The Library in the Secretariat of the League of Nations at Geneva

The Library Situation in British Columbia

By Norman Fergus Black

Chairman, British Columbia Library Commission

FROM MANY PARTS of Canada and the United States, and indeed from still further afield, I am continually in receipt of inquiries regarding the Library Survey launched by British Columbia Public Library Commission early in 1927, and I am, therefore, glad to accept the invitation of *THE LIBRARY JOURNAL* to sketch the library situation, at present existing in British Columbia, and some of our hopes and plans for the improvement of library service. It will be unnecessary to go into great detail as at long last the report of the Survey is just off the press, and copies of that document, so long as the limited supply holds out, will be freely available to all who make application for them.

To understand the library problems of British Columbia, it is necessary to bear in mind certain geographical facts. For example, British Columbia exceeds by more than the area of the Kingdom of Holland the combined areas of Illinois, Indiana, Ohio, Connecticut, Rhode Island, New Jersey, Delaware, Maryland, Virginia, West Virginia, Kentucky and North Carolina. From the libraries operated in the northwestern corner of British Columbia to those in its southeastern regions is a distance greater, as the crow flies, than from Chicago to Houston, Texas.

In this stupendous area there is a population of slightly less than 600,000 people. The majority are resident in the southern fringe of the Province and notably in the southwestern corner, where are situated our only two considerable cities—Vancouver, the commercial metropolis of Western Canada, and Victoria, the provincial capital, the latter being on Vancouver Island. But while so large a proportion of the people of British Columbia live within or adjacent to these metropolitan areas, the existence of approximately 800 postoffices in the Province shows that the people to be reached by any adequate provincial system of library service are scattered over almost every section of our enormous domain.

One hundred and twenty of these postoffices can be reached only by water. Our coastline is bewilderingly irregular, fringed with archipelagos and pierced by many fjords similar to but more extensive than those of Norway. Ignoring smaller islands and bays, which would double the figures, we have a coastline of some 7000 miles. Along it there were last year in operation 1126 tidewater lumber camps, besides very numerous fishing stations, cannery

depots, lighthouses and other tiny frontier settlements, all deeply in need of library service. Together with all these one must bear in mind a great number of mining, lumbering, agricultural, fruit-growing and distributing centers scattered through the interior.

We have no counties in British Columbia. Apart from urban municipalities there are a number of rural municipal districts strikingly various in extent and population, but less than one per cent of the area of British Columbia is administered under local municipal institutions. To meet such conditions, provision must be made for locally controlled and supported library service in the more populous areas and for a very high degree of centralization in the maintenance of library facilities in the other parts of the Province.

An overwhelming majority of the people of British Columbia are native-born Canadians or hail from the British Isles. The school system of the Province is probably among the most efficient in America. Illiteracy is remarkably rare. The demand for books is consequently universal.

There are municipal public libraries in a handful of our larger cities, and scattered over the Province there are public library associations, incorporated and operating under the terms of the Public Libraries Act, for the provision of library facilities in communities not yet ready to maintain such service by public taxation. When the present Libraries Act was passed a decade ago, it was hoped that library associations would soon pave the way for real municipal libraries, but experience has not vindicated these hopes. It is the melancholy fact that, upon the whole, the older public library associations are the weaker. The local book collections are, in most cases, necessarily small; needed supervision by expert librarians is generally lacking; the maintenance of a steady supply of new books is practically impossible; too great a burden is placed on local leadership and initiative; there is no adequate provision for convenient and systematic inter-library exchange; and the financial basis is inadequate and precarious.

In our efforts to remedy this situation we are seeking legislation that will make possible the creation of large area union library districts within which there will be a locally maintained service conducted along county library lines. The Commission will probably be empowered to define provisional union library districts con-

sisting of a considerable number of rural municipal districts and other municipalities and of the municipally unorganized territory adjacent. The aim will be thus to secure a natural unit conveniently adapted to library administration. A Provincial Director of Libraries will conduct field work in these provisional union library districts, explaining possible methods of cooperation for the securing of book service comparable in efficiency to that enjoyed where good county library systems are in operation. He will act as a liaison officer, facilitating negotiations among the local taxing bodies included within the provisional union library district, and when an agreement has been reached as to plans for cooperative support and management, it is expected that under authority of a provincial order-in-council, setting forth the plans already tentatively agreed upon, a referendum will be held throughout the provisional union library district. If a majority of the votes cast in each local taxing unit within the provisional union library district indorses the project, or if it be indorsed by three-fifths of the total number of electors voting in the provisional union library district as a whole, it will become an actual union library district—for library purposes a county. This is the most novel feature of the new library system that we are looking for as fruit of the recent survey.

The Public Library Commission will continue to operate as at present, but, we hope, with increasing efficiency, a kind of mail order reference library service, available in all parts of British Columbia, to readers who are willing to pay return postage on the books loaned. The "Open Shelf," as our reference library is called, now consists of something more than 10,000 very carefully selected volumes, and is supplemented at need from the shelves of the Legislative Library with its 135,000 volumes. The popularity of the "Open Shelf" is growing month by month. However, the publicity methods that have been followed to date are obviously quite inadequate, and relatively few people know of the library privileges already available to them.

A large number of more general readers are served through traveling libraries, which are also administered by the Public Library Commission. In September, 1929, for example, we sent out 106 cases of books averaging about 75 volumes each. Fifty of these traveling libraries went to rural schools. The book stock of our traveling libraries last year was 37,600, and 365 libraries were lent to 263 different communities.

We hope that the time is not too far distant when it will be possible to establish distributing depots in the less populous areas of

the northern and eastern sections of British Columbia, so that the traveling library system, upon which there must be general dependence in many places for long years to come, may, to the maximum possible extent, approach in methods and efficiency the ideals rendered familiar by successful county library systems.

It is a matter of very keen regret to the writer that at present the necessary funds are not available to permit the use of a railway car for the special benefit of the numerous railway hamlets back of which lies no settled hinterland. After long negotiations, the writer had the pleasure of inducing the authorities of the Canadian Pacific Railway to offer a car and free transportation, if the Commission would provide books and librarian. It had been hoped that in launching this scheme British Columbia might be assisted by the Carnegie Corporation, but for the present at least developments in that direction are suspended.

In like manner we plan the operation of one or more library boats for the benefit of isolated seacoast communities, but the realization of these dreams is still for the future.

Through the generosity of the Carnegie Corporation we hope, however, to be able to launch early in 1930 a demonstration of the methods and organization suitable for union library districts of the type discussed above. A grant of \$100,000 will finance this demonstration for a period of five years and leave a margin for the strengthening of our headquarters staff and equipment.

The Library Survey made it plain to all that the existing school library system needs serious overhauling. It will be the policy of the Commission to link up the school libraries with the general library service of the community. In the self-supporting library districts it is hoped that all schools will become book deposit stations, enjoying frequent and regular exchanges, and in unorganized areas it is intended systematically to develop the present policy of supplying traveling libraries to schools, to supplement the book resources that are the permanent property of the school district.

The scope of British Columbia Library Survey was exceedingly broad. A factual basis for library policies was secured through the labors of a Research Board, consisting of the three members of the Library Commission and seven other persons, six of them being professional librarians in active service in British Columbia. The Research Board served without remuneration, and its reports were published from time to time in a series of bulletins that were broadcast over the Province.

The recommendations of the Survey are, however, not offered in the name of the Re-

search Board, but are the findings of British Columbia Survey Council. This is a large committee of outstanding citizens who have acted as a lay jury for the consideration of facts and proposals brought to their attention and for the framing of provisional library policies suited to the needs and conditions of British Columbia and likely to be supported by public opinion.

Thanks again to the generosity of Carnegie Corporation there was associated with the Research Board and the Survey Council, in the capacity of Survey Expert and confidential ad-

viser, C. B. Lester, Secretary of the Free Libraries Commission, Madison, Wis. It goes without saying that the findings of the Survey Council reflect the mature opinions of this distinguished authority, who inspired confidence and made friends wherever he went in British Columbia. The rest of the acts of the champions of library extension in British Columbia and the reports of the facts which they discovered and of the proposals offered for the guidance of the powers that be, are they not written in the book of the *Report of British Columbia Library Survey, 1927-1928*?

A Glimpse Backward

By Myra Poland

Librarian, Osterhout Free Library, Wilkes-Barre, Pa.

SOME OF THE CHANGES that sixty-five years have made in libraries are rather interestingly illustrated in a pamphlet recently received at the Osterhout Free Library, Wilkes-Barre, Pa. It is a catalog, printed in 1864, of the Wyoming Athenæum. This was a subscription library started in 1839.

The list of books is interesting for its omissions as well as for the number and character of those included. The classification strikes us as unusual, at least from a modern point of view. One wonders a little at seeing the *Autocrat of the Breakfast Table* put under moral philosophy along with Dick's *Christian Philosophy* in two volumes and Wayland's *Human Responsibility*. The arts and manufactures are in one list, but one wishes that the cataloger had indicated to which of the two *Tactics and Regulations for the Militia* belongs. And then *Necromancers* by Godwin, did he consider it an art or a manufacture? *The Scarlet Letter* seems to have been rather a puzzler, because we find it with the letters and correspondence and also in miscellaneous, but not among the novels, and nowhere is the author's name given. Whether this was because it was not known or because it was not considered important enough is doubtful. Perhaps the latter as *The House of the Seven Gables*, *Snow Image* and *Twice Told Tales* are all with the novels, but Hawthorne's name does not appear.

The miscellaneous list seems to have been where the cataloger really enjoyed himself and polished off his work in short order. How delightful to throw *Ireland Vindicated*, *Characteristics of Women*, Abercrombie on *Moral Feeling*, *Home Life in Germany* with the *Writings of George Washington* and call them miscellany. Why do we worry over decimal points?

The arrangement of the books on the shelves

is indicated by the letters of the alphabet, but why a book is put on A, L or X shelf is equally puzzling. The letter A, for instance, includes twenty novels, *The Dictionary of Congressmen*, *Doctor Franklin's Works*, Howitt's *Visits to Remarkable Places*, Locke's *Essay on Human Understanding* and a number of others—so it was not contents.

According to the printed rules the librarian's duties were not arduous. He was to "attend at the Library (by himself or someone for whose conduct he shall be responsible) every Saturday afternoon between the hours of two and six o'clock, for the purpose of delivering and receiving books." One can only hope he was not paid by the hour, or if he was that he did not have to live on his salary.

And he probably had his own troubles in connection with the levying of fines and forfeitures. For each week, or portion of a week, the penalty was "of a folio 18¢., of a quarto 12¢., of an octavo or less size 6¢." There is much chance here for argument as to which class a certain volume belongs. Only a decisive voice or the tape measure would decide it.

It would be interesting to know the circulation, but no report has been found and it is doubtful if the figures were kept.

Wilkes-Barre in 1864 had a population of about 4600. Dollars were not very plentiful at the close of the Civil War, and a library of five hundred books open four hours a week indicated a real desire for reading. It was because this desire was so clearly shown that Mr. Isaac S. Osterhout left the greater part of his property as an endowment for a free library to the people of Wilkes-Barre. Today the library has a collection of 75,422 volumes; and is open sixty-six hours a week.

THE LIBRARY JOURNAL

January 1, 1930

Editorial Forum

THE new year 1930, quickened into renewal of prosperity by the wise action of President Hoover in obtaining nation-wide cooperation without recourse to socialism, promises to be especially interesting in library building. The Board of Estimate of the City of New York has appropriated a million dollars toward the central building of the Brooklyn Public Library system, though unfortunately not for the completion of the west wing, so nearly ready for occupancy, but to prepare the general foundation, and the building program of the city should include a substantial sum for library branches in the several boroughs where most needed. The greatest need is doubtless in the Borough of Brooklyn, which has been growing apace in recent years, and where eleven new branches, in addition to its existing thirty-one, have been carefully planned within reasonable distance of each other to accommodate sections where a circulation of 200,000 each is probable. Queens Borough, which opened its new central library building last year, regrettably omitted from the roster of library buildings in our last issue of the old year, is also extending rapidly in library demands, and will ask for six new branches in addition to the eighteen existing. This is also true of Bronx Borough, served by the New York Public Library, though the "tight little island," now Manhattan Borough, is pretty well supplied with branches, the New York Public Library having now forty-five branches in the three boroughs which it covers, Richmond (Staten Island) being the third. Rochester, N. Y., which is one of the cities of the second rank that has developed a branch system without an adequate central library building, enters a new phase with the probable consolidation of the Reynolds Library with the Public Library system, and it is expected that a central library building worthy of that city will presently be provided for by the city itself adding to the \$900,000 already in hand. In a recent estimate of the cultural relations of a city, a leading New England daily pointed out that the library was one of the chief indexes of a city's posi-

tion in culture, and it has been suggested that Worcester, Mass., needs a new library building to keep up the library's reputation won for it so long ago by Samuel Swett Green, whose memory is still cherished by A. L. A. pioneers. Cincinnati, which was well on the way toward a central library building, has suffered a temporary setback through legal complications, but it is to be hoped that within the year definite prospects for its central library building, replacing the archaic one still in use, will dawn. It is a good time for libraries throughout the country which need new central buildings or additional branches to make their wants felt and impress upon their local communities the opportunity which such buildings afford both to prevent unemployment and to make their cities better places to live in.

* * *

BOOK BUYING for libraries is at once a science and an art, for on the good judgment displayed is based the success of any library. The problems of the library and the bookstore are at once alike and different, as Miss Emma Baldwin points out from her experience in both fields in the paper printed elsewhere. The fact that librarians do not have to stand the commercial test which booksellers must consider is at once a benefit and a danger, and there is an element of trusteeship to be faced in the use of public moneys which makes the librarian's task peculiarly crucial. The librarian, as has been pointed out, must meet two classes of demand, that of the general public who read a book many times and give it circulation that counts and the individual scholar whose need of a book is qualitatively greater though it must rest on the shelves, untouched, for months or years. Aids in book selection are now so many and manifold as to make the librarian's task at once easier and more difficult, but out of the multiplicity of good advice, often confusing, must come the wise choice which makes a library or the careless buying which un-makes it.

* * *

PERHAPS stimulated by the practice in America, where the theory of net prices has not been without exceptions, the English librarians have long pressed for discounts on their book purchases, as against the settled practice of the English book-trade not to make such allowances to libraries. An arrangement has now, however, been made which allows 5 per cent, and in the case of purchases of over £500 per year 10 per cent on list prices for books purchased by libraries, these discounts to be available not in money reduction, but in additional books. The new arrangement as to libraries has assumed definite contractual shape

in an agreement between the publishers', book-sellers' and library associations, respectively. Whether this breaking down of the old bulwarks will result in larger discounts and possibly increase all prices to meet them is a matter as to which the future must tell.

* * *

LIBRARIANS complain that obscure publishers and authors are increasingly sending unsolicited books with the request that they be considered for purchase. Occasionally return postage accompanies the package—more often not. In either case, the handling of such material is burdensome, as the books are seldom worth buying. Some libraries use a form to the following effect: "We regret that we do not wish to buy . . . , which has been received without our solicitation. The volume will be delivered to an accredited messenger, or it will be returned by express on receipt of 25c. to cover the cost of handling and wrapping. The volume will be disposed of if no reply is received within thirty days." If libraries in general refuse to allow themselves to be imposed on in this matter, they will discourage a growing, though minor, nuisance. H. C. W.

* * *

NOWHERE is the library problem of the future more interesting than in that part of America which forms the western province of our sister nation Canada, with less than a million people scattered through thousands of square miles, in a territory larger than a group of our States and a population localized in two splendid cities but otherwise scattered sparsely through hundreds of small settlements. It is a compliment to our own library system that one of its leading representatives, from the library state of Wisconsin, was selected to make the survey which the chairman of the British Columbia Library Commission is good enough to summarize in this issue of *THE LIBRARY JOURNAL*, and the Carnegie Corporation is to be heartily thanked by all interested in libraries for making possible this survey as well as that recently reported upon by Librarian Ferguson of California in collaboration with Glasgow's librarian, Mr. Pitt. All this indicates a practical internationalism peculiarly creditable to the library profession and emphasizes the worldwide nature of the field in which our American Library Association has been the advance guard of progress. Librarians on this side of the border may well watch with especial interest the development which British Columbia will make within the next generation.

Library Chat

Contributions Welcome

IT WAS the night of Jan. 14, 1917, and Mr. and Mrs. Lev. Davidovich Trotsky, exiles from Tsardom, had crossed on the little Spanish steamer *Montserrat* to live with relatives in The Bronx. To The Bronx their friend Nicolai Ivanovich Bukharin, who had just been expelled from Scandinavia, took them, but although the hour was late and the Trotskys fatigued from the journey, he insisted on taking them to see the New York Public Library. It was his gold mine, the dingy Golconda from which he was digging material for tome after ponderous tome, his monumental works on *Capitalism and Communism*, *The Economic Theory of the Leisure Class* and *Historical Materialism; a System of Sociology*.

* * *

OUR favorite library story for some time will be the remark of Dr. Andrew Keogh, Yale's librarian, after a series of particularly long conferences on nice architectural decisions: "I have one more suggestion for the building," he said, "that over the main entrance shall be the inscription, 'The Library is On the Inside.'"

* * *

A FEW years ago Christopher Morley attended a meeting of the N. Y. L. A. and was attracted by the fact that the initials of the association—Nyla—might be used as a girl's name. Accordingly, when he produced his drama, "Pleased to Meet You," he christened his heroine Nyla. It so happened that a lady who attended one of the performances was much pleased with the euphonious name of the lovely leading lady. Accordingly, when her own child was born some months afterward, she christened her Nyla Jean, and now the New York Library Association has a living namesake.

* * *

THE FOLLOWING, noted on a Demco letter-head, is a challenge to the up-to-date librarian to advertise her wares. "Isn't it funny? A capable librarian friend of ours rises each morning from an advertised bed, throws back an advertised blanket, uses advertised soap, advertised toothpaste, advertised face cream and powder, dresses in advertised clothing, even to her shoes. She eats advertised food, drinks advertised coffee, puts on an advertised coat and hat and walks to work on her advertised shoes—and yet, due to a thousand and one details, she lets the patrons of her library pass by the most worthwhile books because she forgets to advertise them!"

Librarian Authors

MONICA SHANNON was born in a wooded town on a bay in eastern Canada, and soon after she was two years old her family moved to a ranch, a landloping ranch of twenty-two thousand acres in western Montana, where plains are halted by the Rocky Mountains.

Her father had a rather curious collection of books, and she remembers Gibbon's *Decline and Fall* in dazzling blue and Balzac and Lever in tall, somber volumes. As Miss Shannon and her brothers and sisters never saw the inside of a public library, they read *The Arabian Nights*, Dante's *Inferno* with Doré illustrations, *Taras Bulba*, *Hypatia*, Lord Chesterfield's *Letters to His Son*, and many other things they made no pretense of understanding.

Not being overly robust, Miss Shannon for some time had a teacher at home. He was an English church clergyman, and finally gave up the notion of teaching her arithmetic and settled down to read history and literature with her. The ranch timekeeper, an Englishman, trained a glossy filly to jump, and taught her to take fences, and when her oldest brother, Justin, was home from school they rode up over wet sledge rocks, their horses stumbling and slipping, to mountain tops.

When Miss Shannon entered the Los Angeles Public Library it seemed a very tight place to her, crowded as it was and crammed with, as she says, "inquisitive people." She found it distressful to be always with people, and to her it seemed the vibrant meaning of the work too often escaped in the stifling smoke of statistics. "But what is smoke among

friends?" says Miss Shannon. "And I found there friends as choice as the pomegranates I picked yesterday in my garden. Then, too, I did a good deal of mountain climbing on the side, once carrying a blanket strapped on my back on a fifteen-mile hike, not that the blanket was necessary save as a vagabonding gesture, which afforded me considerable pride."

In 1926 Miss Shannon's first book, *California Fairy Tales*, was published by Doubleday, Doran & Co. Spain and Ireland, America and Fairyland all join to make these fascinating tales. Her second book, *Eyes for the Dark*, was published in 1928 by the same publishers, and these stories grew in the Sierra Nevada Mountains in California. There are all sorts of queer, true things in these stories, the author

says. "'Why Witches Wear Red Flannel Petticoats' was written because an old woman here, well, Mrs. Trauger, ran a bear up a tree and tied her red flannel petticoat 'round the trunk, while she went home to get her gun. Any bear would rather die than go by a red flannel petticoat. Yet bears aren't afraid of the dark! . . . It's all true about Indian Bear Doctors, too, just as the stories say. Instead of Medicine Men, our Indians had Bear Doctors who could turn into a bear by swimming the Kaweah River, where it goes around a corner. And the Kaweah River goes around

a corner of this ranch and then runs right on through it. . . ."

Miss Shannon now lives on a mountain ranch in the foothills of the Sierra Nevada. She says: "We have nine baby pigs, five young calves, and in my higher moments I often believe we have as many oak trees as the King of England."

MONICA SHANNON

The January Forecast

A check list of books of general interest whose publication dates fall during the coming month

(Exact date of issue is given when known.)

Biography

- Aldington, Richard. ed. *The Love Letters of Mme. de Lespinasse*. Dial Press. \$5.
 Baugh, Hansell. ed. *Frances Newman's Letters*. Liveright (6th). \$3.
 Escholier, Raymond. *Victor Hugo*. Payson & Clarke (11th). \$5.
 Hosie, Lady. *Portrait of a Chinese Lady*. Morrow (30th). \$5.
 Stowell, F. M., and Dickinson, G. L. *Goethe and Faust*. Dial Press. \$3.50.

Fiction

- Anon. *Promise Not to Tell*. Liveright (6th). \$2.50.
 Burnett, W. R. *Iron Man*. Dial Press (2nd). \$2.50.
 Carberry, Jacob. *Gems of Love*. Payson & Clarke (18th). \$1.50.
 Chadwick, W. S. *Giants of the Forest*. Bobbs-Merrill. \$4.
 Channon, E. M. *The Chimney Murder*. Little, Brown (3rd). \$2.
 Fergusson, Harvey. *Footloose McGarnigal*. Knopf (3rd). \$2.50.
 Fletcher, J. S. *Borgia Cabinet*. Knopf. \$2.
 Goddard, Gloria. *These Lords' Descendants*. Stokes (23rd). \$2.50.
 Graham, Dorothy. *Candles in the Sun*. Stokes (16th). \$2.50.
 Gregg, Cecil Freeman. *The Body in the Safe*. Dial Press. \$2.
 Hamilton, Patrick. *The Midnight Bell*. Little, Brown (3rd). \$2.50.
 James, Norah C. *To the Valiant*. Morrow (2nd). \$2.50.
 Jones, Nard. *Oregon Detour*. Payson & Clarke (11th). \$2.50.
 Komroff, Manuel. *Coronet*. Coward-McCann (3rd). \$3.
 Luther, Mark Lee, and Ford, Lillian C. *Card 13*. Bobbs-Merrill.
 MacClure, Victor. *The Crying Pig Murder*. Morrow (30th). \$2.
 Mitchell, Gladys. *The Mystery of a Butcher's Shop*. Dial Press. \$2.
 Morrow, Honore Willsie. *Tiger! Tiger!* Morrow (30th). \$2.50.
 Myers, Isabel Briggs. *Murder Yet to Come*. Stokes (2nd). \$2.
 Oke, Richard. *Frolic Wind*. Payson & Clarke (11th). \$2.50.
 Pearson, D. A. G. *The Golden Stone*. Dutton (2nd). \$2.

- Redman, Ben Ray. *Down in Flames*. Payson & Clarke (18th). \$2.50.
 Reed, W. Maxwell. *The Earth for Sam*. (Juvenile.) Harcourt Brace. \$3.50.
 Salt, Sarah. *Joy is My Name*. Payson & Clarke (25th).
 Savage, Juanita. *The City of Desire*. Dial Press. \$2.
 Steen, Marguerite. *The Reluctant Madonna*. Stokes (23rd). \$2.50.
 Wallace, Edgar. *The Black*. Crime Club (10th). \$2.
 Walling, R. A. J. *The Man with the Squeaky Voice*. Morrow (2nd). \$2.
 Yates, Dornford. *Blood Royal*. Minton, Balch (2nd). \$2.

Miscellaneous Non-Fiction

- Bell, V. M., and Helser, M. D. *Essentials in the Selection of Meats*. Wiley (20th).
 Chamot, E. M., and Mason, C. W. *Handbook of Chemical Microscopy*. Wiley (2nd).
 Chase, Joseph Cummings. *An Artist Talks About Color*. Wiley (2nd).
 Ducasse, C. J. *The Philosophy of Art*. Dial Press. \$3.50.
 Dyott, Commander G. M. *Man Hunting in the Jungle*. Bobbs-Merrill. \$5.
 Eggleston, D. C. *Modern Accounting, Theory and Practice*. Wiley (15th).
 Ewen, C. L. L'Estrange. ed. *Witch Hunting and Witch Trials*. Dial Press. \$3.50.
 Fraser, W. J. *Dairy Farming*. Wiley (20th).
 Kuhlmann, J. H. *Design of Electrical Apparatus*. Wiley (20th).
 Naish and Clennell. *Select Methods of Metallurgical Analysis*. Wiley (15th).
 Prioleau, John. *The Open Road in England*. Morrow (2nd). \$2.50.
 Sharp, M. A. and W. M. *Principles of Farm Mechanics*. Wiley (10th).
 Spicer, Rev. William. *Going to College*. Stratford (15th). \$1.
 Sturges, Preston. *Strictly Dishonorable*. Liveright. \$2.
 Tozer, Basil. *Confidence Crooks and Black-mailers: Their Ways and Methods*. Stratford (15th). \$2.
 Walker, Lydia Le Baron. *Home-Craft Rugs*. Stokes (2nd). \$5.
 Ware, J. C. *Chemistry of the Colloidal State*. Wiley (15th).

Book News

Book Club Selections (for January)

AMERICAN BUSINESS BOOK LEAGUE

Walther Rathenau, by Count Harry Kessler. Harcourt Brace.

BOOK-OF-THE-MONTH CLUB

Iron Man, by W. R. Burnett. Dial Press.

BOOK LEAGUE OF AMERICA

Daughters of Eve, by Gamaliel Bradford. Houghton, Mifflin.

CATHOLIC BOOK CLUB

The Catholic Church and Current Literature, by George N. Shuster. Macmillan.

The Catholic Church and Art, by Ralph A. Cram. Macmillan.

(These two books are being issued together)

DETECTIVE STORY CLUB

Mystery of the Open Window, by Anthony Gilbert. Dodd, Mead.

JUNIOR LITERARY GUILD

The Earth for Sam (boys and girls 8-12), by W. Maxwell Reed. Harcourt-Brace.

Judy: A Story of Divine Corners (girls 12-16), by Faith Baldwin. Dodd Mead.

The Loot of the Flying Dragon (boys 12-16), by Kenneth Payson Kempton. Little, Brown.

LITERARY GUILD

Coronet, by Manuel Komroff. Coward-McCann.

Free

THE IOWA State College Library, Ames, Iowa, will give the following set free to any library willing to pay transportation charges:

Biographie universelle, ancienne et moderne . . . (A-SQ), v. 1-82, Paris, Michaud freres, 1811-42.

THE UNIVERSITY of Kansas Library has many odd numbers of *The Commercial and Financial Chronicle* from volume two to date. They will be gladly given to libraries sending want lists. Apply to C. M. Baker, Director of Libraries.

A Dutton Scholarship

ONE OF the interesting announcements that has come in from the Mid-Winter Sessions at Chicago is that of the new scholarship of \$1,000 offered by the publishers, E. P. Dutton & Co., toward a year of special training in children's library work. The award will be made annually by the Children's Librarians Section according to rules that will be announced more fully in the next issue of THE LIBRARY JOURNAL. The firm of Dutton & Co. has always taken especial interest in this field of publishing.

Best Sellers (from the Book Stores)

FICTION

Remarque. *All Quiet on the Western Front*. Little, Brown. \$2.50.

County Library Play Available

THE COMMITTEE on Library Extension of the American Library Association has reprinted the play "Why Not," by Harriet C. Long, in convenient leaflet form. Single copies will be sent free on application to the Executive Assistant in Library Extension.

Two Pamphlets on South African Libraries

Two pamphlets on "Libraries in the Union of South Africa, Rhodesia and Kenya Colony," one by S. A. Pitt and the other by Milton J. Ferguson, have been published by the Carnegie Corporation of New York and may be obtained by libraries without cost on application to the Corporation at 522 Fifth Avenue, New York. They report the visits of Mr. Ferguson and Mr. Pitt to the countries named in 1928.

The Open Round Table

D. C. Numbers on L. C. Cards

To the Editor of THE LIBRARY JOURNAL:

We had rather pay for revising and keeping the D. C. classification up to date than for adding D. C. numbers to the L. C. printed cards. The two classifications are not parallel. If they were, it would not be difficult to assign D. C. numbers from the L. C. numbers which are given. When the two classifications are kept equally up to date, then it will be practicable to print D. C. numbers on L. C. cards. Until that time, we are of the opinion that most librarians will wish to continue to make their own classification or to do their own guessing as to where recent material might be placed in the existing scheme.

JAMES R. GULLEDGE,
*Librarian, General Library, A. & M. College,
Mississippi.*

Motion Picture Available

To the Editor of THE LIBRARY JOURNAL:

A moving picture reel of 250 feet, amateur standard size, showing Scholarly Procedure in a Library is available for loan to other libraries from the University of Denver, Denver, Colo. Projector is Model A Kodascope, easily borrowed in any community.

The picture was taken on the campus and in the University Library, but the reel is adaptable for use in other places. Especially suitable for Freshman library courses in colleges or for high schools.

A small charge will be made to cover expenses. Any interested libraries please correspond with

LINDA M. CLATWORTHY,
Librarian, University of Denver.

Apply at Once!

To the Editor of THE LIBRARY JOURNAL:

Advanced students interested in the two Mrs. Frederick Kahn scholarships of \$500 each should apply at once to the Dean of the Graduate Division, University of California, Berkeley, for the application forms for these scholarships. They are open only to students registering in the School of Librarianship and are awarded only to those who can enroll in the second year as candidates for the master's degree. In the awarding of the scholarships no stress whatever is placed on the applicant being a graduate of a California school. The impor-

tant considerations are the completion of the first year in a graduate or senior undergraduate school which is a part of a university of recognized standing, high scholarship in this first year, and some successful experience, this latter being necessary because experience is now required for admission to candidacy for the master's degree here. While our first year prepares for all phases of library work and no stress is placed in any particular field, our second year facilities are so much better for the study of the university, college and school library work than for public library administration or such special fields as children's work that it is especially those interested in the former fields who should consider coming here.

Announcements and further information regarding courses may be obtained on application to Miss Edith M. Coulter, who will be acting director during the second semester of the current year, while the undersigned is on a six months' sabbatical leave now.

SYDNEY B. MITCHELL,
Director, School of Librarianship.

Work Students*

FOREIGN librarians who wish to have experience in American libraries may be aided by the Work Student movement. This is an important modification of the plan which allows foreign students to come to the United States to study in our colleges and universities despite the fact that the immigration quota may be exhausted.

Graduates of universities in several countries of Europe have been permitted to enter the United States upon non-quota visas, in order to secure employment in our industrial plants. These Work Students are carefully selected, because it is expected they will occupy executive or managerial positions in industrial plants at home. They study efficiency methods in industrial management, relations between the workers and managers, as well as scientific farming, financial and commercial methods.

The Bureau of Immigration grants the privilege of entering as a Work Student. The Bureau must receive assurance that the Work Students will be carefully selected, that there will be some agency in the United States to supervise their activities, and that upon the expiration of their period of visit, which may be from one to two years, they will be returned to their home country.

*Institute of International Education, Tenth Annual Report of the Director, Tenth Series, Bulletin No. 3, Oct. 1, 1929.

Book Selection on World Affairs, IV

The World Peace Foundation Mobilizes the Opinions of Experts
Throughout the United States

Modern European History

Fay, Sidney B. *Origins of the World War*. 2 v. (19 votes) Macmillan. 1928. \$9.

"This work scarcely needs comment. It is rapidly being accepted as the best study of international relations and diplomacy leading to the World War in any language."

Recommended as Advanced by Bell, Binkley, Carroll, Dunham, Eckhardt, Ellery, Farrell, Fay, Fittro, Hall, Lee, Logan, Marsh, McKinley, Newhall, Packard, Slosson, St. John, Tschan.

Moon, Parker T. *Imperialism and World Politics*. (15 votes) Macmillan. 1926. \$3.50.

"An interesting and able analysis of imperialism as a force in shaping world events. It deals with a live problem."

Recommended as Advanced by Eckhardt, Ellery, Farrell, Hall, Newhall, St. John; as Intermediate by Carroll, Fittro, Packard, Riker, Slosson, Tschan; as Elementary by Binkley, Marsh.

Gooch, G. P. *History of Modern Europe, 1878-1919*. (14 votes) Holt. 1923. \$6.25; Students' ed. \$5.

"While this book deals exclusively with European diplomatic history, it is one of the most complete and unbiased accounts of that restricted subject thus far written."

Recommended as Advanced by Dunham, Farrell, Hall, McKinley, Marsh, St. John, Wright; as Intermediate by Carroll, Eckhardt, Fittro, Lee, Newhall; Packard.

Hayes, C. J. H. *Political and Social History of Modern Europe, 1500-1924*. 2 v. (11 votes) Macmillan. 1924. \$7.25.

"A treasure house of historical facts. . ."

Recommended as Advanced by Farrell; as Intermediate by Marsh, St. John; as Elementary by Bell, Binkley, Carroll, Eckhardt, Fay, McKinley, Packard, Slosson.

Hazen, C. D. *Europe Since 1815*. 2 v. (10 votes) Holt. 1924. \$8.50; 1 v. ed. \$5.

"The work shows evidence of careful historical research. It is one of the few efforts of recent times to give a connected detailed account of this period."

Recommended as Advanced by Britt, Farrell, St. John; as Intermediate by Marsh, Riker; as Elementary by Eckhardt, Fay, Fittro, Lee, McKinley.

Buell, Raymond L. *Europe, a History of Ten Years*. (9 votes) Macmillan. 1928. \$2.50.

"An accurate, readable account of post-war Europe."

Recommended as Advanced by Dunham, Eckhardt, Fay, Riker; as Intermediate by Hall, Packard, Tschan; as Elementary by Lee, Slosson.

Brandenburg, Erich. *From Bismarck to the World War*. (8 votes) Oxford Univ. Press. 1927. \$7.

"An admirable survey from the moderate German point of view."

Recommended as Advanced by Bell, Carroll, Dunham, Newhall, Packard, Slosson; as Intermediate by Binkley, Fittro.

Slosson, Preston W. *Twentieth Century Europe*. (8 votes) Houghton Mifflin. 1927. \$6.

"Valuable for an appreciation particularly of the non-political history of the past 25 years."

Recommended as Advanced by Dunham; as Intermediate by Riker; as Elementary by Bell, Carroll, Lee, Marsh, Newhall, Tschan.

Dickinson, G. Lowes. *International Anarchy, 1904-1914*. (7 votes) Century. 1926. \$4.

"In many respects the most stimulating study in English of the decade preceding 1914. Written in excellent style."

Recommended as Advanced by Bell, Dunham, St. John; as Intermediate by Carroll, Ellery, Newhall; as Elementary by Binkley.

Bowman, Isaiah. *The New World*. (6 votes) World Book Co. 1928. \$4.80.

"A geographer's discussion of post-war problems in relation to economic and geographic conditions. Lots of maps. Very useful. A unique book."

Recommended as Advanced by Bell; as Intermediate by Eckhardt, Hall, Newhall, Slosson; as Elementary by Packard.

Renouvin, Pierre. *The Immediate Origins of the World War*. (5 votes) Yale Univ. Press. 1928. \$4.

"One of the few authoritative works on the immediate causes of the World War. Professor Renouvin is an eminent historian who exemplifies in this work the best traditions of careful and unbiased historical writing."

Recommended as Advanced by Binkley, Carroll, Farrell, Fittro, Riker.

Cooperating Professors: Herbert C. Bell, Wesleyan University; R. L. Biesele, University of Alabama; Robert C. Binkley, New York University; H. H. Britt, Emory University; E. M. Carroll, Duke University; Arleen Dunham, College of Wooster; C. C. Eckhardt, University of Colorado; Eloise Ellery, Vassar College; William E. Farrell, University of Notre Dame; Sidney B. Fay, Smith College; Mary Elizabeth Fittro, Salem College; Royal G. Hall, Albion College; Dwight E. Lee, Clark University; Rayford W. Logan, Virginia Union University; Silas B. McKinley, Vanderbilt University; F. B. Marsh, University of Texas; Richard A. Newhall, Williams College; Lawrence B. Packard, Amherst College; Thad W. Riker, University of Texas; James H. St. John, Miami University; Preston W. Slosson, University of Michigan; Francis J. Tschan, Pennsylvania State College; Addie E. Wright, Friends University.

In presenting this selected list of books on Modern European History, the World Peace Foundation aims to offer a guide to the best available material as recommended by composite expert opinion. To the end that these titles be indeed the most worth while the Foundation asked a large number of college professors teaching in the various fields relating to international affairs to recommend the best available books—elementary, intermediate and advanced—in the realm of their particular interest. All of the titles included here were recommended by five or more different professors and are arranged in the order of votes received. It is hoped that not only libraries, but study groups and individuals as well will find this list useful. The complete list of all titles on Modern European History recommended as a result of this survey will be sent upon request.

Schapiro, J. S. *Modern and Contemporary European History* (1815-1923). (5 votes) Houghton Mifflin. 1923. \$5; student's ed. \$3.75.

"One of the most readable accounts for the general reading public."

Recommended as Intermediate by Farrell; as Elementary by Bell, Fittro, McKinley, Marsh.

Temperley, H. W. V., ed. *History of the Peace Conference of Paris*, 6 v. (5 votes) Oxford Univ. Press. 1920-1924. Each \$9.

"The most thorough and comprehensive study of the settlements following the war. Indispensable."

Recommended as Advanced by Bell, Binkley, Dunham, Hall, Newhall.

Toynbee, Arnold J. *Surveys of International Affairs*, 1920-1923. (5 votes) Oxford Univ. Press. 1925. \$9.

"Compendium of useful material presented chiefly as a digest."

Recommended as Advanced by Newhall, Packard, Tschan; as Intermediate by Bell; as Elementary by Slosson.

Fueter, E. *World History*, 1815-1920. (4 votes) Harcourt, Brace. 1920. \$3.75.

"A very thoughtful, stimulating and novel interpretation."

Recommended as Advanced by Dunham, McKinley; as Intermediate by Binkley, Fay.

Mowat, R. B. *History of European Diplomacy*, 1914-1928. (4 votes) Longmans. 1927. \$6.25.

"Clear, well-written survey of the chief diplomatic problems of this period."

Recommended as Advanced by Dunham, Wright; as Intermediate by Carroll; as Elementary by Newhall.

Ward, A. W., and Gooch, G. P. *Cambridge History of British Foreign Policy*, 1783-1919. 3 v. (4 votes) Macmillan. 1922. V. 1, \$6; v. 2, 3 each, \$7.50.

"A splendid cooperative history of British foreign affairs in the last one hundred and fifty years."

Recommended as Advanced by Binkley, Eckhardt, Newhall, Riker.

Ward, A. W., and others, eds. *Cambridge Modern History*. (4 votes) Macmillan. 1902-1912. v. 1-12, each \$7; v. 13-14, each \$12.

"Each subject is dealt with by a recognized authority. Bibliographies are probably the best and most complete contained in any general work. The best of scholarship."

Recommended as Advanced by Bell, Farrell, McKinley, Wright.

Michigan Summer Session, 1930

DURING the eight weeks of the Summer Session of 1930, the Department of Library Science of the University of Michigan will offer special work in cataloging and classification. Prof. J. C. M. Hanson of the Graduate Library School of the University of Chicago, whose work at the Library of Congress and

at the University of Chicago is too well known to require more than mention, will offer two graduate courses, one in Advanced Cataloging Problems and another in the Library of Congress Classification. These courses will be open to students who have had one year of work in an accredited library school and who meet the other entrance requirements of the Department of Library Science. These courses are offered in response to a very widespread demand.

In addition, Prof. Margaret Mann will offer a first year course in Cataloging and Classification, identical with the course which she presents in the first semester of the academic year. This course combines the study of the principles of classification and of cataloging instead of treating these two branches of library work as separate units.

There will also be courses in Reference Work and Bibliography, and in the Making of the Book, by Prof. Eunice Wead. Edward Eppens will offer a graduate course in National and Regional Bibliography. Mrs. Vera S. Cooper of the Public Library of Baltimore, Maryland, will give first year courses in Book Selection and Ordering for Libraries and in Library Administration. Miss Edith Thomas will offer a course in High School Library Work.

The Summer Session of the University of Michigan opens on June 30 and closes August 22. Admission to the courses in Library Methods is open to students who have a reading knowledge of French and German, and who can present ninety hours or more of college credit with at least one and one-third as many honor points as hours.

It is the policy of the Department of Library Science of the University of Michigan to stress certain aspects of library work in its Summer Session. This year the emphasis is on cataloging and classification, but other aspects of library work will not be neglected.

Ontario Catalogers Meet

THE Ontario Regional Group of Catalogers held a dinner meeting on Saturday, Nov. 2. Thirty-nine members were present, and the speaker of the evening was C. R. Sanderson, Assistant Librarian, Toronto Public Library, formerly lecturer in the School for Librarianship, University College, London. In a most entertaining way Mr. Sanderson recalled some of his first experiences in cataloging at the John Rylands Library. Then, becoming more serious, he reminded the members that while the card catalog by virtue of its form was a more pliable instrument than the sheaf catalog, there was a very real danger of letting it, too, become static. The cataloger should never lose sight of the readers' everchanging point of view.

Library Organizations

New Mexico Beginning State Extension Service

THE ANNUAL meeting of the New Mexico Library Association was held at the State University at Albuquerque, Oct. 31 and Nov. 1, in connection with the State Educational Association. It was the largest meeting of the Association ever held in New Mexico and promises well for the future. The president's address, "Forward Steps in New Mexico Library Service," by Miss Wilma L. Shelton, sounded the keynote of the meeting. She spoke in part of the need for working high school libraries and the desirability of a union catalog of New Mexico material. Papers on school libraries were read by Miss Vivian Hedgcock on "Library Work in Normal Schools to Fit Students for Their Work as Teachers"; Mrs. Claire W. Foster on "Standards for High School Libraries of New Mexico"; Mrs. Ella LaBar on "Children's Attitude Toward Their School Library," and Margaret Kuntz on "Methods and Materials for Junior and Senior High School Instruction in the Use of Books and Libraries." Miss Goree's paper "Library Budgets" stressed the one dollar per capita library income for New Mexico. Other papers given were: "Some Phases of Present-Day Book Publishing and Book Selling," by James P. Threlkeld; "Book Buying for New Mexico Libraries," by Miss Evelyn Shuler; "Literature for Character Training," by Miss Margaret Easterday; "The Art Collection in the Small Library," by Captain Paul Horgan, and "A Reading List of Books on New Mexico," by Mrs. T. E. Whitney. Arthur Campa, who is doing research work on the folklore of the State through a fellowship granted by Senator Bronson Cutting, gave a most interesting talk on "Folklore of New Mexico." Mrs. Rupert Asplund in "New Mexico Extension Program" told what has been done by the newly organized extension department of the State, and what may be developed from these beginnings. New Mexico was fortunate in having Milton J. Ferguson, State Librarian of California, meet with them. His visit came at a most opportune time, when New Mexico is just beginning her State extension service. The message which Mr. Ferguson brought to the State was very encouraging and inspiring. Both in his talk, "Successful Library Extension Methods," and in open discussion later, Mr. Ferguson gave many valuable and practical suggestions for the development of our State extension service.

The following officers were elected for the ensuing year: President, Mrs. T. E. Whitney, Librarian, Roswell Public Library; Vice-President, Mrs. Ella M. LaBar, Librarian, Albuquerque High School Library; Secretary, Miss Whitehill, Librarian, State Teachers College, Silver City; Treasurer, Miss J. Vivian Hedgcock, Librarian, Las Vegas Normal University.

Texas Librarians Meet at Waco

THE TWENTY-SECOND session and third biennial meeting of the Texas Library Association met at Waco, Tex., Oct. 31-Nov. 2. In the response to the address of welcome made by Dr. T. D. Brooks, Mayor of Waco, Mrs. Lucy Fuller Gross, President of the Association, pictured the future of Texas libraries and some of the aims of the Texas Library Association. Mrs. F. R. Humphrey, Librarian, Carnegie Library of San Antonio, outlined the recent campaign in her city for bonds for new buildings and Mrs. Charles Stephenson, University of Texas Library, summed up the training facilities in Texas, having previously made a thorough survey of library courses given in the schools of Texas. The four round-table discussions were led by the following chairmen: Miss Lucia Powell of Kemp Memorial Library, Wichita Falls, Public Libraries section; Miss Pearle Burr, Tyrrell Public Library, Beaumont, School and Children's Library section; Miss Frances Ford, Lubbock County Library, County Libraries section; Loulein Harris, Stephen F. Austin State Teachers' College, Nacogdoches Junior College, College and University Library section. Friday afternoon, a visit was made to Baylor University. Dr. S. P. Brooks, President of Baylor University, who gave a welcoming address, was followed by Dr. A. J. Armstrong, who gave a stimulating account of some of his adventures in making the famous Browning collection. At the evening meeting scholarly addresses were made by J. P. Simmons, Baylor University, on "American Books and American Life"; and by Dr. Herbert L. Willett, University of Chicago, on "Romance of Reading."

The following officers were elected for the coming two years: President, Mrs. Frances R. Humphrey, San Antonio; First Vice-President, Miss Lucia Powell, Wichita Falls; Second Vice-President, Mrs. Ruth Underwood Pooley, Harris County Library, Houston; Secretary, Mrs. Pearl C. McCracken, Teachers' College, Denton; Treasurer, Arthur R. Curry, Texas Christian University, Fort Worth.

Boston Special Libraries

THE OCTOBER meeting of the Special Libraries Association of Boston was held Oct. 28, 1929, at the library of the World Peace Foundation. Frederick T. Persons presided. Miss Carroll welcomed the members and gave a brief though vivid account of her recent visits to European libraries. She was official delegate to the World Federation of Education Associations. She also gave an outline of the history of the World Peace Foundation, in which she called attention to the fact that they are the official agents in the United States for the distribution of the publications of the League of Nations, World Court and International Labor Office. Charles F. D. Belden, director of the Boston Public Library, spoke of the first World Conference of Librarians and Bibliographers, which was held in Rome this summer. Miss Gibbs of the Boston Public Library and Miss Eaton of the Federal Reserve Bank of Boston also spoke of their recent trips to European libraries. Zoltan Házarszti, editor, Boston Public Library, described the exhibits in Italy of manuscripts illustrating 2000 years of bookmaking. The Education Committee of S. L. A. B. announced a course in the use of general reference books to assist library workers. The course is to be given by Miss Kimball, lecturer on library science, at Boston University and to commence in January.

Massachusetts Passes Book Censorship Resolutions

A JOINT meeting of the Massachusetts Library Club and the Western Massachusetts Library Club was held at the Curtis Hotel, Lenox, Oct. 17-19. At the evening session the welcome was given by Miss Heloise Meyer of the Board of Associate Managers of the Lenox Library Association, and the main address was by William Webster Ellsworth, publisher and lecturer, on the subject "Forty Years of Publishing." On Friday morning an address on "Gleanings from Berkshire History and Tradition" was given by Harlan H. Ballard, Librarian, Berkshire Athenæum, Pittsfield. He was followed by Walter Prichard Eaton, author, critic and lover of the Berkshires. Mr. Eaton made a stirring plea for the preservation of wild flowers and wild animal life and read bits from his writing, expressing love of nature. These two able lectures on the Berkshires were a prelude to a "Literary Pilgrimage Among the Berkshires," which was the feature of the afternoon. The speaker on Friday evening, Frank Parker Stockbridge, author and journalist, spoke on "American Reading Tastes as Reflected by the Public Libraries." Follow-

ing the evening session, an important committee meeting was held. At the Saturday meeting the Massachusetts Library Club passed two important resolutions on the subject of book censorship. One resolution called for the modification of the Massachusetts law relating to obscene books, while the other supported Senator Bronson M. Cutting in his effort to eliminate book censorship as practised by Federal customs officials. The meeting came to a close with a practical talk by Vernor M. Schenck of the H. R. Hunting Co. on important new books, from a library viewpoint. The final address was a scholarly lecture on "Significant Aspects of Twentieth Century European Literature," by Miss Ethel H. Lyons, Miss Hall's School.

Virginia Book Resolutions

AT a meeting of the Policies Committee of the Virginia Library Association in Richmond, on Nov. 26, the enclosed resolution was authorized in support of the resolution of the A. L. A. Committee in Bookbuying.

Whereas, the members of the Policies Committee of the Virginia Library Association are convinced that intellectual and moral progress is best promoted by the American principle of freedom of thought and discussion.

Resolved, that the Policies Committee of the Virginia Library Association, representing the librarians of Virginia, in meeting assembled Nov. 26, 1929, disapprove of existing and proposed Federal legislation reposing with the Customs Service powers of censorship over books and pamphlets, which should be available to students of world history and literature; and be it further

Resolved, that this Committee commend the efforts of the Honorable Bronson M. Cutting, Senator from New Mexico, to remove such prohibitions from Section 305 of H. R. 2667; and be it further

Resolved, that this Committee urge the Senators and Representatives in Congress from the State of Virginia to resist efforts to impose upon the American public a system of censorship that will greatly restrict opportunities for serious study.

Catalogers and Classifiers Meet

THE MARYLAND, Virginia, and District of Columbia Group of Catalogers and Classifiers met at the invitation of the Virginia Library Association at the Jones Memorial Library, Lynchburg, Va., Friday, Nov. 1. An informal round-table was held, at which the chairman, Miss Mary Louise Dinwiddie, presided. A banquet and reception was attended in the evening.

Rhode Island Fall Meeting

THE RHODE ISLAND Library Association held its fall meeting in the Wanskuck branch of the Providence Public Library on Oct. 25. The gathering was made welcome by Mrs. Catherine B. Merrick, Librarian, who spoke on the importance of the library in community life. Frederic G. Melcher, editor of the *Publishers' Weekly*, spoke on "New Tendencies in Book Publishing," and the "New White House Library" which is being donated by various publishers through a selection committee of which he is chairman. William L. Stidger of Boston, addressed the audience on "The Place of the Public Library and Books in the Life We Live," which led into a long discussion of the censorship problem. Resolutions were unanimously adopted deprecating the extreme censorship of books by the U. S. Customs Service and endorsing Senator Cutting's amendment to Section 305 of H. R. 2667, which the Secretary was instructed to send to each Rhode Island Senator and Representative. The speakers for the afternoon session were A. J. Stoddard, new Superintendent of Schools of Providence; Helen Ferris, of the Junior Literary Guild, and Alice Jordan, Supervisor of Work with Children, Boston Public Library. The meeting adjourned after examination of poster, book project, book list and several other effective exhibits arranged by the Committee on Exhibits from the contributions of the various State libraries.

New Hampshire Hears Tilden

THE FORTIETH annual meeting of the New Hampshire Library Association was held at Concord, Sept. 18-20. Greetings were extended to the librarians by the Mayor of Concord, the Director of the Historical Society, and the State Librarian. Donald Tuttle, Secretary of the State Publicity Bureau, showed how the librarians and the Bureau could work together in collecting material about the State. The principal speaker of the evening was Freeman Tilden, nationally-known figure in contemporary letters and noted novelist. The following morning session was opened with the business meeting. Mary Saxton, Librarian of the Keene Public Library, gave a report of her attendance at A. L. A. in Washington last June; Edna Phillips, Supervisor of Library Work with Foreigners in the Division of Public Libraries of the Massachusetts Department of Education, stressed the importance of librarians helping the aliens to learn to read by having books available suitable to their needs, and Nancy Byrd Turner entertained the audience with anecdotes of her experience in writing

verse and read several of her poems. At the afternoon session, Frank H. Chase, Reference Librarian of the Boston Public Library, spoke on how reference books may be made of value to the greatest number of people. He was followed by John Clair Minot, literary editor of the *Boston Herald*, who discussed many of the new books to appear this winter. The principal speaker of the evening was Mabel Winchell, Librarian at Manchester, who told about the libraries she visited in Sweden, Germany, Austria, and France last summer. Rev. Samuel Drury then talked on the circulation of books. At the closing session Friday morning, four interesting talks were given: "What School Teachers Want from Librarians" by Idella K. Farnum, Supervisor of Rural Division, New Hampshire State Normal School; "How a Trustee May Help the Librarian" by Harry Preston, Trustee, Henniker; "Library Work with Children" by Dorothy Hyde, Children's Librarian, Waltham; and Otis G. Hammond, Director of the New Hampshire Historical Society.

The following officers were elected for the coming year: President, Martha E. Cutler, Petersborough; First Vice-President, Mary Holland, Manchester; Second Vice-President, Hazel Clark, Laconia; Secretary, Marion Manning, Nashua; Treasurer, Etta Dearborn, Belmont.

Kansas Discusses Library Extension

THE TWENTY-EIGHTH annual meeting of the Kansas State Library Association was held in Kansas City, Kan., Oct. 16-18. The program of the first general session on Wednesday night took the form of a symposium on the subject, "Why I believe in the public library." Responses were made by five prominent citizens of Kansas City representing the club woman, the newspaper man, the doctor, the minister, and the business man. Thursday's program was devoted to a variety of interests rather than to any one chosen subject. Demonstrations showing the possibilities of the children's story hour and of the reading of poetry to children, a round-table session for college and reference libraries, and a mending demonstration given through the courtesy of the Gaylord Brothers Co., occupied the morning session. The joys and possibilities of rare book collecting, the value of book-week observance, the A. L. A. meeting at Washington, and State publications furnished interesting topics for the afternoon discussions. At the close of the afternoon meeting, the members of the Association attended the fifth annual commencement of the Vacation Reading Club of the Kansas City, Kan., Public Library. The

annual dinner of the Association was held at the Gould Hotel on Thursday night. Dr. Burris Jenkins, pastor of the Linwood Boulevard Christian Church of Kansas City, Mo., was the after-dinner speaker. On Friday morning the Association enjoyed an address by Congressman U. S. Guyer, which offered a fitting introduction to the general subject, "Library Extension and Community Service," chosen for the morning's program. One of the treats of the meeting was the opportunity of hearing Miss Flavel Barnes, Secretary of the Board of the Pratt Public Library, tell how that library has set about it to give an interesting, valuable, and unusual county service, for Kansas, to Pratt County. Miss Alice Neal, librarian of the Pratt Public Library, assisted Miss Barnes by demonstrating the original publicity material which the library uses in advertising their service. Following this talk, short addresses were given by Mrs. Jonathan B. Carter, president of the Kansas State Federation of Women's Clubs, and Mrs. J. A. McNary, president of the State Parent Teachers' Association.

The following officers were chosen for the coming year: President, Miss Ruth E. Hammond, librarian, Wichita Public Library; Vice-President, Mrs. Bertha McMann, librarian, Kansas City, Kansas Public Library; Treasurer, Miss Luella Varner, librarian, Iola Public Library; Secretary, Miss Helen Wagstaff, University Extension Division, Lawrence.

County Libraries Paramount Topic

THE TWENTY-NINTH annual meeting of the Pennsylvania Library Association was held at Pocono Manor Inn, Pocono Manor, Oct. 22-25. The President's address, which was the event of the first evening, was followed by the appointment of the various committees and a play entitled "Why not a County Library?" The following morning the program was given over to a discussion of books for children with Emma Robinson Engle, Supervisor of Children's Work, Free Library of Philadelphia, speaking on "New Children's Books and the Budget"; May Lilly, Children's Librarian, Free Library of Philadelphia, on "Practical Experience with Some Recent Children's Books"; and "Possibilities of a Cooperative Plan between the Library and the Schools" presented by Mary E. Foster, Head of Schools Department, Carnegie Free Library of Pittsburgh. The evening session opened with a paper on "The Frick Educational Commission and Its Work" by Dr. George W. Gerig, Secretary of the Frick Educational Commission. This was fol-

lowed by the annual auction of autographed books, the proceeds of which were given over to the scholarship fund. The Thursday morning meeting opened with a short business meeting followed by the paramount topic of the entire convention, "County Libraries." Lloyd W. Josselyn, Vice-President of the Buffalo, N. Y., Public Library, told of work along these lines in various States; Howard G. Eisaman, Lecturer for the Pennsylvania State Grange, talked on "The County Library and the Farmer"; followed by Mary A. True, Supervisor of Library Extension, Erie Public Library, who told of the work in connection with the Erie County Library campaign. The afternoon was given over to the Trustee Section and the College and University Section. The program Friday morning was arranged so as to hold the business session first, followed by the papers of the morning. Ruth K. Roohrig, Assistant Librarian of the Pottsville Free Public Library, reviewed "New Books of Fiction" and Eleanor Carver, Librarian of the Sharon Public Library, discussed "New Books of Travel."

Special Libraries Association

THE SPECIAL Libraries Association of Boston met at the Congregational Library, Nov. 25, with a larger attendance than usual because of the interest in the program which was a discussion of encyclopedias.

Mr. Frank H. Chase, Reference Librarian of the Boston Public Library, discussed and analyzed the new edition of the *Encyclopedia Britannica*; the Rev. William M. Stinson of Boston College explained the scope of the *Catholic Encyclopedia: The World in Pictures*, a picture encyclopedia just begun which shows everything in picture form and defines it, was described by Miss Ruth Bradbury of the Boston Public Library; *The Lincoln Library*, a one-volume encyclopedia, was discussed by Mrs. Bertha E. Hartzell, Supervisor of the Library Training School of the public library; the *New International Encyclopedia* and the *Americana* were compared and their respective usefulness discussed by Mr. Raymond L. Walkley, Librarian of Tufts College; and German, French and Spanish encyclopedias were described and compared and many interesting facts about them brought out by Miss Mildred Tucker of the catalog department of Widener Library. The *Spanish Encyclopedia* was particularly stressed as being unusually fine for detailed historical and biographical reference.

In The Library World

PUBLIC LIBRARY
MONTCLAIR N. J.

WE TAKE THE LIBERTY OF WISHING
OUR FRIENDS A MERRY CHRISTMAS.
WE WISH FOR THEM A CHEERFUL AND
LABORIOUS NEW YEAR WITH GOOD
BOOKS TO READ AND BOTH THE TIME
AND THE INCLINATION TO THINK.

Plimpton Collection Catalog in Wellesley College

THE Catalog of the Frances Taylor Pearsons Plimpton Collection of Italian books and manuscripts in the Library of Wellesley College, compiled by Margaret Hastings Jackson, Professor of Italian in Wellesley College and Curator of the Plimpton Collection, and published by the Harvard University Press at the expense of George A. Plimpton, donor of the collection, will be welcomed by all scholars interested in the Italian renaissance writers, as the collection is unique in this country. It is especially rich in rare first editions of the less known as well as the better known writers of the period, and the collection of Italian Romances of Chivalry is one of the most complete in existence. One section of the Catalogue is devoted to the manuscripts in the collection of which there are many of great value, including one complete text of the *Divine Comedy*, signed and dated 1449. The Catalog is illustrated with reproductions of title pages, early woodcuts and text, and has complete bibliographical descriptions of each item followed by bibliographical notes giving information as to provenance, peculiarities of different editions and other interesting matter. Where material was available a brief biographical note has been inserted after the name of each author.

New Buildings

GETTYSBURGH College's, Pa., new \$100,000 M. Emma Weber Memorial Library was officially opened to the students Nov. 18, 1929. The building, made possible through a gift of \$100,000 from the Rev. H. H. Weber of New York, is built of Gettysburgh brick with a granite base and cast stone trim. All the services of the building are located on the ground floor except such as cannot be separated from the study and reading rooms. The entire north end is given over to book storage, with two tiers of metal book stacks having a capacity of 100,000 volumes. The upper floor of each wing is given over to seminar and special study rooms, of which there are seven. Each room has its own book supply of from 400 to 1000 volumes, and each provides facilities for research in a special branch.

THE NEW library building of the Randolph-Macon Woman's College, Lynchburg, Va., was dedicated on November 1st. Dr. C. C. Williamson, Director of the School of Library Science, Columbia University, gave the address in connection with the dedication exercises. Members of the Virginia Library Association, which met in Lynchburg November 1st and 2d, were the special guests of the college at the reception.

The Reynolds Library

THE Reynolds Library trustees have voted in favor of an association with the library of the city of Rochester. There have been negotiations and discussion on the subject for a number of years. About a year ago the Reynolds Board invited a commission of non-residents to advise with them. That commission consisted of:

Mr. Harry M. Lydenberg, Assistant Director, New York Public Library.

Dr. William S. Learned, Assistant Secretary of the Carnegie Foundation for the Advancement of Teaching.

Dr. Charles C. Williamson, Director of Libraries and Director of the School of Library Service of Columbia University.

The commission visited the city in June, made a thorough investigation of the library situation in Rochester, and later submitted a report recommending association with the city. The report was approved in principle by the Reynolds Board, Dec. 2, and a resolution was adopted that a committee be appointed to continue negotiations with representatives of the city.

This action strengthens the hope and brightens the prospects for the development of a central library that will be worthy in content and adequate in service for the citizens of Rochester.

The recent charter extension of the city's debt limit makes it possible to supplement the Rundell Fund so that the necessary funds can now be provided for a library building. The Rundell Fund on Dec. 31 amounted to \$899,742.64. The City Council has recently received a report of the City Planning Commission, including a civic center, of which it is expected that the library building will be a part.

The officers of the Reynolds Library are: President, Leonard B. Bacon; first vice-president, Rush Rhees; secretary, John R. Slater; treasurer, Mortimer R. Austice.

Increasing the Resources of the Library of Congress

VARIOUS gifts of impressive magnitude have been made to the Library of Congress in the year ending June 30, 1929, as is shown by the recently published annual report of the Librarian of Congress. Grants of \$110,000, made by the General Education Board, became effective in July, and included \$35,000 to be expended over a period of three years for the preparation and publication of a catalog of manuscripts of European and Eastern origin now in American collections which are of importance to scholarship (under the direction of the eminent bibliographer, Seymour de

Ricci of Paris); and \$75,000 to enable the Library to carry out a plan for the development of a system of research consultants. From John D. Rockefeller, Jr., there was received \$150,000 as installments of his gifts over a five-year period assured two years ago, of which \$100,000 was designed for the acquisition of source material in American history (chiefly photostat copies of maps in British and other archives) and \$50,000 for the enlargement of the bibliographical apparatus.

A magnificent collection of Spanish manuscripts from the early years of the colonial history of Mexico and Peru was presented to the Library by Edward S. Harkness. The documents from Mexico, amounting to 2600 folios, are mostly the product of sixteenth century lawsuits in which the conqueror, Hernando Cortés, and his son, Martín Cortés, Marqués del Valle, were involved, and have been preserved by descendants of that family. Gifts of books and pamphlets totaled in all 20,505 items, an increase of 1584 over the total for the previous year. The net accessions were 180,802. Inclusive of the Law Library, the Library now includes 3,907,394 books, 1,117,243 maps and views, 1,045,481 volumes and pieces of music, and 494,991 prints. Of the books 2,594,000 in round numbers are now classified under the new classification.

Although the Library's limited funds do not permit any very extensive purchasing of incunabula, it was able to acquire no less than eight large folio incunabula bound together in one volume. When the *Census of Fifteenth Century Books Owned in America* was published in 1919 no copies of six of the eight were known to be in the United States.

The American Academy of Arts and Letters, Fordham University and Holy Cross College are some of the new institutions listed as using the L.C. classification. The number of subscribers to printed cards increased from 4306 to 4623 during the year, the value of the cards shipped amounting to \$219,722. Cards for 38,063 different titles were added to the stock during the year. The whole number of different titles represented in the stock on June 30 was 1,099,537, and the total number of cards is not far from seventy-seven million.

The Copyright Office in all had 161,959 registrations and received \$308,993 in fees. Salaries required \$224,905 and sundries \$1,611, making the net cash earnings \$82,477. Total appropriations for the Library and Copyright Office in 1930 are \$1,699,365, of which the \$722,345 for salaries for general service represents an increase over the \$689,261 of the previous year. Appropriations for care and maintenance of the building amount to \$1,860,312.

From the Library Schools

Simmons

ON OCTOBER 19, 1929, the annual letter "as to the state of the Simmons College School of library science" was mailed to 634 former library school women, and by December 92 per cent had replied to the request for information about their professional activities. Recent information is actually available for 95¾ per cent except as to the 1929 salaries of eight persons. As usual, the geographical distribution is wide, to 38 states, the District of Columbia, Porto Rico, Hawaii and Canada. Forty-two per cent of those in positions are in New England, 15 per cent in New York, and each of the following states has at least twenty representatives: Pennsylvania, Ohio, Illinois, Michigan. In addition, three are in France, one in Russia, one in India, and we claim a share in Miss Mary E. Wood in the Boone University library, China. One of our most interesting letters is from Mrs. Nettie Guise of the Library of the American College, Madura, South India. Doctor Guise, her husband, is head of the History and Economic Department, and during their leave five years ago Mrs. Guise's idea of the right use of leisure included a full year's course in the Simmons Library School. Perhaps she will not mind my sharing the library part of the letter with you. She says: "We enjoy our work here in India. . . . This year, in addition to my library work, I have charge of a Bible and Industrial school, while the Principal is on furlough. . . . Mrs. Nolting and I give from 8:30 to 12 each day to the library. We have three men for permanent staff, and six students working each one hour per day. We do not have open shelves. We have three rooms in the Administration building, so are very crowded." Mrs. Guise speaks of their hope for a new building soon, toward which a generous gift has already been given. We realize librarians speak a common language when she tells of adopting L. C. subject headings and buying L. C. cards, and reading *THE LIBRARY JOURNAL*. Then she adds: "For our Sanskrit, Tamil and Malayalian books we make translated cards and this year we are making in addition vernacular cards." Another letter tells us of Miss Kirwin, Miss Washburn and Mlle. Montel, who have met in library work in Paris. Thirty-eight per cent are in public libraries, 28 per cent in colleges, 16 per cent in schools, teachers' colleges and normal schools. The remaining 18 per cent show the fascinating diversity in library types. National, state and county libraries, and library commissions; music, art and religion; science, technology and business; hospitals and social settlements; rare books, and

antiquarian and historical societies, are but some of the half a hundred fields of work. Of the 608 for whom information is available 545 are in library work, 15 in other fields, chiefly book stores or teaching; four are taking the year for study; four are abroad; 16 are married, one death was reported, 12 are ill or are needed at home, and one has retired. The others are temporarily out of positions.

As usual, the most common vacation is four weeks or a month. Over 52 per cent have that period; 18½ per cent have shorter periods; 29½ per cent range from five weeks to five months. Salaries for 535 persons working full time, as of November, 1929, ranged from \$900 to \$4,500, with the medium \$1,860 and the average \$1,984.97.

4.1 per cent receive \$3,000-\$4,500.
10 per cent receive 2,500- 2,990.
28 per cent receive 2,000- 2,490.
17.3 per cent receive 1,800- 1,990.
26.5 per cent receive 1,500- 1,790.
14 per cent receive less than \$1,500.

Twenty-eight and eight-tenths per cent of the 545 are librarians of public school, college or college department libraries. Cataloging comes next with 23 per cent, and reference and children's work each have 8½ per cent. Two hundred and sixteen were graduates of academic colleges with our one-year program of library science. Two hundred and sixty-six were graduates of the four-year program, which includes the same one-year program of library science. Forty were special students of library experience, carrying only the library science courses. Thirteen had partial programs. A recent survey was made of the women, some 850 in all, who have received degrees from Simmons College in the library science programs since the first venturesome college graduates registered in 1904. Two hundred and fifty-seven have married; 503 are still working; 81 from the first ten classes, 176 from the second decade and 246 from the last six classes.

JUNE RICHARDSON DONNELLY, *Director*.

Oklahoma

THE SCHOOL of Library Science of the University of Oklahoma opened its doors for its first session on Sept. 13, 1929, with an enrollment of eleven students. The school offers a one-year course in library science, open only to those students who have completed three years of college work, entitling them to admission to senior standing in the College of Arts and Sciences in the University. Of the students enrolled three are college graduates while the others have completed only the three years of college work necessary for admission.

Among Librarians

Special Libraries

GRACE BISCHOF, formerly reference librarian of the University of Wyoming Library, is now librarian of the New York Horticultural Society.

MARY COBURN, Simmons '19, has accepted the position of librarian of the Institute for Child Guidance, New York City.

KATHERINE DAY, Los Angeles '29, has been appointed assistant in the Barlow Medical Library, Los Angeles.

GENEVIEVE MCCROHAN, Simmons '29, is doing a special piece of classifying for the Pilgrim Society, Plymouth, Mass.

CHARLOTTE MICHAELSEN, Simmons '26, has accepted the position of assistant librarian of the Commonwealth Edison Company, 72 West Adams Street, Chicago, Ill.

MARGARET NELLIS, Simmons '20, is now librarian and major file clerk for the United States Rubber Company, 1790 Broadway, New York City.

GRACE E. STUDLET, Pratt '25, has been made librarian of the National Bureau of Economic Research in New York City.

Marriages

ANNA G. BISCHOFF, Los Angeles '26, was married to Earl Hadley in September.

ALICE BROWN, Simmons '27, was recently married to V. A. Brown and is living at 81 Brook Street, Wollaston, Mass.

BARBARA BRUSKE, Simmons '28, was married to Charles N. Dewey and is living at 72 Salisbury Street, Worcester, Mass.

MILDRED COOK, Simmons '23, was recently married to John G. Dempsey.

PAULINE GERLACH, Simmons '28, was married during the summer to Herbert L. Whitesell and is living at 109 Second Street, Bordentown, N. J.

EDITH M. HAGAN, Simmons '28, was recently married to Ernest P. Hammaker and can be reached at Box 475, Thurmont, Md.

HARRIET HATCH, Simmons '28, is now Mrs. Edward Everett, Jr., and is living at 9 Eaton Place, Binghamton, N. Y.

HELENA L. KELLOGG, Simmons '28, was recently married to Wyllis Wright and is living at 2306 Van Alst Avenue, Astoria, L. I.

OLIVE MAYES, Pratt '13, was married in October to Thomas Mitchell Hagar.

LILLIAN FRANCES NAYLOR, Simmons '27, was married to Lieut. William M. Breckinridge of the U. S. Army on Oct. 18, 1929.

REBA RICHARDSON, Los Angeles '21, was married to David W. Butler last June.

HAZEL PHELPS SHELDON, Simmons '27, was married in October to John Donald MacKnight and is living in Troy, N. Y.

SELMA WACKER, Atlanta '22, was married in October to Thomas Morgan, foreign representative of the Dixie Culvert Company. She has resigned her position in the Canal Zone Library and will accompany her husband to Havana, Cuba.

FRANCES WIDICK, Los Angeles '28, was married to Loren Hays in October.

EMILY R. WRIGHT, Simmons '26, was married in October to Arnold Watson Lunt. Mrs. Lunt is continuing her work at the Library of Landscape Architecture, Harvard University.

EVELYN W. YOUNG, Simmons '27, was recently married to Fred D. Bennett and is living at 64 Queensberry Street, Boston, Mass.

EUGENIA ZIEBER, Simmons '22, was married during the summer to W. E. Shafer and is living at 1011 Bush Street, San Francisco, Cal.

Public Libraries

FRANCES CROSBY, Los Angeles '29, has been appointed assistant in the Long Beach Public Library, California.

CHRISTINA DAVIS, Simmons '29, is now general assistant at the Flatbush Branch, Brooklyn Public Library.

EDNA DINWIDDIE, Pratt '19, has been appointed organizer in the Extension Department of the Michigan State Library.

FRANCES GEARHART, Atlanta '29, is head of the Circulation Department, Springfield Public Library, Missouri.

CHESTERINE GLADSTONE, Los Angeles '28, was recently married to Howard Cordelle. She will continue her work at the Benjamin Franklin Branch, Los Angeles Public Library.

MARGARET HERRIDGE, Simmons '27, is now general assistant at the Manchester, N. H., Public Library.

MRS. ELEANOR B. JONES, Los Angeles '08, for some years librarian of Hollywood Branch Library, died on Sept. 19.

MRS. RHODA W. MARSHALL, Los Angeles '14, has been appointed principal of the Fiction Department, Los Angeles Public Library.

ANGUS MOWAT entered the Ontario Library Training School when the war was over. He was appointed to Trenton, then to Belleville, and now has been appointed librarian of the Windsor Public Library, Ontario.

College and University Libraries

JEANETTE BOWEN, Simmons '27, formerly on the staff of the University of Indiana Library, has become a cataloger at the Washington Square Library, New York University.

ESTHER CHAPIN, Simmons '13, has been appointed senior cataloger at the Baker Library, Graduate School of Business Administration, Harvard University, Boston.

WINNIFRED CHAPMAN, Simmons '14, is now on the cataloging staff of the Princeton University Library.

THELMA EDWARDS, Washington '23, has taken the headship of the University of Washington Catalog Department, left vacant by the resignation of Mrs. Marie Alfonso, who is now giving her full time to teaching cataloging in the University Library School.

KATHERINE HUGHES, Washington '28, has recently become a member of the Oregon State College Library staff at Corvallis.

PHYLLIS JANSEN, Washington '28, has accepted the position in the University of Washington Library, vacated by Mrs. Ida Mutch, who has left to take a position in Everett, Wash.

AUGUSTUS FREDERICK KUHLMAN, formerly Associate Professor of Sociology at the University of Missouri and director-elect, Division of Classification and Parole, State Department of Institutions and Agencies of New Jersey, has been appointed Associate Director of Libraries at the University of Chicago.

WEYANA LOPP, Washington '20, has accepted a position with the University of Washington Reference Department.

MARY E. MARKS, Illinois, has been appointed librarian at the University of Wyoming to succeed Miss Reba Davis, who has resigned to be married.

ELEANOR PINEO, Washington '27, has recently returned to the University of Washington Library as secretary to the librarian.

DOROTHY RANDOLPH, Drexel '27, has accepted the position of cataloger on the staff of the American University Library, Washington, D. C.

RETA RIDINGS, Pittsburgh '26, formerly of the University of Oregon Library staff, has accepted the position of reference librarian in the University of Wyoming Library.

The Calendar

April 4-5—Pennsylvania Library Club and New Jersey Library Association, annual meeting at Hotel Chelsea, Atlantic City, N. J.

May 1-2—Louisiana Library Association, annual meeting at Monroe, La.

June 23-28—American Library Association, annual meeting at Biltmore Hotel, Los Angeles, Cal.

Opportunities

This column is open to librarians

Wanted—Assistant cataloger and a reference librarian in a strong college of the Middle West. College and library school training required. S-12.

University and library school graduate, with ten years' library experience, desires position in reference or catalog division of large public or university library. S-13.

Librarian with college and library school education and two years' experience in library work, wishes a position in an eastern or southern state. R-17.

University and library school graduate, possessing poise, tact, initiative, executive ability and successful record, desires responsible position in or near New York City. X-10.

Wanted—To exchange positions during spring semester 1930. February to June. College library in West preferred. Salary basis \$250 per month. A10.

College graduate with library school training desires position in college, junior or senior high school library. Three years' school library experience. A11.

Trained and experienced cataloger desires position. Cataloger, recataloging, or cataloging of special collections preferred. A13.

Cataloger with circulation department experience wants position. Public library preferred. Good references. A12.

To the Librarians:

As library books are subjected to constant and hard usage, you will find it of advantage to purchase standard titles in RADEMAEKERS' bindings. These bindings will prolong the life of each book until the pages are too soiled or worn for further use.

Our Reinforced Publishers' Binding; Holliston Library Buckram; Fabrikoid, and Imported Leather look well and wear splendidly. Prices and further details on request.

New Book Department in Charge of
Mrs. K. E. Barry

Hine Bookstacks

Include

**many REFINEMENTS vital to the
correct system of housing BOOKS**

LIBRARIANS no longer are satisfied with merely "the idea of storing books in the *cheapest* manner regardless of efficiency."

BOOKSTACKS lasting 100 years or more

should be Sanitary and therefore economical to clean.

The design should be pleasing architecturally and one that does not soon become trying.

Shelves whether high or low should be easily and quickly re-adjusted without the use of tools or a spirit-level.

"Oversized" books should be readily accommodated without the necessity of a re-arrangement.

Book-covers and **binding-welts** should be protected and **not damaged** while standing on shelves.

Would you not welcome a booksupport that is attached to the shelf, one that will not topple over when heavy books rest against it and yet is readily re-adjusted?

ONLY in the HINE BOOKSTACK

will you find an approach to the "ideal" and you'll be amazed at the reasonable price in addition.

You'll never appreciate, until you see a full-sized sample of the "1930 Model Bookstack," how skillfully our craftsmen have eliminated all of the serious and well-recognized objections.

Orders for small quantities of standard shelving shipped promptly from our factory stock.

*It will be a pleasure to send you literature,
suggestions and estimates*

Forthcoming Issues of THE LIBRARY JOURNAL

✱ Beginning in this issue, and continuing in alternate issues in the future, will be found an index of articles in library periodicals, books on libraries and library economy, and other material of interest to the profession. The subject headings follow those of *Cannons' Bibliography of Library Economy* to which this Department will make a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this Department of "Current Library Literature."

✱ The February first issue will be a special number on book wagons with interesting and worth-while articles from all parts of the country. March first will be a Library Equipment number and readers are requested to send in notes regarding recently acquired equipment that other libraries might profit by knowing about. Especially do we request pictures and information about library signs and markers for county libraries, branches, and library deposits. With each sign picture should come a brief note regarding its manufacture, cost, and whether it has withstood the weather.

✱ We are striving all the time to give you a more interesting magazine. Be sure you do your part and send in news notes and material of interest to other librarians.

What the Flood Did for the West Hartford Library

By Dora Keen Handy

Librarian, West Hartford Public Library, Vermont

INTO OUR green and picturesque valley on Nov. 3, 1927, swept the flood waters of the little White River on their way to join those of the already choked streams emptying into the Connecticut. With two dams above the small village, and from nine to ten inches of rain falling on the steep slopes of our hillsides within thirty-six hours, it was small wonder that the village of West

The new West Hartford Library, with a capacity of 5000 books, erected after the 1927 flood swept away the old building

Hartford was one of the three or four points in the State of major damage. Every house on the river side of the main street was swept away, including the little old red brick school house of former days that had served for six years to house our free public library.

Not only was our building gone with all our books, catalogs and furniture, but even the land had been washed away. All that remained was

the attic gable, which had floated down river and anchored itself against a fine old brick mansion. But as I climbed over the wreckage only two weeks after the flood, a little girl asked when we would have a new library, and week after week messages came from homes telling of books taken out before the flood now being carefully stored away. Thanks to a good circulation, built

up by nine years of hard work, about 150 books were out at the time of the flood and were thus saved.

Within two weeks citizens of Hartford, Conn., bestirred themselves to send aid, and within a month the *Hartford Times* and Chamber of Commerce had jointly collected a fund of \$14,000 for the town of Hartford, Vt. Our village being small, and the only one in the town to suffer greatly, it occurred to Mrs. Guy Place that possibly some part of the relief funds could be spared for a new library. If

Extracts of a paper presented before the Vermont Library Association and awarded the second prize by *The Woman's Home Companion* for a paper covering the subject "Increasing the Usefulness of My Library."

this could be done, she said, she and her husband and brother would make a free gift of the land on which their home had stood as a site for the new building. By agreement with

The new West Hartford Library, costing about \$3,800, has plenty of light

the donors, \$5,000 was accordingly set aside for this purpose, and so well did the Committee in charge handle the funds that for this small sum West Hartford now has an adequate, comfortable, and attractive new library with a capacity of 5000 books. The half acre of ground was graded, the lawn seeded, and the building furnished all within the appropriation.

On Nov. 23, 1928, we moved into the new building, although its formal dedication was postponed until the following June. Second only to light and space in a library comes convenience of arrangement, warmth, and plumbing. Many libraries of larger size in our State do without plumbing altogether, because of the difficulty and expense of keeping water from freezing when the library is not used daily, but we had been without any conveniences for nine years, and by choosing a frame building we were able to afford water, a furnace, and a fireplace instead of a handsome monument without comfort. By placing the intake for our water in the cellar, with pipes underground, a small but constant flow of water direct from a spring high above us was made to supply a washstand upstairs and also a lavatory near the furnace, in the center of the basement. One winter has proved this arrangement to be satisfactory, even at low temperatures with no fire. Indeed, the only criticisms of our building that we can make are trifling ones. Where before the flood we had only a small rented building that was crowded, dark, and uncomfortable, now we have our own building flooded with light, comfortable in all respects, well furnished and standing in a commanding position

in the best lot in the very center of the village.

As soon as rebuilding was announced, offerings of books poured in upon us, and long before work could be started on the new building our church basement was crowded with boxes of books. Boxes came from the Vermont Club of Hartford, Conn.; from the Waterbury, Conn., Women's Club; from H. W. Wilson Company, and some twenty other donors. Already 2500 have been cataloged and about 300 more newly arrived are awaiting the librarian's time. Only 90 of our nearly 3000 books have been purchased. The only real needs unprovided for by the many gifts were the lower grade children. In order to get the books most needed for them for the small sum of \$60, the *Graded Lists for Rural Libraries*, published by our Vermont Free Public Library Department, were carefully studied both for content and price, and finally an entire day was spent at Baker & Taylor's examining the books chosen for consideration. The result was to supplement what we already had, so that about twenty books were available for each grade. This list is kept checked for handy use both at school and at the library. Scribner's and Houghton having befriended us in the past, an appeal was made to them after the flood for a few damaged copies of books selected from the Graded Lists. In both cases not a few but the entire list was donated, and mostly undamaged books. Also, from Newark, N. J., and Montpelier, Vt., public libraries came many welcome discards.

The flood put West Hartford on the map when a front-page news item in the *New York*

Little children's books at left and main shelves in two alcoves at rear

Times told of Dartmouth students digging out our mud-filled cellars. Perhaps one of our readers will some time prove to us that our labors for West Hartford Library have not been in vain, and the seed so carefully sown and nurtured may grow into a sturdy oak.

The Financing of Library Construction Through Bond Issues

By Simeon E. Leland

Professor, Department of Economics, University of Chicago

THERE are several methods by which library construction can be financed by local governments: First, through the proceeds derived from the sale of bond issues; second, through the revenues collected from tax levies; third, through donations and gifts granted to governmental bodies. The alternative of donations and gifts is not a method exclusively within the province of governments, and may be more effectively carried on by voluntary cooperation without the aid of governmental machinery. Gifts, then, will not be further considered. Grants from one government to another are possible, but this method of financing library construction will not be considered here. Voluntary cooperation with citizens whereby groups erect library buildings in return for a rental charge, which also amortizes the original debt, is also a possibility.¹ The charges entailed by this method of financing differ but little from those involved in bond issues. There remain the two policies—loans or taxes—for primary consideration.

At the present time there appears to be little reason to question the appropriateness of bond issues for library construction. The propriety of constructing buildings by means of bond issues has been generally taken for granted. Buildings are fairly permanent investments; they enjoy long life, and in the case of library buildings, this life may be assumed to be quite long provided the initial construction has taken ample cognizance of future growth. The allowance for growth has in many cases been inadequate, but the structures have continued to serve their purpose, not as efficiently as they should, but sufficiently to prevent the entire abandonment of the structure. This longevity of life for library structures indicates a slow rate of depreciation and negligible obsolescence.

The public library building is a financial asset to the community and can be appropriately acquired by means of a loan. If the bond holders exact security, as in the field of private finance, the building can be mortgaged. This

provides the bond holders with a specific asset to claim in case of default in payments. The real security for the loan, however, rests in the willingness of the citizens to pay taxes to retire the debt. This willingness is increased both by the presence of a building in which citizens have pride and by the receipt of personal benefits which library service affords. If, however, the building becomes worthless through depreciation before the bonds are retired, that willingness is seldom found. It is axiomatic that bond issues should not have periods of maturity longer than the life of the assets acquired through the proceeds secured from their sale.

The periods for which library bonds are issued appear to be rather long. In England, bonds issued for the purchase of sites mature in from fifty to sixty years; those for buildings in about thirty years; while bonds issued for the purchase of books or furniture run for about ten years.² In Scotland the bond issues are matured in about twenty years.³ In the United States there is a wide variation in the periods for which bonds are issued.⁴ Some are callable at the end of one year, others do not mature for fifty years. The most common period of issue, however, appears to be from ten to twenty years. The bonds which run forty-nine and fifty years are concentrated largely in New York City. That period is certainly too long for the bonds of that city. However, the latest data available show no New York City bonds issued since 1909, and since that date a different fiscal policy may have obtained.

The analogy to private financial policies is often employed to justify public borrowing for building activities. It is pointed out that individuals properly borrow money to acquire homes, manufacturing and commercial properties, all of which are regarded as permanent investments of capital. The lenders, however, usually insist upon a margin of safety between the amount of the loan and the value of the mortgaged property; such a margin is seldom applied to public borrowing. The entire construction costs may appropriately be defrayed

¹For examples of this type of cooperation see *A Survey of Libraries in the United States*, pp. 118-19.

Extracts from paper read at conference of the Librarians of Large Public Libraries, Chicago.

²Brown, *Manual of Library Economy*, p. 49.

³*Ibid.*

⁴See Table.

by means of bond issues, the security for payment being provided in other ways. For example, designated sources of revenue may be segregated for the payment of interest and amortization charges; or these charges may be given a first lien upon general revenues; or contracts may be entered into for the purpose of binding future legislative bodies; or a State government may undertake the responsibility of guaranteeing the financial obligations of its political subdivisions.

In the case of libraries it is difficult to pledge specific sources of revenue for the payment of library debts. The independent income of libraries, apart from tax revenue, is generally limited to income from fines, endowments, gifts and a few miscellaneous charges. The financial prospect of fines is negligible.⁵ Library officials seek to avoid these penalties and regard them as a necessary evil rather than as a potential source of income. Gifts and the returns from endowments likewise can seldom be pledged to retire bond issues.⁶ A negligible income is also secured by some libraries in the form of rental charges. It is doubtful whether public libraries possess any adequate source of income save that from taxation (or special grants-in-aid) with which to defray the charges incident to the employment of bond issues. The propriety of employing bond issues for construction purposes depends, therefore, upon the ability of library officials to secure funds by taxation.

Library construction through bond issues is also given support by analogy with educational bond issues. If it is appropriate for school officials to issue bonds, it is also appropriate for library officials (or others acting for them) to issue bonds. The library without doubt is an important part of our educational system.⁷ Interest in the movement for adult education

should bring larger recognition to the place of the public library in that system.⁸ Although the unity of purpose between libraries and school systems is recognized, libraries cannot justify bond issues merely because school boards have issued them.⁹ Economically, the proper procedure might have been to defray the costs of school construction from current revenues. Bond issues for school buildings cannot be categorically denounced, but there are many instances where their use must be condemned.

Likewise the resort to theoretical analysis of the proper purposes for bond issues does not provide an entirely satisfactory answer to many of the questions involved. The legitimate uses of public credit extend (1) to covering deficits resulting from unforeseen emergencies; (2) to temporary borrowings in anticipation of revenues; (3) to financing certain governmental commercial enterprises; (4) to financing emergencies, such as wars, the costs of which cannot be met from taxation alone; and (5) to financing public works or projects which are socially advantageous, although they yield no direct financial returns.¹⁰ It is easy to justify bond issues for library construction under the last heading mentioned, *but it appears very unwise to give an unqualified endorsement or a categorical denunciation of the issuance of bonds for library construction purposes.* Individual cases call for special analysis to determine, on the basis of all available facts, whether or not bond issues are in the long run the wisest and most economical policy. In some cases it undoubtedly is best to issue bonds, in other instances there is a wiser course of action.

It appears, however, from an analysis of such data as are available that the majority of libraries, excluding those financed by gifts, have been constructed from the proceeds of bond issues. No statistics are available to show the exact amount of construction by one method or another, so that the data upon which this conclusion is based result from the patching together of scattered bits of information. The data needed for this comparison are the amount of library bonds issued in a single year and the amount of taxes spent in a single year for library construction.

The preference for bond issues over tax

⁵In Brooklyn, N. Y., in 1926 the fines were \$62,416 while the total receipts were \$953,398. Total income was \$103,387, exclusive of receipts from local taxation and an unexpended balance of \$108,530 carried over from the previous year. *Twenty-Ninth Annual Report of Brooklyn Public Library*, 1926, pp. 14, 51. In Los Angeles the total revenue of the public library, exclusive of taxes, for the fiscal year ending June 30, 1927, was \$84,521. Fines constituted \$58,327 of this sum. The total revenues from taxation were \$1,102,142. *Annual Report of the Comptroller, Los Angeles*, 1927, p. 63. In St. Louis for the fiscal year ending April 11, 1927, the fines were \$19,834. The total receipts from all sources were \$1,049,130. *Annual Report of St. Louis Public Library*, 1926-27, pp. 107-08. In Chicago the fines were \$94,362 in 1927; the total receipts were \$1,730,781. The fines are paid into the pension fund for library employees. *Fifty-Sixth Annual Report of the Chicago Public Library*, 1927, pp. 10, 13.

⁶The returns from endowments in the Buffalo, N. Y. Public Library amounted to \$7,581 in 1926 out of \$314,257 in total receipts. *Thirtieth Annual Report of Buffalo Public Library*, 1927, p. 27. In Pittsburgh in 1926 the receipts from endowments amounted to \$1,759, those from gifts to \$100. The total income from all sources was \$575,952. *Thirty-First Annual Report to the Board of Trustees of the Carnegie Library of Pittsburgh*, 1926, p. 50.

⁷Cf. Bostwick, *American Public Library*, p. 31. May also be viewed as part of a system of public recreation.

⁸"There is no limit to the concern of the free state in the education of its citizens. It is as much bound to provide libraries in which the adult may continue his studies as it is to maintain schools in which as a child he may begin them." Utley, *The Levy of Library Tribute*, in Bostwick, *Library and Society*, p. 249.

⁹Cf. Wheeler, *Factors of Economy in Branch Library Building and Maintenance, Libraries*, Vol. 32, No. 1, p. 2 (Jan. 1927).

levies in the financing of libraries is easily explained. There is a prevalent belief that bond issues are used in order to spread the debt for construction activities over a period of years.¹¹ This course has the advantage of minimizing the amount of the initial outlay for construction purposes. It makes facilities currently available without antecedent years of saving or of curtailed enjoyment from other services. The facilities which are thus provided can be utilized while payment for them is being made. This, together with the lower initial outlay required, has made bond issues fairly popular with the citizenry, so that less resistance is offered to public building programs financed through bond issues than to proposals calling for increased tax levies.¹² Finally, bond issues have been employed in order to evade the effects of tax-rate limitation laws and laws for the apportionment of state taxes on the basis of local revenues or expenditures. The principal advantage of bond issues, however, is the facility with which such debts can be incurred.

The ease with which debts are accumulated is one of the principal disadvantages in the use of public credit. A bond issue becomes the first solution of every financial dilemma. It is the ready course to which resort may be had without calling for the necessity of an analysis of projected programs with their fiscal alternatives. The voters seldom scrutinize proposals for bond issues, so that many jurisdictions have been able to borrow beyond their capacities wisely to expend or easily to repay the funds voted upon them. It is only as tax rates have mounted or as corruption and waste have become conspicuous that the issuance of public credit has been curtailed.

The resort to bonds has perpetuated numerous inadequate revenue systems which have been unable to meet the mounting costs of government. Had public credit been more difficult to employ, the breakdown of these tax systems would have been more clearly revealed and their reform begun. On the other hand, the ability of governmental authorities to defray the costs of certain projects from the proceeds of bond issues has enabled them to use current revenues for purposes which otherwise would have been neglected or postponed. Frequently this policy has only produced extravagance or waste. Moreover, the employ-

ment of bond issues has been opposed because the postponement of debt payments has entailed interest charges and long-time administrative costs for handling various payments and funds. These costs cumulate perpetually if the loans are not retired, but the costs are offset by the increased value of the services so provided. Finally, the use of bond issues may so encroach upon the ordinary revenues of governmental bodies as to impair the performance of customary functions. The damage thus inflicted not only reduces the quality and efficiency of present services, but may also permanently damage the cause for which bonds are issued. This caution should not be neglected by library officials. Examples could be cited to show that the usefulness of some libraries has been greatly reduced because interest and amortization charges for construction bonds have taken too great a proportion of current revenues. In some cases from 25 to 50 per cent of the annual library income has been devoted to paying off building mortgages.¹³ A library can easily contract more debts than it can pay.

It is doubtful, as a general policy, whether bond issues should be resorted to if any considerable proportion of current income is required to pay interest and to amortize the construction debt. The writer is not qualified to state just what proportion of the current income of a library system should be devoted to building construction and what maximum should not be exceeded. The data are not available to show the relation between the carrying costs of library debts and other expenses incident to library management.¹⁴ Some of those in the field have stated, however, that one-fourth of the annual receipts is the maximum which should be devoted to debt payment.¹⁵ Certainly *no library bonds should be issued if the library will not be adequately maintained after construction.* Such a palpable lack of interest in library support has been revealed in the experience of the Carnegie Trustees,¹⁶ that those who propose bond issues for library construction should guarantee, by some means, the adequate support of this institution as a safeguard against untimely and uneconomic construction.

It seems obvious that there is little excuse for resorting to bond issue if a library building can be constructed from current revenues or from the proceeds of tax levies. This, in the long run, is undoubtedly the most economical

¹¹Wheeler, *loc. cit.*

¹²But these increased tax levies seem to be called for ere long in order adequately to support the library institution. If to these mounting levies for current expenses are added the fixed interest and amortization charges, the future does carry a larger proportion of the library costs than was incurred by those who provided the building. This has been justified, by some, by explaining that the value of the library and the quality of its service increases with the passage of time. Cf. Brown, *Manual of Library Economy*, p. 49.

¹³Cf. Sureties, An Appeal to Mr. Carnegie, *Library Assistant*, Vol. 4, pp. 202-03.

¹⁴The standard statistics collected by the American Library Association, moreover do not elicit this information.

¹⁵Brown, *op. cit.* p. 50. Wheeler, after careful observation, but without adequate data, concludes that "an expenditure of over \$1.00 in building costs for each 1000 books assured circulation is not justified out of public funds," *loc. cit.*, p. 5.

¹⁶Cf. Wheeler, *loc. cit.*, p. 1.

course for the taxpayer, but its availability is often limited by numerous conditioning factors other than the encroachment of building costs upon operating revenues. In most jurisdictions the construction of a library from tax revenue would entail an increase in the tax levy. The amount of this increase would be determined by the cost of erecting the library, and the amount of taxable property in the jurisdiction, assuming that the levy would be an addition to the property tax. The possibility of employing an increase in the tax rate to furnish the revenue for building construction would be determined, first, by the flexibility of the local revenue system. If the existing tax rate was high, the possibilities of further increases (directly or indirectly through increases in assessed valuations) would be very limited, and if library officials were forced to raise the rate to the limit of tolerance, the ill-will engendered by such increase might react unfavorably upon future claims for adequate library support. It is true that the addition to the rate necessary to build a library might be negligible, either because of a small outlay for building purposes, or because of a large amount of taxable property in the jurisdiction, but the small additional rate can only be considered relative to the total claims upon taxpayers. Those who are wont to advocate small rate increases for worthy projects often overlook the level which the total effective tax rate has attained. It frequently happens, too, that tax-rate limitation laws prevent further additions to the tax rate, thus closing the door to proposals to finance libraries out of the receipts collected from taxes.¹⁷ Moreover, the lack of taxable capacity—or the absence of taxable wealth—in some localities prevents the use of a tax program for library construction. Such districts, however, have seldom desired to erect libraries even by bond issues, for the possibilities of adequate support, either before or after the construction of a building, are decidedly limited. It should be added that if such districts, which are usually considered “pauper” sections, are to be provided with libraries, it will be through some form of philanthropy or state aid.

In some cases, however, the lack of ability to finance library construction may be due to the location, size or shape of the jurisdiction affected rather than an inherent inability to provide adequate revenues. This is often the case where independent political units have been carved within the state without considering the ability of these units to support government. If such districts are forced to abandon

library projects because they are too costly, or are required to issue bonds to secure them, it may indicate that the political unit seeking to construct the library is too small. It may be that the city which is trying to build the library should not have one, but rather that the county which includes the city should be the building unit. And if there are several towns within the county the need may be for a large main library with out-of-town branches rather than for a series of small independent, non-cooperating and poorly financed libraries. Likewise, in sparsely settled districts, the creation of special library districts composed of several counties might enable all to secure library facilities which otherwise none would enjoy. Of course in the creation of such districts it would be possible to link a few “poor” counties with a “rich” one, so that the wealth of the one could be tapped to provide library facilities for others. If the wealthiest county could thus secure a large main library while branches were established in other centers, the objections to the geographical dispersion of funds under this scheme would be lessened. The special district has interesting possibilities for benefit as well as abuse. It is none the less true, however, that the size of the political unit which is seeking to build a library becomes an important factor in determining whether the project can be undertaken and how it should be financed.

The particular body in a municipality which is to undertake the building of the library is often possessed of such limited resources that it cannot finance a building program out of current revenues. This may be due to limitations upon the tax rates which it can levy; to dependence upon almost fixed appropriations; or to the lack of taxable property. Indeed, similar limitations upon borrowing powers may be operative, so that what is said here applies both to bond issues and tax-levy programs. Such conditions indicate *prima facie*, at least, that the body in question should be very cautious about undertaking a building program. It suggests, too, the possibilities of joint enterprises with other branches of government. There is every reason why the school officials should be called upon to aid in the construction of libraries either through their power to levy taxes or to issue bonds.¹⁸ Certainly they should house school libraries.¹⁹ They can be justly called upon to finance, or help finance, branch build-

¹⁷In some localities, as in Kansas City and Grand Rapids, the libraries are controlled by school authorities. *A Survey of Libraries in the United States*, p. 122.

¹⁸Fifty-one libraries operate 228 branches in public schools. *Ibid.* The usual practice in case of such libraries is for the school authorities to defray the cost of room, light, heat, janitor service, furniture and equipment. The library authorities assume the cost of librarian, books, periodicals and library supplies. *Ibid.*, p. 164.

¹⁹It is possible that library levies might be exempted from these limitations.

ings near or adjacent to school houses if they are unwilling directly to aid the cause of adult education through general library construction.²⁰ When general education becomes the aim of school authorities there is no reason why they should not directly undertake the construction of libraries. If legal restrictions prevent, they can, of course, be removed. If the cooperation of school officials can be secured, the possibilities of immediate construction through the use of current revenues may be increased. But the possibilities of cooperation are not limited to school boards. Courts of law may be interested in providing a wing of a library building to house a law library if the building can be located near the court house. Park boards may be appealed to for the donation of appropriate sites.²¹ The financial advantages which would accrue from the cooperative endeavors of several municipal bodies should not be overlooked. Such cooperation may answer the question as to whether the library shall be paid for today or mortgaged for future payment.

The *type of buildings* to be erected may also determine the financial policy to be followed. A main building may cost too much to enable the authorities to adopt a tax program, but if the library can be constructed on a unit basis, with ample provision for future needs by the construction of subsequent units, it may be feasible to erect the library out of tax revenues. The unit plan may also be adopted in the construction of the larger branches. In the larger cities, where branch buildings are constructed almost annually, there is little or no excuse for financing constructional activities out of the proceeds of bond issues.²² The outlay recurs periodically, and after the passage of a number of years the annual interest and amortization charges on an increasing number of branches could easily equal or exceed the outlay required to construct such a building. School boards in some of the larger cities have adopted building programs which call for annual construction and annual bond issues. This practice is to be condemned and does not constitute a justification for its adoption by library boards. These boards should anticipate their needs and levy taxes, so far as possible, to meet them.²³

In Minneapolis, for example, many of the branch library buildings have been constructed from city taxes,²⁴ although the sites for a few buildings donated to the city were purchased from bond issues. Detroit, on the other hand, appears to have been making extensive use of its borrowing powers to finance library construction.²⁵ The wisdom of this policy for a city of such size and wealth may be doubted. Other examples could be cited, but our interest here is in general principles rather than in the practices of certain municipalities. In general, it is believed, however, that branch libraries in the larger cities should be erected more frequently from tax receipts than from the proceeds of bond issues.

If it is proper to increase tax levies to construct library buildings, a valid claim to increased levies can be made for all similar construction. If other departments of government should simultaneously decide to increase tax levies for building purposes, the resulting total tax rate might increase to a point where it would not be tolerated by the taxpayer. Such levies should not constitute a permanent increase in taxes, as the levy for particular construction projects would cease with their completion. It is probable, however, that when these levies were removed, others would be made to take their place, not all of which would be for the acquisition of permanent properties. The relation of levies for library construction to levies for other building construction indicates the desirability of a unified municipal building program financed by a single building fund levy until a city is adequately supplied with the facilities for housing its various departments. The tax levy for this purpose would be fairly stable, and over a period of years should not be excessive. The consolidation of all municipal building programs would make possible many economies in construction, supervision, architectural service and financing. It would require careful planning for the future, which should produce not only better service but also better buildings.²⁶ It would be possible in this way to allocate construction dates according to need and to create building fund reserves in those years in which new construction was not needed. There are objections to such a policy, to be sure, but the advantages of such a consolidated program should be considered by municipalities.

²⁰Many of the school branches are also designed to serve the general public and 99 of the 228 branches have separate entrances leading from the streets to the reading rooms to facilitate this service. In Kenosha, Wis., and Joplin, Mo., separate buildings for some of the branch libraries are maintained on school grounds. *Ibid.*

²¹The Logan Park Branch Library in Minneapolis was housed in a building constructed jointly with the Park Board.

²²Lutz, *op. cit.*, pp. 524-25.

²³Practically two-thirds of the libraries reporting to the A. L. A. Survey stated that their branches had been established in accordance with a definite program of extension. It is significant that a majority of the cities cited as following this practice are not reported in Table as having outstanding bond issues. *A Survey of Libraries in the United States*, pp. 116-17.

²⁴Report of Minneapolis Public Library, 1915, p. 71 ff.

²⁵See Table.

²⁶In 1926 the City Budget Committee of Buffalo asked all of the departments of the City, including the library, to make an estimate of the capital investment it would call upon the city to make during the next 10 years. Cf. *Thirtieth Annual Report of Buffalo Public Library*, 1927, p. 12.

When all of these alternatives are exhausted the possibility of a bond program remains. Once a bond program has been adopted, numerous questions arise. The type of bonds to be issued must be determined; the manner and conditions of flotation must be decided upon; the funds for the amortization of the debt must be set aside or appropriated in the budget; the choice between serial bonds or sinking funds must be made, and shortly after the issuance of the bonds questions pertaining to the retirement, refunding or conversion of the debt will arise to demand decision. The answers to these questions relative to the practices current in library circles can scarcely be made. Whatever answer would be given would be on the basis of general policies developed in other fields of government finance. Perhaps the lessons there learned would be useful to librarians, but in the absence of information relating to library practices this type of analysis is not wholly desirable. Before attacking these problems, it appears best to wait until more data upon library bond issues have been collected. It may not be too much to hope that in the future the American Library Association may undertake the collection of financial statistics which may be used as the basis of research in answering some of these questions.

In this analysis of the financial aspects of the library building program attention has been called to some of the factors to be considered before resorting to bond issues. The bond proposal is not supportable in the first instance merely by the citation of general fiscal maxims or principles which affirm the validity of the use of public credit for public work or for the acquisition of public property. The issuance of bonds is rather to be viewed as a course of last resort for the construction of library buildings. This conception of the province of bond issues in library finance is in no way a disparagement of a bond program; it is merely a declaration that bond issues should not be tried until other courses have at least been examined and their possibilities exhausted. All too frequently the easy road to library construction has been through bond issues with no consideration of an alternative policy. Sound planning seems to call for a different procedure, or at least a preliminary analysis of the entire fiscal situation of the political units involved before bonds are issued. Thus the financial policy of library boards may be placed upon a surer footing and some abuses of public credit may be checked.

PUBLIC LIBRARY BOND ISSUES BY CITIES AND STATES¹

^aLibrary notes.

The New Library Building, University of North Carolina

By Donald Coney

Assistant Librarian, University of North Carolina

THE dedication of the new library building of the University of North Carolina at Chapel Hill, October 19th, marked the successful culmination of many years' work on the part of Dr. L. R. Wilson, Librarian, and the university authorities. The building represents the cooperation of the library staff, the architects, the contractor and the university building department, which made much of the equipment. The architects are Atwood & Nash, Inc., of Chapel Hill, with McKim, Mead & White as consultant.

Facing north, the building stands at the foot of a gently sloping quadrangle, which will be

eventually bounded by classroom buildings. The main section, faced with Indiana limestone, is 208 feet long, the height at the dome 85 feet, at the ends 60 feet. Due to the contour of the ground, all basement rooms have full-size windows above ground, making in effect a four-story structure.

Expansion is amply provided for at the back in wings from the ends of the main section as indicated by dotted lines on the plans. The cost of the building and new equipment will total \$625,000. Its seating capacity is one thousand readers, or 38 per cent of the present enrollment, which is very little below the peak enrollment of two years ago.

Arrangement

Undergraduate quarters are confined to the main floor. All reserve books are used in the reading room to the left of the main entrance, which seats 160 readers and shelves 4000

available here for the departmental offices is recognized as not permanently adequate, it is intended to expand these quarters with the extension of the building.

Conveniences for the staff were carefully studied. Each office is equipped with a private

The main reading room. The columns are a representation of green Tinos marble with black marble bases and bronze capitals. Note newspaper holders set in shelves at left

volumes. The rooms to the right house two departmental libraries brought into the building on its completion which are largely used by undergraduates.

The Rural Social Economics Department, which supports a large and highly specialized library, is housed in the basement with the reading room of the North Carolina Collection and the Library Extension Department.

Readers intending to use books from the stack or the reference collection, or graduate students on their way to the carrells, go to the second floor, where the delivery room, occupying an intermediate position, acts as a vestibule to the main reading room or to the stack.

Administrative quarters are invariably in the intermediate part of the building, between the main section and the stack. While the space

lavatory, coat closet, or locker space. The stairwell toilets at the ends of the building are reserved for staff use on the first and second floors. A staff room, equipped with electric plate, sink, china closet, comfortable chairs and a sofa, has been provided in the basement.

Walls and Floors

The walls of the offices and secondary public rooms are finished in a light yellow rough plaster, the color being an integral part of the plaster so that scratches do not show white. The ceilings are white.

In the delivery room and adjoining corridors the walls are artificial travertine with ornamental plaster ceilings. The main reading room received special treatment, the walls above the

book cases being acoustical plaster designed to deaden sound. The ceiling is also of this plaster, and in addition is backed with a layer of mineral wool for insulation against heat and cold.

Floors in rooms of secondary importance are covered with cork carpet. This was chosen because of its low cost, its great resilience, making for long life and quiet, and its neutral brown, which approximates North Carolina clay in color.

All floors on the second floor, except the offices which are cork carpet and the main stair landings which are travertine, are finished in rubber tile in two shades of marbled brown. Rubber base has been employed except where marble or travertine is called for. The corridors of the first floor and basement are terrazzo. The entrance vestibule is floored with Tennessee marble.

Stack

The stack room is 72 feet high, 82 feet wide and 36 feet deep. It stands at the rear of the structure, south of which ample expansion space has been allowed. It is designed to contain nine tiers of Snead Standard Type "A" stack, $7\frac{1}{2}$ feet to the tier, with aisles 34 inches wide. Five of the possible nine tiers have been completed. The first floor in the basement lacks shelving, while a temporary ceiling has been laid over the sixth floor, which is contiguous with the second floor of the main building. The capacity of the present stack is over 300,000 volumes. By completing the unfinished floors the capacity can be increased by more than 150,000 volumes.

The roof is carried on steel columns en-

cased in brick. The stack proper is carried on its own foundations, the lateral thrust only being borne by the walls. The south wall can be removed and the stack continued in that direction.

The stack, like the whole building, is heated by steam. Carrells, which line the walls on each floor are provided with hand-controlled radiators. A thermostat located midway up the stack controls radiators and cold air shutters in the blower system which draws stale air out of the top floor of the stack and forces it through ducts down to the first floor, where it recirculates as fresh air.

All metal work in the stack, except the shelves, which are black, is painted glossy yellow. This was preferred to gray because of its greater light-reflecting and dirt-resisting qualities. Floors are pink Kasota stone. Ceilings were spray-painted with the metal work to increase reflection.

A Distributor Station. Car to right has just unloaded a book which is about to slide into the receiving pocket. As car passes this floor, unloading comb returns to normal perpendicular

Stack lighting called for a good deal of study. The most satisfactory and least expensive fixtures discovered are 60-watt interior frosted lamps with slightly conical white porcelain reflectors. These furnish a fairly even illumination to the bottom as well as to the top shelves at a low initial cost.

Each carrell is equipped with a metal book shelf, a study table supported on long brackets, a chair and drop cord lamp. They are open to the aisle. Carrells on the east and west sides are 5 by 3 feet in plan; those on the south are 4 feet 3 inches by 3 feet. The stack windows are the metal frame type with one movable pane; the glass is ribbed to diffuse light. Venetian

blinds are used here as well as in all other parts of the building.

Additional stack space is gained under the delivery room area, where three floors of stack from the old building were installed.

Book Transportation

Transportation of books is handled by three agencies: a continuous stair, two flights to the stack floor, connects the stack from top to bottom; beside this stair runs the elevator shaft equipped with an Otis automatic machine; just

inside the stack to the left of the central entrance is the shaft of the Snead Book Distributor. This distributor can be used to send books from the various floors to the desk, or to redistribute books from the desk to the floors.

Communication

All rooms and two stack floors are linked with a Strowger Automatic telephone system, which has been connected with the town system so that the same instrument may be used for both inside and outside calls.

A Branch Building Program in Providence

By Clarence E. Sherman

Associate Librarian, Providence Public Library, Rhode Island

To the Providence Public Library, the year 1928 had a double significance. First, it marked the close of the first half-century of its growth and development. But perhaps even greater in measure of importance, the first branch library building was erected. More than twenty years ago the Providence Public Library began its policy of establishing branches and sub-branches in the outlying neighborhoods of the city until nine branches and three sub-branches were in operation.

But all were in quarters not planned for library purposes—school buildings, a store, community centers, etc. Only one has occupied a separate building, and that one is a renovated dwelling house.

Providence, in its development of branch library buildings, has been one of the most retarded cities of its size in the country. It did not share in the distribution of the grants of the Carnegie Corporation, and as the li-

brary is not municipally operated, financial support from the city government has been not so readily obtained as in most other American cities.

Charging desk and librarian's office in the Wanskuck Branch, Providence

As the result of a careful study of branch conditions, the trustees of the library voted in 1927 to start a program of branch library construction, which, if completed, would place modern branch buildings in seven sections of the city as "regional" branches, with smaller branches in as many junior high schools to be erected in Providence,

breaking down the long distances between the regional branches. The first in this system of structures was completed and occupied in November. It was hoped that this might be both a demonstration of branch library objectives and an influence in securing sufficient funds from public-spirited benefactors or from the city government to proceed further with the building program.

This branch is located in the extreme northwestern section of the city, in an area very much affected by the presence of the Wanskuck Mills. In 1910 the Providence Public Library took over a library operated by the

¹Another branch building was provided in 1928 by reconstructing a church edifice. In it, there was also erected a book storage reservoir with a capacity for 300,000 volumes. *THE LIBRARY JOURNAL* 54:13, 1929.

mill for its own employees, and since that date this branch's growing activities had expanded far beyond the limits of the quarters placed at the library's disposal by the Wanskuck Company. As the Wanskuck Branch was in most pressing need of relief, and because the community is at a distant point from the Central Library, it was decided to erect the first branch library there.

The site selected was owned by the Wanskuck Company, and it was transferred to the Providence Public Library at a considerably reduced price. The situation is most desirable for library purposes. It is near the junction of four streets (one with a street car line), adjacent to a platoon school and a municipal play-

ground. The site, a corner lot, has a frontage of 110 feet and a depth of 100 feet.

As erected, the building is 81 feet 6 inches long with a depth of 43 feet plus a 16-foot projection at the rear. The construction is of Harvard brick, laid in Flemish bond, with limestone trim, and columns of wood. The style is Rhode Island Colonial. Purposely set low and with 10 feet of the sidewalk, the building has a decidedly intimate and inviting appearance, more like a friendly clubhouse than a severely dignified temple of knowledge.

As the visitor leaves the sidewalk and steps up to the portico, two small show windows catch the eye. Planned as a part of the front windows, they detract not a bit from the architectural

Reference Room in the Wanskuck Branch at Providence

charm of the façade, but rather add to it.

Within the front entrance, attractively finished in Napoleon gray marble, incoming traffic goes to the right, passing through a glass door and finds itself immediately at the very center of things—the librarian's office and the charging desk.

dows have draw curtains of casement cloth.

Approach to the basement from the main floor is made via a stairway at the rear. There is also a direct entrance from the ground level. In the basement, provisions have been made for a community room, seating 125; a small conference or committee room; locker, toilet,

The Wanskuck Branch, Providence, erected in 1928

At the right of the delivery room, separated by a glass partition, is the children's reading room (40 feet by 28 feet 6 inches), with shelving for 6500 books and tables and chairs for thirty-six readers. At the opposite side of the building is the reading room for adults with similar provisions for books and readers. Windows stop at the tops of the bookcases at rear and sides of the main floor, with low windows and window seats on the front. There is a fireplace in each reading room. At the back center on this floor is a reference room (19 feet by 15 feet) with seats for twelve readers.

The ceiling of the main floor is 20 feet high at the center, gracefully arched to the front and rear walls. The floor covering is of battleship linoleum in brown jaspé tone. The wood trim and furniture is oak in light green finish. Win-

and rest rooms for the staff; shipping room; book storage room (capacity 10,000); heating plant (oil burning); janitor's room, and public toilets. The trustees of the Public Library have offered to build five additional branches to replace present inadequate quarters, expending the necessary funds from the library's endowment, provided the city government will make an annual increase in the Public Library's appropriation sufficient to reimburse the library for loss of income and also to meet the increase in cost of operating a larger branch library in each instance. The annual increase settled upon it is \$10,000 for each new branch erected. The city government, by appropriation, made it possible for the Public Library to build another branch building during 1929.

Nebraska Normal College Library

By Mrs. Anna B. Bright

Librarian

THE LIBRARY of the State Normal College was first housed in the east end of the library room (later an assembly room) vacated in September, and it was largely a matter of each teacher furnishing his and her own library. There was a fine private collection in the room of Doctor Stough, head of the language department, which contained some rare old volumes and was larger than the one in the assembly room. When the library collection grew too large to be kept in the assembly room, it was moved again. In 1914 the first addition on the west of this building was completed and the assembly room was moved to its present location. The library was then moved back to the old assembly room and occupied the entire room.

Miss Anna Price, from the University of Illinois library school, was the first librarian. The library now began to take form; suitable furniture was purchased, the books were classified and cataloged and a well-selected reference collection was started. Miss Price was followed by Miss Harris.

When more room was needed, the library expanded on the east and annexed one of the

laboratory rooms. This became the librarian's office and was soon filled with the overflow from the reading room. There was no more room for expansion. The library was surrounded by the science department, the reading room was overcrowded, chairs were tucked into every corner and even the floor began to creak and groan at every step. President Elliott wanted and has obtained a new library building,

a building that is an ornament to the campus and a credit to the growing State normal college. The reading room is on the first floor and has a seating capacity of 200. The floor is covered with brown battleship linoleum and the walls are tinted a pleasing shade to harmonize with the frieze and cornice, which are

*The Nebraska State Normal College Library,
Chadron, Neb.*

touched with terra-cotta. The tables, chairs, desk and cases have a golden oak finish. There is indirect lighting and a fine ventilating system, which insures plenty of fresh air without any extremes of heat or cold. The reference books and bound magazines are arranged round the walls. The reserve section is back of the charging desk. The stack room is below the reading room, with a capacity of 60,000 vols.

"We dedicate this library to that high and worthy task of training the mind to think honestly, soberly, clearly, thoroughly, and sanely. We dedicate this institution and these books to the task of supplying that stimulation of the intellect of the faculty and student body and citizens of this community to the end that they may give of their training thus received to the solution of the many problems confronting them whether they be in the realm of the social, the political, the moral, or the intellectual. 'God, give us men who can think,' we pray. The answer to that prayer is found in no small measure in the degree to which the library ministers to the feeding of our minds. Second, we dedicate this library to the high and worthy task of teaching men and women how to more efficiently perform their tasks as students in the classroom and as students out in the active fields of human endeavor. It is not alone sufficient that we afford here the 'means of grace.' It is not alone sufficient that we gather together in vast storehouses any proportionate amount of the sum total of human knowledge as comprehended on the printed page. Just this and no more still would leave this institution as a thing that is dead. Our young people must be taught the uses to which these materials may be put. They must be taught how to use and how to avail themselves of the riches of the storehouse and, furthermore, how they may use these facilities and those of other similar institutions in the years that lie ahead."

Extracts from address given at dedication of Nebraska Normal College Library by G. W. Rosenlof.

THE LIBRARY JOURNAL

January 15, 1930

Editorial Forum

THE "learned societies," Historical, Economic and other, have come into the settled practice of holding their annual meeting during the holiday week, and though the A. L. A., like the N. E. A., has its great gathering mid-year, the mid-winter library meeting at Chicago, held this year the last two days of December, brought together an attendance approximating four hundred, exceeding in size the full meetings of most of the other societies. Incidentally, the Council suggested that the mid-winter meeting might usefully be held from time to time in another than the Headquarters city. A chief interest this year was in the progress of the endowment fund and the increase of membership to meet the conditions of the Carnegie Corporation in permitting each added membership to be capitalized at twenty times the annual return toward making up the million dollars necessary to obtain the added million donation conditionally promised by the corporation. Mr. Utley, Newberry librarian, as chairman of the committee, pointed out that 45,000,000 of our people are still without library facilities as emphasizing the need for further extension work on the part of the A. L. A. The co-operation of the League of Library Commissions in this endeavor was evidenced in the donation of \$1,000 from its funds for A. L. A. endowment.

* * *

THE MEETINGS devoted to the problems of large libraries presented so attractive a program and personnel that the attendance here of nearly three hundred rivaled the full gathering, and to some extent defeated the purpose of this plan, which was to bring together the "large librarians" in intimate and informal discussion of the problems peculiar to administration on a large scale. While these meetings are not intended to be exclusive, they are intended to be selective, and to fulfill their purpose it may be necessary to have it understood that, while they are open meetings, only the

presence of those concerned with the problems of the libraries in the great cities are expected to be present, even as hearers. With the exception of the eternal question of fiction purchasing, the meetings dealt almost entirely with such administrative questions. More than one large library has suffered from or been threatened with a budget cut, and Mr. Ranck's view, that the best remedy was to curtail bookbuying or close branches, was preferable to demoralizing the staff by discharges or reduction of salaries, as this brought the question of the value of the library directly to citizens and taxpayers. With this question there was linked up that of departmental organization, always costly, which in some libraries has been carried very far, and which was vigorously opposed by Dr. Locke of Toronto with his always delightful sense of humor.

* * *

IN PROMOTING the endowment fund, it has proved desirable to acquaint librarians throughout the country with the methods and workings of Headquarters by holding meetings, of which one of the most interesting was that in New York last week, which brought together in the Chamber of Commerce Hall some two hundred librarians and others interested in libraries, and resulted in an interesting fire of questions, as called for by those in charge of the meeting. This scheme of open meetings for the discussion of A. L. A. problems should be useful, in line with Mr. Dana's criticism and the work of Mr. Compton's committee. One pertinent question was pressed home by a trustee, who asked what curtailment Headquarters would favor in case the endowment was confined to the present million and ordinary returns in the event that the second and third millions were not obtained, and although the answer was not fully clear, the indication seemed to be that emphasis should be put on library extension and possibly adult education, "a noble experiment," be minimized as an A. L. A. project and left more to other organizations which deal with that important subject. It is to be hoped that these meetings will be carried through the various library centers of the country, both as a means of informing librarians and of stimulating public interest in the A. L. A. through librarians thus better informed as to the work of that national association.

* * *

AN INTERESTING and creditable development in the library field has been the cooperation which has come about between book publishers and librarians, evidenced especially in the remarkable organization which has now been

achieved throughout the country in Children's Book Week. John Macrae, president of E. P. Dutton & Co., which has published largely in children's literature, has taken a welcome initiative in offering \$1,000 yearly for at least three years as a fellowship fund to be used in training children's librarians. The fund is named in honor of Edward Payson Dutton, the founder and for sixty-five years the head of this publishing house, and is happy both in its name and aim. Mr. Macrae accompanies the gift with a cordial letter, in which he says: "The stupendous good results of libraries with children's sections, carefully and properly equipped and carried out, is in my opinion beyond the reach of imagination." May other publishers follow this example! The Caroline M. Hewins Scholarship Fund, established in honor of that great lover of children, has already done good work in providing a scholarship in the same field, as is set forth on another page, and it may be hoped that Rhode Island librarians will take the initiative in a similar memorial to that other woman librarian, Mrs. Minerva W. Saunders of Pawtucket, who is to be credited with the origin, as is Mrs. Hewins with the wider development, of the children's room within libraries.

* * *

AN IMPORTANT feature of the report of the Librarian of Congress, which should not be overlooked, is the modest statement of Dr. Putnam of his remarkable achievement in bringing into the library service experts of the first rank in the several departments, a scheme started three years ago with the volunteer enlistment of Dr. E. C. Richardson as Honorary Consultant in Bibliography, and has now been developed in successive stages in two directions. Chairs in Music, Fine Arts and American History have already been made possible by generous private endowments which, added to the stipend of the government, induced the cooperation of such men as Carl Engel, Dr. Holland, and Professor Jameson in the combined work of the administration of the department and of expert counsel to those engaged in research in the respective fields. The recent Guggenheim gift has made possible the service of Dr. Zahm, especially qualified as an aviation expert in theory and practice, to fill the "chair of aeronautics," which, with the generous provision from this fund, will build up what will prove to be possibly the most important library in the world in this special field.

The list of consultants now includes, in Spanish Literature, Señor Riaño; in English Literature, Dr. De Wolfe Howe; in Classical

Literature, Professor Fowler; in European History, Professor Bourne; in Economics, Dr. Victor Clark; in Science, Prof. Alfred Lane, and in Philosophy, Professor Hammond, who will not have administrative functions but will serve as research experts for the help of scholars. Worthington C. Ford returns to the Library of Congress in like service with reference to the collection of source material in American history brought under the Rockefeller gift. While it should be kept in mind that the Library of Congress is not establishing a teaching university, it may be said that few universities can boast of so remarkable an equipment of scholarship as the names and records of these men indicate.

* * *

A MOST important desideratum in the library field, as has often been pointed out, is the prevention of waste of duplication of time and effort by those pursuing similar lines of investigation without knowledge of what another is doing. Mr. Severance's Institute Committee for Encouragement of Research has stepped into the breach of the danger by undertaking both to suggest topics for library research, as in the themes in library-school work, and to act as a clearing house for those having a specific subject in mind by answering their queries as to whether anyone else is working in the same field. His fertile mind has suggested a remarkable number and variety of topics, beyond possibility of inclusion in our columns, but those presented herewith show the wide range possible to research students and constitute a stimulus to those who would like to do a good piece of work for the library profession at large.

* * *

THE DEVELOPMENT of the brief Index to Current Literature and Bibliography into a new department which will be more comprehensive and will also include excerpts or annotations will, it is hoped, prove of interest and value to the profession. It is intended to publish this mid-monthly, while the forecast of publications for the ensuing month will be continued in the initial number of each month. A revision of the American Library Directory is in hand, to be published early in 1930 as returns are received and can be edited, and prompt cooperation of all libraries is asked in supplying the information desired. It is intended to include in this volume the list of special collections, which was a feature of the Supplement in 1928 to the Directory of 1927, and which has proved of considerable value to those interested in these special fields.

Librarian Authors

HARRY LYMAN KOOPMAN, librarian of Brown University since 1893, has become known throughout the library world for his work at Brown and for his place among American authors and poets. Born in the old shipbuilding town of Freeport, Me., he was educated in the common schools of Freeport and fitted for college at its high school. At the age of sixteen he entered Colby College and graduated in 1880. In 1883 he received his A. M. and in 1908 his Litt. D., and Harvard University gave him an A. M. in 1893. He wrote his first published poem in December, 1875, and in his freshman year at college began to contribute in both prose and verse to the college monthly, later becoming one of the editors. His graduation part, an English oration, took the unusual form of a poem.

After a brief experience at teaching, he entered the Astor Library in October, 1881, in charge of periodicals and continuations. Later he assisted at the reference desk. At the beginning of 1883 he went to Cornell as a cataloger and in that same year he published his first book, an ode to Farragut, entitled *The Great Admiral*. In the spring of 1884 he went to Columbia to be a cataloger on Mr. Dewey's staff and in the fall of 1885 became cataloger at the Rutgers College Library. At the beginning of February, 1886, he left Rutgers to catalog the special library of George P. Marsh at the University of Vermont and the result of his labors were published in 1892 in a royal octavo volume. In the meantime he had spent several years in cataloging the books of the University library itself. In 1887 he put forth his next two volumes of verse, *Orestes and Other Poems* and *Woman's Will, with Other Poems*. In 1889 he married Helene Luise Mayser of Ulm, Germany, and their two children were born at Burlington.

On the first of July, 1893, he became Librarian of Brown University at Providence, where he is now completing his thirty-seventh year, at the close of which he must retire under the rules of the University. In his present position he has published the *Historical Catalog of Brown University*, 1895; *The Mastery of Books*, 1896; the three volumes of poetry, *Morrow Songs*, 1898, *At the Gates of the Century*, 1905, and *The Librarian and the Desert*, 1908; *Handbook of the Library of Brown University*, 1910; a collection of essays, *The Book-lover and His Books*, 1917; *Hesperia, an American National Poem*, 2 v., 1919-1924; *The Guerdon, a Poem*, 1921; a tribute in an imitation of Chaucerian verse in the Wilberforce Eames memorial volume, entitled *The Clerk of*

HARRY LYMAN KOOPMAN

Breuklyn, 1924; a prose poem *The Narragansett Country*, 1927, and a lecture, *The Eternal Pilgrim*, given on the three hundredth anniversary of the birth of John Bunyan in 1928. He also edited a volume entitled *Lincoln Letters, Hitherto Unpublished, in the Library of Brown University*, 1927.

He was associate editor of the *Brown Alumni Monthly* from 1905-1917 and has been John Hay Professor of Bibliography at Brown since 1908. He was president of the Massachusetts Library Club from 1900-1901 and of the Rhode Island Library Association from 1904-1907. Since the spring of 1926 he has been a constant contributor to the editorial page of *The Providence Journal*.

Doctor Koopman states that he has had two of the greatest satisfactions that a librarian can enjoy, one a new library building and the other his "disciples." "I have had the good fortune," he states, "to be able to start some of my student assistants on a library career." His most highly appreciated professional recognition was his election to the presidency of the American Library Institute. His three years' term began in January, 1928.

A. L. A. Midwinter Meeting—I

Council

IN A two-day conference the Council of the American Library Association decided many questions of importance. "A Code of Library Ethics" as to the management of libraries and the professional conduct of librarians was presented by Josephine A. Rathbone, Chairman of the A. L. A. committee, which has made a study of the subject. The title was changed to "A Suggested Code of Library Ethics" and accepted as read. A report regarding the placing of D. C. numbers on L. C. cards and further cooperative cataloging was presented by Eliza Lamb, University of Chicago Libraries. A recommendation from the Hospital Libraries Committee for affiliation with the American Hospital Association was referred back to the committee for a more definite presentation. May Wood Wigginton, Chairman of the Subscription Book Committee, reported that the first issue of the *Bulletin*, reviewing sets which are recommended, as well as those which are not, will be published this month. Sets of books about which information will be given in the first number include: *America: Great crises in our history, told by its makers*; *American Educator*; *Book of Popular Science*; *Book of Rural Life*; *Book Trails for Baby Feet*; *Circle of Knowledge*; *Classroom Teacher*; *Encyclopædia Britannica*; *Lincoln Library of Essential Information*; *Lives of Game Animals*; *Mythology of All Races*; *New Century Book of Facts*; *Standard Dictionary of Facts*; *Volume Library*; *World Book Encyclopedia*. In addition, about two dozen encyclopedias or subscription sets which have received authoritative reviews in other periodicals will be indexed in the first number of the new bulletin. The National Association of Book Publishers has also appointed a subscription books committee which has offered to assist the A. L. A. committee in its new venture.

O. R. Howard Thomson, from the James V. Brown Library of Williamsport, Pa., gave a report from the Fire Insurance Committee, and Mr. Milam reported on recommendations to establish a statistical bureau at A. L. A. Headquarters. George B. Utley, Librarian of the Newberry Library, reported on the present status of the million dollar endowment fund sought by the association to carry on its work. The Carnegie Corporation has already provided \$1,000,000 for the American Library Association as the first contribution toward an endowment program of \$3,000,000. A second \$1,000,000 is in sight as soon as the public has evidenced

its interest by subscribing an equal amount. One-fifth of the necessary amount has been raised. Mr. Milam reported on the new constitution of the International Federation of Library Associations. Ralph Munn, Director of the Carnegie Library at Pittsburgh, presented a protest against that part of Section 305 of the Tariff Bill which provides for the exclusion of books urging treason, insurrection or forcible resistance to any law of the United States which was made to both the House and Senate by the Federal and State Relations Committee of the American Library Association. It was felt that many books invaluable to scholarship might be brought under the definition and recent decisions of customs officials did not inspire confidence. An amendment to the Tariff Bill was adopted by the Senate, October 11, by the narrow margin of two votes, which excludes only those books urging forcible resistance to laws of the United States or containing threats against the life of any person in this country. This modifies the more general clause, considered so objectionable by scholars and librarians, which permitted exclusion of any books advocating treason or insurrection. Harry M. Lydenberg, Assistant Director of the New York Public Library, presented an approval of all periodicals and books printed on rag paper, and Forrest Spaulding reported on plans for the World Fair in 1933. Effie Power, Director of Work with Children in Cleveland, reported the acceptance of a new scholarship of \$1,000 offered by the publishers, E. P. Dutton & Co., toward a year of special training in children's work by the Section of the A. L. A. for Library Work with Children. The League of Library Commissions reported a donation of \$1,000 to be given toward the A. L. A. endowment fund. The motion for this donation was made by Mrs. Elizabeth Claypool Earl. The concluding recommendation was to the Executive Board that the midwinter meetings might be held in some city other than Chicago.

Executive Board

THE FOLLOWING three items from the Executive Board are all that are ready for publication at the present time: J. C. M. Hanson, Professor, Graduate Library School, University of Chicago, has accepted the temporary chairmanship of an editorial board for the proposed "American Library Association Journal of Discussion"; E. H. Anderson, Director, New York Public Library, and Charles C. Williamson, Director of Libraries, Columbia Univer-

sity, have been appointed American Library Association delegates to the fiftieth anniversary celebration of the American Society of Mechanical Engineers to be held April 7 to 9 at Washington, D. C.; L. L. Dickerson, Librarian, Indianapolis Public Library, has been appointed a member of the Board on the Library and Adult Education to take the place of the late W. O. Carson.

Librarians of Large Public Libraries

LIBRARIANS of Large Public Libraries held two sessions at the midwinter meeting on December 30 at the Drake Hotel, Chicago, Ill. Paul North Rice, Librarian of the Dayton Public Library, presided.

Four topics were discussed at the meeting Monday afternoon. Samuel H. Ranck, Librarian of the Grand Rapids Public Library, Michigan, started the discussion of "How Should a Library Handle a Serious Cut In Its Budget?" by telling how his library managed a serious cut of \$22,000 during the last year. Mr. Ranck feels that the most important things in a case like this are to keep the staff together and cut down on service to the public in books and hours of opening. This paper will be printed in *THE LIBRARY JOURNAL* at a later period.

In the absence of Miss Eastman, Librarian of the Cleveland Public Library, who was to open the discussion on "Departmentalization of the Largest Public Libraries," Everett P. Perry, Librarian of the Los Angeles Public Library, told of the Los Angeles growth in departments from five to the present twenty-six, with a specialist for each public department. Doctor Locke of Toronto argued against specialization and Mr. Wheeler of Baltimore stated that the influence of the building itself is sometimes overestimated in this matter of specialization. He suggested that it is more important to have a first-class person in charge than to put a special department in a separate room. In the general discussion that followed it was the opinion that there must be considerable duplication on books and periodicals in a departmentalized library, that it was expensive and that readers were more interested in the contents of the books than with the physical division of books.

The third subject to be discussed was suggested by the letter of the late John Cotton Dana in *The New York Times*, suggesting the removal of fiction from public libraries. Carl B. Roden, Librarian of the Chicago Public Library, led the discussion and stated that in his library during the past two years they had been cutting down on the number of fiction ordered, and that they had received practically

no complaints from the public. He stated that out of the 1575 books of fiction published during 1929, that Chicago had bought only 253 titles. In the general discussion, Ralph Munn of Pittsburgh stated that a test had been made in Pittsburgh to see how many people borrowed fiction, and that it was found to be only a small proportion of the total number of borrowers. Only 10 per cent of the Grand Rapids borrowers are responsible for the great use of fiction, according to Mr. Ranck. Mr. Strohm of Detroit remarked on the trash to be found in the so-called non-fiction books, and stated that as the library served people it had a right to provide what its borrowers wish. Mr. Dudgeon of Milwaukee stated that in discriminating against fiction we are Puritanic. "Speaking of myself," he said, "I have been educated more by fiction than by any other form of reading."

Forrest Spaulding of Des Moines, Iowa, led the discussion on book review meetings, and mentioned different plans which had been used in his library. Miss Wigginston of Denver felt that all means of introducing books to staff members are good. Experiences from Cleveland and Chicago told of alternate meetings held by two groups so as to bring in all staff members.

At the Monday evening session Harry M. Lydenberg, Assistant Director of the New York Public Library, led the discussion on reserve collections. A collection of 200,000 volumes has gradually been accumulated in New York which may be drawn upon by any department in the library. Every book that is not called for oftener than once a year is sent to this collection from all branches.

Clarence E. Sherman, Associate Librarian of the Providence Public Library, led the discussion of "Is there a need of a return of the library spirit in large libraries?" He felt that librarians are no longer book-minded but business engineers. Doctor Locke of Toronto stated that the librarian who does not know books loses his power over the public because they expect him to be able to talk about them.

The next topic of discussion was "Expense of Cataloging," led by Ralph Munn, Director of the Carnegie Library at Pittsburgh. His problem was, "Could not libraries cut down considerably on the expense of cataloging two classes of books, foreign books and children's books? Would it not do to have a mere author list of books in other languages than English, French, German and Spanish?" Mr. Munn covered this problem with detail, and in the general discussion that followed it was the general opinion that children's books needed to be cataloged in full, with perhaps the exception of picture books and easy books. As for the

foreign books, a mere author list would not be satisfactory, as more often the foreign borrower knew the publisher or the title of the book than the author. This discussion led into an informal discussion of insurance for card catalogs and insurance for libraries in general. Mr. Spaulding of Des Moines told of a policy costing approximately \$25 a year that covered small losses, damages to exhibits, etc. In several libraries (Albany, Milwaukee, St. Paul, Springfield, Mass., Cleveland and Des Moines) there is no insurance on library buildings and contents, but in Cleveland an emergency fund is kept in reserve to cover such cases.

There were several other suggested topics for discussion, but no time to cover them. The committee elected for the following year were: Chairman, Ralph Munn; Forrest Spaulding, Thomas Ayer.

College Librarians

THE midwinter conference of the College Librarians of the Middle West was held Monday evening, Dec. 30, C. P. Baber, Kansas State Teachers College, Emporia, presiding. The attendance was quite large and the informal discussion of the papers proved their interest. The first paper was read by Edna L. Goss of the University of Minnesota on "Cataloging of Serials and Government Documents." In this she discussed ably various guides and reference books that will help the cataloger with these publications. After this she discussed some of the many perplexing problems of this large group. This was followed by Willis H. Kerr, of Pomona College, on "Libraries for a Group of Associated Colleges." In this he, briefly but interestingly, spoke of the plan to unite the three independent college libraries of Claremont, Cal., in certain phases, as buying books costing \$10 or more, centralization of bookbinding, and many other parts of library work that can be dealt with by one central library without the other libraries losing their own identities. Miss Jessie Smith, Hiram College, read a paper on "Student Assistants in a Small College Library." In this she spoke of her own interesting work at Hiram with her student assistants, describing the course of instruction given to a small, select group, and then of the work of a very select few of this class in the college. She likewise spoke with feeling on the loss to librarianship of many of the student assistants after leaving college, due to lack of interest in them in the larger libraries after graduation. The report of the nominating committee was accepted. The officers for the coming year are as follows: Chairman, Jessie J. Smith, Hiram College Library, Hiram Ohio; Secretary-Treasurer, Jessie

Jenks, Illinois College Library, Jacksonville; C. P. Baber, Kansas State Teachers College Library, Emporia, third member of the committee.

University and Reference Librarians

THE JOINT session of the University and Reference Librarians and College Librarians of the Middle West was held Monday afternoon, Dec. 30, with about 250 persons present. The first paper was by Anita M. Hostetter, American Library Association, on "Opportunities for Advanced Study: A Discussion of Scholarships Available for Library Workers." Miss Hostetter briefly but ably described scholarships open to librarians from those wanting advanced study to those who are just starting out. In a very interesting, informal talk on "Pioneering in a College Library," Elizabeth Howard West, Texas Technological College, told of her experience in the Panhandle region of Texas, from the beginning of the library, in August, 1925, to its present state. This was followed by H. W. Wilson, of the H. W. Wilson Company of New York City, on "Cooperative Periodical Exchange." His idea, in brief, is that libraries send to a designated clearing-house a list of duplicates and unwanted sets, listing each title separately, according to the Union List entry. These lists will be alphabetized and copies made to be sent to those libraries that may be interested in either buying or exchanging sets. The clearing-house will handle the selling and exchanging, with an expense rate fixed as the Wilson Company does for its services. For the individual or scattered issues of magazines, he suggested that the Wilson Want List, as compiled for several years, be used as a basis as to what is worth exchanging or selling. As H. H. B. Meyer, of the Library of Congress, was not present to speak on the new British Museum Catalog, James T. Gerould, of Princeton University, spoke briefly on the value and use of the British Museum Catalog. At the same time, he urged libraries to buy this valuable bibliographical aid. So far only 144 sets have been ordered, and 200 are needed to receive the minimum price. He then spoke on the "List of Serial Publications of Foreign Governments," giving briefly the report of the work. He was followed by Theodore W. Koch, of Northwestern University Library, who supplemented his recent articles in *THE LIBRARY JOURNAL* with an informal, illustrated talk, "A Librarian Revisits Europe." C. P. Baber, Kansas State Teachers College, Emporia, and Julian S. Fowler, Oberlin College, chairmen of the two groups, presided jointly.

Current Library Literature

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in Cannons' "Bibliography of Library Economy," to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

BOOK BUYING

Baldwin, E. V. Buying problems of the bookshop and the library. *LIB. JOUR.* 55:7-9. 1930.

Especially problems encountered in selecting original stocks.

Bostwick, A. E. Book buying for branch libraries. *LIB. JOUR.* 55:9-11. 1930.

Branch librarians in St. Louis enjoy a large degree of independence.

Spaulding, Forrest. Some problems of the mid-west library bookbuyer. *LIB. JOUR.* 55:11-13. 1930.

The chief problem is to get books in a reasonable period after publication.

BOOK STOCK

Sayers, W. B. *The Revision of the Stock of a Public Library*. London: Grafton, 1929. cl. 54p. 5s.

Recommends frequent and drastic revision, and suggests rules for discarding books in each division of the Dewey Decimal Classification, besides general rules for discarding. Indexed.

BRITISH COLUMBIA

Black, N. F. The library situation in British Columbia. *LIB. JOUR.* 55:17-19. 1930.

Present conditions and plans of the Public Library Commission after the recent Library Survey.

BUILDINGS, LIBRARY. See LIBRARY ARCHITECTURE.

CARSON, WILLIAM O.

W. O. Carson. Obituaries and editorial. *por. Ont. Lib. Review.* 14:34, 40-41. 1929.

Mr. Carson was Inspector of Public Libraries in the Province of Ontario.

CATALOGING

Association des Bibliothécaires Français. *Règles Générales Proposées pour la Rédaction des Catalogues en Vue de leur Unification*. Paris: Champion, 1929. pap. 32p.

Directions for making cards for author, subject and classed catalogs, shelf-list, etc.

Johnson, M. F. *Manual of Cataloging and Classification for Elementary School Libraries*. Wilson, 1929. pap. 45p.

A guide to the making of simple catalog cards. Has been used as a teaching text at Detroit Teachers' College.

CENSORSHIP

Cannon, C. L. Who shall decide what we can't read? *LIB. JOUR.* 54:1024-1026. 1929.

An account of the censorship provisions in the proposed tariff bill.

CHILDREN'S LITERATURE

New York Public Library. *Children's Books Suggested as Holiday Gifts on Exhibition in the Central Children's Room*. 1929. pap. 20p.

An annotated list.

CHINESE LITERATURE. See MCGILL UNIVERSITY LIBRARY

CHRISTMAS IN THE LIBRARY

Annable, Dorothy. Christmas in the library. *Bull. of the New Hampshire Pub. Libs.* n.s. 25:2-5. 1929.

Includes list of books priced at \$1 or less.

Bailey, S. C. A library Christmas tree. *LIB. JOUR.* 54:1017-1018. 1929.

Christmas at St. Viator College Library, Bourbonnais, Ill.

Peterson, M. O. The spirit of Christmas at your library. *illus. LIB. JOUR.* 54:1015-1017. 1929.

The Des Moines (Iowa) Public Library's Christmas tree.

Rossell, M. E. Fort Wayne's Christmas exhibit. *illus. LIB. JOUR.* 54:1018. 1929.

CLASSIFICATION SCHEMES

Sayers, W. C. B. *An Introduction to Library Classification; Theoretical, Historical and Practical*. 3rd ed.—rewritten. London: Grafton, 1929. cl. 296p. 10s. 6d.

With readings, exercises and examination papers. Indexed.

CORRESPONDENCE STUDY, LIBRARY

Horton, Marion. Recent developments in correspondence study. *LIB. JOUR.* 54:1022-1023. 1929.

Particularly the Home Study Courses in Library Service of Columbia University.

DEWEY DECIMAL CLASSIFICATION

Clemons, Harry. D. C. versus L. C. *Libraries.* 35:1-4. 1930.

D. C. might be more elastic. System of L. C. notation is difficult to remember, and L. C. is still incomplete.

EDUCATION, ADULT

Shaw, W. B. *Alumni and Adult Education*. New York: Amer. Assn. for Adult Ed., 1929. pap. 117p.

The part both the college and the local library can play is given prominence in this introductory survey.

Waples, Douglas. What we don't know about the library and adult education. *Libraries.* 34:479-484. 1929.

There is lack of knowledge of objectives, methods and effects.

HOSPITAL LIBRARIES

Schulz, Maximillian. Libraries in tuberculosis sanatoria. *Wilson Bull.* 4:111-112. 1929.

Stresses the need of light recreational reading.

The library and the hospital. St. Paul (Minn.) P. L. *Lib. Beacon.* *illus.* 2:[1-2]. 1930.

ILLINOIS, UNIVERSITY OF. SMITH MEMORIAL LIBRARY

The new library, University of Illinois. *Libraries.* *illus.* plans. 34:503-506. 1929.

University of Illinois. *The Library Building*. Dedicated Oct. 18, 1929. Urbana. pap. [16]p. *illus.* plans.

INCUNABULA

Haraszti, Zoltán. XVth Century books in the [Boston Public] Library. facsim. *More Books*. 4:353-380. 1929. (To be continued).

The library owns about 200 incunabula.

LEAGUE OF NATIONS LIBRARY. GENEVA.

An international library. illus. *LIB. JOUR.* 55:16. 1930.

The library has 95,000 volumes classified by the Brussels system.

LIBRARIES

Cole, G. W. *The Ideally Perfect Library*. Reprinted from *Essays Offered to Herbert Putnam*. pap. 15p.

The Ideally Perfect Library would include the entire production of the printing presses of all nations from about 1450 to the present day.

IOWA

Brown, C. H. *Librarianship in Iowa*. *Iowa Lib. Quar.* 11:49-50. 1929.

President's address to Iowa Lib. Assn. meeting.

ITALY

Hodgson, J. G. *The Biblioteche Popolari of Italy*. *Libraries*. 35:15-18. 1930. (To be continued.)

"The Italian equivalent of the American branch or station library."

NORTH CAROLINA

Gardner, O. M. *The significance of the Citizens' Library Movement*. *N. C. Lib. Bull.* 7:203-207. 1929.

Address before the N. C. Lib. Assn., by the Governor of the State.

SOUTH AFRICA

Ferguson, M. J. *Memorandum: Libraries in the Union of South Africa, Rhodesia and Kenya Colony*. New York: Carnegie Corporation of New York, 1929. pap. 34p. gratis.

Based on a survey made for the Corporation.

Pitt, S. A. *Memorandum (etc.)*. pap. 45p. gratis.

UNITED STATES

Hodgson, J. G. *Travel notes of a visiting librarian*. *Wilson Bull.* 4:116-118. 1929.

The author discovered much duplication of effort in reference departments.

LIBRARY ARCHITECTURE

Wheeler, J. L. *Library Building*. pap. 22; 4p. illus. plans. (Reprinted from *The Year's Work in Librarianship*. 26-27 Bedford Sq., London: Library Assn., 1929).

"The present article confines itself largely to what has been described in print in 1928, with some slight additional explanatory text, on the same buildings, gathered by correspondence."

See also LIBRARY WORK WITH CHILDREN.

LIBRARY FINANCE

Fair, E. M. *What shall we tell the taxpayer?* *Penn. Lib. Notes*. 12:57-62. 1929.

A cost-study of library expenditures, with recommendations for library publicity.

LIBRARY OF CONGRESS CLASSIFICATION. See DEWEY DECIMAL CLASSIFICATION

LIBRARY WORK

Moody, K. T., ed. *The Library Within the Walls*. Wilson, 1929. cl. 524p. \$2.75. ("Classics of American Lnship.")

Reprints of articles and addresses on reference service, access to shelves, the collection, documents, art and science and the library, special libraries, university libraries, etc.

1928

Library Association. *The Year's Work in Librarianship*. Vol. I. 1928. 26-27 Bedford Square, London, 1929. pap. 216p. 7s. 6d.

Intended to be a "yearly methodical survey of current publications and activities." International in scope. Covers Palaeography and Manuscripts, Archives, Bibliography and the Library Profession as well as all types of Libraries. Chapters on Orientalia and Library Law and a fuller index are promised for later issues.

LIBRARY WORK WITH CHILDREN

Broening, A. M., and M. S. Wilkinson. *Magic Keys to Books (Card Catalog and Magazine Index)*. Baltimore: Enoch Pratt Free Library, c1929. ("Adventures in the Library"). 36p.

— *Magic Keys to Books (Title Page, Table of Contents, Preface)*. 16p. 20c.

Apply inductive method to teaching use of library to fourth and seventh grades.

Fortune, W. W. *Planning the children's library*. plans. *Ln. and Book World*. 19:130-133. 1929.

Plans of several English libraries for children, with suggestions for equipment.

Hunt, C. W. *A new intermediate department*. illus. *LIB. JOUR.* 55:14-15. 1930.

The Brownsville Children's Branch of the Brooklyn (N. Y.) Public Library.

This year's Children's Book Exhibit. illus. St. Paul (Minn.) P. L. *Lib. Beacon*. Dec., 1929.

The romance of chivalry furnished the central idea.

McGILL UNIVERSITY LIBRARY. GEST CHINESE RESEARCH LIBRARY

Laufer, Berthold. *The Gest Chinese Research Library at McGill University, Montreal*. The University, 1929. pap. 8p. illus.

The gift of Mr. Guion M. Gest of New York, this collection ranks second only to the Chinese Division of the Library of Congress.

NEWSPAPER LIBRARIES

The November, 1929, issue of *Special Libraries* is a newspaper number, with articles on "Newspaper Library Methods," by Robert W. Desmond; "Indexing Feature Articles," by Reinhold T. Pusch; "Vertical File and Scrap Books," by Katharine K. Patton; "Keeping a Record of Library Calls," by Blanche L. Davenport, and others.

NORWICH, ENGLAND. EARLHAM BRANCH LIBRARY

Dealing with outlying districts. I.—Norwich: Earlham Branch Library. illus. plans. *Ln. and Book World*. 19:133-138. 1929.

PUBLIC LIBRARIES

UNITED STATES

Bostwick, A. E. *The American Public Library*. 4th ed. rev. and enl. Appleton, 1929. cl. 471p. illus. \$3.

Issued with the endorsement of the Editorial Committee of the A. L. A. Partly rewritten and entirely reset. Has two new chapters, on adult education and art collection.

Hughes, H. L. *Schools and Libraries*. Reprinted from *A History of Trenton* [N. J.] 1679-1929. pap. illus. 71p. Public Libraries, p. 753-774.

REFERENCE DEPARTMENT

Borden, A. K. *Reference work in a college library*. *Libraries*. 35:33-34. 1930.

"Culture and psychology are *sine qua non* in reference work."

Special Libraries for December, 1929, has articles on first aids in reference work in the special library by Edith L. Shearer and M. E. Pellett.

Wyer, J. I. *Reference Work*. A. L. A., 1929. cl. 315p. \$2.50. (A. L. A. Curriculum Study.)

Materials (the world of print); Methods (the use of print), and Administration.

SALARIES

A. L. A. Committee on Salaries, Insurance and Annuities. Salary statistics: large and medium-sized public libraries. *A. L. A. Bull.* 23:778-783. 1929.

Includes 40 large public libraries, 6 more than in 1928, and 41 medium-sized libraries, 2 less than in 1928.

SCHOOL LIBRARIES

Batchelder, Annie. Reading guidance: wholesale? *Libraries.* 34:540-542. 1929.

In large school libraries, group discussions may have to take the place of individual guidance. Permanent records of each student's reading should be kept.

BOOKS BY AND ABOUT LIBRARIANS

Koch, T. W. *Reading: A Vice or a Virtue? The Essence of Poetry*. By Sir Rennell Rodd. *Standards of Value in Fiction*. By Franklyn Bliss Snyder. Dayton, Ohio: Univ. of Dayton, 1929. bds. 119p. illus. \$2.50.

A library miscellany issued as a souvenir of the dedication of the Albert Emanuel Library presented to the University of Dayton by Victor Emanuel.

Newman, Frances. *Letters*; ed. by Hansell Baugh. Liveright, 1929. cl. 372p. \$3.

"And these letters remain, also, if but as a shadow of that strange, and ever-ardent personality, yet as a shadow very vitally shaped."—James Branch Cabell, Prefatory note.

Nodier, Charles. [1780-1844]. *Francesco Colonna; a Fanciful Tale of the Writing of the Hyperotomachia*. Tr. by Theodore Wesley Koch. Chicago: Privately printed, 1929.

By the librarian of the Bibliothèque de l'Arsenal; translated by the librarian of Northwestern University.

New Library Dedicated at Greene, Rhode Island

ON DEC. 28, 1929, the village of Greene, in the town of Coventry, home of that famous Revolutionary war general, Nathanael Greene, for whom the village of Greene is named and whose part in the establishment of independence in this country was second only to that of General Washington, dedicated its new public library building. Among those taking part in the impressive services were two descendants of General Greene. The program, replete with unusual features, was carried out under the direction of Edwin H. Arnold, vice-president of the Library Association and chairman of the dedication committee. The climax was an address by United States Senator Felix Hebert. In presenting Senator Hebert, Chairman Arnold said it was the first time that a United States Senator had spoken in Greene. Senator Hebert in opening his address said that it was the first time that, as a United States Senator, he had been privileged to speak at the dedication of a public library. He prefaced his address with an expression of gratification at being able to join in the occasion, as it was in the town of Coventry that he had been privileged to read his first book from a public library, and also because Coventry was the town in which he first attended school. Mrs. William M. Congdon, State Library Visitor, extended the greetings of the State Library Division, and told of the development of public libraries in rural communities. A list of the many generous contributors to the construction of the new building was read. The erection of the building was made possible by the family of the late Edward E. Arnold, who contributed an amount equal to that raised by contributions. The president of the Library Association expressed the appreciation of the people of the community for the untiring efforts of Miss Mittie Arnold, who, he said, was largely responsible for the realization of the dream of having a library building in the village of Greene. The Greene Public Library was organized in 1923 and housed in the community school building until the erection of the new building.

An Error

To the Editor of THE LIBRARY JOURNAL:

In the selected reading list of books on Japan, P. J. Treat's *Japan and America* is mentioned as being "out of print" (see L. J. 54:947, Nov. 15). May I call attention to the fact that Mr. Treat has recently revised his book to cover 1928, and that it may be obtained from the Stanford University Press for \$3.50.

Sincerely yours,

ALICE N. HAYS, *Reference Librarian*.

Through the Looking Glass

*A Monthly Review of Children's Books
and Reading*

By Helen Martin

Library Work With Children, Western Reserve University School of Library Science.

PREDICTING the new titles which will be of permanent value to the collection before they have been put through their professional paces is difficult. There are, however, certain volumes, particularly adapted to the needs of the school curriculum, which seem worthy of attention.

In geography, or in truer pedagogical parlance—social science, a pleasing variation in textbook approach is afforded by Gregory's *Africa*. The usual subjects, such as climate, people, animals, and minerals, are discussed in the light of recent investigation, but what renders the material especially valuable is the brief historical sketch of each division of the "Dark Continent," treated in relation to its geographical situation. This pertinent book, written by a prominent authority, is well indexed and well illustrated with clear half-tones, interpolated through the text.

Europe, especially through its main countries of Italy, France, and England, has been refreshingly described and sketched in *Story-book Europe*. In spite of the inevitable bon voyage atmosphere, it will serve as a guide book, even for those at home, for the author has added the literary and historical background. A helpful bibliography counterbalances in some measure the omission of an index, and the book will be a real stimulus to the junior high school student for further browsing among the travel shelves.

The modern curriculum requires an early introduction to science, and *Holiday Pond*, written by a professor of the subject, has an accurate, dependable text, suited to the fourth grade. Under attractive chapter headings the life of the frog, swallow, cardinal flower, and other friends of meadow and pond are explained. With true poetic feeling Miss Patch shows how nature lies open like a book to all who will stop, listen, and read the fascinating tale. The somewhat square format allows full-page illustrations of animals, photographed in unusual poses.

Under the rather commercial title, *Made in America*, the story of American craftsmanship from Puritan times to the "Mauve decade" is unfolded for the reader of ten to twenty by

means of biographical sketches. The author cleverly incorporates her theory that our commodities and luxuries are the result of, and adapted to, our mode of living. History teachers will find new portraits of Paul Revere and Thomas Jefferson, while those in manual training and household economics will delight in the unusual bits of information furnished from the craft side in the confines of this slender little volume.

Aviation necessarily creeps into the academic life of the school, and for the untechnically minded librarian many questions are difficult to answer. This fall, however, two books, complementing each other, will prove indispensable to the collection. Two members of the Massachusetts Institute of Technology trace the history of aviation from its almost imperceptible flickerings in 400 B. C. to the present brilliant realization in an extremely alive book, *Sky High*. The courage, persistence, and genius of generations of bird men, known and unknown, with their tragedies and successes, is stressed, while more than a hundred photographs picture the many momentous advances of man's conquest of the air. *Air, Men and Wings*, also written by experts, is devoted rather to the more technical aspects, such as types of aircraft, air motors, training, airways, etc. The embryonic pilot will thumb eagerly the chapter on building models, and his too-eager enthusiasm will be guided by constant reminders that neatness, accuracy, and an elementary knowledge of the laws of aerodynamics are essential. For the devotee, whether young or old, and especially helpful for reference work, is the dictionary of aeronautical terms, arranged alphabetically.

These titles have been discussed primarily from the school library standpoint, yet they would be found equally valuable in any children's room collection, as they are a real contribution to the worth-while non-fiction, and will make possible better book service to the children of the community.

For Bibliography of books reviewed see p. 77.

Cuts, at top of page, of the "White Knight sliding down the poker" are taken by permission from the Tennial edition of *Through the Looking Glass* published by Macmillan Co.

Report of Committee for the Encouragement of Research

Research work completed in 1928-29, including a considerable number of theses written as part of the requirements for master's degrees.

Adams, Randolph G., Librarian, William L. Clements Library.

New Buildings

NEBRASKA State Teachers College Library at Chadron, Neb., was dedicated December 5, 1929.

THE TANNER Memorial Library at Illinois College, Jacksonville, was dedicated October 14, 1929.

THE NEW library building at River Forest, Ill., was dedicated October 13, 1929.

PRELIMINARY work for the erection of the Shakespeare Library Building in Washington, D. C., which is to be a combination of reading room, exhibition gallery and a reproduction of an Elizabethan theatre, has been started with the clearing of the site on the south side of East Capitol Street, between Second and Third Streets. The structure will be approximately 216 feet by 112 feet, and is made possible by a foundation created by Henry C. Folger, American business leader, who gave the National Capitol his Shakespearean collection, which will be housed in the new edifice.

Amherst Holds Sunday Series

THE JONES LIBRARY, Amherst, Mass., began the seventh season in its series of Sunday afternoon meetings on Dec. 1 when Prof. Frank Prentice Rand, of the English Department of the Massachusetts Agricultural College, presented "An Amherst Songbag," an illustrated lecture on Amherst in Poetry. This was the 105th meeting in this "Sunday at Five" series, the first having been given in January, 1922. Usually local talent is depended upon for musical or literary programs, travel talks, local history or other lectures, but occasionally friends from neighboring towns contribute their time and talents to the making of the programs.

The library was first opened on Sunday afternoons from three to six o'clock "for those too busy or too tired to come in on weekdays," and these Sunday afternoon meetings were started soon afterward, very largely for those too busy or too tired to get any of the cultural or educational offerings available during the week. The result is that many new people come in, in addition to the regular weekday patrons. The opportunity to browse in the reading rooms for an hour or more, borrow out books, and finish the day with music or a lecture in the Library Auditorium is accepted by many as a happy part of their sojourn in Amherst.

In the Library World

ABE MARTIN

"I wonder if you've got sich a thing as a good, interestin' novel, one I won't be afraid to leave layin' around where the children 'll see it?" asked Mrs. Leghorn Tharp at our Public Library today.

Christmas Greetings
from the
Indianapolis Public Library Staff

A custom established in the Cleveland Public Library in 1910 of sending out a Christmas greeting has evidently borne fruit, for this year greeting cards from several other libraries have come to our attention. In the last issue of THE LIBRARY JOURNAL the Christmas card from the Montclair (N. J.) Public Library was given, and in this issue we have the greeting used by the Indianapolis (Ind.) Public Library. It is an interesting fact, in connection with this last-mentioned card, that Abe Martin, himself, prepared it for the library—perhaps as his Christmas greeting to the staff.

Valuable Gift Received

IN ACCORDANCE with the will of the late Prof. Marlow A. Shaw, for twenty years a member of the English Department of the University of Iowa, the University of Iowa Library has received his entire collection of books. This collection consists of approximately 1000 volumes of standard works of English literature, and will form a usable and valuable addition to the library.

First Library to Exchange With Germany

THE FRAMINGHAM TOWN Library, Massachusetts, has made an exchange of assistants with the Deutsche Bucherei in Leipzig, Germany, for one year. Miss Carolyn A. Walker of Framingham has gone over there for one year and Miss Hanna Richard has come to America. It is understood that this is the first library to make an exchange with Germany.

Seventeen Years of Service

A CONSOLIDATED report of the Rochester Public Library, covering seventeen years of service, includes summaries dating from the beginning of the library in 1911. This is the sixth publication of its kind and includes annual reports nine to seventeen, covering especially the years 1920 to 1928 inclusive. During those years annual reports were published only in the newspapers. Since 1919 seven new libraries have been opened. The registration of borrowers has grown until it now includes 24.74 per cent of the estimated population. Children constitute about one-third of the registered borrowers. The agencies from which books were issued in 1928 were: One Central Library, 12 branches, 9 sub-branches, 72 deposit stations, 690 graded classroom collections in public schools, and 9 playgrounds. A total of 2,397,600 volumes were circulated in 1928. Besides the many illustrations of the growth in service, by charts and pictures, the librarian ends his report by a list of those things he is thankful for, and his regrets:

THE LIBRARIAN REGRETS

1. That so many of the libraries are in makeshift and made-over quarters. Thus there has been little opportunity to plan real library buildings. Most of the branches fail architecturally to express their purpose or to impress their users.
2. That the policy of renting quarters has been followed so extensively.
3. That under the city manager form of government the powers of the Library Board have been so reduced that the work of the librarian is more difficult and less enjoyable than it was formerly.
4. That the library is subject to the restrictions of municipal civil service. This is not a criticism of the local commission who have cooperated heartily with the library, but a conclusion based on seventeen years of experience with the system.

5. That efforts to cooperate with the Reynolds Library have thus far been unsuccessful.

6. That a combination of circumstances and forces long prevented the establishment of a central library and still stand in the way of its needed and fullest development.

THE LIBRARIAN IS THANKFUL

1. For the opportunity, rare in 1912, of starting the public library system in a city which ranks twenty-third in size in the United States and among the first in beauty, wealth, progressiveness and general well-being.
2. For a Board of Trustees who uphold standards of service and who deal with principles and policies and leave administrative details to the librarian.
3. For a staff of assistants who are competent,

studious, energetic, polite and devoted to the best ideals of service.

4. For the liberal support given by the city to the various units of book distribution once they were established.

5. For the assurance that the established units of service will be maintained and for the prospect that their housing will be improved and their number increased.

6. For the action of the Common Council that the Board of Estimate and Apportionment in adopting the "New York State Employees' Retirement System."

* * *

Minneapolis Observes Anniversary

ON DEC. 16 the Minneapolis Public Library observed the fortieth anniversary of the opening of its doors to the public. The occasion was observed by a dinner for the library board and the staff. The present librarian, Miss Gratia Countryman, was a member of the original staff. Herbert Putnam was the first librarian in Minneapolis leaving to become librarian of Congress. The library had as one feature of its celebration an exhibit with posters listing popular books in 1889, the current events and fashions of the year, as well as the plays running in New York at the time. There was also a group of pictures of Minneapolis taken about that date.

Notes on Modern Design

THE PUBLIC LIBRARY of Newark, N. J., has recently reprinted *Notes on Modern Design*, a leaflet with bibliography which was printed in January in connection with an exhibit of Modern Design held in the library. This reprint contains a revised and enlarged book list. Copies will be sent to people interested. Apply direct.

The E. P. Dutton Fellowship

THE E. P. DUTTON Fellowship for Library Work with Children, as announced in the January 1st issue of *THE LIBRARY JOURNAL*, was the idea of John Macrae, president of E. P. Dutton, who stated in making this proposal that he wished to name the Fellowship after Mr. Dutton, "from whom he had learned to love the publishing of children's books." The following conditions for the fellowship have been accepted by the committee:

1. The fellowship shall be known as the "E. P. Dutton Fellowship for Library Work with Children."
2. Its purpose shall be to train children's librarians or to offer opportunities for advanced study which shall encourage creative work in the special field.
3. For each of the next three years it shall consist of an annual grant of \$1,000, payable in two installments of \$500.

4. It shall be conferred by the Committee on Library Work with Children of the American Library Association for approximately nine months' study in a school accredited by the American Library Association, which offers a degree or a diploma in Library Work with Children, or for advanced study under conditions selected by the applicant and approved by the committee.
5. It may be given, at the discretion of the committee, either to college women desirous of professional training, or to graduates of a one-year library school course, who, through advanced training or research, will be enabled to make a distinguished contribution to the profession in the field of library work with children.
6. In general, the policy controlling the matter should be broad and the Committee on Library Work with Children should be permitted to decide on what is the need of the year or the time, as well as the qualifications which must be presented by candidates.
7. Applications must be filed not later than March 1, 1930, with the Chairman of the Committee on Library Work with Children, American Library Association, Miss Annabel Porter, Seattle Public Library, Seattle, Wash. The award for the year 1930-1931 will be announced May 1, 1930.

Mr. Macrae sailed for Europe on December 20, but a cable from him to Effie L. Power, Director of Work with Children, Cleveland, read as follows: "I want to thank the A. L. A. for accepting the E. P. Dutton Fellowship Scholarship and assuming the responsibility of awarding it. It is my desire and hope that this will eventually tend to increase interest in children's work in all public libraries and be a real inspiration for better work to those splendid young women who as the years unfold will take over the work so nobly carried on by yourself and your contemporaries."

Rural Library Institute

A RURAL library extension institute will be held June 30 to July 18, 1930, under the auspices of the A. L. A. Committee on Library Extension, in connection with the annual Rural Leadership Summer School, at the College of Agriculture, University of Wisconsin. Advance registration is essential.

Three Years in Youngstown

DURING the past three years Youngstown has erected four new library buildings at a total cost, for sites, buildings and equipment, of \$164,967.42. Every dollar of this money was raised in Youngstown by three methods, namely: popular subscription, city council improvement bond, and city council appropriation. The cost of each library project was as follows: Brownlee Woods Library, \$14,100; West Side Library, \$21,771.89; South Side Library, \$101,726.47; East Side Library, \$27,369.06. During this three-year period a department of hospital service, serving twelve institutions, has also been organized.

Library Organizations

Joint Interstate Meeting

REPRESENTATIVES of the Library Associations of Illinois, Wisconsin, Iowa, and Minnesota have voted to have a joint interstate meeting, if arrangements as to place can be made. The time suggested is Oct. 8-11, 1930. It is possible that two or three other States may also join. The joint committee to arrange for the meeting consists at present of Edna Moore, Duluth, Minn., chairman; Earl Browning, Peoria, Ill.; S. J. Carter, Milwaukee, Wis., and J. Sidney Johnson, Marshalltown, Iowa.

Maryland Library Association

THE ANNUAL meeting of the Maryland Library Association was held Dec. 13 in the Alumnae Lodge of Goucher College. Following the reading of reports and the transaction of other necessary business, a most delightful paper on "Nonsense" was read by Paul Wheeler of the English Department of Johns Hopkins University. The meeting closed with an informal social hour. Officers for 1930 were elected as follows: President, Miss Adeline J. Pratt, director of the Maryland Library Commission; First Vice-President, Louis H. Dielman, librarian of Peabody Institute Library; Second Vice-President, Miss Mary S. Wilkinson, director of work with children, Enoch Pratt Library; Treasurer, Mrs. Emma Van Sant, librarian of Gwynns Falls Junior High School; Secretary, Miss Louise M. Reese, branch librarian, Enoch Pratt Library.

A. L. A. Discussion Group

AT A RECENT meeting of a dozen librarians in New York many questions about A. L. A. activities were asked, and one of the group suggested that all members of the A. L. A. in or near New York City have an opportunity to take part in such a discussion. Such a meeting was called in the Great Hall of the Chamber of Commerce on Jan. 10 at 8 p. m., when President Keogh and Secretary Milam of the A. L. A. were present and answered all questions. Over two hundred librarians and library trustees gathered at this informal meeting, asking many pertinent questions, which fulfilled its purpose in informing members of what A. L. A. is trying to do, and gave them definite information regarding the drive being made for endowment.

Caroline M. Hewins Scholarship

THE CAROLINE M. HEWINS scholarship for children's librarians, which was established in 1926 as a tribute to one of the great pioneers in American librarianship, was originated as a personal gift by Connecticut librarians and friends. The fund, which assumed a form which has called forth generous contributions from professional associates and friends in other States, yields at present about \$400 annually. It is administered by the Trustees of the Hartford Public Library. The scholarship is open to young women whose educational and personal qualifications indicate their fitness for professional training in library work with children. Candidates are required to submit applications and credentials not later than March 1, 1930, and to appear before the Committee on Awards in Hartford on a date to be designated each year.

Recent Meetings of Chicago Club

THE CHICAGO LIBRARY CLUB and members of the American Library Association in Chicago and vicinity were guests of the staff of the American Library Association on Nov. 21, 1929, at the new headquarters. Sixty-five persons attended the dinner at the Woman's City Club, which preceded the meeting. The program for the evening consisted of answers, by members of the American Library Association staff, to questions on activities of the association and informal discussion by all present. Following the program the guests were given an opportunity to inspect the new quarters of the A. L. A.

The December meeting of the club was held Dec. 12, 1929, at the Woman's City Club. The Membership Committee reported seven new members. The Committee on Scholarship Funds again presented the plan of cooperating with the Chicago Woman's Club in maintaining a loan fund available to students in library schools, and reported substantial contributions. Other subscriptions were received during the business session. Through his talk on "A Handful of Books; A Thimbleful of Ideas," J. Christian Bay, librarian of the John Crerar Library, shared with the members of the club his pleasure and enthusiasm in book collecting, and gave them the privilege of examining some of his treasures.

Among Librarians

President of O. L. A. Dies

JAMES STEELE, the president of the Ontario Library Association, passed away on Wednesday, Dec. 18. Mr. Steel was a trustee—had been for many years—of the Public Library in Stratford, Ontario, where he was one of the most prominent citizens. He was one of those Ontario trustees who was thoroughly interested in the public library, making it really his hobby.

Public Libraries

OAK AMIDON, Los Angeles '22, has been appointed principal of the Sociology Department, Los Angeles Public Library.

JULIUS AMIS, Atlanta '29, has been appointed librarian of the Stanley County Public Library, Albemarle, N. C.

MRS. ROSALIA LEE BELL, Washington '29, has been appointed head of the Public Library, Columbus, Mont.

O. ELMIRA BORDEN, Simmons '29, has been appointed an assistant in the Reference and Circulation Dept. at the Racine Public Library, Wisconsin.

LUCILLE CHANDONNET, Simmons '24, has joined the staff of the Manchester, N. H., Public Library.

MILDRED COHN, Washington '29, has recently become a member of the Reference Department, Library Association of Portland, Ore.

MRS. EMMA ROOD COOK, Pratt '12, for eleven years an employee of the Omaha Public Library, later of the Andrew Carnegie Library, Carnegie, Pa., died Nov. 16, following an illness of several months.

MARGARET CROMPTON, Washington '24, has accepted the headship of the Reference Department of the Baltimore Public Library.

REBECCA A. HERRING, Pratt '26, has been appointed librarian of the Psychiatric Institute and Hospital of the State of New York.

LOUISE LAIR, Pratt '29, has been appointed librarian of the Davenport Library at Bath, N. Y.

NASRA ODEH, Simmons special '11, recently died at the Worcester State Hospital, Massachusetts, where she had been librarian for a number of years.

RAISA ROGOZINA, Washington '26, has been made cataloger of the Tulane County Free Library, Visalia, Cal.

HARRIET ROURKE, Simmons '29, is now the librarian of the United States Veterans' Hospital at Tupper Lake, N. Y.

VAN TYNE SMITH, Los Angeles '09, has been made branch librarian of the Cahuenga Branch Library, Los Angeles Public Library.

WILLIE WELCH, Atlanta '27, formerly librarian of the Stanley County Library at Albemarle, N. C., has accepted the position of librarian at High Point, N. C.

DOROTHY WENTS, Simmons '29, has joined the staff of the Library of Hawaii, Honolulu, T. H., as first assistant children's librarian.

JAMES I. WYER, director of the New York State Library, has been appointed a member of the Board of Education for Librarianship of the American Library Association to succeed Adam Strohm, librarian of the Detroit Public Library. Mr. Wyer, director of the former New York State Library School before that school was merged in the Columbia University School of Library Service, has recently completed a textbook on *Reference Work* in the curriculum study series, prepared under the direction of the Board of Education for Librarianship.

Miscellaneous

EVALENA CAIRNS, Pratt '29, was married on Nov. 29 to Mr. Irving M. King of Brooklyn. Mrs. King is continuing her work in the Passaic Public Library for the present.

LUCY CHURCH, Simmons '08, is now a teacher of history and Spanish at a school in Stamford, Conn.

VERA M. DIXON, Pratt '12, formerly supervisor of school libraries in Des Moines, is now assistant professor of library science in the new Library School of the University of Oklahoma.

JESSIE A. HARRIS, Simmons '22, has resigned her position as librarian of the Whittier High School, California, and is doing graduate work at University of Michigan Library School.

RUTH N. LATSHAW has been Classifier in the Princeton University Library since July 1st.

GRACE B. MCCARTNEY, Pratt '11, formerly head of the catalog and book order department of the Rochester Public Library, is now in the library department at Scrantom's, Inc., in Rochester.

MARGARET B. MARTIN, Washington '18, has recently taken the position of assistant director of the Library School of Hampton Institute, Virginia.

PHIANNA SUTTEN, Illinois '28, formerly of the Des Moines Public Library staff, has accepted the position of assistant cataloger in the University of Wyoming Library.

Opportunities

This column is open to librarians

United States Civil Service Examination

The United States Civil Service Commission announces the following open competitive examination:

HOSPITAL LIBRARIAN

Applications for hospital librarians must be on file with the Civil Service Commission at Washington, D. C., not later than Feb. 4.

The examination is to fill vacancies in the Veterans' Bureau throughout the United States, and in positions requiring similar qualifications.

The entrance salary is \$1,800 a year. Higher-salaried positions are filled through promotion.

Competitors will be rated on mental tests, library economy, cataloging, classification, and a modern language.

Appointment may also be made from this examination to the position of assistant librarian at the entrance salary of \$1,620 a year.

Full information may be obtained from the United States Civil Service Commission, Washington, D. C., or from the secretary of the United States Civil Service Board of Examiners at the post office or custom house in any city.

Young woman with eight years' experience as assistant children's librarian desires to change position. A-14.

School librarian wants position for the summer; camp work, summer school, or rural traveling work. A-15.

Librarian with university and library school education would like cataloging or organization in the South. A-17.

Children's librarian, with training and experience, desires position on the Pacific Coast. Minimum salary acceptable, \$165 per month. A-15.

Wanted—To exchange positions during spring semester 1930. February to June. College library in West preferred. Salary basis \$250 per month. A10.

College graduate with library school training desires position in college, junior or senior high school library. Three years' school library experience. A11.

To Buy or Exchange

WANTED: To buy or to exchange, for Canadian Government documents, *Wharton*, Revolutionary Correspondence, 6 vols., 1889; Diplomatic Correspondence, 1783-1789, 3 vols.; State Papers and Public Documents, 1789-1818, 12 vols.; or American State Papers, 1789-1833, 6 vols.; U. S. Foreign Relations Series, 1866-date. Apply direct to: Dalhousie University Library, Halifax, Nova Scotia.

To Exchange

WANTED: To exchange many numbers of *Science*, vol. 25, 1907 to date, for *Scientific Monthly*, vol. 3, Nos. 3, 4; vol. 4, Nos. 1, 2; vol. 5, 1917, Nos. 1, 3, 5; vol. 6, Nos. 1, 4; vol. 7, 1918, Nos. 1, 5, 6; vol. 8, Nos. 2, 6; vol. 14, 1922, No. 7; vol. 15, 1922; vol. 22, 1926, No. 3; vol. 27, 1928, No. 3. Also could supply journals on hygiene. Write direct to: St. Louis University School of Medicine, St. Louis, Mo.

Elusive Quotations

A column designed to assist in the location of quotations and poems which cannot be found through the usual channels of anthologies and books of reference.

E. W. B.—Requests the author, title and source of the following quotations:

"He carved no statue, painted no pictures, wrote no poem, composed no song, fashioned no piece of jewelry, built no edifice, founded no city, erected no triumphal arch; but He stands in history as the Great Giver."

"Opportunity knocks but once."

"God and our memories, like roses in December."

Free

PRINCETON UNIVERSITY LIBRARY will send to any library, transportation charges collect, the following sets: *Century*, vols. 1-8; *Scribner's*, vols. 2-22, 29; *Atlantic Monthly*, vols. 5-20, 30-31; *Harper's*, vols. 1-25, 28-58, 60-61, and several unbound numbers; *Electric*, 1852-65, excepting January-June, 1857, and 1858; and unbound numbers. We prefer, if possible, to dispose of the sets as units.

Books for Boys and Girls

THE RESULT of an experience in the Boys' and Girls' Division of the Toronto Public Library in a search for books which would stand the test of time is *Books for Boys and Girls* (Boys' and Girls' House, 40 St. George Street, Toronto, Canada, \$2), a list of 2000 books which the librarians of this Division deem to be of definite and permanent interest. Annotations and descriptions are given which are not taken from reviews, and the list reflects the judgment of the children themselves and of the librarians who have closely observed youthful dislikes and likes. The selection is arranged alphabetically by author, giving publisher and price, with a title index included, and the selection is made from the publications for children of England, Canada, and the United States. The books are not graded, but some division has been made for little children's books and books for older boys and girls. The Toronto Public Library plans to keep this list up to date with supplements issued from time to time.

The Calendar

April 4-5—Pennsylvania Library Club and New Jersey Library Association, annual meeting at Hotel Chelsea, Atlantic City, N. J.

May 1-2—Louisiana Library Association, annual meeting at Monroe, La.

June 23-28—American Library Association, annual meeting at Biltmore Hotel, Los Angeles, Cal.

June 30-July 18, 1930.—A rural library extension institute at the College of Agriculture, University of Wisconsin.

251 West 98th St., New York

EVERY LIBRARIAN should read and own THE BUILDING OF A BOOK *because*

AMERICA HAS become book conscious, and, as book sales have increased, the general public has become more interested in the appearance of and in the problems facing those who publish, produce and distribute books. To meet the demand for information about books, many excellent new volumes on printing and on book collecting have been issued. There has been very little literature on the subject of publishing, however, and little bookmaking from the point of view of the layman, as contrasted with the point of view of the specialist.

A NUMBER of years ago Frederick H. Hitchcock saw the trend of public interest and printed in 1906 the first edition of "The Building of a Book," bringing together articles from authorities on each problem of the bookmaker. The volume found immediate usefulness but has been long out of print and copies difficult to obtain by those newly come into the book field and needing just this kind of survey. Mr. Hitchcock had practical experience as a publisher and designer of books, a personal enthusiasm for the subject, and knew just to whom to turn for the chapters for his book.

HIS INTEREST in the subject did not lessen as the years went by, and just before and up to his death a few months ago, he was busy, at the suggestion of his friends, preparing a revised edition. The material had all been gathered and edited before his death. Every chapter was reweighed, new chapters were added, and every subject reviewed by the original author or someone who had succeeded to an equal eminence in the field. He thus made the book thoroughly up-to-date, as valuable to today's larger group of book lovers as was the first printing to its owners.

THE SCOPE of the book publishing office has very greatly broadened in twenty-five years, and Lyman B. Sturgis of the Century Company has had a varied experience by which to interpret the changes. The function of the literary agent

has broadened with new markets for the author's output and Carl Brandt in a new chapter points out how the work of the agent fits in with the progress of a manuscript.

WITH Lawton L. Walton's article on The Manufacturing Department we begin to get a picture of the complicated processes which the publisher must coordinate and direct. He must know something of types and how best to choose, of papers and their selection for varying books, of inks and their composition. All of these basic factors are here described authoritatively but briefly.

THE PUBLISHER must know, too, the resources and limitations of hand and machine typesetting, proof reading and its pitfalls, the printing press itself and the way it can be made to give best results.

THE FIELD of book illustration opens up a whole new set of questions for the bookmaker and a new field of delight for the book lover. Line cuts have their special virtues and half-tones their advantages; color can be had by various methods, lithography, four-color, offset.

BEFORE THE book is printed the publisher has been planning its binding, and machines fully as intricate as the machines for typesetting and printing will produce large editions or small with amazing quickness. He has been putting his mind also on the problems of publicity, advertising and sales canvass, so that the book may have its adequate hearing. If all the publishers' staffs, all the booksellers, librarians and the ultimate readers should come to know more about the problems which have been faced in producing the volume which they are handling, the book world would be tied still closer together, and, if this volume could help to bring that result, Mr. Hitchcock will have attained something of his purpose in planning it, a volume for whose preparation so many friends gave their cordial support.

Library Curriculum Studies

To Appear in February

The Library in the School

by Lucile F. Fargo

The first basic book on school libraries. Discusses the adaptation of library methods to the needs of the school and, conversely, the moulding of educational techniques to effective library service. Considers what the school expects from the library, the forms of administration best adapted to meet educational needs and, lastly, general problems of administration.

Variations necessary for elementary schools, junior high and senior high schools are kept in mind as are also those for different forms of organization such as traditional, platoon, and various methods of individual instruction.

A book based on experience, study, and on an actual survey of school library systems throughout the country. Approximately 500 p. Cloth. Probable price, \$3.00.

Introduction to Cataloging and the Classification of Books

by Margaret Mann

Emphasizes principles, rather than detailed methods, although detail pertinent to the classification and cataloging of books is considered and evaluated. The three great American classification schemes—Dewey, Cutter, L.C.—are described, the L.C. system especially being treated more comprehensively than in most classification manuals.

The functions and theory of cataloging are set forth with discussions of author and title, classified, and dictionary catalogs. Subject headings, the use of L.C. cards, necessary records, and the organization of the catalog department are also treated. A useful feature is the model catalog of L.C. cards illustrating A.L.A. rules. Approximately 420 p. Cloth, Probable price, \$3.00.

The authorized life of the great adventurous writer with many Conrad letters hitherto unpublished.

"A magnificent book and one which, because of its peculiar values, will not be superseded as long as interest in Joseph Conrad remains."—*Boston Transcript*.

"G. Jean-Aubry has put together a romantic narrative of Conrad's early years that moves swiftly, is vividly conceived and POSSESSES ALL OF THOSE QUALITIES THAT ARE DESIRABLE IN FIRST-RATE BIOGRAPHY."—*N. Y. Evening Post*.

"Conrad lives in these pages as a man, complex, moody, generous, inspired, puerile. We get a thousand and one snapshots of him and the effect in general is that of a very proud, inwardly passionate being, tortured by a genius of sensitiveness that gives him no rest."—*Spectator*.

Forthcoming Issues of THE LIBRARY JOURNAL

✱ Don't forget that the March first issue will be a special number on "Library Equipment" and we are requesting pictures and information about library signs and markers for county libraries, branches, and deposits. All material for this number must be in by February fifteenth.

✱ The February fifteenth issue will be a general number but will include an article on "Classifying, Cataloging, and Binding League of Nations Publications," by C. E. Walton. The "Code of Library Ethics," as presented to the A.L.A. Council at the Midwinter meeting at Chicago, will also be included.

✱ Herewith is the beginning of a special page of school news to be continued in EACH issue. No articles will be given on this page but an attempt will be made to include news notes and information from different school libraries over the country. The cooperation of school librarians is asked in making this page of greatest value to the profession.

✱ Are you sending in news notes from your library?

The Dayton Public Library Book Wagon

By Paul North Rice

Librarian, Dayton Public Library

BOOK WAGON service was started in the Dayton Public Library in October, 1923. Speaking of the purposes of the Book Wagon to a newspaper reporter on the morning that it had started on its first trip, Miss Electra C. Doren said that it had been adopted as the only means available at present of reaching large sections of the city at a distance from the present libraries.

"We have no money to build new branch libraries now," said Miss Doren, "so we have hit upon this plan of bringing the library service to the people. The Book Wagon idea was first developed at Hagerstown, Md., where the wagon was used for carrying books and magazines to the rural districts. New York and Evanston, Ill., are the only cities, so far as I know, where Book Wagons are now used for reaching the urban population. For the present the Book Wagon will not attempt to serve the county outside of Dayton."

Dayton's first Book Wagon was a half-ton Ford truck with a closed body. Book shelves had been placed along the inside walls of this wagon. There were doors at the rear, and the

books were available from the inside only. This half-ton truck, with its special equipment of shelves, cost \$623.

Almost at once this Book Wagon was out-

grown. It was quite impossible to serve adequately the crowds that collected when books were available only to the few who could crowd inside the car. In June of 1924 a ton Ford truck was purchased with a special body constructed by the Pioneer Wagon Works. Both sides were made with hinges so that they could be raised displaying

The Dayton Book Wagon leaving the library garage

three book shelves, thus making books available from the outside. Extra supplies of books were carried in baskets inside, and the books when returned were also placed in these baskets. This Book Wagon cost \$783 and could carry six to eight hundred books.

In December, 1928, our present Book Truck was purchased at a cost of \$1,904. This is a ton and a half Reo truck with a specially constructed body. Again the sides are hinged, but only the top two-thirds of the side lift up, the

other third drops down, making a counter below the three displayed book shelves. Shelves are also built on the inside of the truck on which a reserve supply of books can be carried. Books returned are placed in baskets, which are also carried inside the truck. A thousand to twelve hundred books can be carried in our present Book Wagon.

A very noticeable jump in the circulation occurred during the year 1929. This jump can be accounted for in three ways: The enthusiastic work of Mrs. Eliza Ramsay and Miss Helen Tattershall, who have had the Book Wagon in charge, the increased attractiveness of the stock of books

carried because of recent purchases, and the increased capacity of our new Reo Book Truck.

The following table shows the circulation from the Dayton Public Library Book Wagon during the six years of its history:

Year	Adult	Juvenile	Total
Oct. 1—Dec., 1923.....	3,482	5,645	9,127
1924.....	16,165	34,596	50,761
1925.....	22,639	53,211	75,850
1926.....	26,470	56,629	83,099
1927.....	24,574	46,962	71,536
1928.....	26,120	53,244	79,364
1929.....	40,550	64,994	105,544

The Dayton Public Library Book Wagon has never given house to house service, and stops only at certain appointed places or stations. The Book Wagon goes out every day of the week but Sunday, and has a definite schedule with stated hours at each of the twenty-five regular stops. These stops include public and parochial schools, grocery stores, factories, and corners near neighborhood centers. If possible, stations are selected that offer opportunity for shelter during very inclement weather. The corner grocery may be willing to have the Book Wagon work done inside the store on very stormy days. Whenever the weather permits, however, the work is done outdoors. Children's books are carried on the shelves on one side

of the wagon and adult books on the other side. A small charging desk and a couple of stools are carried within the wagon. The Book Wagon chauffeur and his substitute are men who are regular members of the Library Staff, familiar with books and with the library processes of

charging and discharging. Four days a week the Book Wagon is in charge of Mrs. Eliza Ramsay of the Main Library. On Monday and Tuesday it is in charge of Miss Helen Tattershall of the East Carnegie Branch. Some of the stops are so busy that it is necessary for a third junior assistant to go out.

The Book Wagon has always been considered a

feeder for the branches. When Book Wagon stops are sufficiently well patronized, that is regarded as an indication that a branch should be placed in that region as soon as library funds permit. Book Wagon stops are frequently changed or discontinued both with the building of new branches and with shifts and changes in population. Every borrower at the Book Wagon, we hope, is a potential borrower at the Main building or one of the branches. A man in a factory registers at the Book Wagon because the books are brought right to him. After he has taken a few books, we hope that the desire for a greater choice may lead him to the nearest branch.

Miss Tattershall of our Book Wagon staff writes:

"The arrival of the Book Wagon is awaited eagerly by all its patrons, and others who never even read. Housewives leave their housework and the baby in care of a neighbor to be at the wagon on time. A splendid spirit of community cooperation has developed around the Book Wagon, and many delightful friendships have been made, because the Book Wagon has brought together people who have interests in common. The Book Wagon staff feels intimately acquainted with many other members of the families whom they have never seen. Books are selected regularly for the fathers who are at work, grandparents

The Dayton Book Wagon at the Chrysler Sales Corp. Many of the girls, gathered about the wagon, were frightened away by the camera man

and those who are ill or shut-in, most of which is done by a system of note correspondence. Of particular interest is the kind of work the Book Wagon does at one of Dayton's most important factories (The Duriron). Here everybody comes, from the engineers to the office boys and truck drivers. The

as many biographies of its famous men as is possible. Every month and every season has some special interest of this sort, and a good deal of reference work, filling requests, etc., is done for both school teachers and children. Mothers also take advantage of the wagon stop at the schools. Sometimes the

At the Dayton Duriron Company. Everybody here, from the engineers to the office boys and truck drivers, uses the wagon

skilled mechanics are perhaps the most enthusiastic. A number of foreign men work here, and the Book Wagon has been the means of helping them to learn English quickly. In addition to regular library service, the Book Wagon is a valuable information bureau."

Mrs. Ramsay, in charge of our Book Wagon service four days a week, writes concerning the school, factory and neighborhood stops:

"The children find opportunity to read along the line of their school studies. We try to know in advance when they are studying any special country or any other special subject, and load the wagon accordingly; around Thanksgiving time furnishing abundant material (though it is never enough) on the early colonization of our country, and in February adding

children get the books for their mothers, depending on our long-distance choice, but quite frequently the mothers come themselves. The Wagon is particularly helpful for the very little children, second and third grades, who are too small to go many blocks from home and who love to pick out their own books most trustfully asking, 'Do you think I can read this?' The circulation at school stops is often very heavy. The week before Christmas at one school 556 books were issued in an hour and a half.

"We find the factory stops particularly interesting as much individual work is possible. Many requests are received for particular titles and for books on special subjects. One man has read one by one the four huge volumes of Beveridge's *Life of John Marshall*. At one factory stop we always take a fresh

volume on psychology, biology or heredity for one omnivorous reader who is not interested in anything else! The McCall Publishing Company stop is especially awake to every new book of value. The interests there are extremely varied ranging from Zane Grey to Robinson's *Cavender's House* and the latest cry in sophistication.

"The stops for neighborhoods are full of human interest. Everyone comes, from grandpa to the tot who cries unless his mother gets him a picture book. (This isn't fancy, it happens often!) One old gentleman, a Civil War veteran, wants everything he can find on that period or on Lincoln and his contemporaries. One family wishes to move but decided against it because they would miss the Book Wagon, and that would be impossible. Mothers come to the Saturday stops with market baskets and boys' wagons and load up with books for the entire family.

"Perhaps one of the most colorful of the Book Wagon stops is in that section of the city known as the Hungarian colony. At the sound of our horn the neighborhood is around the wagon like a swarm of bees. These children, ragged, dirty little urchins for the most part, are wild for books, for any print, indeed. Even in freezing weather they line the curbstone looking at the magazines. Fairy-tales are most in demand among the children, and, of course, books in the Hungarian language for the adults unless the word comes, 'My mamma, she wants to try an English book.' Generally, however, they want their own language, and our Hungarian books are read and re-read. A number of the children do the selecting for their parents, quite frequently escorting them to the wagon, interpreting for them as they sign their cards and generally piloting them through the routine of this queer, but pleasant, American custom."

After the Book Wagon service had completed its fourth year, Miss Electra Doren was asked why she considered Book Wagon service superior to service through Stations, that is, small collections of books furnished by the library to non-library agencies such as factories, department stores, etc. Miss Doren felt there were five reasons why she preferred Book Wagon service:

1. Quality and volume of circulation are always better under library personnel. Book Wagon issues at least ten times more than stations. Interest in books and reference questions stimulated.

2. Greater flexibility in book stock which is changed weekly for public on Book Wagon instead of quarterly or less frequently at stations. Hence greater interest because of greater variety from which to choose.
3. Books are not held inactive at unproductive stations when they are more needed elsewhere, consequently greater movement of stock through Book Wagon.
4. Books are better cared for, mended more frequently, fewer losses; also, reporting on use of books is more accurate.
5. Productive contacts with library patrons drawing them to the branch libraries for acquaintance with larger collections and cultural opportunities of the public library through influence of library personnel. This has never happened at any station—interest has declined, not grown.

One argument for a Book Wagon, quite aside from the library service that it gives, is the excellent publicity given to the library in its constant trips through city streets. Every time the citizens of Dayton see the conspicuous lettered "Dayton Public Library Book Wagon" they are reminded of their Public Library. And after six years' service there is still a novelty about seeing the Book Wagon staff actually at work issuing books to an eager crowd of adults or children. No phase of the Library's work secures newspaper publicity so readily.

The cost of Book Wagon service is not as great as might be assumed at first. The initial cost of almost \$2,000 for a Book Wagon such as our ton and a half Reo seems a good deal, but if one considers that this one truck circulates over 100,000 books a year, the cost does not seem prohibitive. I doubt whether the extra cost of circulating the 100,000 books on the Book Wagon over the cost of circulating them at the Main library or a branch would be as much as two and one-half cents a volume, or \$2,500 a year. This would be true even making a liberal estimate for depreciation of the Book Wagon, for gasoline and repairs and for the extra salaries of the people involved. Surely, two and a half cents a volume is not much to pay for the chance of distributing books through many parts of the city that cannot well be reached by branches.

The Book Wagon has been defined as a "library station on wheels." Its forerunner was the horse-drawn book wagon first used by the library of Washington County, Maryland, in 1905, to transport books direct to country people

Book Wagons on Country Roads

By Elizabeth Fangmeyer

Cincinnati Public Library, Ohio

*One of the eighty-two school stops made
in Hamilton County by the Book Wagon*

DUNLOW, situated on the Cincinnati-Brookville Pike at the point where the motorist removes his foot from the accelerator and prepares to glide down the long, winding slope into the valley of the Great Miami, might be termed a post-hamlet were it listed in Lippincott's Gazetteer. But editors of gazetteers pass by this spot as do the motorists bound for Indianapolis and points west, in spite of the sign board by the roadside whose black letters on a white ground announce to all passersby that here between these boundaries lies Dunlow. Nothing more. A few houses, a church and a general store. Population statistics here would never confuse a census-taker. In fact one-third of the inhabitants can be located at the store most any day in the year, but especially at those times when spring rains have made plowing impossible. There is always a checker game on an upturned cracker box and there

are always a few stories going around, ever good in spite of their age and frequent retelling.

To-day there are about seven of these inhabitants gathered in the shadow of the flaming red gasoline pump—even old Tim, whose solitary existence back in the woods and whose evident distaste for soap, water and comb as well as other appurtenances of human society have made him the butt of many jibes.

Just across the road, and displaying signs of parking in front of the store, is something which, the oldest inhabitant sagely remarks, looks to him like a truck load of books. Agreed. It is a truck load of books. Thereupon the tall lean man with the tobacco jaw informs his neighbor that he's seen many things being hauled in trucks from "hawgs" to circus callopes but he'd be switched if he'd ever before seen a truck load of books.

Now the miracle of modern progress has been skilfully parked in the space between a mud-spattered Ford and a lumber wagon and the driver is raising the glass panels, thus offering to Dunlow and the surrounding countryside a fair size collection of books, gay in covers of green, yellow, red and blue. A young lady, very businesslike with her pencil and stamping pad, approaches, with a smile and nod for all present, from her seat beside the driver. Evidently something unusual is happening in Dunlow today. Even the checker players look interested enough to give up the game if necessary.

"Nice lookin' lady," announces someone, probably a local wit.

"Don't reckon she'll sell many books around here." This from one of the checker players.

"There was a book pedlar to my place last week sellin' Bibles. My dog seed him first."

But it takes the storekeeper to explain matters. Wiping the pickle brine from his hands on his long apron and adjusting his pencil to a proper angle behind his ear, he assumes the grand manner of an informing grocer.

"You fellows are pretty dumb, I guess. This lady is a librarian from the Public Library in Cincinnati. If you ever read anything in this store beside tree coupon offers you'd see the sign telling you that the library up there is sending out books to all folks in the county that cares to read them. This lady and this book truck will be here the third Monday in every month and you can get books for nothing if you're not too lazy to pick them out."

Quite a speech for Dunlow's grocer; but then, he may be a Sunday School Superintendent, too, you know.

"Well," as the thin nosed man remarks, "it don't cost anything to look," and so they decide to inspect the truck and its contents.

"Chevrolet, ain't it?" asks the owner of the muddy Ford. "Did you have the body made to order? I bet them shock absorbers make her ride easy. Say, have you got a book on how to repair Fords?"

Old Tim, the hermit, surprises them all, including the librarian, by his solemn request for Xenophon's *Anabasis* or the work of Cornelius Nepos.

Being a well trained and experienced library assistant, the young lady weathers the shock, informs her patron that she hasn't the book with her this time but she will certainly have one or both on the next trip, meanwhile wondering just what to give this literary eremite from the collection on the truck.

From the frame cottage across the way, Mrs. T. has seen the book truck and now she comes through the gateway—a tall thin woman wearing a bright sunbonnet, the use of which is

belied by her deep "sun tan" complexion.

"Howdy, miss. I seed you comin' and I just put on my hat and come right over. My boy said this morning, 'Ma, don't you forget to get me some books when the book truck comes, to-day. Tell the lady I want western ones.' I guess you'll have to do the pickin' because I don't know much about readin'. I come from Tennessee."

From the house next to that of Mrs. T., the one with the well trimmed lawn and shuttered doorway, comes a young woman with a baby in her arms.

"I saw Mrs. T. come over and I thought I'd come, too," she says shyly, pushing aside the baby hands that reach for a bright book. "I'd like a cooking book and maybe a story, too."

Someone has discovered *God and the Grocer* and the village wit shouts to the storekeeper, "Just the book for you, John, so you'll feel more honest and not weigh your hand along with the sugar." The rest join in the laugh.

A shy young fellow coming out of the store asks if there are any German books to be had for his grandmother who cannot read English. Then little "Grossmutter" is brought out to the truck to select with shining eyes several Marlitts and Courths-Mahlers written in the language she has not read for many years.

The storekeeper remembers almost at the last minute that he is supposed to get a book on the diseases of fruit trees for a farmer who couldn't get in at the scheduled time and that the farmer's wife desires two good novels. These are to be left at the store until called for at mail time.

And so the populace of Dunlow accept their share of the county library service offered by the Public Library of Cincinnati and Hamilton County.

All of the villages do not respond as readily as this one on the first visit and the librarian, in making house to house visits meets many and diverse opinions on the subject of reading. Take for instance the initial trip to Ten Mile in the western end of the county.

It is a raw blustery day in November and the librarian, her wool coat buttoned to her chin, is anxiously peering up and down the road for signs of possible patrons. There are no signs. Even the storekeeper, peering out above the flyspecked "coupon" dishes, canvas gloves and unripe bananas in his show window, shakes his head despairingly.

Coming thus from one whose knowledge of the social life of Ten Mile has been gained through experience, this sign of discouragement casts a chill upon librarianish ardor. But merely a chill. Library enthusiasm warm in

her heart the lady sets out to visit the six households in the village of Ten Mile.

House number one, set far back from the road in a yard overgrown with last summer's weeds, presents a smokeless chimney, and broken windows with shutters flapping in the wind. No one here to enjoy library privileges.

The door of the next house is opened by a surly looking individual who evidently resents having to leave the cheerful glow of the base-burner to welcome callers. No, he does not want any books, but maybe the hired girl might.

This damsel would be delighted to have a book, but she must finish up her work before indulging in such pastimes.

At the third house, where a little yapping dog announces her arrival, the librarian is greeted with, "Ich kann kein English verstehen" from a little woman who places her foot in the doorway in self defense. How can the poor librarian, whose knowledge of German has been gleaned in a year or two of German I and German II, explain to this person the delightful opportunity offered to get a library book. With a smile which grows more pensive at each closing door, she goes on to the next house.

Here two charming ladies offer doughnuts and a seat by the fire near a beautiful angora pussy on a cushion, but they do not care to get books this time. Perhaps next month.

At number five the librarian is mistaken for a buyer of antiques and is coolly bidden to depart. Obviously the dealers in antiques have harassed this household to the point of murder, but the librarian, establishing her identity by the presence of the book truck up on the road, is invited in to see the Wedgwood plates and walnut secretaries and leaves with the promise to bring a book on old china and glass next time.

Number six has too many quilts to be pieced and her eyes are bad; furthermore, she will soon go to visit her married daughter in Hamilton. As this is the last house in the village a weary-spirited librarian returns to her book

truck hoping for better luck next time. As is usually the case in village stops, Ten Mile, after several more trips has become decidedly interested in reading and new borrowers appear each month.

And so the book truck goes speeding on its way. Well, not exactly speeding, for village constables have been known to arrest drivers of county cars in spite of license plates.

Science Hall, though its name suggests the space and grandeur of a World's Fair, is forsooth a house of learning, its frame walls and

belfry set firmly in a wide clearing of the woods. Its student body numbers twenty in good weather and the faculty but one in any season. Today the library book truck pulls up in the school yard next to the ancient and muddy vehicle that jounces the teacher over the back roads to the school house every morning. Through the windows comes the monotonous buzz of the

"I have a swell one this time!" Youthful Book Wagon readers in Hamilton County

Fourth and Fifth Grade struggle with the tables of nine or the Seventh Grade's united recital of the bones of the body. Then—a frantic waving of hands to attract the teacher's notice. The Book Truck is here!

The reciting is over and books are closed as the librarian and her assistant enter this single room school. Library books from the last stop are checked and counted while the children race each other out the door to the truck and make their choice of fairy tales, "twins," histories and story books. Each child is permitted to take but one book and when he has read it he gives it to the teacher who "circulates" it to another child in the class. At the next stop, a month later, these books are exchanged for others of the children's choice.

"Teacher, gimme another book about Henry Ware."

"Did you bring me the book you promised about Abe Lincoln on the flatboat?"

"I like to read about battles and wars."

"So do I. I had a swell one last time."

"Teacher, is this all right for a Third Grade girl to read?"

And so the chatter continues until the last book is dated, the shelves are closed and the book truck is on its way to the next school.

Book truck service in Hamilton County was begun in September, 1927, with one truck, a Chevrolet with a specially built body costing \$1,500. The work was planned to cover both schools and village stops but the demands of the children were so great as to eliminate any idea of serving adults that year. Stops were made every two months instead of monthly as originally planned. The book truck covered over five thousand miles the first year, served 178 classrooms in 74 schools and circulated 59,412 volumes.

A single room school with nineteen pupils circulated 463 volumes and a five room school circulated 5755 volumes during this time. By September, 1928, another truck was added to be used for monthly village stops and to supply the schools nearest the villages. The first truck continued to serve the elementary schools and high schools, making monthly stops this year. At present the two book trucks make eighty-two school stops and twenty village stops.

Hamilton County contains 407 square miles and has a population of more than 550,000.

The Public Library of Cincinnati has been serving this county for almost thirty years through branches, deposit stations and classroom collections. The book truck service was established to reach communities which were not receiving any book service or where the deposit stations were not being successfully managed. In the case of juvenile readers, a monthly choice from a large collection is far more enjoyed than a small collection changed only every three or six months.

The type of books asked for depends on the type of the community. The farming centers request books on vegetable growing, poultry raising and fruit culture. At Columbia Park which is a settlement of resident engineers and employees of the Union Gas and Electric Power Plant on the Ohio River about twenty-five miles below Cincinnati, the librarian must supply calls for *Trader Horn*, *Elmer Gantry* and *Bridge of San Luis Rey* as well as cook books and garden books.

But whether the call comes for the *Koran* or for *Abie's Irish Rose*, in Symmes Township or New Baltimore, over hills and through valleys, on paved roads or dirt lanes, in snow, rain, or sunshine, the book truck librarians will supply the book.

The Cost of Book Truck Service—Is It Worth While?

By Edna Holden

County Librarian, Logansport Public Library, Ind.

THE EXACT cost of book-truck service is most difficult to estimate. One can add twelve months' garage rent, so many hundred gallons of gasoline, quarts of oil and alcohol plus the price of two or more tires and a few patches with perhaps a repair bill or two and call the result the running expenses of the book truck. Divide this by the number of miles traveled and we glibly say: "It costs so many cents per mile to run our book truck." But what about the librarian, who is such an important part of this service? How much per mile does she cost and how many miles can she go? This equation is not so easily solved. It is like trying to set a price on the sunshine or rain or an intangible thing.

I have tried to collect the tangible facts from several libraries using truck service and have given them to you, hoping they would help to answer the problem of costs and we could go to the question: Is it worth while? As far as I can find out the answer is unanimously YES from the librarians and patrons having this service.

At Portland, Ore., they have two trucks—one for summer service with the books on the outside of the truck and the other for winter with the books on the inside. They write: "We cannot speak too highly of this service. Our routes are made every two weeks. We simply could not withdraw the service. It is about the most successful thing we do."

Greenville, S. C., has been using a truck for six years, visiting schools, villages and mills every two weeks, thus giving direct service only where they can make a stop of several hours length and serve a whole community from some sort of center of population. Their county is too large for them to make visits to individual homes; but they feel that they are most successful in the work that they do with a truck.

Hibbing, Minn., known as the richest village in America, for many years has had a book truck which carries about one thousand books and can accommodate six people at a time. They do real work in Americanization for many of their people are foreigners and cannot read

English. In several places where there are both Finns and Swedes each group selects its reader and gathers round him while he reads. Truly this is an unexpected fulfillment of America's promise of opportunity. And the book truck has made it possible, for they are people who would never think of seeking libraries and books. The books had to go to them.

Iowa State Library Association so thoroughly believes in the truck that after the passage of the state county library law a book truck was equipped and sent from county to county to aid in the establishment of county libraries.

The schools find that the regular arrival of the book truck keeps the children interested in books and reading. The ever-changing collection on the truck shelves gives them wide choice, and they never feel that they have read all the books in the library, a feeling sometimes expressed about deposit collections.

The patrons having house-to-house service are very firm believers in the book truck, and will fight for its maintenance if necessary, as it was at one time in our county.

Several Indiana libraries are now using a book truck for school work, house-to-house visits, and Muncie is even using one to visit her parks in the summer and circulating books from that center.

The initial cost of the various trucks in the state seems to run from \$109 to \$165 for the building of bookcases on various chasses with an additional \$15 to \$20 for lettering the body. The Bloomington-Monroe County one is the newest in the state, I believe. They

are using a half-ton Ford truck with panel body.

The body was rebuilt for \$165 and the gold lettering cost \$12, making the total \$860.15. This truck, as all the others in the state with one exception, has the bookcases on the out-

side so that the service must be given on the outside. The Rochester-Fulton County is the one exception. It carries about one thousand books on shelves built on the inside of the body and will admit ten or twelve people at one time. This is certainly a library on wheels. The initial cost is

somewhat more, as you will see from the chart.

The cost of operating varies, of course, with the size of the truck, kind of service given (that is, whether house-to-house work is done or not) and the kind of roads in the county.

The Logansport-Cass County truck costs .057 cents per mile, which seems to be about the average. This includes garage rent, gasoline, oil, alcohol, repairs and tires, but no depreciation on the truck. Rochester and Logansport have two county workers, while Evansville has three. All clerical work and cataloging is done by the city assistants. Rochester hires a driver for the winter months, which adds about \$200 to their expenses. The figures on the chart are from places having truck service in addition to stations and sub-branches, so that

the figures are not of the circulation from the truck alone. In our case we cannot divide the two expenses, as they are interchangeable.

It has been shown that schools, villages, factories and individual homes can be successfully served from the book truck. Is this

A family returning a bushel basket of books and selecting new ones from the Logansport, Ind., Book Wagon. Unfortunately, a poor exposure

The rural service Book Wagon used from September to June in Portland, Ore. Dodge truck with 600 book capacity

kind of service worth while? If so, what are the advantages?

We who do it feel that there is no question about it being worth while. Every day's work is proof anew of that. We reach the people who are too shy to enter a library building, where they fear they may make a mistake. We give individual service, and know our pa-

than the ones I get. They don't always read like the title sounds."

The truck is a fine advertiser. People do notice it and ask concerning it. I have found that no matter how much we advertise or try to publish the opportunities of the library, and that it is free to all, there are a goodly number of people who do not understand. Really, in

*Books being selected for the community libraries and the library in operation,
Camden County Free Library, New Jersey*

trons personally from the grandparents to the newest baby. Know their interests and desires. In our county we circulate many times the number of non-fiction books from the truck that are borrowed from the stations and sub-branch. Why? Because the truck has a trained librarian in charge who knows her books and her people, and whose job it is to see that the right books get to the right people. Because many times the patron does not realize that there is a book on just the subject he needs, and therefore he never asks for it. Many station keepers are willing and eager to do their best, but they do not know the books as we, at least, ought to know them.

Then, so many rural people are not familiar with books or authors. It is quite a common occurrence for a patron to say, "You pick me out some. I like the ones you choose better

beginning county work one must be an expert salesman, for it is just as hard to overcome people's fears of being taken in as it would be to sell them a book. We have made three or four visits, months apart, before people are convinced that it is all right, and that they want to borrow books. I remember one woman who refused books several times and at last explained that she could not, she feared, read a book through in a week. When we explained that we came only once in six weeks, she eagerly came out to the wagon and selected six books to read in six weeks, and now is one of our best patrons. So the truck is a reality, and not just a newspaper article to them.

We frequently find town people who, never having used the town library, move to the country and become users of the book truck because the books are brought to them. We

COST OF BOOK TRUCK SERVICE

Library	Truck	Initial Cost	Yearly Mileage	Cost per mile	Tax rate	Circulation per capita	Cost of circulation per capita
Bloomington	Ford, 1929, 1/2 ton	\$860.15					
Evansville—8 Tp.	Chevrolet, 1927	890.00	7,231	.053	.04	5.05	...

are sometimes amused at a few of our book-truck patrons who borrow books for their sons and daughters and live in town, but never go to the library, who think they get better books from the truck.

The truck is a strong link with the main library, and develops many readers for that institution. When a rural patron becomes accustomed to library rules, understands about returning books on time, feels acquainted with you and perhaps some of the others at the library, and comes to the place where he wishes more choice than the truck affords, he is willing and often pleased to come to the main library. We feel that this is quite a good thing, for the large library does have a stimulating influence that the small collection in a station or truck can never have.

From the money standpoint we are convinced that it is possible to operate for less money and reach more people with a truck than with only stations and branches. The book collection can be many times smaller and still be adequate. All the books are in constant use. Fewer copies of a title are needed because there will be no copies standing on a shelf for two or three months without being used, as must often happen in a station.

The library truck, then, goes to its people, seeking them out, not waiting for them to become library-conscious. If it is worth while for the grocer and baker to go to their customers, as they are now doing in almost every community, why should not the library do the same? It is just modern business.

Is it worth while? Unanimously YES!

The Welcome Wagon

THE WELCOME WAGON is an organization, with home offices at 1500 Columbian Mutual Tower, Memphis, Tenn., which procures the names of new property owners or renters. Its hostess is one of the first to call upon the stranger in a strange town and in Akron, Ohio, a card from the Public Library is presented along with a letter of welcome from the Mayor and such other valuables as theater tickets, coupons for the first loaf of Bond bread, the first two dollars' worth of electrical supplies

and advice as to the best milk for the baby. The only cost to the Akron Library, by arrangement with headquarters officials, is the cost of printing the card presented. The local hostess uses a white Studebaker closed car with a negro chauffeur, and Mr. Collins, Librarian at Akron, feels that the library is introduced in a dignified way and yet with cordial and hearty recommendations. This is a rapidly expanding organization, and at present is operating in twenty-one towns and cities.

The Roadside Library

By Donald K. Campbell

Librarian, Haverhill Public Library, Massachusetts

What Is It?

A ONE AND ONE-HALF ton bus chassis with specially built library body to accommodate 1000 books. Enclosed body to hold with comfort six people at a time, with driver's seat and assistant's work desk. This body heated in winter, cooled in summer.

How Does It Distribute Books?

It makes regularly routed stops of one-half or more hours each at convenient crossroads, near stores, post-offices, grange headquarters, or other convenient centers handy to the most people. It includes the possibility of parking outside a grange or community hall or other evening center to be available and attractive to people visiting these centres for social or business purposes.

What Kind of Books?

Books that will help with trade, farm, club, school work. Stories, biographies, books of travel, poems, plays, and magazines. Brings continuing supply of fresh, new books. Its purpose, to make available any book, anywhere in the library system, for any resident of the city. It extends city library facilities to all persons living beyond easy reach of central library and large branches.

How Does the Public Library now Reach its Public?

The ratio of card holders at present is:

One to each two and two-thirds of population resident within a mile and one-half of the central library or either branch.

One to each ten of population resident a mile and a half or more from the central library or either branch. More than 12,000 people live in this outside district.

The circulation of books from the five little branches at present in this outlying district has averaged for six years 12,500 per year.

We believe conservatively that a traveling automobile branch will double the amount of circulation done under present conditions from these little sub-branches.

We base this estimate on the experience of other cities using this means of rural book service, and on a study of the present use of the five sub-branches. To equal the average week's work done by the outlying stations during the last six years, this book automobile will need to circulate in the districts listed in table below:

Ayers Village district	50 books per week
Rocks Village district	72 books per week
North Parish district	57 books per week
Riverside district	41 books per week
Ward Hill district	21 books per week

Total 241 books per week

The public library user reads an average of about 20 library books per year.

If this automobile book branch can interest one in five of the 12,000 suburban residents of the city (2400) to read this average number per year, the result would be some 48,000 divided on the basis of population about as follows:

Ayers Village district	240 books per week
Rocks Village district	115 books per week
North Parish district	258 books per week
Riverside district	252 books per week
Ward Hill district	161 books per week

Total! 1,026 books per week

To be conservative, we halve this total and still have more than 500 estimated circulation

of books, or double the present circulation of 241 books each week.

One person in five is about half the number of persons who use a public library or branch in thickly settled city districts.

Citing the reaction of a city which has tried this system—the Evanston (Illinois) Librarian has this to say concerning the experience of such a service in that city:

Book Auto Service of Evanston Public Library

"We have operated our book truck for eight summers to take the place of the school stations which had not proved successful mediums for issuing books during the long vacation season.

"It has scheduled routes (a different one each of five days) and stops about every second block, sounds the horn, and the people come out as to a vegetable wagon and select their books.

"For all-year-round service in your climate, as in ours, a large truck such as is used by the Hibbing Library, Minn., would seem the only feasible type.

"If, as with us, whatever you do is of necessity more or less of a compromise between nothing and something partially good, I would say that for scattered communities, we have found that we can provide much more for the same amount of money through book auto service.

"Books do not lie idle in stations between days of opening. Collections in truck can easily be modified to suit communities traversed.

"Assistance in book selection is of primary importance. One experienced adaptable librarian on book truck gains an experience and a background which makes her services more profitable to community and library than the same total salary investment in the part time station librarians.

"There are definite advantages in the informal and intimate service of a book truck. We found that dozens of Polish families took books from the truck who had not patronized any other form of a library agency.

"We found that one of our greatest assets the first two summers was that the librarian in charge was one of the school librarians, who was very popular with the children. When the parents saw that the children knew her, they gave no objections to the children 'taking,' and would sign for cards for themselves.

"The book truck has been one of the most interesting library experiences with which I have been connected.

"It has issued during these years an average of 10,000 volumes a summer to people who would not otherwise have used books.

"There seems to have been nothing which the library has ever done which has so attracted the attention of the various city departments and of the press as has the book auto.

"Also the people in the parts of the city remote from the central sections felt a sense of gratitude in that as they say: 'We now have something for our taxes which the people on the east side do not have. Previously they gained most from their tax money, for they are near enough to the lake front to profit by the money spent to improve it, but now we have books to offset that.'"

Assistance to be Provided at Main Library—

1927 maintenance cost		\$571.44
Proposed cost		242.40

This saving in salary would become possible partly by redistribution of duties, but principally by releasing a higher salaried assistant to more important duties in connection with promoting rural library service and replacing the more mechanical portion of his duties at the central library with a lower salaried assistant.

Brief prepared for Library Board regarding subject of suburban book service.

A Cooperative Clearing House for Duplicates

By H. W. Wilson

ONE OF the chief reasons for printing the Provisional Edition of the *Union List of Serials* was that it might serve as a want list of what was needed to complete sets of periodicals, and give opportunity to libraries to dispose of unwanted duplicates. This theory proved in practice to be somewhat visionary for several reasons. First, libraries did not have people who could give the time necessary to make lists of duplicates of volumes and fractional sets and quote them to other libraries in need. It was discouraging also to find that often the library to which quotation was made did not care to complete some sets except by gift. And so it came about that the dream of consolidating useless fractions into complete sets for regional use was not realized, and the final edition of the *Union List* was printed showing many cases where one library still holds a scrap that is needed to complete a set in a neighboring library.

At the time when this Provisional Edition was published the matter of cooperation through the office of the *Union List* in the exchange of periodicals was considered. A plan was made, but it was thought inadvisable to put it into operation, since it was expected that libraries would carry on for themselves.

Now, with the publishing of a supplement to the *Union List*, the question again arises whether such a cooperative plan cannot be made successful. The following is suggested:

Invite every library to send to the Clearing House, on 3 x 5 thin paper slips, a record of duplicate or unwanted sets or partial sets. The slips should be typed in the style of the *Union List* and show the price at which items should be sold. The Clearing House will, if requested, give its best advice as to prices that should be charged.

When lists have been received from all of the libraries that wish to cooperate, all cards will be thrown into one alphabet as "copy" for a printed catalog, which will be issued and distributed to all libraries thought to be interested.

The selling library will make shipment direct to the buying library and will receive credit for the amount of the sale, less commission from the Clearing House. The cost of operating the Clearing House, printing the sales catalogs, and keeping the accounts should be met from a commission of probably 25 per cent on all sales brought about. In case of a balance due to a library or the Clearing House, payment by check may be required by either.

In case this plan is well thought of, the H. W. Wilson Company will be willing to undertake it, and without obligation on the part of the libraries that cooperate. The expenses of operation will be computed just as are the costs of other operations of the company, and, if experience shows that 25 per cent is too high or too low, the rate of commission will be adjusted to cover cost of operation, with a small margin of safety. If the plan is undertaken, the Wilson Company would be glad to have an advisory committee appointed, unless the Advisory Committee on the *Union List* would be willing to enlarge its responsibilities and cooperate in this plan.

Having lived all my life in daily contemplation of cost accounting methods and calculation of overhead expenses, I can readily understand that one who has been free from such unpleasant conditions will have no idea of what it costs a library to handle its own disposition of unwanted periodicals, and may therefore feel that a commission of 25 per cent is high. I can say with certainty that if such a business can be carried on and sales consummated at that cost, it will effect a great saving. I am sure that the work can be centrally done at a half and perhaps a quarter of the cost of having it done in many places. Undoubtedly the chief advantage would be that of moving the periodicals from a state of idleness to a state of productivity, with a comparatively small outlay of cash.

This plan does not provide help in disposing

of odd numbers or items of too little value to warrant inclusion in a printed catalog. The first problem in handling duplicates of this sort is to know what has value and what should be sold for waste paper. For the last two years the Wilson Company has kept a record of orders and sales as a basis for determining what and how much stock will be required to meet its probable need for some years to come. To help build the stock up to this requirement, a want list covering more than a thousand titles has been prepared, and we believe it is safe to assume that numbers of these periodicals not on this want list have little value. In some cases bulk shipments of all and any items the library has might be sent by freight from a distance of a few hundred miles, and the credit given exceed the freight charges. Ordinarily, we should advise librarians to check the list of wanted periodicals, ship only what is worth shipping, and dispose of the balance as waste paper. The making of lists of duplicates of the more popular periodicals is generally useless, but lists of important periodicals not in this catalog should be made and submitted to dealers.

The publishing of this want list is an experiment, but it is expected that revised and enlarged editions will be issued from time to time, and it is hoped that it will be found eventually to be a safe and dependable guide in selecting from stocks of the more common periodicals those numbers that should not be destroyed.

The Bookmobile as a Demonstration Book Truck

THOUSANDS of people from all walks of life in many States of the Union had their first knowledge of book trucks as they gazed upon the Bookmobile while it traveled over the country in 1929. Methods of using book trucks in rendering library service to remote sections of cities and counties were described to a large percentage of them.

One of the original purposes for which the Bookmobile was built was to give demonstrations of this kind. Explanations to librarians, library trustees, school authorities and county officials were given in much greater detail. If results may be measured by the widespread and favorable professional and newspaper comments, this object alone seems to have justified the expense borne by the long list of sponsors of the Bookmobile.

Contrary to some expectations, the Bookmobile is not a model book truck, that may be duplicated for local use. Different duties to be performed in various places, local climatic and

road conditions, available resources and other considerations make it impracticable to design a truck to suit or even act as a dependable model for use under all circumstances.

The Bookmobile copied some of the best ideas from different trucks now in use throughout the country. It has a few that are original. Many features successfully used in local book trucks were omitted so as not to interfere with the advantageous display of the permanent exhibit that it carries. This exhibit consists of reference books, catalogs, library supplies and equipment of those sponsoring the expedition.

To be an inspiration rather than a model is the purpose of the Bookmobile. Its size, shape and color attract the attention of the most sophisticated passers-by. To the layman, the ideas it represents are new and impressive. The thoughts that are provoked and the memories that crystallize when it is recalled by local agitation for county library service are its chief contribution to library progress. Now, almost

The Bookmobile is now touring the Lower Mississippi Valley

a year later, favorable echoes of its early visits are heard as library reports for 1929 are read and discussed.

The cumulative effect of these demonstrations, the newspaper and magazine publicity, talks and contacts should be valuable in making the establishment of county library systems increasingly simple and more frequent. They should hasten the time when book trucks become standard library equipment everywhere.

The nation-wide tour of the Bookmobile has been continuous since Jan. 3, 1929. At present it is visiting the lower Mississippi Valley in charge of Mr. Thomas J. McLaughlin. Advance routes are published in library and book

trade publications and sent by mail immediately prior to individual visits.

The Bookmobile is cooperatively sponsored by the National Association of Book Publishers, the American Booksellers Association, R. R. Bowker Company, H. W. Wilson Company, H. R. Hunting Company and Gaylord Brothers, who are assisted by the American Library Association, F. W. Faxon Company, Public Affairs Information Service and many other firms and associations. It is their ambassador of good-will to the library and bookselling world and offered to individual localities in the hope that it may be found useful in promoting their respective ambitions.

The Tompkins County Library

By Albert Lawrence Huff

Supervisor, Tompkins County, N. Y.

IN THE SPRING OF 1928 a campaign for a truck was started by the children throughout Tompkins County, and dimes were collected until finally it was purchased. Then we, the Supervisors, began to receive letters from the Parent-Teachers' organizations, Junior High Schools, W. C. T. U., Women's Clubs and finally a committee was appointed from the Board to make an investigation. They reported favor-

ably and offered a resolution asking for an appropriation of \$3,000 for county library work. The State department loaned 5000 books and our Cornell City Library loaned 1298 books. We now have 7000 books in circulation to 130 schools and between 40 and 50 houses and stores.

I had the privilege of spending a day on our truck not long ago. We started about 9 A. M.

and visited many schools, all of which dismissed directly the truck hove in sight. Most of the pupils in the first school were American-born, and I noticed that many of these boys were asking for Indian and Western stories. Then came the shock! We called at a school where there were ten boys and four girls, all Finns. Requests were made for books on science, and I asked, "What kind?" The answer promptly came for Electricity, Aeronau-

Each circle represents a stop made by the Book Wagon

tics and Agriculture. And as we drove off I began to ask questions. I found that the fathers of these boys have bought old farms, have but little money and are using our books to get help for themselves and their children. Our librarian is working with the Farm and Home Bureau, and women's clubs are asking for programs. Does it pay? I do not hesitate to say that I think it is one of the best investments our county has made.

In the spring of 1928 the children of Tompkins County each gave a dime toward the purchase of this Book Truck

THE LIBRARY JOURNAL

February 1, 1930

Editorial Forum

THE BOOK WAGON has become so useful and promising a feature in library extension that this issue of THE LIBRARY JOURNAL is given largely to the subject. The Bookmobile took up the idea for another purpose within the same field and made journeys throughout the whole eastern country, as described in this issue. What the book wagon has done in respect to a city library, especially in reaching factory hands, is told by Mr. Paul North Rice of Dayton, and suggests its use by similar libraries, while from Cincinnati, as Miss Fangmeyer tells, its use throughout the county library system, the use for which the book wagon was really originated in Maryland, is well exemplified. To those considering the development of a book wagon scheme, Miss Holden's article on different methods and their respective costs will be welcome. If any librarian has failed to read Christopher Morley's *Parnassus on Wheels*, that also should stimulate interest in the book wagon.

AT THE STOCKBRIDGE meeting of the Library Institute there was useful discussion on the question of a clearing house for duplicates based on Mr. H. W. Wilson's presentation of the subject, one which, as we have before pointed out, comes every once in a while to the front ever since Mr. Dewey's original emphasis on its value. The physical difficulty of obtaining sufficient room within cost limits for a collection of duplicates, and the financial difficulty of exploiting and utilizing the collection, have always stood in the way of the realization of the plan, in itself good. Mr. Wilson has now undertaken what may be called a sample development by starting a like plan for completing sets of the periodicals in-

cluded in the *Union List*, and his paper read before the joint session of the University and Reference Librarians and College Librarians at the mid-winter meeting in Chicago should have practical outcome by attention from libraries which either have copies of these periodicals it does not desire to keep on the shelves or lack copies to complete sets. It will be interesting to note, after some months' trial, how effective this plan has been in its workings and what the cost has been in relation to the saving of values by this service.

THE CARNEGIE CORPORATION is not lessening its service to libraries because it has ceased to follow out the old method of furnishing funds for library buildings. The donation of \$100,000 to the British Columbia Library Commission for library extension outside the two great cities in that sparsely settled province is a fine example of international generosity, international in one sense, though included in the American field, as the name of the A. L. A. emphasizes. The gifts to library schools have been carefully considered and allotted, the leading one being to the Carnegie Library School of Atlanta, which Mr. Carnegie himself had closely at heart as doing needed work in the Southern States, many of which greatly needed and still greatly need the service of trained librarians. The proposed school at Denver will serve locally a quite new field, although the Rocky Mountain States have not been without representatives in the existing library schools. Certainly the Carnegie Corporation, since Mr. Carnegie's death, has entirely fulfilled his spirit of generosity by the wise work which it has done for the whole library movement at home and abroad.

BROOKLYN and its Public Library lose in the passing of David A. Boody, at the ripe age of ninety-two, the one, a foremost and finest citizen, the other, the library's only president during its active existence of thirty-three years. Dr. Boody served the public in many capacities, as a governor of the Stock Exchange—after, in the sixties, he had purchased for \$1,000 a seat worth just before the crash nearly half a million, now held by his grandson—as a bank president, as Congressman from a Brooklyn district, and as Mayor of Brooklyn in the latter years of its existence as a city before its submergence in Greater New York. But no

public cause has ever meant more or been dearer to him than that of service to the public through the Brooklyn Public Library system. When Mrs. Mary E. Craigie began her collection of books toward a public library, she easily obtained the sympathy and assistance of Mayor Boody, kindest and most good-natured of men throughout his long career. To his instrumentality was owing the charter of the new library, as well as the recharter of the Brooklyn Institute of Arts and Sciences, now with its two libraries, the art library at the great museum, and the children's library at the Children's Museum, of which he was a charter member and remained a trustee, though inactive in his later years. In the early days Mrs. Craigie acted as director of the new library and came to consider that she represented the ownership of the public in it, so that when a real librarian was found for it in Arthur E. Bostwick, this lady, whose private spirit paralleled her public spirit, continuing in service as assistant librarian, so harried her chief that he accepted the invitation of the New York Public Library to return to his former post there, whence he went to St. Louis for his great achievement as the head of a municipal library, which he has made one of the foremost in the land. In 1901 Dr. Hill came to the post, which he has filled for nearly thirty years, during which the library system has reached its present great proportions, yet to be crowned by the completion of the central library, whose beginnings its only president had the satisfaction of watching from the window of his home for some time before his death. It was probably not known to Mrs. Craigie or Mayor Boody that the trustees of the old library—originally the Brooklyn Mercantile Library, under the librarianship of Stephen B. Noyes, whose Brooklyn "catalog" made that library famous in its day—had laid plans for the consolidation of existing libraries into a public library for Brooklyn. The choice of Dr. Hill as librarian was agreeable to the members of this board, and in 1904 a merger was completed by which the property of the old Brooklyn Library, then three-fourths of a million dollars in value, and now much more, was passed over as an endowment for the new enterprise under contract that the representatives of the older library should, for the succeeding twenty-five years, ending in 1929, elect half the new board. Since that date the Mayor has reappointed members of the old board, including Mr. Bowker, for some years the senior in service, covering more than forty years since his election to the old board in 1888. Under the presidency of Dr. Boody both classes of trustees have worked in entire harmony, and his devotion to the library and its staff was illustrated in his generous ante-

mortem gift of \$50,000 as an endowment for the benefit of the Brooklyn Public Library staff. Perhaps no library can boast the record of such a president as Dr. Boody!

THE INSTITUTE PAPER of Dr. Hill, "What Shall We Do with Our Old Librarians?" printed in *THE LIBRARY JOURNAL* for Nov. 15, 1929, proves to have prophetic meaning, for at Dr. Hill's own initiative and insistence the Board of Trustees of the Brooklyn Public Library have accepted his resignation after nearly thirty years of service, to take effect probably in October next, and made provision for his later years. He is retired with the title Librarian Consultant, in the expectation that he will cooperate with his successor, yet to be chosen, in planning for the equipment of the central library, now again started toward completion, and giving the help of his long and active experience. The rather novel title was suggested by the use of the word "Consultant" in the Library of Congress, and defines a function which, with tact on both sides, should make a happy result of old experience and new vigor when a veteran librarian comes to the retiring age and a younger librarian takes up his work. It is scarcely necessary to point out to the library profession how successful has been Dr. Hill's work in the past fifty years, in Lowell, in Paterson, in Salem, as the predecessor of Mr. Dana in Newark and, finally, in Brooklyn, and how great his service has been to the A. L. A. as secretary, president, member of the War Service Council, chairman of the War Finance Committee, and in many other relations, while his presence at library meetings has always meant live contributions of real value as he wrote or took part in discussions. Dr. Hill has recognized that the burdens of administration of so large a system as that of the Brooklyn Public Library, especially with the problems of the new building confronting its head, might be rather wearing as he came into the five years preceding his becoming an octogenarian and demanded the fresh energy of a younger man, preferably within the half-century age, with years of experience behind and years of usefulness before him. The Brooklyn trustees were unanimous in their regret and unanimous in wishing that means could be afforded of making larger remuneration for him in his retirement than the \$4,000 yearly, which seemed the practicable limit and proved acceptable to Dr. Hill. May it be many years that his pen, his voice, his personality may still rejoice his associates, old and young.

Librarian Authors

EMMA L. BROCK, a children's librarian of wide experience, was born at Fort Shaw, Mont., and during the early years of her life led a nomadic army life from West to East and Middle West. She attended high school in New York City and Philadelphia, and received her A. B. from the University of Minnesota. While in college she specialized in literature and writing, studying the latter under Ada Comstock, and did not begin her art training until after college years were over, when she studied design and figure drawing at the Minneapolis School of Art. For two years she was in the Art Department in the Minneapolis Public Library, and in 1921 went to New York City for further art work. In New York, at the Art Students' League, she studied etching with Joseph Pennell, whom she terms "a most kind, crabbed and excellent teacher," and figure drawing with Boardman Robinson. While studying at Art School she joined the staff of the New York Public Library and remained there for six years, during which time she worked in children's rooms in various parts of New York with Jewish, Irish, and Italian children, and had "great fun." The summer of 1928 was spent in a small Breton fishing village sketching the people, their houses, and their costumes, and here she first met "Zacharie." The first book to be written and illustrated by herself, *The Run-away Sardine*, published by Knopf, grew out of some Brittany sketches and water colors, and we have the unusual story of Zacharie, an adventurous sardine, who lived in a tub in the cottage of a very old Brittany fisherman and his very old wife. Zacharie soon tired of his confinement and longed for freedom and

Emma L. Brock

"Zacharie," the leading character in "*The Run-away Sardine*"

a glimpse of the sea, and so one day he put his tail in his mouth and rolled out of the house and into the village street. He had many adventures before he finally returned, a much wiser sardine, to the safety of his tub. The

book is decorated throughout in two colors and done with a broad, free brush stroke, the pictures moving gayly through the text.

During these years she was also illustrating children's books. She illustrated *The Memoirs of a London Doll*, by Richard Henry Horne, in 1922; *Merrimeg*, by William Bowen, in 1923, and the Children's Classics edition of *Granny's Wonderful Chair*, by Frances Browne, in 1924, all of which were published by Macmillan Company. In 1922 she illustrated a book for Harcourt, Brace, *Islands of Magic*, by Elsie S. Eells. Exhibits of her etchings and water colors have been held in Minneapolis, Toledo, Brooklyn, and New York City, and in 1928-1929 she showed her work in the American Federation of Arts Rotary Exhibit. She has spent three summers in Europe sketching castles in France, villages in England, and market places in Italy, France, and Holland.

At the present time Miss Brock is working in the Art Department of the Minneapolis Public Library and illustrating children's books. Her hobbies are "characters in markets, push-carts of New York and markets in Italy and France."

A. L. A. Midwinter Meeting—II

Executive Board

ONE OF several new publications authorized by the Executive Board at a meeting Jan. 1 was *Illustrated Editions of High School Classics*. Others were *Foreign Books for American Children's Rooms*, an *Index to Plays for Children*, *American Library Laws and Book Selection and Acquisition*. The *Graded List of Books for Children* will be printed when indorsed by the committee in charge of the list.

The hospital library project, providing for a study of the use of books and reading as a therapeutic agent in hospitals, was approved, and the request for an appropriation for printing the report of the Committee on Institution Libraries and for printing prison library book lists was likewise approved.

On the motion of Mr. Wheeler, it was voted that the President be authorized to appoint a special committee to consider the establishment of a statistical bureau at A. L. A. Headquarters, its functions, and the method of financing, and that the committee consist of representatives from several library groups which will presumably use the statistical information. Elva S. Smith felt that there was a growing feeling among libraries that the burden of reporting statistical information and answering questionnaires was becoming too great.

A department of library work with children at A. L. A. Headquarters was again considered, and an endeavor to secure funds for this project approved. A department of school library work at Headquarters was also discussed, and a motion by Mr. Dudgeon carried that "the Board at this time recognizes the rapidly growing importance of this field of work, and reiterates its interest and indorsement . . . and considers this the important thing for 1930."

How the A. L. A. could aid the college, university and reference libraries by giving more attention to the scholarly aspects of the profession was discussed at some length. It was brought out that when the Executive Board appropriated money for something which did not interest the college and university libraries, it was not because the Board preferred in every case that particular activity, but because the money was given for a specific project.

As there are no funds to carry out a recommendation from the College and Reference Section that a clearing-house be created at Headquarters for bibliographies and research lists compiled by various libraries, and as the A. L. A. Headquarters Library would probably serve as such a clearing-house, if properly

financed, the recommendation was laid on the table.

Chicago was selected as the meeting place for the A. L. A. Conference in 1933, because of the proposed Chicago Centennial Exposition at that time. Members added to the committee at work on plans for the Exposition are: Ethelred Abbott, Mary B. Day, William Teal, Winifred Ver Nooy, Charles H. Brown, Pearl I. Field and Bess McCrea.

It was voted, on motion of Mr. Dudgeon, that the Executive Board instruct the officers and the Chairman of the Committee on Hispanic Relations to make every reasonable effort to have someone at the Inter-American Conference on Bibliography at Havana who can adequately represent the A. L. A. It was also voted, on motion of Mr. Lydenberg, to convey to the Conference the hope that it will hold its second meeting in 1933 in Chicago.

The suggestion of Gladys Caldwell, chairman of the Committee on Visual Aids, that the name of the committee be changed to the Committee on Motion Pictures and Other Visual Aids was presented. No action was taken.

The Rockefeller Foundation, at the request of William Warner Bishop, has voted \$2,500, it was announced, to make possible a visit of the architect of the League of Nations to this country to inspect American libraries, the grant being made to the A. L. A. for disbursement.

The Secretary announced that a fellowship of \$1,900 has been granted by the Carnegie Endowment for International Peace to Margaret Demchevsky, of Bulgaria, to visit this country and study American library methods, the grant to be disbursed through the A. L. A.

Another fellowship of \$1,500 has been granted to Señiorita Maria Chavez, of Mexico, by the Carnegie Endowment for International Peace, for one year of study at a library school in the United States, this fellowship likewise to be administered through the A. L. A.

A letter from the Research Service, Washington, D. C., was read, asking the Association to cooperate in a study of eyesight conservation, a thorough, systematic, scientific investigation that will analyze the various elements and make a series of tests with the "reader's eye" to ascertain the most legible type faces for various uses. The Secretary had replied, asking for suggestions as to how the Association may cooperate. No action was taken.

It was voted, upon motion of Mr. Dudgeon, that the President appoint the joint committee with the Fire Underwriters' Association, which was authorized by the Council.

Council

D. C. Numbers on L. C. Cards

A DEFINITE interest in adding D. C. numbers to L. C. cards was indicated in a report by Eliza Lamb, University of Chicago Libraries. Subscriptions have amounted to \$8,000 of the \$9,000 a year needed to start the work, and the Library of Congress, by detailing service, agrees to underwrite half of the remaining \$1,000, provided the A. L. A. will underwrite an equal amount. The Executive Board later authorized this underwriting. In accordance with the plan, D. C. numbers will first be supplied on cards currently printed for English books and as many others as possible. As time and funds permit, they will be added to all printed and reprinted cards. The work, if undertaken, is expected to be self-supporting, on a service basis, at the end of the three years of trial.

Extension of Cooperative Cataloging

Mr. Keogh, Doctor Williamson and Doctor Bishop have been appointed a committee to raise the \$7,500 needed to undertake an investigation in the field of cooperative cataloging, Miss Lamb announced. The investigation—recommended in 1928 by a committee of the Catalog Section, of which Mr. Currier was chairman—and the effort to promote cooperative cataloging were indorsed by the Executive Board. It was voted that the report be accepted.

Hospital Library Project

A recommendation that *The Booklist* include ten books a month for hospital libraries was referred to the Editorial Committee, and a second recommendation that the Committee on Hospital Libraries' Budget be raised from \$50 to \$100 a year was referred to the Executive Board.

Federal Library Activities

The ten questions concerning a future program for the federal government in library work, enumerated in the December *Bulletin*, were taken up one at a time in the Council. Suggestions that liberal interlibrary loan privileges be extended, and that the government prepare special bibliographies on educational subjects on request met with unanimous approval. A large majority of the Council approved the recommendation that the United States Bureau of Education maintain an adequate library on education for the staff of government employees in that field and for other

students. Attention was drawn to the fact that such a library existed, but its continuation was advocated on the ground that such an important government function should not be overlooked in outlining a federal library program.

The preparation and publication of bibliographies of current books and pamphlets in the field of education; the compilation and publication of library statistics; the conduct of surveys and studies of library service, and the production of publications on library service were all considered proper government activities by a majority of the Council.

Opinion was divided on the question of maintaining a library division in the federal office of education; on the federal conduct of surveys of library service outside the field of education and on federal advisory assistance on library service to schools and colleges, although all suggestions were approved by a small majority.

Subsidies to equalize library service or to aid in the establishment of county libraries were opposed by the Council, although financial aid to promote adequate library service in educational institutions and in connection with educational projects partly or wholly financed by United States Government funds was approved after discussion. Federal advisory assistance on library service outside the field of education was not found. All votes were to be taken as informal, and as expressing the sense of the meeting.

As the library program will not be presented to the advisory committee on education until called for by the Committee, Carl H. Milam, library representative on the committee, requested that A. L. A. members submit additional suggestions.

Business Libraries Section

At the request of William Alcott of Boston, president of the Special Libraries Association, a committee was appointed to inquire into the legal standing of the Business Libraries Section of the A. L. A. The committee, consisting of H. O. Severance, chairman of the Committee on Constitution and By-laws; Carl B. Roden and Matthew S. Dudgeon, the two latter trained lawyers, made the following report:

"Your committee has given careful consideration to the facts in the case presented by the member who offered the resolution and by the chairman of the section, to the by-laws governing the authorization of sections, especially Section 17, which is involved, and to the record of the Council authorizing the Business Libraries Section.

"The contention is that this section held a private illegal meeting at which it elected officers and adopted constitution and by-laws; fur-

Supplementary material to Council report in last issue of THE LIBRARY JOURNAL.

thermore, that the section should have elected officers and adopted the constitution and by-laws at the open meeting May 16, 1929, 8:30 p. m., in the Washington Auditorium.

"It is necessary to refer to the minutes of the Council of Saturday morning, Dec. 29, 1928, which read as follows: 'That the Council grant the petition for a Business Libraries Section now before it, and permit *certain members* of the American Library Association to organize a section to be known as the Business Libraries Section. The motion was seconded and carried.' (A. L. A. *Bulletin*, January, 1929, p. 10.)

"It seems clear to the committee that these 'certain members of the Association' were the petitioners for the section, and that the Council intended to authorize these petitioners to proceed with the organization of the section. The Chairman of this group called a meeting of the petitioners by mail, inclosing a copy of the proposed constitution and by-laws. The meeting was called at 3 p. m., May 16, in the Library of Congress. The officers as given in the A. L. A. *Bulletin*, August, 1929, p. 292, were elected and the constitution adopted, those members not present voting by mail.

"It is the opinion of your committee that this group has acted within its rights, and that the proceedings comply with the enabling clause and with the By-laws of the A. L. A.

"In regard to the open meeting on May 16, at 8:30 p. m., the committee holds that the constitution and by-laws were legally adopted at the previous meeting, but that the officers elected at that time were temporary officers, and that permanent officers should have been elected at the final meeting, the meeting of May 16 at 8:30 p. m. Section 17, last clause, reads: 'The registered members of each section shall at the final session of each annual meeting choose officers to serve until the close of the next annual meeting.' Consequently, the officers elected in the afternoon of that day are not the officers *de jure* in the technicality of the by-law. On the other hand, they are *de facto* officers, and may hold office and function until the final session of the section at the next A. L. A. conference, because the section failed to elect permanent officers at the meeting May 16 at 8:30 p. m., the final session of that annual meeting."

The report was adopted by a vote of thirty-two to one.

Fire Insurance

Fire insurance on library building and contents, at not less than 80 per cent of their value, was recommended in a report of the A. L. A. Committee on Fire Insurance, pending a report of a proposed joint committee of

A. L. A. members and representatives of the National Underwriters Association. The suggestion of 80 per cent instead of 100 per cent of their value was made because in many cases it would appear that lower rates can be obtained by 80 per cent co-insurance than under any other plan. It is hoped that the preliminary report, prepared by the committee, of which O. R. Howard Thomson is chairman, may be printed later.

The Council authorized the appointment of the proposed joint committee, and the report was adopted.

The Statutes of the International Federation of Library Associations, printed in the December *Bulletin*, were unanimously adopted.

Book Censorship

Book censorship by customs officials was condemned by the Council in the following resolution, which was adopted on the recommendation of Ralph Munn, chairman of the Federal and State Relations Committee:

"The Council of the American Library Association, regularly assembled at its midwinter meeting in Chicago, Dec. 31, 1929, bespeaks your earnest support of Senator Cutting's amendment to Section 305 of the tariff bill relating to the importation of books. Quite obviously, the American Library Association does not favor either obscenity or revolution, but neither is it willing to place a censorship in the hands of customs officials whose established record in this matter borders on the absurd. Books which are essential to American scholarship have already been banned by customs clerks. Under the original provisions of Section 305, eliminated by Senator Cutting's amendment, but now proposed for reinstatement by other interests, this condition would become intolerable. With prohibitory statutes in most States and with many voluntary organizations seeking to censor the nation's reading, the American Library Association sees no need for further federal action."

The Secretary was instructed to send copies of the resolution to all senators.

Miscellaneous

A publisher cannot refuse to accept a subscription in cash of the realm and in good faith to a magazine admitted to second-class rates, Mr. Lydenberg informed the Council on behalf of the Book Buying Committee, when Mr. Ranck reported that certain technical publications refused to accept subscriptions from libraries.

A petition that the Maryland Library Association be made a chapter of the A. L. A. was granted by unanimous vote.

Association of American Library Schools

A MEETING of the Association of American Library Schools was held at the Hotel Knickerbocker in Chicago on Dec. 30, 1929. Thirteen schools were represented. Papers were presented as follows: "The Service Load of Library School Faculties," by Ernest J. Reece; "The Need for an Index to Current Publications in the Fields of Library Work, Bibliography and Publishing," by John S. Cleavinger; "The Program and Methods of the Graduate Library School of the University of Chicago," by Douglas Waples; "Whom Shall the Library School Admit?" by W. E. Henry.

Informal discussions were also held on the use of A. L. A. text books, the relations between the Board of Education for Librarianship and the Association, and various topics suggested for the program of the next meeting, to be held in Los Angeles. Members of the Association dined together at the Hotel Knickerbocker between the afternoon and evening sessions.

Normal School and Teachers College Librarians

THE NORMAL School and Teachers' College Librarians, under the chairmanship of Eleanor Weir Welch, met on Tuesday, Dec. 31. Ruby E. Cundiff, Library School, Syracuse University, spoke on "Methods of Building a Live Book Collection." She emphasized the need of the library being built around the courses in the catalog, that it may take its place as an instructional factor in the school. The publications for each course will fall under (1) primary sources, (2) secondary sources, (3) in the general field, (4) in the regional field. This material will include books, periodicals, official documents, society publications, atlases, bibliographies, dictionaries and encyclopedias. Such a study will build the collection where weak, cooperate with the teaching staff, inspire respect for the library and its service.

Mrs. Elsie Howard Pine, Kansas State Teachers College, Emporia, Kan., talked on "The Organization and Administration of the Practice School Library." Mrs. Pine discussed the advantages and disadvantages of housing the practice library in the college library building and of housing it in the training school building. The practice school library should not be too expensively equipped, but should be simple and complete to serve as an example for the smaller communities. She further emphasized the size, shelving and equipment, hours of service, books, the librarian and her service.

The service is first to the practice school pupils and secondly to the practice teachers.

The third speaker, Della McGregor, Chief of the Juvenile Division, St. Paul Public Library, discussed the illustrators of recent children's books. A mimeographed list of illustrators and an exhibit of books supplemented the talk. Miss McGregor spoke especially of the characteristics and tendencies of the three Russian artists, Boris Artzybasheff, Nadejen and Silibin. Other artists emphasized were Elsa Beskow, Pamela Bianco, Elizabeth MacKinstry and the Petershams.

The charts and floor plans of reserve rooms and practice school libraries exhibited at the Washington conference were on display and will form an exhibit kept at headquarters to be loaned to those interested.

Miss Emma Wiecek, librarian of the State Teachers College, Mankato, Minn., was elected chairman for 1930.

University and Reference Librarians

THE SECOND session of the University and Reference Librarians was held on Tuesday afternoon, Dec. 31. Mr. Fowler presided. The first speaker was Robert J. Usher, who read a paper on the Howard Memorial Library, New Orleans, of which he is the librarian. Founded in the '90's, the gift of the Howard family to New Orleans, the library has specialized in reference material and has played an increasingly important part in the educational life of the city. Without adequate funds for cataloging or making material available, the former librarian, Dr. William Beer, bought at what seems now a ridiculously low price, vast quantities of books, pamphlets and periodicals. After being stored in the basement of the library for years, the accumulation is gradually being sorted over and made accessible by the present librarian. Many rare books and pamphlets are coming to light.

Harold G. Russell of the University of Minnesota Library next read a paper on "The Foreign Dealer: a Study of the Book Trade." His paper dealt not so much with what books to buy as where to buy them. He said that was the problem of many scholarly libraries. He distributed to those present a mimeographed list of 100 foreign booksellers, omitting those which deal in books of Great Britain, France and Germany, and emphasizing those in countries where booksellers are not so well known to American librarians. Dealers are listed from nearly all the countries of South America, Australia, New Zealand, China, Japan, the Baltic countries, the Balkan States and other countries of Europe. Mr. Russell said that the

book markets of Australia and New Zealand were becoming increasingly attractive, and many books published in Europe could there be found at gratifyingly low prices.

In the absence of the author, Mr. E. A. Henry read a paper by Miss Gertrude Wulfekoetter of the University of Cincinnati Library on "The Organization of a Periodical Department." Many such departments, the writer said, had grown like Topsy, and the librarian had suddenly awakened to the fact that the periodical routine was antiquated and unworkable. There are two divisions to the problem: (1) The processes dealing with the ordering and receiving of the periodicals, and (2) those connected with the use of periodicals in the reference work of the library. Miss Wulfekoetter laid down in fairly close detail an excellent routine for handling the ordering, receiving and recording of periodicals, and that for prosecuting satisfactory work in using them in reference service.

Dr. Ruth Lapham Butler of the Newberry Library, Chicago, read the last paper of the afternoon on "Transcripts of Archive Material in the Ayer Collection of the Newberry Library." The Ayer Collection, given to the Newberry Library by the late Edward E. Ayer, a Chicago business man, contained, Doctor Butler pointed out, not only books and manuscripts dealing with the native races of North America, but also with the large field of American history, especially with the history of those sections formerly occupied and governed by the Spaniards.

Officers elected for the coming year were: Chairman, George B. Utley, Newberry Library, Chicago; Earl N. Manchester, Ohio State University Library, Columbus; Julian S. Fowler, Oberlin College Library, Oberlin, Ohio.

Catholic Educational Association

THE MIDWINTER meeting of the Library Section of the Catholic Educational Association was held at Loyola University, Chicago, Sunday, Dec. 29, with librarians from many of the leading Catholic colleges and universities in attendance. Group meetings were likewise held on Monday, Dec. 30, at the Drake Hotel. Included in the questions under consideration was the important project for the publication of the *Catholic Periodical Index*. This publication, similar in scope to the *Reader's Guide*, will index by author and subject the contents of approximately forty of the most important Catholic journals. For the present only those periodicals published in the English language both here and abroad are to be included, but as the Index develops, those in foreign languages will

likewise be added. The indexing will be done by competent librarians and published by the H. W. Wilson Co. of New York. It will appear quarterly with an annual cumulation and a final cumulation at the end of the third year. The first issue is to appear sometime in March, and the cost price will be on the service basis.

League of Library Commissions

THE LEAGUE of Library Commissions met in joint session with the Extension Committee of the American Library Association on the afternoon of Dec. 30, Mr. Lester presiding. At the evening meeting of the League, with Mrs. Griggs, president, presiding, 19 States and provinces were represented. As Mr. Tolman was unable to be present, his paper was read by Miss Parkinson.

Mr. Modisette, member of the Louisiana Commission, emphasized the need of providing for the permanent financing of library activities so that there would be some guaranty of future support. He also stressed the necessity of convincing the public that the library is a form of education in itself and not a mere adjunct to the school, as so often considered by school people. In sharing the expenses of county libraries with the county, the State might provide expert supervision and such State aid, together with books, and grants might be financed by a luxury tax.

Miss Hazel B. Warren, Extension Division, State Library, Indianapolis, Ind., spoke on agencies cooperating with library agencies, referring to the work done by the General Education Board, the Carnegie Foundation, the Rosenwald and Rockefeller Foundations in Louisiana, British Columbia, North Carolina and Georgia. In the recent campaign for a State library building, cooperation with the State Federation of Clubs, the American Legion and various other State organizations were most helpful.

The League voted \$1,000 toward the American Library Association Endowment Fund in the form of two sustaining memberships.

Toronto News

THE NEW Danforth Branch of the Toronto Public Library was opened in November. In accord with the experimental ideals of the libraries of that system, this is unlike any other. It is in the heart of a suburban shopping district and frankly took in the aspect of a shop—thus the old English front reminds one of Chester.

The February Forecast

A check list of books of general interest whose publication dates fall during the coming month

(Exact date of issue is given when known)

Biography

- Boas, Louise S. *Elizabeth Barrett Browning*. Longmans, Green (Feb. 19). \$3.50.
 Bradford, Gamaliel. *Daughters of Eve*. Houghton Mifflin (Feb. 7). \$3.50.
 Clemenceau, Georges. *Memoirs of a Victory*. Harcourt, Brace. \$5.
 Corbett, Elizabeth. *If It Takes All Summer*. Stokes (Feb. 20). \$2.50.
Early Letters of Mark Hopkins. Day (Feb. 6). \$4.
 Gribble, Francis. *Balzac: The Man and Lover*. Dutton. \$6.
 Hosie, Lady. *Portrait of a Chinese Lady*. Morrow (Feb. 6). \$5.
 Hughes, Rupert. *George Washington, The Savior of the States, 1777-1781*. Morrow (Feb. 6). \$5.
 Ludwig, Emil. *Lincoln*. Little, Brown (Feb. 8). \$5.
 Martet, Jean. *The Life of Georges Clemenceau: As Told by Himself to His Secretary*. Longmans, Green. \$5.
 May, J. Lewis. *Cardinal Newman*. Dial Press (Feb. 1). \$3.50.

Literature, History and Travel

- An American Officer. *The Great Crusade*. Dial Press (Feb. 15). \$2.
 Austin, Maude Mason. *Annals of the Desert*. Stratford. \$2.
 Beard, Charles A. and Mary R. *The Rise of American Civilization* (one vol. ed.). Macmillan (Feb. 4). \$3.
 Bett, Henry. *How to Write Good English*. Stokes (Feb. 6). \$1.
 Chilvers, Hedley A. *Johannesburg*. Stokes (Feb. 20). \$3.50.
 Dare, Viola. *Little Poems for Little Folks*. (Juvenile.) Stratford. \$1.
 Dresbach, Glenn Ward. *The Wind in the Cedars*. Holt. \$2.
 Hayes, Carlton J. *France: A Nation of Patriots*. Columbia University Press (Feb. 15). \$4.50.
 Henry, Stuart. *Conquering Our Great American Plains*. Dutton. \$5.
 Karraker, Cyrus H. *The Seventeenth Century Sheriff*. University of North Carolina Press (Feb. 15). \$2.
 Kingsmill, Hugh. *Anthology of Invective and Abuse*. Dial Press (Feb. 15). \$2.50.

- Loti, Pierre. *Morocco, Siam*. Stokes (Feb. 20). \$2.50.
 Paxson, Frederic L. *When the West Is Gone*. Holt (Feb. 15). \$2.
 Percy, William Alexander. *Selected Poems*. Yale University Press. \$3.
 Titzell, Josiah, ed. *The Author's Annual, 1930*. Brewer and Warren (Feb. 3). \$2.
 Townsend, Mary Evelyn. *The Rise and Fall of the German Colonial Empire*. Macmillan (Feb. 4). \$5.
 Williams, Charles. *A Poet Looks at His Fellows*. Oxford University Press (Feb. 15).

Religion and Philosophy

- Fite, Warner. *The Living Mind*. Dial Press (Feb. 1). \$3.50.
 Fleg, Edmond. *Life of Solomon*. Dutton (Jan. 31). \$3.
 Green, Rev. Canon P. *Our Heavenly Father*. Longmans, Green (Feb. 20). \$1.50.
 Jenkins, Burris. *The World's Debt to Protestantism*. Stratford. \$2.50.
 Kaltenborn, H. V. *We Look at the World*. Henkle. \$3.
 Keeley, Fred C. *Why You Win or Lose*. Henkle. \$2.50.
 McCormick, Rev. William P. *Be of Good Cheer*. Longmans, Green (Feb. 20). \$1.
 Menninger, Karl A. *The Human Mind*. Knopf (Feb. 3). \$5.
 Monsma, John Clover. *The Story of the Church*. Henkle. \$3.
 Mygatt, Tracy D., and Witherspoon, Frances. *Armor of Light*. Holt. \$2.
 Rawlinson, A. E. J. *The Church of England and the Church of Christ*. Longmans, Green. \$2.
 Schnackel, H. G. *The Art of Thinking in Business*. Wiley.
 Sweet, Helen F., and Fahs, Sophia L. *Exploring Religion with Eight Year Olds*. Holt. \$2.50.
 Williams, Rev. Canon Norman P. *Lausanne, Lambeth and South India*. Longmans, Green (Feb. 13). \$1.

Miscellaneous Non-Fiction

- Bell, M. M., and Bell, M. D. *Essentials in the Selection of Meats*. Wiley.
 Clarke, H. T. *Organic Syntheses* (v. 10). Wiley.

- Danzig, Allison. *The Racquet Game*. Macmillan (Feb. 25). \$4.
- Eggleston, D. C. *Modern Accounting Theory and Practice* (v. 2). Wiley.
- Elliott, Grace Loucks. *Understanding the Adolescent Girl*. Holt. \$1.25.
- Fraser, W. J. *Dairy Farming*. Wiley.
- Harrow, Benjamin. *The Making of Chemistry*. Day (Feb. 6). \$2.
- Macpherson, Hector. *Modern Cosmologies*. Oxford University Press (Feb. 6). \$2.50.

Illustrated Text

THAT we should use the same words for Columbus's "Santa Maria" and the "Leviathan" seems almost absurd, yet we shall doubtless continue to do so, says Arthur E. Bostwick in the closing pages of his brief discussion of *The Public Library in the United States* (A. L. A., cl., 62p., \$1). We shall also keep talking about a "library," although its appearance, its functions and its aims have so fundamentally altered in the course of the last century. Numerous and pointed illustrations carry out the thesis of Dr. Bostwick's text, and show the flexibility and range of the modern public library.

Reads Most Books in South Dakota

ACCORDING to the latest available statistics, Aberdeen reads more library books than any city in the State of South Dakota. During the past year the people of Aberdeen borrowed 127,950 books for home use. This is more than eight books per capita. Of this number 22,529 were distributed through five school stations and St. Mary's Public Library Station. The latter alone distributed 10,568 volumes to the residents in the northeast section of the city. The main library sent 105,421 books out over its loan desk. The library business has increased 124 per cent over that of 1923, while it shows a gain of 17 per cent over that of the previous year.

Recent Prize Awards

THE KLEIST prize for 1929, the most important literary award in Germany, was given to Anna Seghers for her novel, *The Revolt of the Fishermen*. Longmans, Green will publish the book this spring in a translation by Margaret Goldsmith. In the past, writers of such distinction as Arnold Zweig, Fritz von Unruh and Leonhard Frank have received the Kleist award.

Distributed Without Cost

A BRIEF history of motion pictures and the development of sound, *See and Hear*, by Will H. Hays, president of the Motion Picture Producers and Distributors of America, has been issued and is being distributed without cost. Any library which has not received it may obtain it on application at the office of the company at 469 Fifth Avenue, New York City.

Book Reviews

TALES FOR BIBLIOPHILES; trans. from the French and ed. by Theodore W. Koch. Chic., The Caxton Club, 1923. *Flaubert, Gustave. Bibliomania*; a tale, trans. by Theodore Wesley Koch. Evanston, Ill., Northwestern Univ. Lib., 1929. 75c.

DOCTOR KOCH has certainly done librarians as well as general readers a real service by translating and editing in his *Tales for Bibliophiles* five well-known French *contes* describing bibliomaniacs. This volume was issued as a publication of the Caxton Club. The tales included range in date from about 1832 to 1925. The first, Charles Nodier's *The Bibliomaniac*, is one of the most genial and perhaps the best known of these. Its hero resembles somewhat a combination of Charles Lamb and Anatole France's *Sylvestre Bonnard*. The second story, from the *Memoires* of the elder Dumas, is a delightful sketch, founded on fact, of a chance meeting with Nodier, whose enthusiastic description of a newly acquired copy of the rare Elzevir *Le Pastissier François*, caused Dumas in turn to become a collector of books. Charles Basset's *Copy of Hennepin*, which follows, is not entirely accurate in its statements regarding the scarcity of the specific book in question, but it is an amusing satire of the miserly bargain hunter whose love of books and of money conflict. The fourth sketch, Charles Asselineau's *A Bibliophile's Hell*, details the delirious dream of a bibliophile compelled by a demon to purchase at ruinous prices books of little or no value. The concluding sketch, Georges Duhamel's *Letter on Bibliophiles*, first appeared in 1925. It satirizes a collector who passes from general interest without knowledge to self-satisfied specialization, and who ends by selling his library to devote his days to compiling an analytical and annotated catalog of the catalogs he has collected.

A sixth tale was originally intended to be included in the book. This was Flaubert's *Bibliomania*, first published in 1837, the year after the execution in Barcelona of the bibliomaniac ex-priest, Don Vincente, who murdered a rival collector to secure a book which he believed unique. Andrew Lang, in Chapter 2 of his *The Library*, and Rosenbach, in his *Books and Bidders*, discuss this episode on which Flaubert's tale is based. Though it shows little of the author's later literary skill, it is a logical companion of the other five. Two French editions, three German and one Spanish, beside this by Doctor Koch, attest its popularity. It is re-

grettable that a faulty point of law in the conclusion kept it from inclusion in the earlier volume. Its exclusion, however, led to its separate publication in the square, blue-gray covered format familiar to the possessors of some of Doctor Koch's earlier monographs. The two books belong together.

The translation is admirably done. It is smooth, pleasing English, but at the same time true to the feeling, and usually to the letter, of the originals. Each story has an adequate introduction with a bibliography of the more important editions and translations. Copious, interesting notes, biographical and bibliographical, bear witness to the editor's wide and discriminating reading.

Physically, the books are delightful. The *Tales for Bibliophiles* was printed in an edition of 300. The presswork, in Goudy old style type on *Arches* paper, is excellent. An earlier edition was destroyed because not up to the exacting standard of the Publication Committee on this point. Flaubert's *Bibliomania* was printed by Paillart of Abbeville, France, in an edition of 500 numbered copies, also on *Arches* paper.

Aside from the fact that Nodier was a librarian and bibliographer of note and Asselineau a sublibrarian of the Bibliothèque Mazarine, these books should be salutary alike to those professionally and to those personally interested in books. The satire is intended as a corrective of excessive or misplaced zeal, but it is in every case directed against excess of a tendency which one feels the authors consider a virtue when duly exercised. It is, or should be, of value in giving a glimpse of the international and universal appeal of books.

As far as can be determined, this is the first collection in English entirely composed of stories of books and book collectors. It is a field which deserves further cultivation by translation. Octave Uzanne, Anatole France and Janin, who occur to me at the moment, illustrate the diversity of the *genre* in France alone.

The only regrettable feature of Doctor Koch's translations is the small number of copies available for libraries and readers generally. It will, therefore, be welcome news that there are many good reasons for believing that this first half dozen tales will be followed in due time by another similar collection by the same editor and translator.

FRANK K. WALTER,
Librarian, University of Minneapolis.

School Library News

Booklists with Personality

WHEN the Montclair junior high schools issued their new and novel revised list of books for home reading it was "with the belief that such a list could be so published that it would mechanically have power to interest a pupil at other times than when discussing it perfunctorily in class, and in the belief that a booklist can and ought to reflect the personality of the owner." In looking back over the school year we find that we have been justified in our beliefs. The "Booklists with Personality" have allowed their personality to pervade all school activities. Being loose-leaf, a convenient size, attractive in make-up, valuable as a reading guide, and an invaluable record of one's reading experiences, to keep such a booklist timely and interesting becomes the desire of every owner. To give you an idea how this has been done at Hillside School we may cite the following:

Enthusiasm over the class party was running high. Every ninth grade pupil had been given an opportunity to book passage on THE GOOD TIMES CRUISE sponsored by the HILLSIDE NAUTICAL ASSOCIATION. The S.S. JAZZ-MANIA of the HALF DOLLAR LINE was to leave the pier at the foot of Cafeteria Row on May 10 at 6:30, Eastern Standard Time. Passports were to be distributed at noon. As it happened, not only passports were received, but also bright colored sheets headed

READ BEFORE—AND AFTER—YOU TRAVEL

Suggestions gleaned from our
own book list

giving titles and authors of interesting and entertaining travel stories with brief annotations. These sheets were just the size of the book-list pages and punched to fit. Copies of the books listed, travel posters and current numbers of the travel magazines subscribed to by the library helped create the "atmosphere" of the lounge. When a travel book is suggested for outside reading the bright-colored page is quickly turned to and checked for choices.

May 15, 1929, was a memorable day, for it brought the announcement of the winner of the Newbery Medal. There had been an exhibition in the library of the books which had previously won the medal. The bulletin boards displayed pictures of the authors, illustrations from the books, notes of interest about John Newbery, and a picture of Frederic G. Melcher, the donor of the medal, with an article about his life and interests. During the session

room period a member of the library committee made the round of the rooms with a news sheet issued from the library. The announcement read:

Eric P. Kelly has just been awarded the
John Newbery Medal

for his book *The Trumpeter of Krakow*.

The book may be seen in the school library.

Copies may be obtained at the Public Library.

It is a mystery story in an unusual setting—

Poland in medieval times. The pictures
were made in Poland by the Princess
Pruszyńska.

The bell for dismissal brought a queue of eager girls and boys to see the book. The Anne C. Moore page of *The Three Owls*, which was devoted to a review of *The Trumpeter of Krakow*, was supplemented by the enthusiastic remarks of those children who happily had read the story. Nothing would do but that their librarian should bring an autographed copy to them from the very scene of the presentation, the A. L. A. Convention in Washington, D. C. An immediate search began for pictures of Mr. Kelly, for illustrations of the book, for publisher's blurbs, for the family copies of *The Three Owls* page. All of which became choice material for additional pages in the cherished book lists.

With summer came June—with June came commencement—with commencement came gifts, parting advice and greetings. The greeting from their school librarian took the form of a letter printed on paper the size of a book-list page which read

TALLY-HO! YE HOBBY RIDERS!!

When school is done and the post-mortems of the last exam have been said, "give a man a horse he can ride." Many of the horses chosen will be hobby-horses that have been a-rearin' to go. Some will ride down to the sea. Ere he go "give a man a book he can read." May we suggest Beard's *Boatbuilding and Boating*, Cavileer's *Model Boat Building for Boys*, and those readable "Yarns of the sea and of sailors."

Others will ride to the land of Hammer and Saw. We know that they will more thoroughly enjoy their stay if they have the following books in their packs: Blackburn's *Boy Activity Projects*, *The Boy Mechanic*, Griffith's *Woodwork for Beginners*, Hall's *Handicraft for Handy Boys*, Polkinghorne's *Toymaking in School and Home*, Stanley Plant's *How to Work with Tools and Wood*, and William's *How to Make Things*.

Still others will go trotting to the airports. Balloon riding had to satisfy Tom Sawyer. Today's Toms can enjoy riding in Byrd's *Skyward*, Crump's *Boy's Book of Airmen*, Earhart's *20 Hrs. 40 Mins.*, Green's *Dick Byrd-Air Explorer*, LaPage's *A B C of Flight*, Lindbergh's *We*.

When it becomes too foggy for flying, nothing can be more fascinating than the Little Theatre. What a fund of interesting material is found in Leeming's *New Book of Magic*, Mackay's *Children's Theatres and Plays*, Mills and Dunn's *Marionettes, Masks and Shadows*, Stoddard's *Book of Marionette Plays*, Young's *Stage Costuming*.

The curtain having fallen upon the last play in the repertoire, we may wish to turn to our stamp collection. Without Scott's *Stamp and Coin Catalogue* we would be philatelists lost. *Description of U. S. Postage Stamps and Postal Cards* and Warren's *Pageant of Civilization* have been fascinating us. To say nothing of the new book, *Stamp Collecting, Why, and How*, by Thorp.

Hurrah for Phoebus Apollo! Once more we can take to the open road. Shall we *Walk, Look and Listen* with Fuller, or go with Sir Lisle and his Eagle Scouts? They named the story of their journey *Hobnails and Heather*. Peck's *Storybook Europe* will give you entertaining stories of places you visit abroad. Coming nearer home, do you know *Chatt Roland*? Linwood Righter will introduce you to him and tell you of his life among the fish pirates of the New Jersey coast.

Again TALLY-HO! and may you have a pleasant ride astride your hobby is the wish of your librarian,

PAULINE J. SCHMID,
Hillside School Library,

June 20th, 1929.

Students Encouraged to Own Books

AT VANDERBILT UNIVERSITY Library an experiment is being tried to encourage the students to buy and own reference books. On a table in the reading room a number of such books are assembled, each book having a paper streamer folded around it. The streamer bears the publisher's name and the price of the book, and in some instances there is a reference to other editions of the same book. On a nearby display board the books are listed, some of them several times, to form groups that can be bought for various lump sums—a \$5 reference library, a \$10 one, and so on. However, most people seem to prefer to handle the actual books, and to group them according to their own needs and the contents of their own

purses. One person may choose Roget's *Thesaurus* at \$2.50, Reinach's *Apollo* at \$2, and *The World Almanac* at 50 cents. Another may decide on Gayley's *Classic Myths* at \$1.92, Phyfe's *18,000 Words Often Mispronounced* at \$2, and Cushing's *Manual of Parliamentary Practice* at 75 cents (or Roberts' *Rules of Order* at \$1.25 or more). For a \$10 collection some of the same books might be used, adding one or more medium-priced foreign language dictionaries. Most of the books and editions have been chosen because of their cheapness, but more expensive ones have been included, for example, Bartlett's *Familiar Quotations* at \$5, and Stevenson's *Home Book of Verse* at \$15. And Lester Bartholomew's newly issued list showing the comparative merits of all of the well-known encyclopedias is posted conspicuously.

Government's Pedagogical Library

IN THE present Office of Education of the United States is a highly specialized pedagogical library of 135,000 books containing a great variety of material, including works relating to subject matter in the curriculum of all grades of public and private schools, the training of teachers, and research relative to education. Almost a complete file of all educational periodicals is a part of the library and in the collection are annual and biennial reports of State superintendents of public instruction, and all official publications of the states. Among the collections of early books are some rare and quaint old bindings as well as early contents which furnish material of great interest to the student of education.

American School of the Air

STARTING Feb. 4 the "American School of the Air," which will bring together a distinguished group of nationally known educators in an educational series, will be presented twice weekly for seventeen weeks by the Columbia Broadcasting System. Dr. William C. Bagley, Professor of Education, Teachers' College, Columbia University, will head the Advisory Faculty as its Dean. While this faculty is as yet incomplete, other noted leaders in the Educational Fields who have accepted positions are: Henry Turner Bailey, the noted authority of the Cleveland Museum of Art; Hoard Hanson, Director of Eastman School of Music; P. W. Dykema, head of the Music Department of Teachers' College, Columbia University, and Miss Effie Power, head of the Children's Division of the American Library Association.

In the Library World

Irish Refuse Gift to Build Library

THE CANADIAN PRESS reports that, believing it would be better to devote the money to relieving poverty in the county, the Council of Leitrim County has refused to accept a grant of \$4,750 from the Carnegie Foundation for the establishment of a library. Acceptance of the grant would have necessitated a levy of a tax of 2 cents in \$5 and the appointment of a librarian, working out at an impost of about 12 cents on each farmer. Members opposing acceptance of the grant considered the money would be better used in stocking derelict farms or providing bags of flour for the impoverished in one of the poorest counties in Ireland.

Carnegie Corporation Grants

A GRANT of \$100,000 was made recently to the British Columbia Library Commission by the Carnegie Corporation of New York in the interest of library extension in that province. The attempt to distribute books in the sparsely settled and inaccessible regions of the Province creates a technical situation of unusual interest, and the success of the Commission in dealing with it will be watched with interest throughout the English-speaking world.

Six grants have also been made to library schools. The Atlanta Library School received \$10,000; the University of Denver, \$5,000 for the preliminary work of organizing a library school to serve the Rocky Mountain region; the University of Kentucky, \$1,800 for continuation of a summer session for school librarians; the Carnegie Library School in Pittsburgh, \$3,950, to continue a summer session for the training of elementary school librarians; the St. Louis Library School, \$3,000; Hampton Institute Library School, \$10,900 for the support of the school in its regular session and \$1,600 for the summer session for school librarians.

Fellowship grants for study and research in library problems will be available to a limited number of librarians through a fund set aside by the Carnegie Corporation of New York. The purpose of the grant is to enable persons who have shown promise of capacity to contribute to the advancement of the library profession, to pursue a year of study in connection with an educational institution approved by the Advisory Group on Library Grants. In general, candidates should be graduates of approved colleges or universities, and should have had one year's work in a li-

brary school, but these requirements may be waived in exceptional cases. The stipend will be \$1,500 or more and will vary according to the requirements of individual students. When warranted, the stipend may be renewed for a second year. Application for fellowship grants for the school year 1930-31 should be filed before March 1, 1930, with the Advisory Group on Library Fellowship Grants, Carnegie Corporation, 522 Fifth Avenue, New York. Applications will be acted upon before May 1, and applicants will be notified as soon as possible.

San Jose to Give Librarianship Degree

THE ONLY institution providing library instruction for the undergraduate and giving a degree in librarianship on the west coast is the distinction San Jose State College may now claim. The only other accredited library school in the state is at the University of California, which is for graduate students, but there is a small school maintained in connection with the Riverside Public Library. The library course at San Jose is in charge of a faculty of six trained librarians and a holder of the library degree from this school may serve as school librarian or teach library work. Both the degree of librarianship and the supervision and administration credentials are subject to a four-year course.

Toronto University Plans Enlarging

THE UNIVERSITY of Toronto, which has now the largest university library in Canada, is feeling the pressure of the ever-increasing attendance, especially in the graduate schools, and therefore the Board of Governors has appointed a committee to consider a plan for enlarging the capacity to house at least a million volumes.

Catalog's Centenary Exhibit

A SPECIAL exhibit made up of books which have been in the library of the University of Pennsylvania for at least one hundred years has been opened in the Franklin Room of the University Library on the campus in observance of the centenary anniversary of the library's first printed catalog. In comparison with the 700,000 books on the shelves of the University library today, its original catalog, which was printed in 1829 when the library was about eighty years old, lists only 1000 volumes. The majority of the books in that collection, however, are still in the library's possession and are in good condition despite their age.

A. L. A. Headquarters Survey

THE COMMITTEE ON A. L. A. Activities met in Chicago Oct. 25-26 and made a survey of headquarters. Conferences with heads of departments and with the secretary and assistant secretary gave the committee much needed information in preparing its report. This information is being supplemented by letters to various groups of the A. L. A. membership. Letters have been sent up to this time to (1) a cross-section of the membership, including about 1000 names; (2) present officers and members of Executive Board and Council and members of same for past three years; (3) chairmen of committees and sections.

It is planned later to send letters to extension workers, readers' advisers, library school directors and heads of other training agencies, these letters asking for opinions on A. L. A. activities related to the work of the above.

The work of the committee has been divided as follows: Miss Countryman will give special attention to library extension and adult education, Mr. Meyer to professional training, and the chairman to more general activities.

A copy of the letter sent to the cross-section of the membership read as follows:

"The Committee on A. L. A. Activities, authorized by the Council at the West Baden Conference in 1928, has been instructed to make a scrutiny of the activities of the association with the view of suggesting to the Council possible changes of policy. The committee is now engaged in such a survey. One of the methods which the committee proposes to use is to obtain from a cross-section of the members of the association their suggestions on and criticisms of the work and policies of the association.

"In making this selection we have taken the first four names (not including institutional members) on each page of the list in the A. L. A. Handbook, or approximately 1000 names.

"We especially would like to know your opinion of the activities the association is now carrying on and also what you think the association might be doing

which would be of greater importance than its present activities. We desire the utmost frankness, as otherwise your letter will be of no value to us. We may wish to quote from letters received, but names of those writing them will not be given.

"The committee is approaching its difficult task wholly with the idea of making constructive criticism and recommendations, and to do this we must have facts from all angles. We shall greatly appreciate your careful consideration of and compliance with this request. Please mail your answer to the chairman at the address indicated below.

(Signed) C. H. COMPTON,
Chairman, St. Louis Public Library."

The committee is receiving answers to this letter from many of those to whom it was mailed, but it will appreciate equally letters from any other members of the association who have suggestions or criticisms to make.

GRATIA A. COUNTRYMAN,
Minneapolis Public Library.

H. H. B. MEYER,
Library of Congress, Washington.
CHARLES H. COMPTON, Chairman,
St. Louis Public Library.

Library Has Ukulele Club

THE CAMDEN, N. J., Public Library Association has a Ukulele Glee Club consisting of thirteen members. Organized in a more or less impromptu manner for temporary entertainment purposes last summer, the club is now in demand at all meetings of the Association. The last appearance of the club was at the annual Christmas meeting when the girls sang Christmas carols accompanied by their ukeleles.

National Drama Week

NATIONAL Drama Week of 1930 is to be celebrated the week of Feb. 9-15 with each day of the week dedicated to a different phase of drama's many significant relationships. Sunday, Feb. 9, is to be devoted to "Drama and the Church"; Monday to "Professional Theatre Day"; Tuesday, "Drama and the Clubs and Organizations"; Wednesday, "Drama and the Radio"; Thursday, "Drama in the Community"; Friday, "Drama in Education"; Saturday, "Drama in Print."

Free

THE SPONSORS of the publication of the Sacco-Vanzetti Record have a few sets which they will be glad to send gratis to libraries that have not received the Record. Applications will be filled in the order received as long as sets are available. Address Bernard Flexner, 40 Exchange Place, New York City.

British Museum Catalog Subscribers

THE ATTENTION of American librarians is called to the accompanying list of subscribers to the *British Museum Catalog*. We need 200 subscribers if the American quota is to be reached, and if American libraries are to receive the advantage of the discount furnished by the funds promised by Dr. Capps of the General Education Board. If the 200 subscribers are not secured, the offer lapses, and whether the project is carried through or is passed over by the Museum authorities can be settled only by time.

The British Museum is under no obligation to print this continuation, has stated that it will undertake the work if support is assured, and has given the world fair warning that the greater part of this support must come from American libraries, from whom have come the most vociferous and most insistent appeals for a new edition of the catalog.

This list is printed in geographical form, so that every librarian to whose attention it is called may see for himself how well his section of the country is represented. If libraries come to mind that are not represented here, every reader of the list is requested to send these names to the undersigned at the Library of Congress in Washington, D. C., with suggestions of any possible sources from which help can reasonably be expected in securing their subscriptions. In the case of college libraries, the question comes to mind whether an appeal could be made to the enthusiasm of loyal alumni. Suggestions will be gratefully received and will be followed to the fullest extent of the ability of the committee in charge.

H. H. B. MEYER,
Chairman, "British Museum Catalog,"
Bibliographical Society of America.

Library Organizations

Rural Library Institute

ALICE S. TYLER, until recently dean of the Library School of Western Reserve University, has accepted the directorship of the Rural Library Extension Institute, and Harriet C. Long of the Wisconsin Free Library Commission and author of *County Library Service*, will conduct one of the courses, according to word received from A. L. A. Headquarters.

The Institute, which is being planned by the A. L. A. Committee on Library Extension, as announced in *THE LIBRARY JOURNAL* for Jan. 15, will be in session from June 30-July 18 at the College of Agriculture of the University of Wisconsin at Madison. It will be held in connection with the annual Rural Leadership Summer School of the College of Agriculture.

Miss Tyler, who is an outstanding figure in library activity, will conduct the lectures and discussion groups in state library extension.

Since the Institute courses are for advanced students, the informal discussion method rather than the lecture plan will be used. Projects will be initiated and carried through as far as possible. The curriculum will include courses in two fields of rural life in addition to the two library courses. Prompt registration is required, and communications should be addressed to the Executive Assistant, Committee on Library Extension, American Library Association, Chicago.

New York School Librarians

THE JANUARY meeting of the New York School Librarians' Association took place Saturday, Jan. 18, in the library of the new DeWitt Clinton High School, with President Maud McClellan, librarian of Wadleigh High School Library, New York City, presiding. The program consisted of a series of open discussions on what is being done by the libraries of the New York high schools to encourage the individual students to do wider reading, to form better reading habits, and stimulate creative ability.

First Meeting of Pasadena Club

THE FIRST meeting of the Pasadena Library Club, recently held in the lecture hall of the Pasadena Public Library, was an informal buffet supper. Eighty members assembled to do honor to George Watson Cole, librarian emeritus of the Henry E. Huntington Library, who as chief speaker of the evening told of his trip as official delegate to the World's Congress of Librarians and Bibliographers held in Italy in June. In addition to the regular business of the club, a committee was appointed which drew up a resolution protesting the recent action of the City Directors in curtailing the vacation period of the Pasadena city librarians. Willis H. Kerr, librarian of Pomona College Library, was appointed chairman of this committee.

The Open Round Table

Salutation to A. L. A. Membership for the Last Week of June

CALIFORNIANS associated with library work rejoice unitedly that the American Library Association will hold its annual meeting in Los Angeles from June 23 to 28. Already we are feeling the glow of welcoming plans and are crowding all the bad weather possible into January, so that wind and rain will be exhausted by June.

This fifty-second conference of the association will be the fourth to be held in California—San Francisco in 1891, Pasadena in 1911, Berkeley in 1915, and now for the first time—Los Angeles.

Since A. L. A. members last journeyed to California in the year of the San Francisco exhibition, much library development has been accomplished in the south of the State. To mention large plants only, the great Huntington Library has been deeded to the public, and new buildings of the Pasadena and Los Angeles Public Libraries have been completed, the Pomona, Claremont and Scripps' College group has been organized, and the new campus of the University of California in Los Angeles has within the present year been opened.

Workers in every type of library activity, librarians and trustees of research, university, college, school, special, county and public libraries join in urging you all to tip the continent to a hazardous Pacific slope in the rush you will make westward to the first meeting of the 1930s.

Welcome to all twelve thousand members!

ORRA E. MONNETTE,

*President, Board of Library Commissioners,
Los Angeles Public Library.*

Two Books Identical

To the Editor of THE LIBRARY JOURNAL:

We have recently received two books, one published by D. C. Heath Company in their Social Relations Series. It is entitled "Economics and Ethics; A Study in Social Values," by J. A. Hobson, with a foreword by Jerome Davis. Yale University. On the reverse of the title page it says, "Copyright 1929, printed in the United States."

The second book was received about a week later in a shipment from England. It is entitled "Wealth and Life; A Study in Values," by J. A. Hobson, Macmillan & Company, London, 1929. On the reverse of the title page is printed "Norwood Press, Norwood, Mass., U. S. A."

The two books are identical, with the exception that the Heath edition has a two-page foreword by J. Davis, Yale University. The titles of the books vary, of course, but the chapter headings are exactly the same, and the books are printed from the same plates. Upon inquiry at the office of the Macmillan Company in New York City they informed us that they do not carry the title in stock.

Here is a book which libraries would undoubtedly duplicate if they were tempted to buy Hobson's book (and Hobson is a first-class writer of Economics) with a changed title and no indication whatever that it is the same book. In such an instance it seems to me that the American publisher, in listing his book, should add a note saying that this book was printed in London under the title "Wealth and Life; A Study in Values," by J. A. Hobson, Macmillan Co.

Very truly yours,
C. L. CANNON,

"H R H GLOOPASTE is
surely splendid."
—A LIBRARIAN.

"It is by far the best
paste we have ever used."
—A LIBRARIAN.

If you have not as yet become acquainted with our new **H R H GLOOPASTE** ask us for a **FREE SAMPLE TIN**, it will be sent with pleasure.

H R H GLOOPASTE is the finest paste we know for general book-mending and all ordinary office purposes. It holds tight, does not flake away after setting.

Among Librarians

A Librarian Honors His President — *An Appreciation by Frank P. Hill*

FOR TWENTY-NINE YEARS it has been my good fortune to work with and under Honorable David A. Boody, President of the Board of Trustees of the Brooklyn Public Library, whose death occurred on the 20th of January in the ninety-third year of his age.

When I came to Brooklyn in 1901, Dr. Boody had been president for four years. It was his persuasive voice and promise of support of the whole Board of Trustees that induced me to leave a comfortable position as librarian of the Free Public Library of Newark, N. J. (where we had been in a new library building only two months) and accept the Brooklyn offer to undertake the arduous duties of building up the Brooklyn Public Library.

Only once (in my first year) did I regret the change, and that was when a city official tried to prevent the trustees from leasing a very desirable property. Dr. Boody's conciliatory efforts calmed my fears in short order; and from that moment I placed great reliance upon his judgment, reliability and fairness.

He was a teacher, lawyer, banker, Congressman and Mayor, and all of these positions he filled to the satisfaction of his associates.

He was kindly, courteous, and tactful in all things; and was an admirable presiding officer, being thoughtful and considerate of the rights and feelings of others, and never entering into debate without leaving the chair.

His real joy was in aiding the development of the Brooklyn Public Library system. It was his child, and in his fatherly guidance it was nourished and grew to fair proportions.

President Boody has been quite properly called "The Father of the Brooklyn Public Library," and rightly so, for he obtained its charter and was its first and only president, until his death—a period of thirty-three years. It has even been suggested that the new Central Building, now in the course of construction, be called the "David A. Boody Library," but I fear he would not approve of it if alive, as he believed the library belonged to the whole people and that no one name should be so honored.

In his life it was his wish to reach the great mass of readers and to spread the reading habit and library influence to every part of Brooklyn, and that spirit lives after him.

Brooklyn has no Central Building, although plans for such were approved in 1907 and part of one wing erected in 1918. The war and other complications delayed the work until two

years ago, when \$1,000,000 were appropriated by the city to continue work on the wing, and last year, when another \$1,000,000 was set aside for the completion of the foundation for the whole building.

From the beginning Dr. Boody took a lively interest in this project and did everything possible to get action by the City Fathers. And he never gave up the fight or lost courage, but continued to use his influence with the trustees and Board of Estimate in efforts to secure additional appropriations. He was deeply concerned at the delays which he could not understand; and it was with great satisfaction that he saw from his windows about two years ago construction work again started. His faith was constant and was rewarded, for the last view he had of the building was on the day the steam shovel began work on the remainder of the foundation.

President Boody identified himself with every phase of library work from the standpoint of a trustee. He attended many meetings of the National Association of Librarians, a few of the State Association, and several of those held in Atlantic City.

His generosity to and practical interest in the staff were shown in 1927 by his unexpected and worth while gift of \$50,000. This was an outright gift to the staff, to be managed by a committee of the staff in cooperation with the chairman of the Administration Committee of the Board. It was later established as the David A. Boody Foundation, the income of which was to be used for the benefit of members of the staff and could be used as a loan given outright in case of illness. For two years he witnessed the practical application of the income and was delighted with the success of his plan.

This was the first gift of this sort ever given to a library, and its example has been followed in at least one other city.

David A. Boody was a model trustee and a model citizen, who gave time and money to further the educational interests of the people of Brooklyn. He leaves a memory which trustees and librarians connected with the Brooklyn Library will ever hold in fond remembrance.

He was indeed a true friend of libraries and librarians.

The latest portrait of Dr. Boody, aged 91, was published in THE LIBRARY JOURNAL for Jan. 1, 1928.

Public Libraries

MARY H. DAVIS, N. Y. S. '13, assistant librarian of the Brookline (Mass.) Public Library since 1925, resigned to accept the librarianship of the Medford (Mass.) Public Library.

LOTTA L. FLEEK, Wisconsin '10, has been temporarily assigned to the Adult Education Department of the Library Association of Portland.

GLADYS JEAN HAMLEY, N. Y. P. L. '29, has joined the staff of the Library Association of Portland, where she will be in the Reference Department until June.

GERTRUDE C. HARTMAN, N. Y. P. '26, has taken a position as reference assistant in the periodical division of the New York Public Library.

SALLY HODGSON, Columbia '28, who has been connected with the Children's Department of the New York Public Library since her graduation, was promoted to the headship of the Children's Department of the George Bruce Branch in October.

MRS. SONIA HUDOBENKO was appointed, on January second, acting librarian of the Foreign Department of Providence, R. I., Public Library.

HELEN JOHNS, Pratt '21, formerly librarian of the Longview, Washington, Public Library, is doing temporary work in the Circulation Department of the Portland Public Library.

GLADYS T. JONES, N. Y. S. '25, has resigned her position as librarian of Cedar Crest College, Allentown, Pa., to become cataloger in the East Cleveland Public Library, Ohio.

The Calendar

April 4-5—Pennsylvania Library Club and New Jersey Library Association, annual meeting at Hotel Chelsea, Atlantic City, N. J.

May 1-2—Louisiana Library Association, annual meeting at Monroe, La.

June 23-28—American Library Association, annual meeting at Biltmore Hotel, Los Angeles, Cal.

June 30-July 18—A rural library extension institute at the College of Agriculture, University of Wisconsin.

Free

PRINCETON University Library will be glad to send to any library that does not have it, Meyer's *Jahrbuch der Chemie*, Jahrg. 1-20, 1891-1912; *General Register*, 1-10, 1891-1900. Transportation charges collect.

Opportunities

This column is open to librarians

United States Civil Service Examination

The United States Civil Service Commission announces the following open competitive examination:

SENIOR LIBRARIAN

Applications for senior librarian must be on file with the Civil Service Commission at Washington, D. C., not later than Feb. 26.

The examination is to fill vacancies in the Office of Education, Department of the Interior; in the Patent Office, Department of Commerce, and in positions requiring similar qualifications in other branches of the Departmental Service, Washington, D. C.

The entrance salary is \$4,600 a year. Higher-salaried positions are filled through promotion.

Competitors will not be required to report for examination at any place, but will be rated on their education, experience, and fitness.

Full information may be obtained from the United States Civil Service Commission, Washington, D. C., or the Secretary of the United States Civil Service Board of Examiners at the post office or custom-house in any city.

Wanted—By the Montclair, N. J., Library, a cataloger experienced in use of L. C. cards and capable of introducing L. C. cards into a system which adds 15,000 volumes a year. College and Library School required. Salary \$2,000.

Wanted—Children's librarian, training and experience, in medium sized library. Chisholm Public Library, Chisholm, Minn.

Wanted—A cataloger by the Carnegie Public Library, Boise, Idaho. College and library school training required.

Trained librarian with college degree and several years of library experience will be free for position Feb. 1. Assistant in reference department or a combination of cataloging and reference work preferred.

B-11.

Young woman, college and library school graduate, with two years' experience as college librarian and several years' teaching experience, wishes a temporary library position for the summer.

B-10.

Young woman with eight years' experience as assistant children's librarian desires to change position.

A-14.

School librarian wants position for the summer; camp work, summer school, or rural traveling work.

A-16.

Librarian with university and library school education would like cataloging or organization in the South.

A-17.

Children's librarian, with training and experience, desires position on the Pacific Coast. Minimum salary acceptable, \$165 per month.

A-15.

Although in daily use in some three thousand libraries throughout the country, we sometimes hear the statement—from libraries where the Dictionary is not yet available—that they will wait until it is completed before subscribing. One might as well say that he would wait until America is completed before exercising the rights of citizenship.

The Dictionary will never be completed—we hope. So long as there is an America which produces men and women worthy of a permanent record, just so long will the Dictionary of American Biography continue.

Twenty volumes are now projected for the simple reason that it would be difficult to look further ahead at the moment, but to say when the Dictionary will be completed requires an assurance which experience has shown to be slightly dangerous.

Four volumes are now ready—an unparalleled wealth of source and inspirational material. In hundreds and thousands of communities throughout the country, the Dictionary is already serving the same important purpose which the Dictionary of National Biography does in England and which similar records do in all other civilized countries.

If the Dictionary is not already available in your library, we shall be glad to aid in making it so.

Maps for Libraries

The Map of Great Adventures

The Map of Adventures has been planned as a practical method of stimulating interest in books and reading. The map, quaint drawing legends give a hundred and fifty good reasons for more reading. Full size, 22 x 28 inches. 4 colors. Designed by Paul M. Paine.

Price \$2.50

The Map of America's Making

Printed in the warm and beautiful tones of the lovable old maps with scores of little illustrative drawings which scatter over the land. Over 200 references to famous and romantic events in American history. Size, 22 x 28 inches. Full colors. Designed by Paul M. Paine. Price.....\$2.50

The Booklovers Map of America

A Chart of Certain Landmarks of Literary Geography. There are nearly 300 books mentioned. This Booklovers' Map will be welcomed by all teachers of literature and will be most appropriate for school and public libraries, class rooms and homes. Size, 22 x 28 inches. Full colors. Designed by Paul M. Paine. Price \$2.50

Booklovers Map of the British Isles

Beautifully colored and attractively portrayed with legends and drawings the interesting contour and natural beauty of the Islands provides a library or wall map of exceptional desirability. Full colors. Designed by Paul M. Paine. Price.....\$2.50

Picture Map of the Holy Land

A fascinating picture chart of Bible history for wall decoration. The caravan trails of ancient and modern times, the route of the Israelites from Egypt to Canaan, the regions occupied by the Phoenicians, Philistines, etc., and the principal cities are all represented.

Drawn by Harold Haven Brown. Size 22 x 32 inches. Full colors. Price.....\$2.50

Picture Map of France

All the places of historical and literary significance are depicted in delightful drawings and beautiful color upon this new map of France. It is designed, drawn and colored by Harold Haven Brown. Its full size is about 25 x 32 inches, reprinted in 6 colors.

In this map one catches the charm as well as visualizes the places that are renowned in French history and literature. The detail of the border sketches is apparent in the reproduction shown above. Full color. Price \$2.50

Historical Map of the State of New York

Students of New York History will find this map accurate and careful as well as full of sparkle with its quaint drawings and general air of charm similar to old maps. New York from its original history down to present day.

Size approximately 22 x 28 inches, full colors. Designed by Paul M. Paine and Alexander Flick. Price\$2.00

Forthcoming Issues of THE LIBRARY JOURNAL

* The next issue will be devoted to Library Equipment with articles on furniture, charging desks, and other subjects of interest. A section will be given over to representative pictures from manufacturers of book stacks, bulletin boards, lifts, gravity drops and chairs. It is hoped that this number will be of great help to librarians in ordering furniture and other equipment.

* April first will be a number on the small library. One new phase of a small library will be covered—a suburban library and its problems. Vacation reading will be the subject of the April 15 issue with one article on special collections for summer camps. This number is being prepared early so that children's librarians will be able to obtain ideas for their summer reading this year.

B. E. W.

Double the

Library books rebound in washable, beauty-keeping du Pont Fabrikoid by Chivers Book Binding Company, Brooklyn, N. Y.

of your BOOKS by re-binding them in Library Fabrikoid

DU PONT Library Fabrikoid deals kindly with the re-binding budget. This sturdy material actually doubles the life of books—unless they had the fortune to be bound in Fabrikoid before.

Yet longer life tells only part of the story. Fabrikoid is washable. Ink spots, smudges and finger prints disappear instantly upon application of soap and water. Fabrikoid is water proof, scuff proof, even insect and vermin proof!

On top of all this, it is a beautiful material. It lends itself to any type of

decorative treatment, such as gold stamping or embossing.

Specify du Pont Library Fabrikoid the next time you send books to the bindery. For further information and samples of the latest colors and grains, send in the coupon below.

A Library Caravan

The First Library Caravan, Covering Almost 900 Miles, Gave Each Person a Broader First-Hand Knowledge of California County Libraries

By Milton J. Ferguson

Librarian, California State Library

THE RAPID progress which is being made in the building of the California highway system promises very soon to metropolitanize all of those back country spots where a little of the spirit of the days of '49 was still lurking. The county library has not waited for beautifully engineered roads to cross the mountains and the wide spaces which once separated the northern counties. The pioneers of the book, like their historic forerunners, found in the distant county seats and the once well populated, but now abandoned, gold centers much of that older California of which the singers sang and the writers wrote. However, the miracle of a three cent gasoline tax for highway construction and maintenance will, before many years pass, make us skeptical of the labors the early travelers were put to in crossing those hills whose golden tones called the adventurous of the middle nineteenth century. If you are a good Californian, if you are what may technically be termed a "Californiac"—and the expression connotes far more of bigness than of littleness—you admire the engineers who build so skillfully, but you regret the loss of that spirit which was so wholesome a part of the earlier life. We cannot have everything.

The librarians and library visitors who knew Plumas and Modoc and Trinity told enthusiastic tales of the adventure of the book on its way into far places. Some of the persons who have been condemned to servitude on city beats and who have daily run the gauntlet of congested traffic expressed a hope that they might

see these unspoiled spots before the glamour had entirely faded into an unbroken line of scenic-destroying sign boards. Talk thereon—and plans—grew until in the early morning of September 23 four automobiles, with thirteen persons, set out on what will go down in local history as the first library caravan. We scarcely think the number thirteen held any significance. What was more pertinent was the fact that the mere men of the party totaled two: not an unusual proportion of men to women in the library field. One of the minority led off, and the other brought up the rear, bearing the important responsibility of not losing anyone and the positive duty of fixing flat tires, temperamental carbureters and broken gas lines, if any.

For fifty miles along the Sacramento River runs what is locally called the Garden Highway. Much of the way it follows the river levee; on the one hand giving the traveler glimpses of the water through the trees, and on the other a wide view of a rich, reclaimed area now a true garden of high productivity. The stream itself is then crossed and the highway continues through the "peach basket" of California: Sutter County, whose county seat, Yuba City, became the first stopping place for the pilgrimage.

In the ordeal of early rising for the beginning of a trip one is sometimes indifferent to breakfast. However, an hour and a half in the fresh morning air not infrequently changes one's opinion about food. Miss Burkett at

Yuba City had imagination enough to understand the possible physical condition of her visitors. She, therefore, was prepared to feed them all the broad facts concerning her library system, its branches, books, principles of management and place in the life of the county; and, furthermore, she was prepared to refresh inner woman with coffee, biscuits and jams. The party, after doing full justice to a second breakfast, and after satisfying its professional curiosity as to the methods of the Sutter County Library, moved northward.

The second stop of the day was at Oroville, headquarters of the Butte County system. There the library was "inspected"; and the librarian and her staff put on the stand in explanation of their methods and practices. Oroville also has a public library, and it, too, was looked into during the stay. The headquarters of a county library may not, need not in fact, be expensively or elaborately housed; it must, however, be the beating heart and the reasoning brain of the system. It must have an organized ever-growing stock of books sufficiently large and varied to meet the requirements of a circle of users who are in contact with the service through their neighborhood branches. The first visits made by the caravan were sufficient to demonstrate that the librarians in charge fully understood these essential elements in the service they were administering.

Oroville is the point in a rail journey eastward beyond which one finds himself suddenly introduced into the splendid spectacle of the Feather River Canyon. A few miles out of Oroville on the way toward Quincy the traveler finds himself at a spot of historic importance. The road dips sharply; and there you are at Bidwell's Bar. The name derives from a time when it might have signified something to drink; but as it is a location on the middle fork of the Feather River, it means merely a topographical condition. Here, however, are grouped three things: an early suspension bridge still serving the traveler; a pioneer period fig tree beyond belief in size, which in its old age the more securely supports itself by drooping boughs themselves firmly rooted in the earth; and, best of all, the mother orange tree planted in 1856 still vigorous and productive.

The Butte County librarian, who was prevented by local duties from joining the party, nevertheless escorted us to the Bar, and as one having right invited those who would to partake of the figs. The road joining Oroville and Quincy is not yet a royal highway—unless one refers to a period now well past.

At Meadow Valley, near Quincy, when the

shadows began to lengthen, the Caravan came to a halt for dinner. There was pleasant hospitality among the trees on the side hill. A stream of cool mountain water ran rippling by the door, and from its depths a school of speckled trout came at call for supper almost eating from the hand. A spotted fawn made friends of the visitors as though he were not descended from the shy creatures of the quiet places. The crisp after-dinner tingle in the air made the night's bonfire a comfortable experience as well as an ever-fascinating spectacle.

Plumas County, unlike the two others visited during the day, enjoys a new and elegant court house. Therein the library headquarters are located. Miss Woods and her staff kept open house during the evening and explained their system of operation. It is strange and pleasing, too, how everlastingly sweet a group of librarians finds discussion of its day's work. The conclusion is warranted, I think, that all this talk must clarify the case and strengthen the worker in his resolve to do better by his service.

Motor cars which stand in the open overnight in Quincy are reluctant to depart the next morning. They were persuaded, nevertheless; and away we went, through the woods, along the mountainside highway looking down upon the ribbon at the bottom of the Feather River Canyon, passing by Lake Almanor, rather lacking in beauty, with its banks uncovered at the low-water season, through the pine made lumber town of Westwood, and so over more hills and through more woods to Susanville.

Now, Susanville is another lumber town. At its door is a great mill whose product glitteringly new is stacked in a vast checker board. Signs warn the unwary, on its radiating roadways, to beware of the log-laden trucks. Lassen County is rather cut off from the country we had just crossed. Here in the early days was what was called the "land of the never sweats." Roads now join it with its sister counties, when snows do not hide highways and compel motor cars to keep to their kennels like whipped dogs. But far away though Lassen County be, here it was that Miss Martin inspired study circles to carry on some of the most effective examples of adult education in art fields that I have observed. Not through one season alone but through several these women have followed the gleam in proof that the experience gave them stimulus and joy. Another one of those new modern court houses in Susanville furnishes excellent quarters for the center of a library system whose influence is felt throughout the county.

When we came into Alturas the sun was down. The town is in the throes of a boom; a railroad had recently connected it with the outside world. But the people made us welcome in a manner that will never be demoded. The Women's Civic Club served the dinner in their own very creditable building. A group of officials and citizens of town and county headed by Miss Williams took part in the following program, a part of which was the conference of the Eighth District of the California Library Association, whose total membership numbers seven. Four of them were present, and carried on as valiantly as a host. Miles and hours meant nothing to the traveling librarians; after this party they gathered at the library headquarters, and far into the night talked of this and of that.

When the next morning we left Alturas, refreshed by sleep and hospitality, our line of march included a new car. Miss Celia Gleason, lately established at Yreka, had motored over with her assistant, Miss Revell, and acted as special escort on the next lap of the journey. The branch at Bieber was visited. The branch came first, to be sure, but afterward the process of cheese making in a local factory proved even more fascinating.

For those who cared to "kodak as they go" this day held much of charm. Fall River has beauty spots worthy of a painter's brush; and an occasional new log house in the grand manner reminded us of the substantial dignity of older types of building. Lassen Peak got fleeting glimpses of us as we went; but Mount Shasta came out in bold grandeur, and for hours protected us from his towering height. What shadows and tints and values such a magnificent structure continually expresses! However, when night came on the tutelary powers of Shasta must have weakened, for in the early evening came an accident to Mr. Levinson's car which greatly upset the whole party, as well as his passengers. Fortunately, bad as it was and painful, two of the occupants of the machine stoically went on the next morning. Miss Woods and Mr. Levinson were obliged to take the train for home. "All's well," you know; and so it was in this case.

The visit at Yreka was, under the circumstances, not as happy as we had anticipated. But like good soldiers the able-bodied members of the Caravan carried on. Miss Gleason in her new enthusiasms had much to set forth for the visitors' information. Her books go into far places; she brings the outside world to many persons living so far beyond the main traveled roads that we who have pavement under our feet wherever we go cannot understand their language when they talk of time

and distance. With all the value of service to the multitudes by the great libraries of our State one cannot help getting a thrill when he contemplates these citizens who live back of the beyond. Happily, books know no favorites, and serve all, under our county scheme, with equal ease.

So much has been said about roads that one cannot withhold a word of admiration for the highway which parallels the upper reaches of the Sacramento River. The scenery is inspiring in its rapidly changing aspects. Easy grades and wide curves put wings on the car, and permit even the driver to take a look about without endangering the lives of his passengers.

Shasta County, unfortunately, has no library system; so the county seat was just another town to pass through. Here the line of march turned westward at a right angle, and Weaverville became the objective. Trinity County is decidedly off the beaten path. Despite the millions and millions of gold her mines have given the world, she has long lain in seclusion behind the bulwark of her hills. That condition is in the way of being changed. For some years the convict labor gangs have been doing a splendid thing in joining Weaverville to the main north and south trunk line. The construction is not yet completed, but the road now finished makes the trip easy and speedy.

Weaverville is worth a visit on several scores. It was a great mining center in olden times, and one still sees where the gold came from. The whole town has an air of another day, and I for one hope that the citizens thereof may studiously maintain that feeling unmodernized. But the people of Weaverville are not of another age, unless in the respect that they have retained more of the spirit of hospitality which was once the peculiar gift of the West. Nobody of the party can soon forget the luncheon, the visits to historic spots, the library and the good fellowship of the Trinity people who officially and unofficially did the honors of the day.

The stopping place for the night was Red Bluff, where Miss Bailey was waiting with plans which appealed to the party after its longest day of travel, 245 miles.

Tehama County is another possessor of a fine new court house, and in it the County Library has its more than usually spacious and convenient headquarters. Here the following morning the visitors gathered, as eager to see and hear some new thing as were the Athenians of old. Miss Bailey was not content to say goodbye on the steps of the new court house, so excellently arranged for dramatic events; but led the way to Gerber, where one of her

branches, housed in its own building, offered opportunity for study at the point where library book and borrower's hand make contact.

Mrs. Russell was not standing at the front door of the Glenn County Library to welcome us to Willows, for the very good reason that she was in the party. Although she was looking forward to the occupancy of spacious quarters in the new American Legion building, which also was inspected, her headquarters library still tenants one of the long, narrow store rooms. It is interesting to mark the transformation possible in this quite difficult type of structure by the addition of shelves and books and desks. Again, of course, we have evidence of the fact that buildings do not make libraries; but that library service, properly rendered, will in time and inevitably bring forth the buildings best suited to the project.

Two more counties remained to be visited as the Caravan drew on toward its starting, and ending, point. At Colusa Mrs. Morse prefaced the inspection of her headquarters by a luncheon at her home; both of these experiences bear out the conviction that a good executive will produce excellent results in a domestic as well as a professional capacity. At Woodland the president of the C. L. A., Mrs. Julia G.

Babcock, turned back reminiscently to the years when she presided over the destinies of the Yolo County Library, and marked the developments of the work. Such occasions are pleasantly necessary to enable us to realize that once there were small beginnings in the system which as a whole has grown so great.

The results of the tour were fairly evident. The circuit was almost exactly 900 miles around. At the end everybody had a broader first-hand knowledge of a system of which he is a part. Observation of how the other fellow operates and under what conditions cannot help but better the team work of everybody. Those librarians who are somewhat off the main highway were encouraged by the interest in them evidenced by the visit. The lay public had more forcibly brought to its attention that the local book distributing system is a part of a State-wide movement. This is a day of tours and conventions, and libraries must to some extent adopt modern methods of publicity. Aside from merely professional considerations, knowledge of the State in which one lives is an asset not lightly to be valued. Another year, for it is to be hoped that the caravan may not die after this one effort, a different section of the State could well be covered.

The Chicago South Shore Branch Library

By Paul Gerhardt

Architect

THE CHICAGO Public Library has recently opened the South Shore Branch Library, located at the southwest corner of Exchange Avenue and East 73 Street, continuing to the southeast corner of East 73 Street and Kingston Avenue in the City of Chicago, Ill. This structure was designed

The South Chicago Branch is of Tudor Gothic design, having an exterior treatment of limestone and face brick

and constructed under the supervision of Architect Paul Gerhardt, at a cost of approximately \$75,000, exclusive of the value of the land or the equipment. This structure is the eighth branch installed in an especially planned

building by the Chicago Public Library. Thirty-six remaining branches are housed in quarters either rented or provided by other agencies.

The directors of the Chicago Public Library chose this location as being a most outstanding and attractive one both from the standpoint of central

location of a rather more intelligent class of citizenry, as well as from the standpoint of its conspicuousness to call attention to or advertise the advantages and opportunities of the public library. As a consequence, a build-

ing was designed with these thoughts in mind, making it highly attractive and inviting to those accustomed to homelike atmospheres.

The size of the lot on which the building is erected is 120 feet on East 73 Street by a depth of 94 feet on Kingston Avenue. The building occupies 108 feet by 70 feet and is two stories and basement in height.

The structure is of Tudor Gothic design,

tioning of volumes, and, centrally located, a Delivery Room designed to have complete visibility and supervision over the entire building.

The second floor has a Children's Story Room, capable of seating over 150 children for the weekly story and intended to be used for juvenile assemblages, motion picture and stereopticon lectures and meetings of local children's clubs or groups. In addition will be found a

Adult Reading Room on the first floor. There is also a children's Reading Room and a Reference Room on this floor

having an exterior treatment of limestone and face brick with an exposed cypress half timber roof construction, having natural, varied color slate pitched roof. The window sash is steel casement. This location being ideally situated in the South Shore district, which is becoming increasingly populous, has the advantage of maximum light and air, facing on three street frontages. On the first floor will be found an Adults' Reading Room, a Children's Reading Room, a Reference Room for young people of intermediate or high school age, a Stack Room having a present capacity of 20,000 volumes with provisions to double same by the placing of a balcony tier of stacks, a Librarian's office, a Work Room for the repairing and recondi-

tioning of volumes, and, centrally located, a Delivery Room designed to have complete visibility and supervision over the entire building. The basement contains public rest rooms and storage space for periodicals and books not in active circulation.

An outline specification of the building is given herewith. The total cubical contents of the building is 168,000 cubic feet.

OUTLINE SPECIFICATION

General Construction

Pressed brick and Indiana limestone, masonry walls set on reinforced concrete foundations with wood floor and ceiling joists and wood roof trusses.

Roof

Graduated unfading natural slate with copper flashing, snow guards and copper downspouts.

Exterior Materials

Red matt faced brick with limestone trim, having eaves of cypress timbers interspaced with stucco.

Windows

Steel in-swinging casement windows.

Floors

Cork tile on wood.

Interior Millwork

Quarter sawed clear white oak.

Wall Finish

Smooth plaster of Paris plaster.

Interior Decorative Treatment

Woodwork, stained green fume and dull varnished. Walls and ceilings, painted.

Heating

Two-pipe vapor low-pressure steam using oil-burning equipment.

Plumbing

Cast and wrought iron piping, vitreous china fixtures.

Public Library Service to Negroes

Existing Facilities for Training the Negro Compiled from Questionnaires Sent to Librarians of Over Eighty Cities

By Louis Shores

Librarian, Fisk University, Nashville, Tennessee

IN THE LAST two years Fisk University has received repeated requests to establish a library school for the professional training of Negroes, on the one hand, and on the other it has been cautioned that existing facilities for training the Negro are adequate to meet the demand for some time. In order to determine just what the opportunities in librarianship are for Negroes, and at the same time establish the status of the Negro in the American public library, the following questionnaire was sent to the librarians of some eighty cities selected from the *A. L. A. Handbook* and the U. S. census list of cities with large Negro populations:

1. To what extent do Negroes use the library?
 - a. Main building.
 - b. Branches.

2. Is there a separate library or libraries for Negroes?
 - a. Size of collection in Negro branch.
 - b. Appropriation.
 - c. Registration.
 - d. Circulation.
 3. How many Negro librarians do you employ?
 - a. Main building.
 - b. Negro branches.
 - c. Other branches.
 4. Have you felt a need for trained Negro librarians?
 5. What training facilities are provided in your system for Negro librarians?
- What are the future prospects for Negro librarians in your system as concerns:
- a. Responsibility of positions.
 - b. Salaries.

The replies of seventy-four cities made possible a 90 per cent return and some supplementary data to the excellent surveys made by Miss Ernestine Rose of the New York Public Library, Mr. George T. Settle of the Louisville Public Library, and the A. L. A. Committee on Library Extension. Only three cities with large Negro populations failed to reply, and there is still the possibility that they will complete the records now on hand.

As concerns public library service to Negroes, American cities may be divided into five classes:

CLASS I

CITIES WITH NO PROVISION FOR LIBRARY SERVICE TO NEGROES

City	Negro Population
Alexandria, La.	7,863
Annisson, Ala.	5,834
*Avon Park, Fla.	...
Charleston, S. C.	32,326
*Clebune, Tex.	...
Columbus, Ga.	9,093
Dallas, Tex.	24,023
*De Land, Fla.	...
*Duncan, Okla.	...
*Hollywood, Fla.	...
Jackson, Miss.	9,936
Miami, Fla.	9,270
Mobile, Ala.	23,906
Monroe, La.	6,540
Raleigh, N. C.	8,544
Shreveport, La.	17,485
Wichita Falls, Tex.	2,217

Of these, Charleston's Library Association is a private institution which cannot be held responsible for general public service. Annisson started a Negro branch independent of the public library, but it has been closed. In Avon Park, Fla., the city has no appropriation in next year's budget for the city library, and no salaries have been paid since the first of July. Nevertheless, all of the library's duplicates are given to Negro preachers and teachers for use in the "Quarters." Cleburne, Tex., feels, "That it will, in all probability, be some time before we shall be able to arrange in any way for a Negro library, though there are occasional requests." A new Negro school is to be opened Sept. 1 in Columbus, Ga., and is to include a public library branch under the supervision of a teacher who will receive some training at Columbia University this summer. The situation is rapidly changing in Dallas, Tex., according to the Librarian there, because money is "already in hand to build a Negro branch

... this year or the early part of next." De Land, like another Florida city, sees "no immediate prospects," first, because of lack of funds, and second, because there is no demand for service to Negroes. In Jackson, Miss., there is no Negro branch, but the Negro schools have libraries. The Negro Welfare Board of Miami has been encouraged by the Flagler Memorial Library in its efforts to establish a branch in the Negro community houses and if some philanthropic organization will step forward with the necessary finances, another city will be providing service to its Negro citizenship. Plans in Mobile have been temporarily "delayed on account of a friendly suit to establish the right of the library board to use part of the bond issue for the establishment of a Negro library." Monroe, La., which has only a private library now, feels that if a parish or city library is ever established, provision for a Negro branch will be made. "As the Olivia Raney Library is chartered by the city of Raleigh for the use of white citizens only . . . that library has never been in a position to render any service whatever to the Negro population." Shreveport positively answers every question with a negative, and in Wichita Falls, "a Negro committee has been to the library and asked for some kind of help," and the Librarian feels "That before long some arrangement must be made to take care of the Negroes." Most of these cities, in response to the question on need for trained workers, indicated that as soon as Negro library service was begun, a trained librarian would be sought.

CLASS II

CITIES LIMITING NEGRO USE OF PUBLIC LIBRARY

Only two of the cities replying to the questionnaire definitely come under this class. Lawton, Okla., permits Negroes to "come and get books, but (they) are not allowed to stay and read." Fort Worth, Tex., which maintains three stations for Negroes, and grants colored readers the "privilege of drawing books from the main library and branches for home use," plans "to establish a branch library for Negroes as soon as the money is available," and asserts that it "will then need a trained assistant." However, other cities, especially those in the South that are too small to support separate services, grant Negroes limited library privileges. Also, some of the larger cities, which provide segregated branches, often permit Negro readers to come to the main building for material not available elsewhere, provided that no publicity is attached to these occasional exceptions.

*Under 2,000 population.

CLASS III

CITIES PROVIDING SEGREGATED LIBRARY SERVICE TO NEGROES

City	Negro Population	No. Negro Branches	Collection (No. Volumes)	Appropriation (Dollars)	Registration (No. Readers)	Circulation (No. Volumes)	Librarians Employed	Need of Trained Librarians	Training Facilities

(a) Just opened.

(b) \$200 plus.

(c) 7 months.

(d) 9 months.

(e) From Library Board.

As concerns future prospects, most of these cities are optimistic. A few—Asheville, N. C., Macon, Ga., Durham, N. C.—are uncertain. Of the cities that have felt no need of trained librarians, Henderson, N. C., comments that the entire library system is hampered by a lack of funds, and that the Negro branch is already receiving an appropriation proportionate to the "whole amount paid by Negroes in taxes." In Richmond there has been no demand for a trained worker since the present one was trained, but if an opening should develop, the prospects would be the same as in any other branch. Tampa expects "to always have a trained librarian in charge, but it will be quite some time before the library would require more than one." Jacksonville's colored librarian receives assistance from the main building, and has had a summer course in Columbia. Louisville, alone, of these cities pro-

vides training facilities for its Negro workers. For the past two years, however, there have been so many applicants and so few vacancies that the Library has temporarily discontinued the training class. At present, in addition to the two Carnegie branches, there is one high school branch, 15 deposit stations and 77 classroom collections in 28 school buildings. The head of the colored department and his eight assistants have the same responsibilities and salaries as workers in the white branches.

New York's 135th Street Branch has occupied a unique position among libraries. Its location in the nation's greatest Negro center might easily have stimulated the development of segregated service. Yet, branches all over the city are used extensively by colored readers and the regular training class as well as the graded service accepts Negroes on the same basis as whites.

CLASS IV

CITIES WITH SPECIAL NEGRO BRANCHES,
OR BRANCHES USED LARGELY BY
NEGROES, BUT WITH FREE USE
OF ALL LIBRARIES

City	Negro Popu- lation	No. of Branches Used Largely by Negroes	Negro Librarians Employed	Training Facilities
Baltimore.....	108,322	4	None	None

New York.....	152,467	1	4	Training Class
Pittsburgh.....	37,725	2	None	None
*Springfield, Mo ..		1	1	None

*Under 2,000.
***Main: 14 women, 6 boys, 10 janitors. Branches: 38 women, 6 boys."

Baltimore has several branches used largely by Negroes: 90 per cent in Branch No. 1, 40 per cent in Branch No. 5 and 20 per cent in Branch No. 12. Although there are separate schools in Baltimore, the Library points out that there is no Negro branch, and that it is anxious "to carry out the spirit and intention of Enoch Pratt, who established the Library in 1882, specifying that no distinction should ever be made in service to the public." Commenting on training facilities, none of which is open to Negroes, the librarian states, "It does not seem probable that during the near future there will be need of Negro librarians in our public library system."

Bartlesville, Okla., extends the same privileges to Negroes as to whites, but in addition provides a branch in the Negro school. It is the opinion of the Librarian there that the Negro population will never warrant the use of a full-time librarian, although the "Negroes . . . would be greater readers if someone would write books about their life, especially for children."

Charleston permits "very limited" use of the main building and full use of the Negro branch only. On Dec. 12, 1927, the Board of Education attempted to definitely exclude the Negroes from the main library, but the resolution was

declared unconstitutional by a higher court. Nevertheless, in the past years the city has appropriated \$5,665 for a Negro population of 4500, but the colored citizens have been unwilling to barter their equal rights for a per capita appropriation of \$1.25.

Chicago has refused to recognize Negro readers as different from any other readers. Nevertheless, two of its 45 branches are used almost exclusively by Negroes. Fourteen Negro women are employed in the main building, and a total of 38 women in the Negro branches, but no indication is made as to the capacities in which they are employed. The same training facilities are open to colored as to white applicants, and promotion in service is on the basis of grades applied to all library assistants.

Pittsburgh has one branch in which 30 per cent of the readers are colored. No Negro librarians are employed, but the Librarian suggests that "Perhaps we should have recognized such a need. The hiring of Negro librarians has never been considered, and I doubt seriously if any move to do so will be made in the near future."

Indianapolis, which extends the same privileges to all readers in the main building and all of its branches, has also provided two splendid Negro branches and a number of deposit stations under four trained colored assistants. Though none of these workers has had her training in the Indianapolis training class, the Supervisor of Branches feels that there would be no objection to admitting a colored applicant. As the number of branches increases, trained librarians will be added, and their salaries will be dependent upon their personal qualifications.

Kansas City, too, permits colored readers to use all library facilities freely, including the Negro branch, but inasmuch as there are separate schools, Negroes have never been admitted to the training class. The Librarian of the Negro branch is white because they "have never found an efficient colored one. Have tried three—have colored assistant who has learned from experience." The librarian adds that a Negro "could never work at main or in a white branch."

Los Angeles reports that three branches have over 50 per cent Negroes, and that one of these is entirely staffed by Negroes, while a second branch has one junior assistant. Both the short two months courses and the regular library school are open to Negroes.

Cincinnati has two branch libraries located in colored communities and staffed by four full-time and two part-time assistants. The regular six months training class is open to

colored and white applicants alike, selected by competitive examination. Four branches in Detroit show considerable use by colored readers. In addition, a one-room sub-branch in the colored community house has just been opened. Although "no color line" has been drawn, there have been no applicants thus far.

CLASS V

CITIES GRANTING FULL USE OF ALL LIBRARIES

The cities in this class, for the most part, do not recognize the Negro reader as a "problem."

Boston's Negro population is neither large nor concentrated, and therefore no separate branches have existed. In the past, a few Negro women have been employed, but there is no colored assistant at present. The regular training facilities are open to all candidates, and Negroes would be placed on a par with whites in the service; but in three years there has been no qualified Negro applicant. The Librarian, however, has a "sincere feeling that there should be another library school for the training of Negroes, particularly for service in the South."

Brooklyn's Negro population, which comes chiefly from the West Indies, is scattered and **does not use the library much.** The regular training facilities are open to all, but there has never been a Negro applicant.

Buffalo has disliked the idea of a Negro branch, and at present employs one assistant in the main building. However, "We have not found that mixed staffs work out well for either the staff or the service."

Negro readers use the entire library system of Cleveland quite heavily, and two colored assistants are on the staff at present. Both the apprentice course and the Library School at Western Reserve are open to Negroes, and although the latter has never had a Negro student, one member of the first faculty was a Negro. The Librarian further states that "We are anxious to give them a fair deal here, but so far the eligible candidates for positions have not measured up to the average."

Down in the far South, El Paso, Tex., permits free use of its library facilities. But the Negro population is only 1½ per cent of the

total as compared with a Mexican population of 60 per cent.

Milwaukee, Minneapolis, Newark, San Francisco and Seattle, among other cities, have felt no need and see no future prospects for trained Negro librarians because of the lack of segregated facilities.

It would appear that in public libraries, especially in the South, there will be a need for trained assistants to take charge of the colored branches. One city in Oklahoma needs a trained person at once; two cities in Tennessee and one in Texas will want librarians this summer. A great many of the cities have been retarded in their Negro library programs by lack of money; but with the entrance of the Julius Rosenwald Fund into Southern Library development, its insistence that service be extended equally to colored and white races and the resolution of the Southeastern Library Association "that library service to Negroes should be a part of every public library program" there is every reason to believe that the demand for trained workers in the next few years will exceed the supply furnished by present training facilities.

This is said with a full realization that the greatest danger facing the profession at present is an over enthusiasm which is likely to produce the conditions existing in teaching. There are now more library schools than the opportunities warrant; but the Negro community is still untouched. The Negro reader has received nothing like the stimulation that has gone to other groups of potential library users. There is still a vast field of Negro adult education which remains unexplored simply because there is a dearth of trained colored workers. One librarian comments, "I have about come to the conclusion that we might extend the use of the library by putting a better prepared person in charge. Such a person has never seemed available."

The new library program in the South has set equal library facilities to both white and colored races as a goal. This means more than giving the Negro a building and some books and blaming him because he does not take advantage of the opportunities offered him. It means that the Negro must be subjected to the same proselytism that has characterized the spread of library service to other non-using groups. To accomplish this, trained Negro librarians in greater numbers must be provided to carry out the fuller program.

The public library is an institution maintained to promote the general welfare and charged with responsibility to see that every citizen of the community knows about the recorded knowledge which would help him in his life and work.—JOY ELMER MORGAN.

Classifying, Cataloging, and Binding League of Nations Publications

By C. E. Walton

Chief Acquisition Dept., Washington Square Library, New York University

IT is distinctly worth while, at the beginning of any consideration of the publications of the League, to point out that the question of standardization owes its origin to the American library profession. It was our urging which prompted the World Peace Foundation to undertake, years ago, its arduous campaign looking toward the resolution of those difficulties, bibliographical and historical, which seemed to us so troublesome. Although there has been little formal research, and although there is less literature, we are nevertheless only bringing finally to the front a question long accepted as difficult; and one which, therefore, induced in many quarters long hours of labor and thought.

This paper is offered as a preliminary effort to clear away some of the underbrush. For before we can safely arrive at any sort of standard plan for handling these publications, we must realize clearly just what any standard plan involves. Many of us may have felt that the responsibility rested at Geneva: that some different form of publishing procedure might have settled the whole matter. But publishing procedure, however, and especially publishing procedure in material of this kind, has rarely been synonymous with library uniformity in treatment; and it must, of necessity, have little influence upon classification and cataloging. Many of us may have felt that a different card procedure at the Library of Congress might have avoided some of our difficulties; but here, again, it is difficult to conceive of any alternative which would have dealt effectively with either classification or binding. If we are to arrive at some sensible conclusion which shall represent library efficiency in the years to come, it seems to me that we must cease to be so troubled by a small detail here and another small detail there, however exasperating such small details may prove in their cumulative effect. There are many learned societies, now happily defunct, which can be shown to have been precisely as troublesome, yet libraries have given their publications effective treatment. Not least of the reasons may have been that we were thrown back upon broad principles, having no secretariat to whom to write.

At this point I should like also to emphasize that if we are to approach this matter of a standard plan at all, we must do so cautiously. The League of Nations has very generously released for public sale a very great quantity of advance, semi-confidential material. Much of this material relates to matters still in process of debate. Advance information we now secure, sometimes as much as six or eight months before final action; all of it is valuable source material. It is quite within the bounds of the probable that the League might discontinue this practice if and when American libraries were to become too critical.

Before we can make any further intelligent or practical contribution to the problem of standardization, there are several facts about the publications themselves and the conditions under which they appear which we must recognize. Far from the center of activity, keen as we are to press for those types of library practices which shall represent the highest degree of efficiency we can conceive, we are in our own minds, perhaps, sometimes raising questions, formulating procedures which I am afraid would be received at Geneva with less sympathy than we might desire.

That the League and its subsidiary bodies have won their maturity in an atmosphere of fluctuation and change which lend their records imperfectly well to library procedure, we are now prepared to admit. We may as well face the corollary: that such fluctuation and change is a necessary characteristic without which many types of League activity would be impossible and its publications useless for the purpose for which they were meant.¹ For the whole publishing apparatus the League has followed for nearly ten years is what one might call the "memorandum" system: as though one had lifted, on a very large scale, the inter-departmental correspondence of a great library system into print to the extent of five hundred pieces or more annually. Some are comparatively informal or even confidential; some are more elaborate; and some, even, quote statistics. With this fact clearly in mind, perhaps we can sympathize more closely with that bashfulness which initially confounded us when we were first informed certain imprints were

¹Paper read before the Seventeenth Annual Conference of Eastern College Librarians, Columbia University, Saturday, November 30, 1929.

¹Cf. Sir Eric Drummond, Secretary General of the League in *Annuaire de la Société des Nations, 1920-1927* . . . (Ottlik), *Avant-propos*, p. xi.

"never on sale." Thus the publishing scheme, as it is and must be maintained, is designed to give that wide play in authorship, form, and composition which have proved the despair of the librarian. The evidence shows that the material has been most effectively handled by organizations like the member states, or like the State Department at Washington, where a tier of filing cabinets probably thirty feet long and four drawers high, if my memory serves, holds the publications of the League. Here the controlling principle is very close subject analysis; principles of authorship with their attendant bibliographical and historical features are frankly rejected as of minor importance, precisely as they are in our office files. Here, in short, the procedure is least similar to that normally useful in a library.

The problem of applying normal library procedure at all to this mass of material was bound to be very difficult. Principles of authorship, of subject bibliography, were complicated by the youth of the League, by its frank avowal of fluctuation in both as a working principle in investigation, and by a consequent lack of suitable and easily accessible authority to which to refer to clear up obscurities. Essentially something of a dilemma must always remain. The memorandum type of publication has answered the League's purposes admirably, and library difficulties will always remain of secondary significance in the memorandum scheme of things. We cannot, in the last analysis, expect a remodelling for our benefit. We must finally standardize for library use a serial collection, if I may use the term, which is such only as we may interrupt the consummation of its intended function long enough to make it so.

The bibliographical difficulties have also an historical flavor. From the origin of the League to May, 1921, the material was issued strictly for private consumption, with the exception of the *Official Journal* and a few other general titles meant to keep the public informed. The memorandum feature was brought out by means of an internal code system of numbers. From May, 1921, to the end of 1925, a combined alphabetical and numerical document series notation was employed: what we now call the "Official distribution registry series." The gradual emergence of secretariat section designations during this period formed the authority for a rough subject classification by libraries. This classification followed the structural lines of demarcation within the League itself; and has been the basis for all subsequent attempts at arrangement or classification. It is at this time that duplication begins to appear, due largely to annexation of earlier documents to complete reports, and to the inclusion of select items in the *Official Journal*. During

this period no distinction is made between imprints on sale and those not on sale. From 1926 to 1928 a numbered public distribution registry series was added to each section designation, forming a well-defined annual series within each section, and comprising those documents released to the public. These series, however, contained at irregular intervals reports of a serial nature begun under title by many libraries during the previous period. Duplication, meantime, had increased. Beginning with 1929, we find the annual document series better defined, with fewer single page imprints (due to their inclusion in the *Official Journal*), and with the series so designated in the lower right-hand corner. Reports still appear within the document series, however; and there is still considerable duplication.

We have at present, then, eighteen annual series of documents divided by broad subject. It does not seem to me that this situation represents a very great lack of logic. While for library purposes a simpler system would unquestionably cause less trouble, we must nevertheless realize that to urge any very radical change would be in effect to urge a substitution. There is already an entirely practical foundation upon which to build.

Since no plan is perfect, there are objections which might be urged. But it seems to me that they are mostly boiled down to three, remedial action on which would greatly improve matters. The lack of adequate bibliographies constitutes the most serious problem, a lack particularly unfortunate for the earlier periods. We are discovering, in the second place, as we put our files in order, that considerable early material is out of print. Third, the inclusion of important minutes and reports in the annual distribution numbering, when an increasing number of libraries is finding it most helpful to handle them under title, creates the necessity for much cross-referring.

With these three difficulties in mind, we may profitably ask what direct action we may expect from the League within the near future. We are fortunately aided by the recent release of Dr. Sevensma's *Short Guide to League Publications*, which may be considered the League's official position on the question of treatment. The division is by form, first into periodical and non-periodical publications. Periodical publications are divided into: first, twelve general titles as continuous and regular; second, three of the ten series within the documents of the Economic and Financial Section and the pamphlets of the Information Section as continuous and irregular; and third, the four yearbooks. Non-periodical publications are to be arranged by the public distribution registry series numbering since

1926: in chronological order for previous years: and title pages and indexes are to be supplied from 1930 onward for "each category of documents placed on sale."² The *Short Guide* . . . is hopeful on other lines. Next year the early out of print volumes of the *Official Journal* are to be reprinted. Furthermore, the list under continuous and irregular inspires us to hope that eventually it may be extended to include all imprints of the League which are continuous and irregular, which may then be dropped from the distribution numbering and placed upon the same footing as the periodicals proper.

Before we can face intelligently the question of a standard plan, there is another phase of the situation which demands our attention. We must realize that we owe a duty to the past as well as to the future practice of American college and university libraries. We would stand, I fear, as over-theoretical should we try to capture what Emerson called "deceptive simplicity." In order to find out what had been done, I wrote to those of the college and university libraries with whose methods I was unfamiliar. Included in the list were all such institutions subscribing to the global service as they were listed in the spring of this year. I am now informed of the practice in thirty-seven libraries out of fifty-five, a total of 67 per cent.³ To a brief tabulation of that information I now proceed.

In seven cases libraries report files less than half complete, with deficiencies chiefly in the early period from 1920 to 1924. In thirty cases files are approximately 85 per cent complete. Those libraries with files less than half complete remain, naturally, undecided as to procedure, although, in five cases out of seven, series within the documents have been isolated by title for temporary binding in two and permanent binding in three.

In the thirty libraries having fairly complete files, two are still undecided and beyond isolating for treatment a few general titles, have done nothing. In the remaining twenty-eight cases, fifteen have disregarded the public distribution numbering, although from the fifteen, three follow a subject arrangement which duplicates it. Seven have scattered the material, while eight keep it together as a collection.

In four cases from the eight, a classification special to the library concerned has been followed. In the remaining four such a special classification is still in doubt or in some stage of progress. Twelve of the fifteen bind series within the documents by title, the total number of series including general titles in the case of the University of Michigan being eighty-two. In ten cases out of fifteen the treatment is expected to be permanent. Three libraries only from the fifteen have attempted files of Assembly and Council documents by those numbers, and only in two permanently.

Thirteen out of twenty-eight having fairly complete files have followed the public distribution numbering. In five cases the treatment is expected to be permanent, and some attempt is being made to bring the earlier material into harmony with the later, usually by assigning section numbers. In all thirteen cases, the material is kept together as a collection. Six have bound series within the documents by title, the total of such series in the case of New York University being sixty-four.

From the thirty-seven libraries reporting, sixteen, or 43 per cent, have adopted permanent methods of treatment, either by subject primarily, as in ten, or by form primarily, as in six. Twenty-one libraries from the 37 or 56 per cent have series within the documents bound by title.

The statistical study, as a whole, has proved difficult of interpretation from a comparative standpoint, because no two libraries happened to be at the same stage in working out their problems. In general, a well-defined tendency is shown to maintain the material as a collection, twenty-one libraries, or 56 per cent, reporting such procedure. Subject classification, founded on the structure of the League, is characteristic of those libraries which came to an early decision as to treatment. There is also a tendency on the part of those libraries to scatter the material throughout the classification, possibly in order to avoid the duty of compiling an extension which would of necessity have to fall back upon arbitrary assignment very largely for the integration of the whole collection. Libraries which do not scatter have shown a decided tendency, particularly in recent years, to attempt some classification by form, following the section designations and the public distribution numbers. Subject classification, however, where the material has been kept together, is practically identical to the newer method by form. In fact, the section numbering did little save convert into series subject categories already sanctified by usage. The categories were taken over from the structure of the Secretariat, of course; and are always found in any subject classification in one

²League of Nations. *Short Guide to League Publications*. [Geneva, 1929]. p. 16. (Distributed in roneo.)

³These libraries are the following: Stanford, Univ. of Cal., Univ. of Cal. Southern Branch, Univ. of Southern Cal., Wesleyan, Yale, Univ. of Chicago, Univ. of Ill., Indiana Univ., Johns Hopkins, Amherst, Harvard, Harvard Law, Mt. Holyoke, Univ. of Mich., Univ. of Mich. Law, Univ. of Minn., Univ. of Missouri, Dartmouth, Princeton, Rutgers, Columbia, New York Univ., Skidmore, Univ. of Rochester, Vassar, Univ. of N. Carolina, Ohio State Univ., Reed, Univ. of Oregon, Penn. State, Swarthmore, Univ. of Penn., Univ. of Pittsburgh, Brown, Univ. of Texas, and Southern Methodist Univ.

order or another. Within these subject heads some difference of arrangement occurs in the older schemes contrived before the public distribution numbering appeared. Extensive subject classifications are in use as worked out at Johns Hopkins University by Dr. Mattern at the World Peace Foundation Library, as worked out by Mr. Myers and Miss Carroll, and at Princeton University, as worked out by Mr. Gerould. A very comprehensive subject classification for the collection has also been worked out for Dewey, using 341.1, by Miss Clower of Southern Methodist University. Johns Hopkins extends the Library of Congress scheme at JX5811-5870, following International Law. Princeton extends the Richardson Classification very minutely. The World Peace Foundation extends the Brussels International.

The form treatment is, in a sense, a gradual growth from the older method, prompted, as it has been from time to time, by direct action from the League. There is no tremendous difference between the two. Most libraries adopting a subject arrangement have found the numbered series a help in collation; and most libraries using a form arrangement have found the subject similarly helpful. On the whole, the last five years has seen a steady increase in the degree of responsibility which the League was willing to bear in order to insure a series of publications effectively useful in libraries. The proposed changes for 1930 and the following years make to a great degree official the arrangement by form already in process of emergence from our own study. The most extensive study of the treatment by form, so far as I know, is that which I presented at the Washington Conference this year, now contained in the Proceedings of the Catalog Section.⁴ It was a great satisfaction to find that the League had followed the same fundamental procedure when the *Short Guide* . . . appeared some months later. The method by form has since been adopted at the University of North Carolina and at the University of Illinois.

While there are, of course, minor differences here and there in the procedures of different libraries, and while, also, most have shown a commendable caution in accepting any permanent procedure, yet the central impression from a careful study of the reports is one of slow and independent movement in the same general direction.

With this brief summary of pertinent facts in the embryology of the publications them-

selves, and with regard to the practices of American college and university libraries thereon, it seems to me that this conference is now in a position to consider the matter of a standard plan for classifying, cataloging, and binding. As a preliminary to such consideration, there are certain aspects of the present publishing scheme which I should like to point out as worth attention. In the first place, there seems little doubt but that the material should be maintained as a collection. Fifty-six per cent of libraries handling the material so maintain it, and at least one other is in process of revising its method in order to do so. For a collection so large as this would be, a group of general serials, selective or explanatory in intent, would be desirable. This we have. If this general group were followed by a series of subject groups, presenting by distribution numbers or by title or by both important source material, I should judge this not a bad idea. This we have. Thus, as to physical arrangement, which to some degree presupposes binding policy, we already have some features which have been already largely standardized in practice.

With regard to classification, the structure of the Secretariat must certainly be set up as a skeleton on which to build. An extension of Dewey exists at Southern Methodist University, of the Richardson Classification at Princeton University, of the Brussels International at the World Peace Foundation Library, and two of the Library of Congress Classification: one at Johns Hopkins University and one at New York University. Of all these extensions, that of Richardson is least in accord with the physical structure of the League. All the others are substantially in agreement upon their general principles.

With regard to cataloging, libraries have been very reticent on the efficiency of the Library of Congress special catalog. I have long felt that their special unit, while admirable in many ways, was rather more elaborate than experience has shown to be necessary. There seems also in such a special procedure a tacit admission that our usual cataloging principles have broken down, to which some would object. I suppose the most direct criticism of the Library of Congress cards for League material lies in their frequent ambiguity on the question of real authorship; yet on this point we must remember that the truth about authorship is often very hard to discover, even in Geneva; and that, when in doubt, it has seemed best to err on the side of too much information rather than too little. Some of the difficulties on the question of authorship can be cleared up by the League cards, recently begun, but they vary widely in minor particulars, not

⁴American Library Association. Proceedings of the Catalog Section, including annexes and a directory of Catalog Section members: Washington, D. C. Conference, May 13-18, 1929. Chicago, Catalog Section, A. L. A., 1929. pp. 70-86.

only from the Library of Congress cards but also frequently from what we have come to regard as standard practice. Ottlik, in his *Annuaire . . .* presents a very complete list of all commissions and special bodies which have functioned under the League's auspices. I am inclined to think the individual library would do better to take what information and authority they find and to proceed, rather than to wait for any pronouncement from some higher source.

A possible suggestion for standardized cataloging is offered in our experiment at New York University. The four divisions of the Library of Congress catalog for League publications are: title, author, topic, and document number. We are trying to work out a plan to copy U. S. Government practice for entries in the public catalog in an endeavor to eliminate the special unit idea. A possible notable improvement, I feel, will be the principle of elision, by which we may enter directly under the League bodies several times, dependent on other bodies, reserving, however, the full entry with notes for the official catalog. We hope to be able to transfer the title and topical sections to their proper places in the dictionary catalog, adding as general subject-heads, but very judiciously, those topics at present unrepresented in the Library of Congress list. There seems no way, in the absence of a competent document index, to avoid the document number section in the public catalog; but it should properly be regarded as a temporary device to serve only until such an index appears.

In turning this question over for discussion, I should like to ask a question. By a standard plan, do we mean a uniform plan, or do we mean a simple plan? If a uniform plan, we have it now, as I have been at some pains to point out, conditional only upon the necessity for the proper study to apprehend it. We must dig some features of it out from a mass of bibliographical detail, but that this can be done, the student of European documentation knows: that it has been done, the experience of many American libraries shows. The situation here has been duplicated, in not unfamiliar fashion, in the publications of the British Historical Manuscripts Commission, and in the publications of the French Ministry of the Interior. If we mean by a standard plan a simple plan, then I see nothing to do,

in view of the facts herein presented, except to go back to the beginning and to reopen negotiations with the League. If it takes as long to convince Geneva now as it did on the question of the public distribution numbers, many of us will cease to be interested by the time the question is settled. We shall, furthermore, if we are successful, have importuned a change which will throw out of whack at least 43 per cent of the collections in American college and university libraries, assuming that nothing further is done by the others in the meantime.

I am sure this will seem a very dreadful situation indeed. From some years of study in this field I am convinced, however, that if we will be very careful to inform ourselves thoroughly first and to be not too radical in what we are willing officially to petition; and, above all, if we will recognize candidly the many purposes the material must serve, we may gain much from an official and formal resolution to the League. I am inclined personally to favor action on the three difficulties of which I spoke before. Concerning the lack of bibliographies, I understand that the sections of the Secretariat have thought more than once of undertaking such lists from the beginning of their publishing periods to date. Why cannot we signify the help we should surely find them to be? Again, a reprint program is already planned for the *Official Journal* for next year. Why cannot we ask for the reprinting of certain other badly needed items such as the first sixty-one *Epidemiological Reports*, the reprinting to be distributed over whatever period of years is necessary? And, finally, why may not we ask that the list of continuous and irregular titles appearing in the *Short Guide to League Publications* be extended to include all such items appearing within the documents, and that these items be dropped from the distribution numbering and placed upon the same footing as the periodicals proper? Thus we place ourselves in the light of supporting projects either already begun or suggested by the League from within, and thus we avoid the rather dismal connotations of attempting to "bring pressure to bear."

As I have already pointed out, improvement in the past in the machinery of the League's publishing has been secured slowly, one small point at a time. This, I am personally convinced, is the only safe way to proceed under the circumstances without grave danger of upsetting the whole appletart.

⁵*Annuaire de la Société des Nations, 1920-1927; préparé sous la direction de Georges Ottlik. Lausanne et Genève, Librairie Payot et Cie, n.d.*

The better part of every man's education is that which he gives himself, and it is for this that a good library should furnish the opportunity and the means.—JAMES RUSSELL LOWELL.

THE LIBRARY JOURNAL

February 15, 1930

Editorial Forum

A DECIDED advance is being made in our own time in the ethical standards of professions and industries, reviving in the latter case the spirit of the ancient trade guilds. A code of ethics for the library profession has long been discussed and has at last been reported by the committee of which Miss Josephine Rathbone is chairman, and it should be carefully studied by every member of the library profession, not excluding library trustees or the apprentice beginning lifework in the library field. Indeed, it would be well if the code of ethics, in relation to the staff, should be read at staff meetings as often as every three months, and to considerable extent made the text for discussion at staff meetings. The advice given is throughout sound and wholesome and should help to raise the dignity of library service into that of a profession of the highest rank.

MUCH INTEREST has been awakened in library circles by the introduction in Congress of a bill sponsored by Representative Ross A. Collins of Mississippi to purchase from Doctor Vollbehr the 3000 incunabula which he brought to this country originally for exhibition in Chicago and which were later exhibited at the National Arts Club. The purchase price named in the bill was \$1,500,000, which is said to be not more than half the value of the collection as estimated by experts in Fifteenth Century productions. The Librarian of Congress, however, has expressed his feeling that the government should not be asked to appropriate such a sum for this purpose, as lesser sums such as Congress has liberally appropriated for the administration and collections of the library can be made more directly of use in service for Congress and the people than even the most valuable collection in this field, much as it is to be desired that the Library of Congress, which is not strong in such books, should have a better representation of them. It cannot be hoped, of course, that the Library of Congress could rival the older historic libraries in the possession of books which they have accumulated for centuries, but a representative collection is cer-

tainly to be desired. Especially desirable would be the vellum copy of the Gutenberg *Bible*, of which the other two vellum copies are in the possession respectively of the British Museum and the Bibliothèque Nationale, so that this third copy would find its proper place in our national library. This *Bible*, also in possession of Doctor Vollbehr but not numbered among the 3000, was purchased, it is said, at a cost somewhat above \$300,000 and could be had for that price, but again the Librarian of Congress does not feel that a purchase of this sort should be made out of the people's money by act of Congress. It is greatly to be desired that some multi-millionaire, whose sufficing generosity matches his wealth, would present such a gift to the nation, and this would indeed be the most distinguished gift possible and one of the best personal memorials.

WE WERE not guilty of the virtue of understatement in speaking of the hoped-for million-dollar endowment for the A. L. A. from the Carnegie Corporation conditioned upon the raising of another million from private sources as a promise of the Corporation. While it is understood that such a generous grant would probably be forthcoming, the trustees of the fund have not acted in the matter, and there has been no actual pledge or promise, but only an intimation of the likelihood of a grant under the given circumstances. In seeking private endowments, the Indianapolis Public Library some time since prepared a brief list of generosity to libraries in this wise as an effective means of stimulating such donations. It has been suggested that libraries, generally quite willing to receive endowments, would be helped by reason of an adequate list which could be compiled if each library having endowments would send a list of the date, amount, special purpose and name of donor of the several funds which the library has thus acquired. We should be glad to compile and give space to such a list in THE LIBRARY JOURNAL, and this might have a further usefulness in convincing municipal authorities which support libraries that, if they make liberal appropriations for maintenance and, if they keep "hands off" the administration by trustees and librarians, they would better induce private endowments and thus benefit their libraries and the public, who are the owners of the libraries.

LAST YEAR at the annual luncheon of the National Association of Book Publishers Dr. Arthur E. Bostwick stressed the point that public libraries daily advise readers to buy books, tell-

ing them what they ought to buy and where to buy it. That public libraries are acting as agents of the book trade was emphasized throughout the address. It is interesting to note that Joseph L. Lippincott, retiring president of the Association and president of the J. B. Lippincott Publishing Company, in his presidential address at the business meeting this year brought out the same point. He stated that more and more the best in literature seems to find its way to the public through the channel of public libraries, and that librarians are in many communities veritable guide posts to reading. "In fact," states Mr. Lippincott, "the libraries are greatly instrumental in keeping alive the standard books in all lines of reading. Many might otherwise go out of print." The National Association in its promotion report indicates the widespread and growing cooperation of public libraries, school libraries and others in the development of book reading and book purchasing and our own reports from the library field indicate an alert interest in the business of helping people select books. Both publishers and librarians should welcome this spirit of active bookstore cooperation with public libraries, for there is no doubt that libraries are good outlets not only for current books but for older books of enduring value.

IT is a wise act of the American Federation of Labor to prepare a compilation on unemployment, admirable for library use, which represents the views and practices of the trade unions in providing against this misfortune of workingmen. The volume is introduced by President William Green, one of the ablest of Labor leaders, who succeeded Samuel Gompers and has brought to the post a responsible sense and fair-sided view of his mission as the highest Labor executive. Every library, whether urban or rural, and whether or not this problem exists in its territory, should not fail to place this book on its shelves.

THE EFFORT of Miss Mary Elizabeth Wood to obtain a permanent endowment for the Boone Library School, founded by her and now an integral part of the Central China University of Wuchang, capital of the inland Province of Hupeh, deserves the interest not only of all librarians but of all who are interested in seeing China assimilate as much of our Western culture as is good for her. China has always been the land of the scholar, and the printed book was familiar there for centuries before we had it in the West. We have made some progress in systematizing its stor-

age and in making it available to readers, and the efforts of our enthusiastic Chinese pupils to make use of our methods should have our assistance and encouragement in every respect in which we are able to give it. A. E. B.

Library Chat

THORVALD SOLBERG, who has been Register of Copyrights ever since the creation of that office in 1897 and whose bibliographical and library relations make him an eminent member of the library profession, absents himself from the Copyright Office for a ten weeks' vacation after spending 361 days at work in it during the past year, every day except one Sunday, Thanksgiving Day and two days at Christmas. This is a remarkable record for a man in his seventy-eighth year, continued for two-year periods ever since the usual retiring age of seventy because of his combination of the experience of age with the vigor of youth. Despite personal stresses which the year brought to him, Mr. Solberg also added to his office work the rounding up of his remarkable bibliography of the Balearic Islands, which forms the latest contribution of the Bibliographical Society of America to its series of publications, an achievement of very notable character.

THAT librarians are not the only QUESTIONNAIRE SUFFERERS is proven by the current number of *The Research Bulletin of the National Education Association*, devoted entirely to the problem. The case against the Questionnaire and the case for it are well presented, illustrations of two types of administrators (the one who answers questionnaires and the one who does not bother with them) are given, and though the criminals at the court of justice are school superintendents and teachers, librarians will sense a kindred spirit as they read the following questions on the cover:

THE QUESTIONNAIRE

Have you dispatched a carefully prepared questionnaire, asking for significant data?

Has this questionnaire gone to a group of persons who ordinarily treat you with courtesy and respect?

Has your questionnaire been thrown into the waste basket with the others—good, bad and indifferent—which roam the country unrestrained?

Or

Have you neglected pressing duties, and burned midnight oil while you answered questionnaires?

Have you anathematized questionnaire-makers and all their works?

Have you purchased a large waste basket and resolved to answer no more questionnaires, question blanks, check lists, inquiries, or data sheets?

If you have done any or all of these things—this "Bulletin" is for you.

Librarian Authors

WILHELMINA HARPER was born in Farmington, Me., the daughter of the assistant principal of the State Normal School. During her school years a literary profession was not her "chosen profession"; her aim then was to become a teacher of physical education. She was always more fond of athletics than anything else, and was captain of the champion girls' basket ball team of the Flushing, N. Y., High School. Finally she chose a library career and took two special courses in story telling at Teachers College (Columbia University), special courses in literature at New York University, and special courses in children's work in the New York State Library at Albany. Her first appointment was as children's librarian in one of the branches of the Queens Borough Library system of Greater New York at the time when the library was under the administration of Jessie Fremont Hume. For ten years she was with the Queens Borough Public Library as a children's librarian, helping to develop children's work in the fast-growing branches, conducting story hours, giving talks in public schools, instructing classes in the use of the library, organizing clubs for boys and girls, and as a branch librarian. She resigned to enter war work and was first assistant at the Pelham Bay, N. Y., Naval Training Station until she went overseas to Brest, France, as library organizer for the Y. M. C. A., and later as assistant to Edward C. Carter, director of Y. M. C. A. overseas service.

Upon her return to the United States she went to California and was the first county children's librarian to be appointed in the State. For six years she was supervisor and organizer of children's work in Kern County Free

Library at Bakersfield, Cal., but resigned to become consulting children's librarian in an independent capacity, with headquarters at Palo Alto. She has been instructor in children's literature at the University of California Library School, at the Riverside Library School, and at the San Jose Teachers College.

Her literary career started some years ago in the Queens Borough Public Library. With a weekly story hour of some two hundred children, it was necessary for her to have quite a story list always at hand, so she compiled her favorites for her own use. The head of the Branch in which she was conducting stories thought this compilation good enough to send to a publisher, so she risked it, and the collection was published by the Century Company under the title of *Story Hour Favorites*. The next venture was during war times, when she compiled some favorites of sailors. This book, *Off Duty: A Dozen Yarns for Soldiers and Sailors*, was also published by Century. Since going to California she has compiled the following children's stories: *Fillmore Folk Tales* (Harcourt Brace); *Stowaway and Other Stories for Boys* (Little, Brown); *The Girl of Tiptop and Other Stories* (Little, Brown); and *Pleasant Pathways, Winding Roads, Far Away Hills, Heights and Highways*, a series of four school readers published by Macmillan. She now has in the process of publication *A Little Book of Necessary Ballads* (Harper).

Her work at the present time is that of consulting children's librarian. She assists libraries who have no children's librarian in the further development of children's work, chiefly in an advisory capacity regarding suitable children's books.

THE DRAGON'S STRENGTH

From "Fillmore Folk Tales," a selection of stories from "The Mighty Mikado" and "The Laughing Prince," published by Harcourt, Brace

Through the Looking Glass

*A Monthly Review of Children's Books
and Reading*

By Helen Martin

Library Work With Children, Western Reserve University School of Library Science.

BIOGRAPHY during the last few years has suddenly captivated the adult public, but the child from time immemorial has been a hero worshipper. This year for his pleasure four biographies have appeared, which, taken together, epitomize the American "stream of history."

The colonists had just been galvanized into action by the famous words of Patrick Henry, when there stepped forth a young surveyor, George Rogers Clark, who added vast regions to the country but whose patriotic service was unrecognized by the mistress of his dreams—the nation. Lowell Thomas, in *The Hero of Vincennes*, has produced a tale as absorbing as fiction, which will stimulate greatly on the part of the twelve-year-old further browsing in the biographical field. Against a background of forest trails, moccasined Indians, brilliant red British uniforms and dark robes of the French fathers stands the figure of Clark, leading by sheer force of will his men, ragged and hungry, in that military coup d'état—the capture of Vincennes. The author has increased the reality of the narrative by a judicious selection of extracts from journals, letters and documents and with a fair-minded chapter on the vanishing race, the Indian.

From Clark's uncharted wilderness, later known as Kentucky and Tennessee, came the seventh President of the United States. With her usual excellent grasp of things historical, Helen Nicolay has added another fine portrait in *Andrew Jackson, the Fighting President*. Many difficulties, both personal and political, arise when presenting such a stormy character as "Old Hickory's" for children, but these have been handled adroitly without distortion of facts and without sensationalism. The description of his tragic childhood and youth explains with artistic subtlety the reasons for Jackson's impetuous actions. To his ability the author pays this tribute: "He had a great heart, great energy, great power of wrath and scorn, all of which he gave unstintingly to the service of the country he loved."

Interesting Personalities

"Praise we therefore famous men,"

And, let who'd succeed them,

Know they'll, too, be famous when

A little child shall read them.

—Wolfe—Cursory Rhymes.

Twenty years after the death of Jackson, in the midst of the harrowing days of the Civil War, Henry Ford, whose mechanical ability was to change the color of the American scene, was born. Simonds, in the book *Henry Ford, Motor Genius*, has accomplished a difficult thing, the portrayal of an interesting character, around whom is woven the evolution of the automobile industry. Like a tale of romance reads the rise of Ford, who in spite of almost insurmountable difficulties fulfilled his boyhood dream by proving the practicability of "horseless carriages." The biography, written in a popular style, simple enough for the mechanically minded fifth-grader, concludes with a description of a trip through the Ford factory and an exposition of the famous engine. The many halftones are supplemented by a large number of photographs of the factory and famous trade school. Even if at times the text seems somewhat overloaded with figures and dollar signs, still these help materially in visualizing the immensity of the schemes of this industrial wizard.

The new land of democracy in the twentieth century and the old land of tradition are skillfully fused by Mirza in his autobiography, *Myself When Young*, written with a simplicity and charm reminiscent of the Oriental epics. The book might be classed as travel, for there is much of the magic country of Persia, the customs, people and neighbors, the Kurds. In reality, however, these serve merely as a background for the story of an alert, sensitive village lad, who finally leaves the home of his fathers and travels to the land of opportunity, the New World. Sketched with him are his family, the patriarchal grandfather, the gentle mother, the understanding father; and finally, the friends of the strange, adopted country. Like designs in rare old Persian rugs are the simple illustrations of the artist, Nadejen.

Cuts, at top of page, of the "White Knight sliding down the poker" are taken by permission from the Tenniel edition of *Through the Looking Glass* published by Macmillan Co.

For Bibliography of books reviewed see p. 176.

Suggested Code of Library Ethics

THE LIBRARY as an institution exists for the benefit of a given constituency. This may be the nation, a state, a county, a municipality, a school or college, a special field of research, industry or commerce, or some more limited group.

Libraries differ so widely in size, type of constituents, support and character of work that a code of ethics would have to be excessively detailed to apply to all situations, but certain fundamental principles may be laid down that are generally applicable.

The library's obligations relate to such collection, organization and administration of printed material or other records as will give the best possible service to its constituents. The human factors in this service are: The trustees or other governing body or agency; the librarian; the staff; the people whom the library serves.

A. GOVERNING BODIES.

These may be the Board of Trustees or city officials (on whom the responsibility rests) of public or semi-public libraries; the library board or committee of college or university trustees or faculty; Board of Education or a committee thereof for school libraries or for public libraries organized under school law; officer or committee or department of a business corporation.

1. *Functions:*

The functions of a governing body are usually prescribed by law but generally include:

The representation of the constituency for which the library exists.

The determination of the policies of the library in its service and relation to its constituency.

The exercise or delegation of the appointing and removing power.

The administration (sometimes the raising) of the funds for the support of the library.

Responsibility for the economic, social and physical well-being of the staff, including a retirement system which is needed for the good of the service as well as of the individual.

Trustees of tax-supported public libraries, remembering that they are representatives of the whole community, should be careful not to ask special privileges for themselves or their families. The Board

of Trustees should recognize that the librarian, as its executive, should attend the meetings of the board in order to be fully informed as to its desires and purposes and to aid in the formulation of its policies.

2. *Appointments:*

The appointing power in any institution should be definitely vested in some one board, committee or person. The appointee should not consider an appointment as final unless made by the agency or person in whom that authority is lodged.

Appointments should be made for fitness only; no merely personal consideration should enter into the selection of the personnel of any library; conversely, no librarian should accept an appointment however attractive unless he believes that he has the ability, the training and the experience needed for ultimate success in that position, and no one should continue to hold a position unless he finds himself qualified to meet all its requirements.

3. *Tenure:*

Having accepted a position in a library, the appointee incurs certain definite obligations—

To remain long enough to repay the library for the expenditure of time and money incident to the period of adjustment. This length of time differs in different positions, but is seldom less than a year.

To remain long enough to accomplish definite results in work undertaken.

Unless a larger opportunity offers, it is best to remain in a position as long as one is able to do creative or effective work, or to get satisfaction from the work; otherwise it is probable that one's usefulness in that position is at an end.

4. *Resignations:*

Resignations should be made in writing to the authority from which the appointment came with due notification to the immediate supervisor. Adequate time should be given before the resignation takes effect for the work to be put into shape; for the appointment and, when practicable, the initiation of a successor.

5. *Recommendations:*

Trustees and librarians are sometimes dependent for information about candidates on recommendation from trustees, librarians, library schools, and other employment agencies. Recommendations should present a fair statement of the strong and weak points of the candidate.

— Presented at the first council session at A. L. A. Midwinter meeting by Josephine A. Rathbone, chairman of committee which prepared the code.

B. LIBRARIAN (or chief administrative officer).

The librarian is the executive officer for the governing body of the library. The position of librarian involves a threefold relation:

1. To the trustees or governing body.
2. To the constituents of the library.
3. To the staff.

1. In Relation to the Board of Trustees, the Librarian:

Should make a loyal effort to carry out its policies.

Should make regular and systematic reports upon the work accomplished.

Should initiate plans for improvement of the service of the library.

Should act as liaison officer between the trustees and staff, interpreting each to the other and establishing, where possible, friendly relations between them.

2. Librarian and Constituency:

The librarian represents the library—book power and book service—and should so represent it as to win recognition for the institution rather than credit for the individual.

The librarian has a further obligation to the community or constituency which the library serves and should, as representative of the library (with due respect to other duties), take part in the life and activities of the community or constituency.

As representative of the library, the librarian and the staff should feel an obligation to maintain in personal conduct the dignity of the position and take care not to offend against the standards of decorum that prevail in that community or constituency.

The librarian, representing the governing body, should see that the library serves impartially all individuals, groups and elements that make up its constituency. In the case of the public library as a non-partisan institution, the books purchased should represent all phases of opinion and interest rather than the personal tastes of librarian or board members. In an official capacity, the librarian and members of the staff should not express personal opinions on controversial questions, as political, religious, or economic issues, especially those of a local nature.

3. Librarian and Staff:

The relations of the librarian to the staff within the library should be impersonal and absolutely impartial. The librarian owes to the members of the staff:

Stimulus to growth, to the exercise of the creative impulse, to the development of initiative and of a professional spirit.

Constructive criticism.

Freedom to achieve results and credit for such achievement.

Respect for the authority delegated to the staff.

Friendlyness of attitude.

Justice in decision.

Opportunity for professional and economic advancement within that institution or some other.

An interpretation of the policy and aims of the institution and of their relation, responsibility and loyalty to it.

Encouragement of reasonable suggestions and criticisms for the improvement of the service.

C. THE STAFF.**1. Loyalty:**

Loyalty to the institution is the primary duty of all members of the staff.

Loyalty involves, in part, submergence of the individual to the institution. Such manifestations of egoism as criticism of the library or librarian outside, or the claiming of individual credit for work done as a staff member when credit should belong to the institution, are examples of disloyalty. Constructive criticism offered to the proper authority should not be considered disloyalty and should be encouraged.

Good health is a prerequisite of good service and involves the right use of free time, so that a proper balance is maintained between work, recreation and rest.

The atmosphere of the library is disturbed unless the workers preserve harmony and a spirit of cooperation among themselves; hence the staff relations, while impersonal within the building, should be friendly. Envy, jealousy, or gossip should have no place in a library staff. The staff should refrain from discussion of personal affairs in the library or from attention to personal business in library time.

2. Relations to the Public:

The members of the staff are the interpreters of the library to the public, and its service may be materially helped or harmed by their individual contacts.

The staff owes impartial, courteous service to all persons using the library. Among the patrons entitled to use the library, no distinctions of race, color, creed or condition should influence the attitude of the staff, and no favoritism should be tolerated. On the other hand, a cold officialism is to be avoided and a cordial attitude which welcomes approach should be manifested by those in direct contact with the public.

3. Department Heads:

Heads of departments should consider their departments in relation to the institution as a whole and never magnify unduly

the importance of their own part.

Understanding and cooperation between departments is essential to the efficiency of the library's service to the community.

The heads of departments bear much the same relation to those under them that the librarian does to the library staff as a whole, and have on a smaller scale the same duties and responsibilities.

4. *Assistants:*

Assistants are an integral part of the institution as a whole, and their suggestions for the improvement of the service should be encouraged. These suggestions should be made to the immediate superior. If differences of opinion concerning the work arise between assistants in a department, the matter in question should be taken to the head of the department for adjustment. If an assistant is critical of the policy of the department, or feels that she has been unfairly dealt with, she should first discuss the matter with the head. If unable to obtain satisfaction, she may then appeal to the next higher authority. Constructive criticism or correction by responsible heads is necessary to the efficiency of any service and should be accepted by assistants without personal resentment.

The advancement of assistants should

come as the result of the recommendation of heads of departments or of the librarian. Assistants should never use outside relationships to obtain a position or promotion.

The relation of staff members to the non-professional group of workers, as janitors and pages, should be strictly impersonal. Personal favors should never be asked. Their work should be directed by those assigned to the duty, and never interfered with by other staff members.

D. LIBRARY PROFESSION.

All libraries and all librarians have a duty not only to their constituents but to the profession as a whole, or to some division of it, because cooperation between libraries and librarians makes for better service to the constituents of every library. This duty involves membership and activity in one or more professional organizations, subscription to and the reading of professional literature, interchange of ideas and, as far as possible, of material.

While these principles may not cover every case that may arise, we believe that if applied intelligently they would make for harmony in staff relations and for the general good of the service.

Report of New Jersey Library Commission

THE REPORT of the New Jersey Public Library Commission shows that New Jersey now has ten county libraries: Burlington, Morris, Camden, Monmouth, Cape May, Ocean, Atlantic, Hunterdon, Mercer and Somerset counties. These county libraries circulated through their stations last year an aggregate of 2,500,000 books. It is the policy of the New Jersey Public Library Commission to establish one county library a year, as the State has only twenty-one counties, and Hudson County is entirely urban and therefore does not need a county library. This will enable them to finish this work in ten years and to give each county State aid, which makes good service possible. In addition to establishing a new county library in Somerset County this past year, new municipal libraries were established in Haworth, Roselle Park, Metuchen and Piscataway Township. Association libraries have been established in sixteen communities. These association libraries will in time become municipal libraries. High school library work has progressed to the extent that 156 high schools now have libraries with libra-

rians giving at least the minimum time required in Certain's specifications. Of these librarians, 78 have a minimum of 210 hours of library training in addition to a college degree and 52 are full-time librarians. The Commission itself has sent out 234,320 books. During the last ten years the amount appropriated for libraries in the State of New Jersey has tripled and the circulation of books has increased by over 5,000,000. The graded summer school, for which certificate is given, has been accredited by the American Library Association, and thereby placed upon a permanent footing. Since the beginning of Summer School courses in New Jersey there has been an attendance of 1098 pupils, and four-fifths of the small libraries in the State have librarians trained in this school.

Bain Memorial Tablet

THERE WILL BE a memorial tablet in the Reference Building of the Toronto Public Library to the memory of Dr. James Bain, who was the first Chief Librarian of Toronto, 1883-1908, and whose special interest was the Reference Division.

List of New Books

As An Aid To Book Selection In Hospital Libraries

Compiled by The Library Section, Medical Service, U. S. Veterans' Bureau
May-November, 1929

Aldrich, Darragh. *Peter Good for Nothing*. Macmillan. \$2.

A story of the Minnesota logging camps with enough complications and healthy, outdoor atmosphere to offset the insipidity of its romance.

Andrews, R. C. *Ends of the Earth*. Putnam. \$4.50.

The hazards of hunting whales and heading expeditions to little-known lands told informally with all the joy and enthusiasm experienced by the author in carrying out assignments of the American Museum of Natural History.

Babson, R. W. *Storing up Triple Reserves*. Macmillan. \$2.

The three sections of the book deal with problems that all men must face—how to store up reserves of money, health, and spiritual power. (Book Review Digest.)

Bartlett, Lanier and V. S. *Adios*. Morrow. \$2.50.

The scion of an old Spanish family in California attempts to avenge the wrongs perpetrated by "gringos" after the Mexican War. Good love story and stirring adventure.

Biggers, E. D. *Black Camel*. Bobbs. \$2.

A mystery story of Honolulu and the motion-picture world. The numerous baffling clues are adroitly handled by Charlie Chan, the bland Chinese detective.

Brown, R. W. *Lonely Americans*. Coward-McCann. \$3.50.

Studies of eight uniquely distinguished Americans, necessarily isolated by their rare quality: Whistler, C. W. Eliot, Edward MacDowell, George Bellows, C. E. Norton, Raphael Pumpelly, Emily Dickinson, Abraham Lincoln. Hospital readers of a more thoughtful turn may find a comforting parallel to their own enforced isolation in these notable lives.

Burnham, J. B. *Rim of Mystery*. Putnam. \$3.50.

An engaging travel narrative of strange places, people, and conditions encountered on a search for mountain sheep in Siberian Asia. The author sums up the lure of such adventure with the words: "You who love new country will understand; life is too short to explain to the others." Although approved for all hospitals, it is advisable for librarians to read the book before circulating it, particularly to neuropsychiatric patients.

Cantor, Eddie. *My Life Is in Your Hands*. Harper. \$3.

A popular comedian's autobiography, written with artless unreserve and light-hearted humor. Its glimpses behind the theatrical scenes and of stage and other celebrities of the day will entertain.

Chase, Stuart. *Men and Machines*. Macmillan. \$2.50.

A unique study of machines and their influence on human life in the past, present and future. Written in the entertaining non-technical manner which made "Your Money's Worth," by this author, a popular seller, the book will appeal to men with business experience.

Christie, Agatha. *Seven Dials Mystery*. Dodd. \$2.

A highly mystifying detective story whose fatalities are dispatched with a lack of somberness adapted to sick readers.

Cuppy, W. J. *How to Be a Hermit; or, A Bachelor Keeps House*. Liveright. \$2.50.

From his retreat on Jones's Island, off the South Shore (Long Island), the genial book reviewer uses himself for copy and affords the reader a good laugh over the tribulations of hermit life.

De La Roche, Mazo. *Whiteoaks of Jalna*. Little. \$2.50.

To the world the Whiteoaks presented a forceful, united front, but within the walls of Jalna one finds ever-shifting groups in conflict, with the excessive individuality which characterizes the family, clearly revealed. An absorbing book; a worthy sequel to "Jalna."

Eddy, Clyde. *Down the World's Most Dangerous River*. Stokes. \$2.50.

All men with a thirst for adventure will get vicarious thrills by following this party of twelve men, a bear and a dog, in running the three hundred dangerous rapids of the Colorado.

Fogg, Walter. *One Thousand Sayings of History*. Beacon Press. \$5.

Ampler than the usual quotation books in that it gives the setting of time and circumstance for each saying. Well indexed and of interest to the general reader as well as for reference.

Fuller, R. T. *Walk, Look, and Listen! Signposts on a Naturalist's Highways*. Day. \$2.50.

Brief chapters giving useful and interesting data on outdoor life.

Gould, Bruce. *Sky Larking*. Liveright. \$2.50.

Envisages the exhilaration and ecstasy of flight as well as giving considerable technical and historical information on aviation. Good bibliography of popular books on flying.

Gregory, Jackson. *Mystery at Spanish Hacienda*. Dodd. \$2.

A mysterious stranger who travels in a house on wheels, falls in love with the daughter of a haughty Spanish don. A murder, and a man hunt, combine to make a thrilling tale sure to appeal to western story fans.

Grey, Zane. *Fighting Caravans*. Harper. \$2.

A novel of settlers trekking into the Old Southwest. Kit Carson lives again and Indian skirmishes are vividly pictured.

Hopper, J. M. *Medals of Honor*. Day. \$3.

Quoting from the book-jacket "True stories of eleven men who won the congressional medal of honor in the World War, and of the fighting moments in which they made glory." The entire list of those who were honored in this way, ninety in all, is given in the foreword, together with their birthplace, organization, and present place of residence.

King, Basil. *Seven Torches of Character*. Doubleday, Doran. \$2.

Energizing discussion of the fundamentals of effective living. Recommended for all types of hospitals.

Lardner, R. W. *Round-up*. Scribner. \$2.50.

More than 30 of the author's short stories, many of them new. An excellent collection, pithy, with elements of pathos as well as of humor, and the stories not too long to hold the interest of the most nervous patient. (Veterans' Hospital, Northport, L. I. Library report, March, 1929.)

Lincoln, J. C. and Freeman. *Blair's Attic*. Coward-McCann. \$2.

Father and son have collaborated in this mystery story, set against the Cape Cod background Joseph Lincoln's readers have learned to love. A good hospital book.

Lovelace, M. H. *Early Candlelight*. Day. \$2.50.

Frontier life in Minnesota and the early days of Ft. Snelling.

Lowell, Joan. *Cradle of the Deep*. Simon & Schuster. \$2.75.

That these are the actual experiences of a girl whose first 17 years were spent aboard her father's copra-trading schooner in the South Seas has been disputed, but the book is diverting as fiction if incredible as fact.

Lynde, Francis. *Young Blood*. Scribner. \$2.

Railroad adventure in the West in which youthful confidence and integrity, combined with the motivating power of love, overcome apparently insurmountable "big business" obstacles.

MacArthur, Charles. *War Bugs*. Doubleday, Doran. \$2.

A war story of such authentic doughboy humor that it will start reminiscent chuckles among veterans. Author was a private in the Rainbow Division.

Matthews, E. C. *How to Draw Funny Pictures*. Drake. \$3.

A progressive course in cartooning for the untrained art aspirant, touching on mediums, branches of cartooning, marketing of work, etc. Of possible hospital use in offering a hobby and in arousing dormant abilities.

Morison, S. E. *Hour of American History*. Lippincott. \$1.

A bird's-eye view of our history from "Columbus to Coolidge." Some other subjects covered by this "one hour" series, which holds out inducements to readers who would be taxed by

longer works, are: American poetry, American motion pictures and American music.

Morris, W. F. "G. B." Dodd. \$2.50.

A British officer collapses, and upon regaining consciousness believes himself to be a high-ranking German officer reported missing, a man whom he resembles and had known intimately before the war. The complications and dangers that result from this case of dual personality form a most thrilling and original war story.

Mowery, W. B. *Silver Hawk*. Doubleday, Doran. \$2.

A member of the Royal Canadian Air Force assists an attractive girl to elude her pursuers. Good adventure, with occasional melodramatic features. Action takes place in the Canadian Rockies.

Norris, Kathleen. *Red Silence*. Doubleday, Doran. \$2.

A wounded veteran is one of the principal characters in this light romance, which will interest women patients more than men.

Oemler, M. C. *Johnny Reb*. Century. \$2.50

Everyday doings in a small Carolina town in the nineties, with a Confederate veteran as the chief character. The local dialect is excellent and humorous. Women patients will like the story, but men may consider it somewhat lacking in action.

Oppenheim, E. P. *Glenlitten Murder*. Little. \$2.

Mystery concerning the murder of a guest in Lady Glenlitten's bedroom, involving the theft of a famous diamond necklace, Russian refugees, and blackmail. Good plot, not too complicated.

Perkins, Kenneth. *Gold*. Stokes. \$2.

First-class adventure aboard a whaler in the days of '49. The mutinous crew, dazzled by the lure of gold, imprison the captain and his daughter, and head for San Francisco, where the excitement continues unabated.

Pertwee, Roland. *Hell's Loose*. Houghton. \$2.

A formula found on a dead aviator, providing a substitute for gasoline, starts activities not inaptly described by the title. Rapid plot and romance kept within bounds.

Phillips, J. C. *Sportsman's Scrapbook*. Houghton. \$5.

Huntsmen and lovers of the outdoors will enjoy this record of exploits, ranging from the east to the west coast. Good print and splendid illustrations. (Adapted from library report, Veterans' Hospital, Rutland Heights, Mass., March, 1929.)

Propper, Milton. *Strange Disappearance of Mary Young*. Harper. \$2.

An American mystery that fulfills some major canons of detective fiction; unhackneyed and unlagging plot, convincing, plays fair with the reader and does not stress the gruesome.

Queen, Ellery, pseud. *Roman Hat Mystery*. Stokes. \$2.

Who took the hat belonging to the man murdered in the Roman Theatre, and how and why did it disappear? The solution will surprise even ardent mystery fans, and is reached by means of clever deduction on the part of two detectives, father and son. Above the average.

Ripley, Clements. *Dust and Sun*. Payson & Clarke. \$2.

Two young Americans and a girl unwittingly get drawn into the thick of a revolution in a republic south of the Rio Grande. Plenty of action, danger galore, and a good dash of romance combine to make this an excellent book of adventure.

Rogers, Will. *Ether and Me, or Just Relax*. Putnam. \$1.

In similar vein to Irvin Cobb's "Speaking of Operations." A diverting addition to the small book collection.

Rosman, A. G. *Visitors to Hugo*. Minton. \$2.

A refreshing story of the contacts achieved by a young man, bedridden and guarded by a devoted family from the shocks of normal existence. Holds an indirect plea for an improved attitude toward invalids. Readers sensitive to atmosphere will enjoy.

Sabatini, Rafael. *Romantic Prince*. Houghton. \$2.50.

Charles the Bold and Louis XI are the prominent figures in this romance of the future Duke of Guelders and the beautiful daughter of a Flemish merchant.

Smith, A. D. H. *Drums of the North*. Macaulay. 75c.

Tale of the North with some good descriptions of the region and of Indian customs. Plenty of excitement. Good print. Will be liked by men. (Veterans' Hospital, Legion, Tex. Library report, April, 1929.)

Venable, Clarke. *All the Brave Rifles*. Reilly & Lee. \$2.

The beginnings of Texas and its achievement of independence from Mexico, woven into an engaging historical romance.

Train, Arthur. *Illusion*. Scribner. \$2.50.

A picturesque novel in which society, vaudeville, and the circus glitter before the reader and leave to his decision which is the more real or illusory.

Vestal, Stanley. *'Dobe Walls; a Story of Kit Carson's Southwest*. Houghton. \$2.50.

Lively account of stirring times in pioneer days at Bent's Old Fort on the Santa Fe trail. To quote the review in "Books": "Upstanding pioneers, Pawnees, Cheyennes, Arapahoes, sweethearts and soldiers mingle here in a tale that's vastly more exciting than an armful of most open-space yarns."

Wallace, Edgar. *Nothing Tramp*. Doubleday, Doran. \$2.

A light and humorous story with many improbable situations. The adventures begin right after a girl has married a hobo and the husband is dogged by sleuths.

Williams, J. L. *They Still Fall in Love*. Scribner. \$2.50.

Proving of the younger generation the thesis of the title, in a story of farcical situation and witty dialogue.

Willoughby, Barrett. *Trail Eater*. Putnam. \$2.

Story of winter adventure in Nome, Alaska, the plot centering around a closely contested dog race for the annual sweepstakes. Realistic setting, canine sport feature and a not too obtrusive romance should commend to men readers. Offers refrigerated reading for hot weather, too.

Wodehouse, P. G. *Fish Preferred*. Doubleday, Doran. \$2.

The favor of the head of the family, upon whom depends the bliss of two young couples, is sought through the theft and recovery of his prize pig. Published serially under the title, "Summer Lightning."

Censorship Again!

THE Massachusetts State Library Commission has recently written the following letter to their senators and representatives regarding the censorship section of the tariff bill:

The Board of Free Public Library Commissioners for Massachusetts agrees with the American Library Association in firmly opposing the language of Section 305 of the H. R. 2667 for the reason that it will take from the courts the right to decide whether books are seditious or obscene and place it in the hands of customs officials who are not appointed for such a delicate and important purpose, but primarily to levy customs duties on imported articles. We do not know whether this act violates the constitutional jurisdiction of the courts, but we do know that it is placing the authority for decisions of far-reaching import in the hands of officials who are appointed for an entirely different purpose. The board hopes that you will use your influence to oppose this section as printed.

Respectfully yours,
CHARLES F. D. BELDEN,

Chairman, Board of Free Public Library Commissioners.

Demand for Catalogers Discussed

THE WINTER meeting of the Chicago Regional Group of Catalogers and Classifiers was held Jan. 20, 1930, at the Cordon Club. Forty members and guests were present for the dinner and program. After the preliminary business of the group was concluded, Miss Hazel Timmerman, assistant, Board of Education for Librarianship, A. L. A., spoke on "Why Be a Cataloger?" She told of the importance of the cataloger to the library, the growing demand for competent catalogers, and the necessity of a knowledge of at least three foreign languages, the cataloger's minimum educational requirements. In conclusion, she spoke of the possible development of the future of catalogers trained along special lines, such as the cataloger of children's books and the school cataloger. Her talk was followed by an hour's informal discussion of cataloging methods and problems.

School Library News

Schools and Libraries Cooperate

IT HAS been demonstrated in Massachusetts that when public libraries and schools work together in cultivating good reading habits among children better results are obtained than is possible without cooperation. The *Rural News-Letter* for January, distributed by the U. S. Department of the Interior, reports that a recent survey in Massachusetts shows that children living in towns in which schools and libraries cooperate read better books and fewer pernicious magazines than children living in other towns. The purpose of the survey, which was made by the Advisory Council on Crime Prevention, was to show ways in which 14,000 children living in 40 cities and towns spend their leisure time. The results relative to the questions on reading are given in one of the late autumn reports of the division of public libraries of the State Department of Education.

Child Health Booklist

THE SCHOOL Department of the Public Library of Newark, N. J., has recently compiled for the Child Hygiene Bureau of the State Board of Health a 20-page book list entitled "Child Health Care and Guidance." The list, which is annotated, falls in two sections. The first appeals to the reader whose interest is general, and the books are listed under such subjects as Care and Feeding, Mental Health, and Sex Education; the second is addressed to definite groups, such as parents, teachers, nurses, social workers and children themselves. Application for the pamphlet should be made direct to the State Board at Trenton. Copies will be sent on request as long as the limited supply allows.

Radio in Education

THE PAYNE FUND has published a booklet, "Radio in Education," to provide information for those who wish to use radio in education and who feel the need of facts on which to base investigation and activity. Copies of the Report will be sent on request to educators, libraries, Parent-Teacher Associations and others participating in educational work. Requests should be addressed to the Payne Fund, 1 Madison Avenue, New York, and should be accompanied by 15c. in stamps to cover postage.

A Reorganized Course in Library Usage

A COURSE in Library Usage is given by the librarian of the California State Teachers' College, Chico, as one unit of a four-unit course in required Freshman English. The course includes exercises in use of the library tools; guidance in periodical reading; lectures on bibliography, language and shibboleths of criticism, correlation of the arts, contemporary literature, county library service to schools and special topics of assistance to the teacher-custodian. Scripture and Greer's *Find It Yourself!* published by H. W. Wilson Co., is used for the individual exercises in the course.

School Bulletin

THE second number of the *Bulletin*, official publication of the California School Library Association, Northern Section, was issued in December. It is prepared by the Publicity Committee of the Association, and endeavors to give news and service to those actively engaged in school library work, as well as information to others who are interested in this rapidly growing profession.

Library Day in Berkeley

THE SEVENTH annual Library Day was observed in the Garfield Junior High School, Berkeley, Cal., on Oct. 18, 1929. Following the custom of many years, pupils and teachers of the school impersonated, for the day, book characters from history or fiction. A parade was led by the school band with more than 1000 characters in line. Among the most attractive representations were Ten Girls from Dickens, Three Musketeers, American Holidays, Peter Pan, Arabian Nights, Guinevere, Treasure Island, Jacqueline of the Carrier Pigeons, and the Trumpeter of Krakow. Programs in keeping with the day were held in the auditorium and class rooms, a puppet show written and conducted by a show seventh class being one of the features.

Free

A SIXTEEN-PAGE brochure on "The Life and Works of William James" will be supplied to libraries and individuals free of charge, upon request by the Publicity Department, Longmans, Green & Co., publishers, 55 Fifth Avenue, New York City.

Book Reviews

THE HIGH SCHOOL SCIENCE LIBRARY, 1928-1929; a reprint from the *Peabody Journal of Education*. Reviewed by Gilbert O. Ward, Technical Librarian Cleveland Public Library.

IN "The High School Science Library for 1928-1929" by Hanor A. Webb, we have a reprint from the *Peabody Journal of Education* for July, 1929. Here is a classified, priced, and annotated list of about 275 titles, with recommendations for budgets ranging from \$10 to over \$250. The editor assures us that the books have been carefully examined, that they are now in daily use by high school pupils, and that they are heartily recommended to inquiring high school librarians.

With this assurance, it is pleasant to glance through the list and recognize such excellent works as Andrade's *Engines*, Barton and Barton's *Guide to the Constellations*, Anthony's *Field Book of North American Mammals* and Hornaday's *Wild Animal Interviews*. One welcomes Tuttle's *Book of Rural Life* even if its connection with science is not quite clear.

It is less pleasant to note the inclusion of many merely average or definitely mediocre juvenile works of which the scientific usefulness is problematic or non-existent, notably in the sections on Exploration and Travel, and Animal Life. One regrets Chelsea Fraser's *Story of Engineering in America*, devastatingly criticized for its many errors by the *Engineering News-Record*.

A certain number of textbooks is probably justified, but the list gives the impression of being overweighted with them.

One thing which makes it hard either to prepare or to criticize a high school list is the fact that high school pupils inspired by an enthusiastic teacher will often attack successfully books which are advanced or rather highly specialized. Yet one may question the inclusion of the bi-centenary volume on Sir Isaac Newton, and Hoffman and Scipio's *Elements of Machine Design*, which latter, the note informs us, "boys who like machinery will like—except some of the mathematics." Other titles which seem out of place in the high school library are *Apollonius, or the Present and Future of Psychical Research* in the Today and Tomorrow series, and Watson's *Ways of Behaviorism*. Wildon Carr's *Unique Status of Man* is philosophy rather than science and stiff reading at that for most people.

It is difficult to catch every title which should go in a list like this and unfair to criticize a few omissions too severely. Yet one notices

the absence of several desirable books, such as Burns' *Radio* and Chant's *Our Wonderful Universe*. If books on engineering are to be included, Starrett's *Sky-scrappers and the Men Who Build Them* ought to be mentioned.

The editor's classification of his titles seems odd in places. For instance, Romig's *Automobile Cleaning and Repairing* is put under Exploration and Travel. Arthur's *Estimating Building Costs* is classed under Home and Community.

The two books just mentioned together with others like Hutton's *Joint Wiping and Lead Work* and Stoddard's *Steel Square Pocket Book* seem more appropriate to a list for a vocational or trade school. They illustrate again the editor's propensity for straying off his reservation.

The choice of books for smaller budgets will be questioned by experienced high school librarians. For a library with a budget of ten dollars for all purchases are recommended (with a few other titles), three American Library Association Reading Lists in cloth editions at fifty cents; *Popular Mechanics Shop Notes for 1929*; *The Young Collector* by McMillan; McGowan's *Soap Bubbles*; the *Boy Scout Handbook* and Johnson's *Star People*. Allowing for legitimate variations in personal judgment and in the necessities of different schools, it is hard to believe that these recommendations could not be much improved.

The notes too frequently fail to give the full and precise information which a high school librarian or teacher-librarian needs to know in order to purchase intelligently. Occasionally a note is entirely misleading. Thus, Wright's *Inventions and Patents* is not "stories of fortune makers," and though the note implies it, is not written for youngsters. Titles which are decidedly juvenile—perhaps too juvenile for high school—are not so indicated. For instance, there is nothing to show that Johnson's *Star People* is for the third and fourth grades.

It is no pleasure to dwell on what the reviewer feels to be fundamental flaws in a piece of work which is really needed and which has been undertaken with such excellent motives. Yet it is only fair to the high school with a ten-dollar or twenty-five dollar or larger book budget, as well as to the editor, to point out that the titles are extremely uneven in quality, frequently inappropriate in subject or treatment, sometimes ill-classified, and very, very inadequately annotated. The chief, perhaps the only value of the list is for suggesting titles to be looked up and checked in more critical sources of information.

Current Library Literature

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in Cannons' "Bibliography of Library Economy," to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

ALPHABETIC ARRANGEMENT

Sustrac, Charles. Observations sur le classement des cartes d'auteurs et d'anonymes. *Revue des Bibliothèques*. 39:155-162. 1929.

Alphabeting of homonyms, anonyms, and works by the same author.

BOOK SELECTION

Ormerod, James. Book selection. *Lib. World*. 32:155-157. 1930.

Successful book selection implies scholarship and acquaintance with the best bibliographical tools. Fiction should be limited to one-third of the stock.

Tobitt, Edith. Book selection for public libraries. *S. D. Lib. Bull.* 15:65-71. 1929.

Includes list of inexpensive aids for use in book selection.

See also SUBSCRIPTION BOOKS.

BOOK SHELVES. See SHELVING.

BOOK WAGON DELIVERY

Campbell, D. K. The roadside library. map. *LIB. JOUR.* 55:106-108. 1930.

Brief prepared for Haverhill, Mass., Library Board regarding subject of suburban book service.

Fangmeyer, Elizabeth. Book wagons on country roads. illus. *LIB. JOUR.* 55:99-102. 1930.

Interesting experiences of the librarian in charge of the book truck of the Public Library of Cincinnati and Hamilton County, Ohio.

Holden, Edna. The cost of book truck service—is it worth while? illus. *LIB. JOUR.* 55:102-105. 1930. Portland, Ore.; Greenville, S. C.; Hibbing, Minn.; the Iowa State Library Association and several Indiana libraries agree that it is.

Rice, P. N. The Dayton (Ohio) Public Library book wagon. illus. *LIB. JOUR.* 55:95-98. 1930.

Service started Oct. 1923. Present Book Truck is a ton and a half Reo truck costing \$1,904, capable of carrying 1200 books. Circulation in 1929 was 105,544 volumes.

BOOKS AND READING

Guppy, Henry. The art of reading. *More Books*. 4:409-420. 1929.

"The best literature for everybody is that which they can best assimilate. No intellectual stomach will digest everything. It is better to read twenty books twice than to have read the so-called hundred best books once." This address is reprinted from the *Bulletin* of the John Rylands Library, v. 13, no. 1, Jan. 1929.

BUSINESS LIBRARIES. See HARTFORD (CONN.) PUBLIC LIBRARY. BUSINESS BRANCH; NEWARK (N. J.) PUBLIC LIBRARY; SPECIAL LIBRARIES.

CATALOGING

Toward union cataloging. 1. Social Sciences, by B. M. Headicar, librarian, London School of Economics and Political Science. 2. In Science, (i) The Information Service of the Science Library, by Dr. S. C. Bradford, Deputy Keeper; (ii) The World List of Scientific Periodicals, by W. A. Smith, of the British Museum, ed. of the List. 3. In London

and in the University Libraries, by Luxmoore Newcombe, librarian, the Central Library for Students. 4. In Wales, by John Ballinger, librarian, the National Library of Wales. 5. In Cornwall, by Miss W. M. Grayton, County Librarian. *Lib. Assn. Record. Supplement*. n.s. 7:20-50. 1929.

1. The Library of the London School has in preparation a four-volume catalog to be published in the middle of this year. 2. (i) The Science Library has a union catalog of 1,300,000 cards covering all branches of pure and applied science. (ii) This article has what is considered a complete conspectus of union lists published to that time. 3. Under a grant of £3,600 from the Carnegie Trustees a union catalog with entries for some half-million books will be made and installed at the Central Library. 4. A Union catalog for the million volumes in Wales and Monmouthshire is in preparation, to be housed at the National Library at Aberystwyth, which has about half the volumes to be listed. 5. The County Library is cooperating with the seven borough libraries. A simple card index to the books in all of these is kept at the County Library.

CLASSIFICATION SCHEMES

Richardson, E. C. *Princeton University Library Classification System, 1900-1920*. Printed as manuscript, uncorrected proof edition. Yardley, Pa., F. S. Cook & Son, Inc., 1929. xiii. 229p. (Montague publications).

COUNTY LIBRARIES

Felton, R. A., and Marjorie Beal. *The Library of the Open Road*. Ithaca, N. Y.: New York State College of Agriculture, Cornell University, 1929. pap. illus. 50p. (Bull. 188, November, 1929.)

County library campaigns; situation in New York State; book truck; county librarian; State aid; State law; county library and rural schools, traveling libraries, etc. Numerous illustrations and maps.

Huff, A. L. The Tompkins County Library. illus. map. *LIB. JOUR.* 55:110-111. 1930.

The book truck was purchased partially through contributions of school children, and visits schools in this New York county.

Long, H. C. County libraries. *Wis. Lib. Bull.* 25:338-341. 1929.

Only 263 counties of a possible 3065 in the United States spend public funds for public library service. In Wisconsin 21 of 71 counties have some form of county library service.

Mitchell, J. M. The small town in relation to the county library system. *Lib. Assn. Record. Supplement*. n.s. 7:1-7. 1929.

Colonel Mitchell is secretary of the Carnegie United Kingdom Trust, but this address was made from the standpoint of a vice-president of the Association. Libraries in towns with populations of 20,000 and below should either cooperate with a larger unit or preferably sur-

render their powers and become a branch of the County Library, to insure the best library service.

Other papers in the Supplement include "Impressions of the County Library Movement as it Presents Itself to an Ex-County Librarian," by H. W. Acomb, and "County Library Work in a Residential County," by H. Wilson.

Number 5 of *Library Extension News*, published occasionally by the A. L. A. Committee on Library Extension, has a one-page bibliography of recent articles on county libraries. (4 mim. p., December, 1929.)

CRAWFORD LIBRARY

Balneil, David Lindsay, Lord. A private library. *Lib. Assn. Record*. n.s. 221-239. 1929.

The collection began to be systematically formed in the latter half of the 16th century. Theology is the keystone of the library. It is notable for its de Brys, books on languages and literature of the East (6000 manuscripts of which are in the John Rylands Library), the history and progress of typography, classical Greek writers, and early illustrated books. The catalog, probably the most extensive and ambitious catalog of a private collection ever produced in Great Britain, was issued in 1910 and extends to nearly 10,000 folio columns.

EDUCATION, ADULT

Willard, J. D. *A Preliminary Inquiry Into Rural Adult Education*. 60 East 42nd St., New York: American Assn. for Adult Education. pap. 27p. ("Bulletin.")

By the Field Representative of the Association. Commends library service of California and New Jersey.

LIBRARY CONFERENCES

International Congress of Librarians and Bibliophiles. Prague, 1926. *Procès-Verbaux et Mémoires Publiés par le Comité Exécutif du Congrès . . . avec le Concours du Ministère de l'Instruction Publique de la République Tchécoslovaque*. Prague, Imprimerie d'État, 1928-29. 2v.

CONTENTS.—I. Procès-verbaux Rédigé par Jaromír Malý.—II. Communications et mémoires, rédigé par Bohuslav Koutník.

LIBRARY FINANCE

Leland, S. E. The financing of library construction through bond issues. *LIB. JOUR.* 55:49-55. 1930.

"There is little excuse for resorting to bond issue if a library building can be constructed from current revenues or from the proceeds of tax levies." With table of 70 cities which have public library bond issues. The most common period of issue appears to be from ten to twenty years.

LIBRARY PUBLICITY

Hayner, C. I. Publicity in a high school library. *Mich. Lib. Bull.* 21:3-6. 1930.

Making the library known to the teachers, with suggestions for more informal publicity among students.

Morrill, M. H. Publicity. *Mich. Lib. Bull.* 21:6-7. 1930.

"Any organization hidden away behind a wall of silence and darkness may become distorted and unhealthy, neither representing nor serving its community. A library needs the sanitation of publicity."

LIBRARY REPORTS

Rosser, E. M. A readable library report. *A. L. A. Bull.* 24:8-9. 1930.

The Hoyt Library of Kingston, Pa., made its annual report in the form of a book mark at a cost of \$8.50 for 3,000.

LIBRARY SCHOOLS

Henriot, Gabriel. La formation professionnelle des bibliothécaires. *Revue des Bibliothèques.* 39:121-154. 1929.

Suggestions for various types of library schools, with reports on existing schools from several countries to which a questionnaire was addressed.

Williamson, C. C. Selection of library students. *Wilson Bull.* 4:203-206. 1930.

Adapted from the Report of the Director of the School of Library Service, Columbia University. "Inability to read modern languages is the most serious and most common defect at the present time, and this should be called to the attention of deans and vocational advisers of colleges throughout the country. . . . An applicant who has made only a naverage record in college and in some subjects has fallen below the average is not likely to do well in the library school or make a marked success in his professional work. . . . There is some reason to fear that the vocational advisers in certain institutions of high rank quite unconsciously pursue a policy of directing graduates of mediocre ability and attainments into library service. . . . The library school in one short academic year has all it can do to impart the minimum essentials of library training without attempting to form or reform the student's reading habits and interests, which would involve in most cases a thorough diagnosis and treatment for defects in his general education."

LIBRARY WORK WITH CHILDREN

Stacy, Emerol. History teaching and children's books. *Normal Instructor and Primary Plans.* 39:48, 87-88. 1930.

By the Library Teacher, Halladay Demonstration School, Portland, Ore. Lists of books of fairy tales, myths and legends, hero romances, middle ages, Indians, discovery and exploration, etc.

MASONIC LIBRARIES

Informal Conference of Masonic Librarians and Educators. *Proceedings* of the third conference, Milwaukee, May 2, 3 and 4, 1929. Wisconsin Grand Lodge Committee on Masonic Research, 1929. 125p. (Pamphlet No. 41, Sept. 1, 1929.)

NEBRASKA STATE NORMAL COLLEGE LIBRARY

Bright, A. B. Nebraska Normal College Library. *illus. LIB. JOUR.* 55:61. 1930.

This library at Chadron, Neb., has a capacity of 60,000 volumes.

NEWARK (N. J.) PUBLIC LIBRARY. BUSINESS BRANCH

Manley, M. C. How business can profit from the library. *Forbes.* 24:26, 28, 32. 1929.

The primary basis for the selection of material is first that it be definitely related to the commercial and not technical aspect of an industry. Trade directories and the investment collection receive particularly intensive use at Newark.

NORTH CAROLINA, UNIVERSITY OF. LIBRARY

Coney, Donald. The new library building, University of North Carolina. *illus. LIB. JOUR.* 55:55-58. 1930.

Cost, \$625,000; seating capacity, 1000 readers; present stack capacity, 300,000 volumes; with unfinished floors completed, 450,000 volumes.

PERIODICALS

Clermont, Jean. Fiches pour la réception des périodiques et meubles de classement des périodiques en cours. *illus. Revue des Bibliothèques.* 39:343-352. 1929.

Suggestions for checking and housing current periodicals.

PICTURE COLLECTIONS

Dana, J. C. *The Picture Collection.* 4th ed. Revised by Marcelle Frebault. Wilson, 1929. pap. 738p. *illus. plans.* 90c. ("Modern American Library Economy as Illustrated by the Newark, N. J., Free Public Library.")

The collection now includes 600,000 pictures, of which 100,000 are mounted. "List of Subject Headings Under Which Pictures are Filed," p. 28-70. "Addresses of Publishers of Pictures," p. 73-76.

PROVIDENCE (R. I.) PUBLIC LIBRARY

Sherman, C. E. A branch building program in Providence. *illus. plans. LIB. JOUR.* 55:58-60. 1930.

Description of the Wanskuck Branch. "Providence, in its development of branch library buildings, has been one of the most retarded cities of its size in the country. It did not share in the distribution of the grants of the Carnegie Corporation, and as the library is not municipally operated, financial support from the city government has been not so readily obtained as in most other American cities."

PUBLIC LIBRARIES

WISCONSIN

Hazeltine, M. E. Some comments on the present condition of Wisconsin libraries. *Wis. Lib. Bull.* 25:335-338. 1929.

Miss Hazeltine has found an encouraging improvement in appearance of library property, selection of book stock, and training of staffs.

Lester, C. B., *comp.* Some comparative statistics for Wisconsin libraries, 1928 and 1929. *Wis. Lib. Bull.* 25:345-353. 1929.

Sixty of 231 public libraries failed to report. Number of volumes increased from 1,000,664 in 1928 to 1,490,337 in 1929; circulation from 3,869,369 to 6,847,893.

PUBLICITY. See LIBRARY PUBLICITY

RANDOLPH-MACON WOMAN'S COLLEGE

Randolph-Macon Woman's College. *The Dedication of the New Library.* Lynchburg, Va., 1929. pap. 32p. *illus. (Bulletin, vol. xv, no. 4; vol. xvi, no. 1.)*

REFERENCE BOOKS

Minto, John. *Reference Books; a Classified and Annotated Guide to the Principal Works of Reference.* London: The Library Association, 1929. cl. vii. 356p.

The classification is that of the Institut International de Bibliographie, Brussels, with Library of Congress class marks added.—Preface.

REPORTS. See LIBRARY REPORTS

RESEARCH, BIBLIOGRAPHICAL

Insh, G. P. *Golden Journeys.* Glasgow: Library Review, 1929. pap. 19p.

Reprinted from the *Lib. Review*. Contents: The Romance of Libraries: The Student and the Library. The first is a record of pleasant historical research in the City Record Office, the Library of the Royal Society in Burlington House, etc.; the second the author's methods in training his students at Jordanhill College in the use of reference books, and in regarding local history as a living subject rather than as a matter of mere antiquarianism.

SALARIES

Perry, Leta, *comp.* Salary statistics; junior and senior high school libraries. *A. L. A. Bull.* 24:29-31. 1930.

Sixth annual report. Includes 47 systems. Average minimum salary for complete table \$1,605; maximum, \$2,451.

SCHOOL LIBRARIES

Wheeler, J. L. Educational books of 1929. *School and Society.* 30:857-873. 1929.

An unannotated list. "School Libraries," section 15, p. 867.

See also HIGH SCHOOL LIBRARIES.

SHELVING
Leyh, Georg. *Das Büchermagazin in seiner Entwicklung*. Berlin: Elsnerdruck, 1929. 15p. illus.

Storey, W. R. *Planning Attractive Bookshelves*. 347 Fifth Ave., New York: Natl. Assn. of Book Publishers, c1930. pap. 12p. illus. plans. Suggestions for bookshelves in the home.

SPECIAL LIBRARIES
Partridge, Robert. "Routing" technical information. *Lib. Assistant*. 23:8-10. 1930.
Recommends that librarians attend to this himself rather than to rely upon heads of departments to pass it on.

SUBSCRIPTION BOOKS
A. L. A. Committee on Suscription Books. *Subscription Books Bulletin*. A. L. A., vol. 1, no. 1, January, 1930. Quarterly. \$1 a year.
Meets the need for a central advisory service on encyclopedias, subscription sets and various allied compends. This first number describes and evaluates fifteen sets. It is emphasized that a listing in the *Bulletin* does not constitute a recommendation by the A. L. A.

TRAINING, PROFESSIONAL
Howland, A. W. *Recommended Courses for Prospective Librarians*. Philadelphia: Drexel Institute, 1929. pap. 5p. ("Bull.," vol. 6, no. 6.)
The work of the public librarian, the college librarian, the school librarian, the special librarian requires a foundation in undergraduate work looking to its special field. But specialization should not be emphasized too early. And a young librarian does not always know what field of work he will eventually choose. Of three Drexel graduates who specialized in children's work only one has remained in that work.

Ledbetter, E. E. Training for librarianship. *Christian Science Monitor*. Jan. 8, 1930.
One of a series on training for a career. A librarian's career is a happy one for a person who cares for books and people.

UNION CATALOGING. See CATALOGING

UNIVERSITY LIBRARIES. See GÖTTINGEN UNIVERSITY; NORTH CAROLINA, UNIVERSITY OF

VATICAN LIBRARY
Giordani, Gino. Les nouveaux catalogues de la Bibliothèque vaticane. Paris: Institut International de Coopération Intellectuelle. *La Coopération Intellectuelle*. 1:681-682. 1929.
Progress on the catalogs of books and manuscripts, and the principles on which they are being made.

WEST HARTFORD (VT.) PUBLIC LIBRARY
Handy, D. K. What the flood did for the West Hartford Library. illus. *LIB. JOUR.* 55:47-48. 1930.
Awarded second prize by the *Woman's Home Companion* in a recent competition. The library has replaced the building swept away by the flood of 1927 with a small but modern building costing about \$3,800 and with a capacity of 5000 volumes.

WELCOME WAGON
The Welcome Wagon. illus. *LIB. JOUR.* 55:105. 1930.
The Akron (Ohio) Public Library cooperates with this organization in welcoming new property owners or renters to the city.

BOOKS BY AND ABOUT LIBRARIANS
Greene, Charles S. *From the Sierra to the Sea; or, Songs from the Scalean Gate*. Berkeley, Cal.: Sather Gate Book Shop, c1930. cl. 108p.
Sonnets and other verse-forms by the Librarian-Emeritus of Oakland (Calif.) Free Library.

In Memoriam; Thomas Lynch Montgomery. Reprinted from the *Pennsylvania Magazine of History and Biography*, January, 1930. pap. 4p.
Dr. Montgomery was State Librarian of Pennsylvania from 1903 to 1921, when he was elected Librarian of the Historical Society.

Latimer, Louise P., comp. *Illustrators; a Finding List*. Boston: F. W. Faxon Co. 1929. cl. 47p. \$1.
Revised edition of a list published in 1927, with an author index added. Confined chiefly to children's books.

Special Offer!

EXTRA copies of THE LIBRARY JOURNAL for August, 1929—Special County Number—may be had for 10 cents per copy as long as supply lasts.

Tarkington's Works Available
THROUGH the kindness of a friend, the New York Public Library has had put at its disposal a number of sets of THE SEAWOOD EDITION OF BOOTH TARKINGTON'S WORKS, 21 volumes, boards, cloth backs, paper labels, the limited edition published at \$6 a volume, the first volume containing Tarkington's portrait and his autograph signature. This set, recognized as the best edition of Tarkington's writing, is printed in large type and illustrated. These will be sent, while available, to any public libraries applying for them, and agreeing to pay the cost of transportation from New York on a parcel weighing 49 pounds. Applications addressed to the New York Public Library, Fifth Avenue and 42nd Street, will be answered in order of their receipt.
Apply at once!

New Jersey Holds State Publicity Committee Meeting
THE FIRST meeting of the New Jersey Library Association Committee on 1930 Publicity was held in the Newark Public Library on Jan. 14 with all seven members present. It was decided to send to every library in the State a check list of the simple fundamental publicity undertakings for any library; to ask each library to prepare a brief history of its own institution for a possible weekly column of library news to be syndicated in New Jersey; to sponsor in the spring a series of five or six discussions on publicity held at the Newark Public Library with no charge to the librarians attending; and to conduct a publicity "clinic" at the Atlantic City meeting in April to which librarians may bring their own publicity material and have it criticized constructively.

Library Organizations

New York Regional Catalog Group

THE New York Regional Catalog Group held its first meeting of the 1929-30 season in the Grill Room of Schrafft's, East Forty-second Street, Nov. 29, with seventy-five present.

Miss Mary N. Shaver, of the School of Library Service, Columbia University, told of her experiences at the International Bibliographical Congress, held at Rome, June, 1929, and gave an entertaining view of the whole Congress.

The second part of the program consisted of brief explanations of methods of cataloging and classifying of the League of Nations documents by representatives of six libraries. Miss Margaret Roys, of the Columbia University Library, read the paper prepared by Miss Elsie Bassett. Miss Helen Sinclair, of Colgate University Library, reported that, though their work was just begun, they had decided to classify the documents in 341.1 with a special scheme for subdividing. Miss Constance Beal, of the Russell Sage Foundation Library, said that they treated these publications like others and classed them where they would be most useful. Miss Carolina Righter, of the New York Public Library, gave a full explanation of how they handle these documents. Miss Dorothy Garland read a short paper prepared by Miss Reba Cawley, of Princeton University Library, reporting that the documents are classed by them as a set in a special scheme in their International Law Section. Mrs. Dorothy Livingston, of the Yale University Library, brought a number of questions to the meeting. As to their own set of publications, they have bound the serial publications as sets; the others they plan to bind individually. They use the topical arrangement in filing cards. A short discussion followed on the advisability of using Library of Congress cards.

Conference on Bibliography

AN INTER-AMERICAN Conference on Bibliography will be held at Havana on Feb. 24, 1930, under the auspices of the Pan-American Union, the result of a resolution adopted at the Sixth International Conference of American States. An extensive agenda for the conference has been prepared by the Permanent Committee on Bibliography of the Governing Board of the Pan-American Union with the collaboration of the Advisory Committee on Bibliography. On the latter committee were the following librarians: H. H. B. Meyer, C. K. Jones and E. C. Richardson of the Library of Congress, and Charles E. Babcock of the Pan-American Union Library.

Meeting of Inter-Racial Interest

THE MASSACHUSETTS Division of Public Libraries, the Massachusetts Library Club's Committee on Work with the Foreign-born, the Berkshire Library Club, and the Adams Free Library, in cooperation with similar organizations for teachers of the foreign-born and clubs interested in inter-racial matters, arranged a meeting held recently at the Adams Free Library on "The Poles and Their Background."

Prof. Eric P. Kelly, who teaches American literature and a course in Slavic backgrounds of literature at Dartmouth College, spoke on his experiences in Poland. His book, *The Trumpeter of Krakow*, was awarded the 1929 Newbery Medal.

Brief reviews of books having Polish interest were an important part of the program. Miss Marjorie Martin, librarian of the Dalton Public Library and vice-president of the Massachusetts Library Club, discussed *The Nigger of the Narcissus*, by Joseph Conrad, beloved both by Poles and Americans. Harold Millet, principal of the Liberty Street School, Adams, reviewed several new books, such as Brunner, *Immigrant Farmers and Their Children*, and Thomas and Znaniecki, *The Polish Peasant in Europe and America*.

Miss Edna Phillips, supervisor of library work with foreigners Massachusetts Division of Public Libraries, and chairman of the executive committee representing the participating organizations, presided at the meeting. Miss Irene M. Poirier, acting librarian of the Adams Free Library, arranged a book exhibit illustrative of the day's program.

Joint Meeting of N.Y.L.C. and S.L.A.

A JOINT meeting of the New York Library Club with the Special Libraries Association of New York was held at the Auditorium of the Roerich Museum on Jan. 30. The main address of the evening, "Not Everyone Reads Best Sellers," was by Mr. Terence Holliday of the Holliday Bookshop, New York City, who told how one bookseller built a steady trade among the pure readers who have literary tastes of their own and do not ride the tide of best seller blurbs. Mr. Angus Fletcher, Director of the British Library of Information, explained an interesting scheme for encouraging staff reading—a "two-foot book shelf" established in his library for staff reading. Mr. Roger Howson, Librarian of the Columbia University Library, by a twist of the imagination turned "obscure books" into "obscene books" and dwelt upon them at length to the delight of all.

In the Library World

Chicago Public Library Suffers With City

THE CHICAGO PUBLIC LIBRARY has been obliged to reduce its budget for 1930 by \$400,000, or about 20 per cent, because of a delay in the collection of taxes due to the cancellation of the 1929 levy and a complete reassessment of taxable property in Chicago, which was ordered by the State Tax Commission in response to many protests of unfairness made against the previous valuation. It is now reported that the 1929 taxes will not be levied until June 1, 1930, and that the new assessment will decrease the total valuation by five hundred million dollars! Meanwhile, the Public Library, in common with all the other Municipal "taxing bodies," has operated on borrowed money and has practically reached the legal limit of its borrowing power—and may have exceeded it, if the rumors of reduced valuation prove true.

The budget cut was made by eliminating 229 persons, comprising practically the whole untrained or junior grade, suspending automatic salary increases, reducing the book fund from \$265,000 to \$100,000, besides some minor economies such as changing the *Book Bulletin* from a monthly to a quarterly. Service hours in the branches were reduced from twelve to eight hours daily. Staff reductions were also made in the closed departments where work is decreased by the curtailment of book purchases.

The funds of the Public Library are entirely derived from a half-mill library tax, with an additional one-tenth mill for building, normally yielding a little under \$2,000,000 and \$400,000 respectively.

Retired After Forty Years Service

WILLIAM STETSON MERRILL, who completed forty years of continuous service in the Newberry Library last June, has been retired on half pay for the remainder of his life. Mr. Merrill graduated from Harvard in 1888, and after spending a year in the Harvard College library, joined the Newberry Library staff in 1889 at the invitation of Dr. William F. Poole, then librarian. For many years he was head classifier, and for ten years served as head of the Reference Department. This recognition of his long and faithful service comes while he is still hale and vigorous and will give him the anticipated opportunity to study and write and engage in other pleasant avocations.

Subscription Books Bulletin

IN THE first issue of the long-awaited *Subscription Books Bulletin*, issued quarterly by the A. L. A. and edited by the A. L. A. Committee on Subscription Books, fifteen encyclopedias, source books and compends of various sorts are described and evaluated. It is emphasized at the outset and on every page that a listing in the *Bulletin* does not constitute a recommendation. The first title, *America: Great Crises in Our History, Told by Its Makers*, carries this conclusion: "By no means indispensable but worth while if purchased at second hand." Other sets are *American Educator* (not recommended); *Book of Popular Science* (recommended only where supplementary material is needed); *Book of Rural Life* (recommended where it can be afforded at the price); *Book Trails for Baby Feet* (review on the whole favorable, but the set is not recommended for library purchase); *Circle of Knowledge* (not recommended); *Classroom Teacher* (desirable in a school or large public library); *Encyclopædia Britannica*, 14th edition (recommended); *Lincoln Library of Essential Information* (recommended); *Lives of Game Animals* (recommended to any library that can afford it, and a worthwhile extravagance for the library that cannot quite afford it); *Mythology of All Races* (recommended to large libraries); *New Century Book of Facts* (not recommended); *Standard Dictionary of Facts* (not recommended); *Volume Library* (not recommended); and *World Book Encyclopædia* (recommended). Other features of this first issue, dated January, 1930, are a list of cooperative measures which publishers might take to eliminate those things which educators and the general public might properly criticize or complain of, a report of the trade practice conference of Subscription Book Publishers, held in Washington in 1924, and a partial index to sources where reviews of widely known subscription works may be found. Subscription to the *Bulletin* is \$1 a year.

American Federation of Labor

BECAUSE of the widespread interest in unemployment at present, public libraries will be interested in the latest publication of the American Federation of Labor, a paper bound book entitled *Unions Provide Against Unemployment*. This book is the result of a careful survey of trade-union unemployment benefit plans and other union methods for relief and prevention of unemployment.

New Buildings

THE UNIVERSITY of Oklahoma, at Norman, Okla., will dedicate their new library building on Feb. 21 and 22.

THE CATHERINE Ingalls Memorial Library at West Boxford, Mass., was opened and dedicated on Jan. 12.

THE NEW building of the Green Public Library, Coventry, R. I., was dedicated Dec. 28, 1929.

PROVISION of \$2,500,000 for a new central library building for the Enoch Pratt Free Library, Baltimore, Md., was recently included in the Municipal program.

A NEW library building will be erected at Coe College, Cedar Rapids, Iowa, through the generous gift of \$200,000 by Col. Robert W. Stewart.

A NEW library building will be erected at Lake Forest, Ill., as a memorial to the late Kersey C. Reed. The gift of \$250,000 was offered in behalf of Mrs. Reed and her sister.

NORTHWESTERN University has received \$1,000,000 for a new general library building to be placed on the Evanston campus. The gift was given by the family of the late Charles Deering of Evanston.

HATTIESBURG Public Library, Hattiesburg, Miss., has been granted \$100,000 by the town for a new building and equipment.

SOUTH PROVIDENCE Branch of the Providence, R. I., Public Library was dedicated Jan. 20.

MONTEREY, MASS., at annual town meeting, Feb. 3, voted to spend \$7,000 for a new library.

A New Branch Like an English Shop

THE NEW Central Lending Library of the Toronto Public Library system will be opened on Easter Monday. A new branch built like an English shop—confessedly a shop, but the best-looking shop in the shopping centre—was opened in November and another in the French Château mode in a thickly populated neighborhood of homes will be opened in May. An article about this interesting type of library building will be forthcoming.

Hirshberg to Be Director of Libraries

THE TRUSTEES of Western Reserve University, Cleveland, announce the creation of the new office in the faculty of Director of Libraries by a resolution passed by the executive and prudential committees of the board, stating that it applies to all libraries of all departments of Western Reserve University, Adelbert College, Cleveland College, and the Cleveland School of Architecture—separate corporations. At the same meeting the board selected for Director of Libraries Dean Herbert S. Hirshberg, who resigned as city librarian of Akron last June to succeed Miss Alice S. Tyler as Dean of the School of Library Science. He will retain his deanship along with his new duties. This appointment is considered of great significance, as it is the first step toward the organization of the great library the university hopes to build within a few years, and is the first portent of coordination of Case Reference Library, moved to the university campus two years ago, with the library of Adelbert College and other University libraries.

How Do You Handle This Problem?

THE FOLLOWING form is sent to borrowers of the Washington Public Library who recommend books, which the Library is unable to buy:

You recently requested that the Public Library purchase the book . . . You are informed that it has been found impracticable to comply at present because it falls in the class marked (*) below. Readers are invited to recommend books for purchase; the library always strives to furnish any book requested, as far as its very inadequate book fund will permit, and so far as it comes within the scope deemed proper for this library. Certain limitations recognized in our purchases of books are noted below.

If the book is purchased at a later date, you will be notified of that fact by mail. Very respectfully,

GEORGE F. BOWERMAN,
Librarian.

1. Expensive books; they may sometimes be secured at reduced prices by waiting.
2. Books too highly specialized and therefore of too limited demand.
3. Town and county histories and genealogies. (The Library of Congress procures these expensive books.)
4. Rare and early printed books. (More appropriate to the Library of Congress.)
5. Reported out of print.
6. Title not identified; please give fuller details including, if possible, the name and address of publisher.
7. Meagerness of funds compels a restricted selection from current books.
8. Sufficient affirmative critical opinion of the book has not been found in general or specialized reviewing journals.
9. The library has other books on the subject, some of which are

Book Review Club of Greater Boston

THE BOOK REVIEW CLUB of Greater Boston is an informal assembly of the librarians of Greater Boston whose principal purpose is to help its members in selecting fiction for their own libraries. The group meets once weekly during the active publishing seasons and listens to reviews of the newest fiction which are presented on forms given below.

Author..... Date.....
 Title

(Underline descriptive words in each group)

- A. Kind—Adventure, Business, Character, College, Historical, Humorous, Love, Mystery, Nature, Politics, Problem, Sea, Short, Society, Western.
 B. Effect—Cheerful, Clean and wholesome, Depressing, Dull, Immoral, Moralizing, Sordid, Stimulating, Trashy, Trivial, Entertaining.
 C. Estimate—Literary Value: 1. Excellent. 2. Good. 3. Fair. 4. Poor. 5. Bad. Appeal: 1. Very popular. 2. Popular. 3. Average appeal. 4. Limited appeal. 5. Displeasing. For Whom: 1. All Readers. 2. Adults. 3. Men. 4. Women. 5. Children.
 D. Recommended. Not Recommended.

(Other side of card)

Review

Objectionable matter, page.....

.....Reviewer

Copies of the reviews are filed with the Massachusetts Division of Public Libraries where they are available to any visiting librarians. The lists are prepared at irregular intervals whenever there seem to be enough really worthwhile books to make a good list. They are multigraphed by the Massachusetts Division of Public Libraries and are sent by the Division to members of the group and to all small libraries throughout the State. Large libraries, throughout the State and elsewhere throughout the country, who care to have the list pay 50 cents a year for it, the subscription being sent to Galen W. Hill, Quincy Public Library.

Virtually every new novel published in America is reviewed at the meetings. One librarian reports on every novel by an author whose name begins with A, another on every novel by an author whose name begins with B, and so on. At every meeting one or several novels that stand out above the rest are noted, and when, after several weeks or months, a sufficient number of outstanding novels to make up a list have been noted a list is made up and the brief annotations are written by the chairman of the group. The chairman at the present time is Harold A. Wooster, librarian of the Brockton Public Library.

List XXII, December, 1929

Recent Fiction

- I. Novels of literary value or included because of author's prominence

Davis, William S.—*The Whirlwind*. The French Revolution provides the subject for an able historical novelist.

LaFarge, Oliver—*Laughing Boy*. A beautiful, tragic romance of Laughing Boy and Slim Girl, Navajo Indians.

Lee, Mary—*It's a Great War*. Prize war novel presenting a vivid picture of war as seen by a non-combatant near the front line. A remarkable book with the characteristic form and subject matter of the modern war novel.

McFee, William—*Sailors of Fortune*. Short stories of sailor adventures in different parts of the world, typical of the author.

Wharton, Edith—*Hudson River Bracketed*. A young man's struggle to attain a place in the literary world of New York with the complications of ambition and love. Well written, but does not reach the author's highest standard.

II. Stories of more popular appeal

Connor, Ralph—*The Runner*. Historical romance of exciting days and pioneer life on the Canadian border in the War of 1812.

Dawson, Coningsby—*When Father Christmas Was Late*. Satisfactory short stories of Christmas.

Farnol, Jeffrey—*Another Day*. A light, popular romance of love and adventure.

Gibbs, George—*Isle of Illusion*. Adventure, love and a mystery in Louisiana, a Mississippi flood complicates the situation.

Locke, William J.—*Ancestor Jorico*. An unusual treasure hunt.

Mowerie, William B.—*Girl from God's Mercie*. A good type of rugged northern adventure.

Oman, Carola—*Crouback*. Historical novel of 15th century, England, Anne of Warwick and King Richard III. Accurate, colorful background.

Payne, Elizabeth S.—*Hedges*. A light, wholesome romance of a very popular type.

Powel, H. W. H.—*Married Money*. A Boston girl inherits one million dollars on her marriage, which brings many interesting complications. Written with humor and satire.

Skinner, Constance L.—*Red Willows*. Pioneer life in British Columbia ably described.

Weston, George—*Around the World*. An amusing story of a world tour.

III. Detective stories

Casey, Robert J.—*Secret of 37 Hardy Street*.

Farjeon, J. Jefferson—*The 518 Mystery*.

McIntyre, John T.—*The Museum Murder*.

Orr, Clifford—*The Dartmouth Murders*.

Among Librarians

Edward C. Williams

THE DEATH of Edward C. Williams at Washington on Dec. 24, 1929, means the loss of one whose contributions to librarianship, although quietly made, were far-reaching and vital.

Mr. Williams was born at Cleveland in 1871 and graduated at Western Reserve University in 1892. He attended the New York State Library School in 1899-1900, receiving an honor first-year certificate there in 1900. This formal professional study had been anticipated by his appointment as librarian of Adelbert College of Western Reserve University in 1894, which post he held until 1909. Beginning in 1900, his duties as librarian included the giving of instruction in bibliography and reference work to undergraduates, and after the establishment of the School of Library Science at the University in 1904, he taught bibliography, reference work and allied subjects at the School of Library Science. In 1909 he resigned his Cleveland positions to become principal of the M Street High School in Washington, and after seven years of work in the school field was designated librarian of Howard University in 1916. The last-named post, which came to carry with it a heavy program of instruction in modern languages, he held at the time of his death. Mr. Williams served as secretary of the Ohio Library Association in 1901 and as second vice-president of the New York State Library School Association in 1903-04. In 1929 he was awarded by the Julius Rosenwald Fund a fellowship for advanced study, pursuant to which he enrolled in September in the School of Library Service at Columbia University. Illness through the fall compelled his return to Washington early in December, followed by the discovery of conditions more serious than had been realized.

Sympathy, versatility, and brilliance were characteristic of Mr. Williams' mind, and these qualities and his capacity for hard work made him a force in every circle that he touched. As a librarian he was broad-visioned and efficient, and as a teacher highly successful and stimulating. In recent years he has been particularly a source of advice and inspiration to all who are concerned with the growth of library work and library service among Negroes. Mr. Williams leaves a wife, who is a daughter of Charles W. Chesnutt, the author of "The House Behind the Cedars" and other stories; and a married son, who is practicing law in Washington.

Public Libraries

BERYL D. ANDERSON, Columbia '28, reference assistant in the Warder Public Library, Springfield, Ohio, resigned to join the staff of the Free Public Library, Newark, N. J., in October.

JANE L. BAKER, Columbia '28, resigned her position in the Children's Department of the Queens Borough Public Library to become reference assistant in the Danbury Library, Conn.

A KNIGHTHOOD was conferred upon John Ballinger, librarian of the National Library of Wales at Aberystwyth, on January 1.

VERNE BOWLES, N. Y. S. '14, resigned as head cataloguer, Public Library, Tulsa, Okla., to accept a similar position in the Public Library at Paterson, N. J.

LEILA M. BROWN, Drexel '29, has been appointed librarian of the Public Library, East Moline, Ill.

MIRIAM CURRY, Drexel '27, has been appointed assistant, Library Extension Division, State Library, Springfield, Ohio.

DOROTHY W. CURTISS, N. Y. S. '23, is engaged in recataloging at the Public Library, Westerly, R. I.

JOHN J. MACFARLANE, for nearly thirty years librarian and statistician of the Commercial Museum, Philadelphia, died at his home in Philadelphia from bronchial pneumonia on January 7, 1930. He was in his eighty-fourth year.

EDWARD F. ROWSE, N. Y. S. '26, resigned as associate professor of library science, Syracuse University School of Library Science, last summer, to take charge of the reference service of the Brooklyn Public Library.

GEORGE T. SETTLE, librarian of the Louisville Free Public Library, Kentucky, completed his twenty-five years in the service of that institution on January 1.

EDA TANKE, Wisconsin '20, has accepted the position of reference librarian on the staff of the Public Library, Anderson, Ind.

CECILIA TROY, Wisconsin '15, has been invested with the religious habit of the Sisters of Providence and is now known as Sister Camilla. Sister Camilla is librarian at Saint Mary of the Woods.

ALTHEA WARREN, Wisconsin '11, is now assistant librarian, Public Library, Los Angeles.

MRS. GRACE LANE YOUNG, Wisconsin '09, began her work as librarian of the Public Library, Sedalia, Mo., on October 1.

Special Libraries

ETHELDRED ABBOT, N. Y. S. '97, has succeeded Sarah Louise Mitchell as librarian of the Ryerson Art Library of the Art Institute of Chicago.

EILEEN M. DUGGAN, Wisconsin '15, has a temporary appointment on the staff of the *Booklist*, A. L. A. Headquarters.

MRS. ANNE C. HAXBY, Wisconsin '21, has deserted the ranks of librarians for the business world. She has opened a gift shop in Fargo, N. D., her old home.

CAROLINE S. JENKINS, Columbia '27, with the Children's Department of the New York Public Library since her graduation, resigned in September to become librarian of the Ethical Culture School, New York City.

SARAH LOUISE MITCHELL, N. Y. S. '04, librarian of the Ryerson Library of the Art Institute of Chicago since June, 1914, resigned September 1.

MRS. GUDRUN (MOE) SCHOELLER, N. Y. S. '21, librarian of the Bankers Trust Company, New York City, since 1923, has resigned and will be succeeded by her first assistant, Dorothy Watson, N. Y. P. '17.

Free

THE SPONSORS of the publication of the Sacco-Vanzetti Record have a few sets which they will be glad to send gratis to libraries that have not received the Record. Applications will be filled in the order received as long as sets are available. Address Bernard Flexner, 40 Exchange Place, New York City.

To Exchange

U. S. National Museum. *Proceedings*, v. 22-54, 56 (2 copies of v. 47 and 56).

The HINE Bookstack System

The Hine Bookstack System is a Book-protecting Shelving designed to give books the utmost protection from friction, compression, flaring open, vermin, and dust.

Books are not damaged in circulation only. Often their lives are shortened in the library—on the shelf. The library shelf is the most logical place to start book protection—on a shelf designed to fit a book, designed to support and protect.

HINE standard steel shelving units finished in olive green or to match woodwork sell at the price of wood and are also consistently reasonable in multi-story stacks. Yet, the same as 40 years ago, HINE does not stress the initial saving, but the lasting economy of its book-protecting design.

Protects Your Bookbindings

The HINE steel shelf shows plainly the "V" shaped design by which books are kept closed. This is the most important part of the HINE Bookstack System because by converging the shelf the design conforms to the natural shape of the book.

The HINE Book Support is designed in the shape of an inverted "V." In this way, shelves partially filled have the same book-conforming design as the completely filled shelf. By engaging the rear edge of the shelf, it is readily adjusted and cannot topple over when large books rest against it.

The HINE Shelf-Extension is applied in 10 seconds to the face of any shelf for the immediate accommodation of over-sized books. This device admirably solves one of the librarian's annoying problems. A standard 8" shelf quickly becomes 10" or 12".

The HINE Portable Book Distributor designed for the librarians' convenience, can be readily hooked to the face of shelving and leaves both hands free for replacing books. This distributor is useful in carrying books from Charging Desk or in collecting books from reading tables.

To librarians contemplating expansion we offer, without obligation, services of our Library Equipment Specialists in preparing plans and estimates. HINE Bookstack System has been selected in preference to others by many important libraries.

McClurg's—

specialists in library book service. Since 1876 we have operated a separate department for handling orders from Public Libraries, Schools and Colleges. Our long experience, our immense stock, together with our liberal discounts and central geographical location, combine to make this the logical place to send book orders.

A. C. McClurg & Co.

333 East Ontario Street, Chicago

The ECONOMY of the Dickman Bookcharging System

1. ABSOLUTE ACCURACY

Mistakes are IMPOSSIBLE.
Saves fully 35% of your book losses which are directly traced to transposed figures.

2. LEGIBILITY

Eliminates arguments as to due dates, saving assistants' time.
Avoids "snags" in slipping.
Speeds up general routine in circulation department.

3. SPEED

One machine, operated by a clerical worker, will charge a minimum of 1,500 volumes per day.

4. SIMPLICITY OF OPERATION

Does not require special training.
Releases trained Librarians for more constructive work for which they have been trained.
Can be operated by pages and high school students.

5. PROTECTION

Furnishes receipt for each volume issued.

6. IMPROVES RELATIONS WITH PUBLIC

Eliminates arguments as to due date.
Protects the borrower against erroneous charges.
Improved service at the charging desk is appreciated.

7. LOST BORROWERS' CARDS

Reduced to a minimum, avoiding, to a great extent, the existence of duplicate cards.
The Borrower attaches more value to our "UNIT" than the ordinary reader's card.

8. SUPPLIES

Uses every available space on all record cards, saving from 25 to 50% of all supplies.
Can you AFFORD to miss these advantages?

Write—or use this coupon—NOW!

BOOKS THAT SMILE!

If your re-bound books are lettered by the famous ~~GOLD O GRAPH~~ machine, you may be sure that your shelves are full of "Sunshiny Smiles" for your readers. Library Binders who use ~~GOLD O GRAPH~~ lettering can guarantee the following—

1. Absolutely straight lines.
2. Pure Gold Lettering (imitation gold will not work in machine).
3. Many different styles of lettering.
4. Books returned from bindery quicker.
5. "Individual" looking books that resemble Publisher's bindings.
6. No more expensive than old style hand lettering.

Beware of imitation machines — there is only one ~~GOLD O GRAPH~~ and any bookbinder using same will display our trade mark.

Forthcoming Issues of THE LIBRARY JOURNAL

* Our Special Equipment Number is not as complete as we wished for, owing to the lack of cooperation on the part of several manufacturers of library supplies. We are grateful for the assistance given us by those included and we hope the material, in both the editorial and advertising departments, will be of great help to our readers. Unfortunately, we were unable to include an excellent article on school library equipment written by Edward Tilton, but we will run it in the March 15th issue.

* April first will cover various problems of Small Libraries in Vermont, California, Ohio and New Jersey. This number has been planned for a long time and has been requested by several of our readers. Any news notes from small or medium-sized libraries will be specially acceptable for this issue.

* April fifteen will be a special number on Vacation Reading but we shall also look forward to an article on Jewish Book Week written by Miss Fanny Goldstein of the Boston Public Library, in this issue. Jewish Book Week comes in May and Miss Goldstein will tell of an exhibit of Jewish books planned in Boston last year and again this year.

THE LIBRARY JOURNAL

~ MARCH 1, 1930 ~

Delivery Desks

By William Webb

Librarian, Flint Public Library, Michigan

DELIVERY DESKS seem to fall into three natural divisions:

1. The desk for the large library, which is a special case, as the work is split up, and for which special arrangements must be made to meet the layout of the work in the building.
2. The desk for small public libraries and small branches and high schools with a circulation up to 100,000, where a standard desk such as put out by the library supply houses meets the situation.
3. The desk for the agency having a circulation from 100,000 up. This would include the smaller public libraries and the branches. There must be a central desk here, at which all types of work can be done and from which, at the same time, the assistants can give supervision. It is in these cases, where many of the desks are built from special plans, that there is the greatest chance and opportunity for careful planning.

In larger institutions the old-fashioned type of delivery desk is becoming obsolete, for a heavy volume of business is forcing the splitting up and isolating of the five main functions of (a) charging, (b) discharging, (c) slipping, (d) registrations, (e) reserves. This change is being brought about by the following causes:

- A. A desire to separate the five functions and avoid congestion, so that crowding of one of these will not hold up the work of another type.
- B. A desire to take our "kitchen work" away from the most valuable space in the building and devote this space as far as possible to the reader.
- C. Simplification of charging and discharging of the books.
- D. A desire to have slipping and such routine carried on away from the public, so that un-

trained help may be used instead of trained.

- E. A desire to place the assistants so that they can turn immediately to whatever needs to be done.

It is in general to the third class of delivery desk that the following remarks are directed:

1. The general criticism to be made of delivery desks is that they have been placed, for the most part, so that they are not near the exit and the interior arrangements tend to make the patrons crowd at the front.
2. They are so constructed as to have too many blind or unused corners. Most often these can be used in providing space for books that are to be slipped or that have been slipped and are to be returned to the shelves.
3. A discharged book should be put where it would not need to be carried to the slip tray, and, after slipping, the book should go on a shelf or truck so that it can go as direct as possible to its place. The saving of handling of books should be noted among the most desirable features of a desk, and one so planned saves time, as well as wear on the books. Space, on one side of the slip tray, should be fixed so that by the lifting out of one or two pieces of shelving, the truck can be run right in. The truck will then be out of the work space inside the desk and will be immediately available to the assistant who is slipping. Too often assistants who are slipping books have to turn around almost 180 degrees in order to reach the place where the books are to be placed.
4. The slip tray has too often occupied the central portion of the desk and the place where the public would naturally come. Slip trays should be put in places where the public cannot reach and, if necessary, dropped below the top level of the desk, so as to attract the least attention. This will allow

a less qualified assistant to do slipping and not have her bothered by the public who cannot distinguish between the least and best trained assistants. Dropping the slip trays below the top of the desk allows notes to be put up on the front of the well. The front of the well should be covered with cork board. Assistants seated at low slip cases can more easily reach the lower shelves of the desk or truck.

If two people are to work at a slip tray at the same time, it is much better to have a bench than to try to have them work from two chairs. Knee holes under slip trays should be made wide enough for two people. Enough slip trays should be provided. If space for these is limited, a book card two inches wide will allow more trays than a three-inch card. Some libraries prefer to use a sloping slip case rather than a flat bed one. In the knee hole under the slipping trays a shelf half the depth of the knee hole can be placed about ten inches down from the bottom of the slip trays. This shelf will not interfere with the knees and it will give a place where snags and bindery books can be placed when they turn up in slipping.

5. Sorting trays for book cards with at least twenty divisions can be set into the top of the desk, so that cards can be sorted as they are charged. These trays should be movable with adjustable divisions and label holders on the divisions. The label holders should be set at an angle and the trays should be deep enough to have the top of the book card below the top of the divisions, and should be at least half an inch wider than the book card.

Trays should be set in the desk so that they can be covered by a panel in order that the top will be flush if needed. Two sets of sorting trays can be used if desired.

6. Care should be taken in the construction of the building, that there be an electrical floor plug under the delivery desk. This will provide illumination, when needed at the desk only, by using small lights and so avoid burning large fixtures in the ceiling. These desk fixtures should have adjustable shades so that the eyes of the assistants of various heights can be shaded.
7. Librarians have been keeping too many records on the 5 x 12.5 or 7.5 x 12.5 cm. cards, with a resulting loss of space. For example, registration records could be kept on a 7.5 x 5.8 cm. card. These cards give twice the number of records in the same space. Library furniture houses make trays to

hold two rows of these small size cards, and they fit in the same openings as the standard trays for 7.5 x 12.5 cm. cards. In their straight office height charging desks, furniture manufacturers might well have drawers equipped for either sized card. Place for registration and other card files should be planned, so that standard sized combinations of card catalog trays are used.

8. Drop down desks are often used in delivery desks. In general, they should be equipped with a panel that can be fitted in to make them flush across the top. Almost invariably, it will be found that in rush periods this space can be used if it is flush with the top of the rest of the desk. It is doubtful, however, whether drop down desks are not a waste of space on account of the small amount of time that they are used. A sliding shelf or a hinged one with supports might do this work as well and save a lot of room.
9. Drawers for the staff are very useful. These can be assigned to the various assistants, and into them each assistant can put her own work which is unfinished when she is called to handle a rush, and know that she will be able to go back and find this just as she left it. Often these can be worked into blind corners. To provide for a large staff, these drawers can be divided by a partition down the middle.
10. Long sections of the desk top for which no particular use is planned, as, for example, on account of its being in the rear of the desk, can be used for troughs. Place here books that are slipped and not yet shelved, so that they will be available for the public. The books will draw people away from the front of the desk. Under the book trough there would be a good chance to get a considerable amount of shelving to house special collections, restricted books, reserves, etc.
11. Fine computers can be set in the top of the desk with a glass over them. A hole through the top should be cut below the fine computer so that it can be pushed up from the bottom, as if the glass fits tightly it is hard to get out. The computer should be so placed, as should any sorting trays, stamp pads, and lights, so that at least two people can use it. This can easily be done if spaces are marked out in advance as to where each assistant will be when she is doing a certain type of work, and provision is made for places for enough people to take care of rushes.
12. Set the stamp pads into the top of the desk

so that they will be a little bit below the top when the covers are off. Also have them set in some material which is easily cleaned and which will not stain from ink. It would be advisable to put pads behind a lamp standard or something of that sort. This will prevent patrons putting books on to them.

13. On the inside of the desk there should be an overhang, so that there will be a toe space for the person standing close to the desk.

14. Movable waste paper baskets should be eliminated as far as possible. When needed, they should be placed under the counter or even under the foot rest under the knee hole. Foot rests are generally about a foot above the floor in the knee hole, and a box that would slide under

the foot rest can take the place of the ordinary waste paper basket that clutters up working space if left out.

15. Space for pigeonholes can often be found if looked for in drawing up the plans of desks. Pigeonhole space has a tendency to be very wasteful, because the extreme depth that it can have is about six inches, while the tops of delivery desks are rarely less than eighteen inches wide.
16. If the telephone is desired in the desk, the conduit should be brought up underneath and a place planned for the instrument.
17. The library furniture houses have been building standard desks with poster cabinets, but have been rather discouraged, and in some cases have eliminated them because they were not used a great deal, and they made an additional cost in the manufactur-

ing of the desk. These can be installed in front of knee hole or in front of catalog cabinets, provided the desk is wide enough.

18. Linoleum and wood are the best and the most common types of covering for the top of the desk. Plate glass is also used, but this gives light refraction and also scratches and must be replaced within a short while.

The first point raised is with regard to location.

Most desks are placed back from the front door. It is my belief that better results can be obtained if the desk is as near the entrance as possible, and that the best way to get this is to have a vestibule. The vestibule should have doors opening on the sides instead of directly opposite the door from the street. The desk would face either the rear or the sides of the room and join the solid wall of the vestibule between the doors. This type offers several advantages

Photograph by courtesy of Library Bureau

Discharging and slipping desk for fiction, Los Angeles Public Library, located back of receiving desk. Non-fiction is slipped at another desk identical in size. Phones shown are of three kinds, the outside phone, house phone (interdepartmental), and the "grab" phone (hanging), connected with receiving desk. See also pages 187, 196

over the first type, viz., (a) it is more economical of space, located as it is abutting on the vestibule, for, by moving the desk forward in this way, space is released which can be devoted to regular library purposes; (b) it allows for a close checking of books entering or leaving the building, as this type of desk presupposes that low shelving will be built parallel to it, forming guide rails on both sides so that patrons cannot go directly to the vestibule without passing an assistant; (c) traffic from one side of the building to the other will be in the rear of the desk and not, as is so often the case when the desk is set back from the entrance, in front of it, which results in people coming in being constantly crossed by people going from one side to the other; (d) the vestibule wall can be solid up to the top of the desk and then glassed so that there is immediate and full supervision of the

vestibule; (e) assistants are not in a draft in winter, while in summer, by taking out glass panels in the vestibule wall, a breeze can reach them; (f) slip trays can be placed inside the desk at the end that joins the vestibule, allowing for a large bin to hold returned books on one side and a large bin or truck on the other side, at the same time the trays can be lowered and so placed that the public cannot reach the person working at them; (g) registration is done at the end of the desk opposite the vestibule and slip trays; here it may be advisable to have the desk made regulation office desk height instead of approximately 39 inches, which has been the height assumed as standard in all this discussion; if office desk height is used, have the front open or at least recessed; (h) a desk of this design provides for the return of the books on one side, the charging on the opposite side, the slip case at one end and the registration at the other, while reserves will be handled on the side that does the charging. In this way at rush times the patrons are automatically sorted into three groups, each group striking the desk at a different place, while slipping can go on undisturbed. When a single

assistant is working at the desk she can take in books on one side and turn around and charge at the other, having to walk only in going from the slip tray to the registration files, or the reverse.

To get the best benefit of this location, the vestibule and entrance must be planned with the desk in mind. This is the *first* and *most important* step, for without this planning it will be impossible in most cases to get the desk near the front door. This means that the work starts with the architect of the building if it is desired to get the best results with the furniture to be installed.

Might it be possible for the American Library Association to have a person or perhaps a small committee which might be paid to check all plans—that is, some central place where librarians could send plans of buildings and get really professional recommendations? This would mean for the whole building, and if a responsible or professional committee were available to which a librarian or library board could turn for advice and pay a fee for the securing of this advice, I believe that it would be used after its worth became known.

The Building of Fine Library Furniture

Cabinet Work In Connection with Library Furniture by One Who Has Spent His Life in the Woodworking Industry

By Arthur J. Horrocks

Gaylord Bros., Inc., Syracuse, N. Y.

OUR PUBLIC, university, and school libraries are visited by thousands of people, and have buildings designed by architects employed to give the best in the art of such buildings, the interior being designed both for convenience to librarian and for beauty and skill of craftsmanship. The librarian choosing the furnishings is often at a loss as to just what kind of furniture should go into such buildings, as the library is constantly under critical eyes. The furnishings providing convenience and equipment should be of the best possible type of construction.

This article is intended to acquaint prospective buyers of furniture with some of the essentials and a brief explanation of the manufacture of high-grade standard library furniture. The writer has spent his life in the woodworking industry and has through a period of years of contact acquainted himself with certain requirements of library furniture, its construction, its design and practicality. This article is not intended to go into every detail of the manufacture of furniture,

but to aid the librarian in observing certain definite points in choosing furniture.

Selection of Lumber

Of course, to build good furniture, we must have good wood; the best only will do. The standard for our American libraries is quartered white oak, which must be thoroughly dry, of even texture, free from streaks or spots, and of even figure. Quartered oak derives the name from the way it is cut from the log into boards. When the tree is cut down the log is quarter sawed lengthwise and the boards are taken from the center out. The cutting is through the medullary rays and leaves a beautiful flake grain on both sides of the board; this makes our library furniture so beautiful when evenly matched. The boards are then placed in a kiln and thoroughly dried, all moisture or greenness being taken out in preparation for construction of furniture. White oak is used for its consistent texture, and is free from spots and mineral streaks so often found in cheap furniture.

Other woods sometimes used are mahogany, walnut, and birch. Mahogany and walnut are very beautiful woods, but for library purposes are in some places very impractical. When finished they show every little scratch and mark, and before long, under severe public use, become unsightly. Birch is used to imitate mahogany. It gives a beautiful mahogany finish and enables the purchaser to buy a mahogany finish at a lower price than would be required for genuine mahogany. All of these woods are of the hardwood class and require very careful and experienced workmanship. Chestnut, white wood (or poplar), and bass wood are used on the unseen parts of the furniture. Being of the soft wood variety, they are much easier to work and, of course, much lighter in weight. They also afford good construction, as glue adheres to soft wood much better than to hard wood. Beech and birch of the hardwood class are used for drawer sides and bottoms and for slides on small cabinets, of the 3 x 5 inch size, or where metal runners are not necessary. Being of the hardwood class, these woods give the assurance of long, hard wear for the constantly sliding drawers in wall and small cabinets. Hardwood running on hardwood also slides much more easily than hard and soft woods together.

Veneers

Much can be said of veneers. Often the layman speaks with pride of possession of a solid piece of furniture, built of solid wood. To the practical man or craftsman, a veneered piece of furniture, such as found in a table top or table leg, counter tops, desk tops, ends of magazine racks, or panels, is much better. Paneled doors are better and more satisfactory than the solid type. In fact, furniture of solid wood is not built today. Veneered work or pieces will hold their shape, will not warp or twist, and when made under good conditions will not crack or split. Then, too, more beautiful effects can be obtained in the graining of the wood. All new creations and duplications of old furniture are made chiefly of veneers.

Speaking in trade terms, veneers are of three-ply, five-ply, or seven-ply; that is to say, a top is made up of three, five or seven thicknesses of wood. Take, for example, a table top 1½ inches thick, 30 inches wide, 60 inches long. First, the core or center of the board is made by taking a number of soft pieces of wood 1 inch thick and 60 inches long, and gluing them together to make a width of 30 inches. After these are made one by the process of gluing, a piece of rotary cut veneer

3/16 of an inch thick, 60 inches wide and 30 inches long is glued on each side of the core at right angles. The oak veneer is then glued on top of these pieces at right angles with the grain of the wood, thus forming a five-ply top—never to warp or twist, and lending itself to rare beauty. The panels in doors or in shelf ends, 3/8 or 3/4 of an inch thick, are made up in this same manner of three, five or seven-ply, so that they will not bulge or crack. From an economic standpoint, veneering is helping to spread the supply of rare and beautiful woods over a longer period of time to counteract the fast diminishing of the wood supply in the forests.

The Building Process

While a great deal of furniture is made under production methods, the library demands and requires the old-time craftsman. In this day machines have an important part in the building of quality furniture, and the manufacturers must be equipped with the best modern facilities and with machines which are of the high speed type and require experienced and carefully trained men. Every precaution known to the trade is taken in the building of furniture, in using dry wood, in having well-heated work rooms with plenty of light and air. Careful consideration is given to every need and requirement of libraries, such as sitting heights of desks, standing heights, proper heights for adults and juniors, reach, vision, strength and durability.

The first workman handling the lumber on its journey to the finished product is a trained man, able to choose the right stock from rough wood, able to match the color and grain to make them appear as one. He then sends the lumber on its way to the fine machine department. Here workmen straighten the stock and prepare the stock for assembly of articles by accurate machine work, planing, mortising, tenoning, molding, and shaping; all of this is done to make a precise fit in all joints, thus assuring firm, rigid construction. All wood before assembly is put through a large sanding machine, to make it absolutely even, perfect and smooth. It is then sanded with a fine paper to prepare it for the finishing room.

All boards are glued together with an automatic glue machine, assuring an even spread of glue, and a strong and neat joint which can be detected only by the difference in the grain of the wood. Glue is one of the most important parts of good construction. Each workman is supplied with fresh, clean, well-cooked glue each day. Old glue loses strength and is not good after several heatings. Great

care must be taken in the style of joints used in construction. For doors and end panels, mortise and tenon should be used. This joint is recognized by the trade as the strongest one possible to obtain. Panels are grooved in, and where a mold is used, it should be of the graceful sweeping type in order to eliminate the possibility of dust collecting. All drawers should have the front piece dovetailed to two sides. This also is the strongest possible joint known to the trade for drawer building. The back is fastened to sides with the lock joint, also a recognized joint. Some manufacturers offer other joints in an attempt to cheapen the article. Charging trays are made with this lock joint, bottoms are grooved into sides, a feature which makes them both neat and strong. Paneled ends for shelving are built of solid stock for framework, true and straight. The panel insert is of $\frac{3}{4}$ -inch five-ply wood; the center partition is made up of two or three pieces to make up desired width. These are glued together to insure their remaining straight and true, a feature very necessary in the building of shelving. The shelves are built of three or more pieces glued together edgewise, always remaining straight and without twist. This also makes the shelf much stronger than a solid board would be. In fact, all solid boards 6 inches or over should be built up of many boards glued together edgewise. After all work is assembled, it is hand sandpapered. This requires a workman of rare ability; he must have the work

spotless, scrape off all glue, sandpaper evenly and equally to insure perfect conditions in the finish and varnish room. If this is not done, the color and finish will appear blotchy, as the unsanded part, being more open, will allow a greater amount of stain to penetrate into the wood.

The finishing of library furniture requires the labor and art of highly skilled workmen. The first process is the color. On oak we have that rich standard library light oak and the darker shade called golden oak. These two are standard and can be matched at any time and will usually blend in with any library finish on walls, doors, or window casings which have been finished by local builders or painters. The color desired is obtained by either stain or filler shaded to obtain the exact color. This filler is of a paste nature, and is applied to fill in the pores of wood, rubbed crosswise and then lengthwise. To even the surface after drying twenty-four hours, a thin coat of shellac is applied with a modern spray equipment, which assures an even spread. After this has dried, the surface is rubbed again with very fine sandpaper, after which it is varnish-sprayed and allowed to dry under special drying processes. Then it is again sandpapered, treated with another coat of varnish, and allowed to dry and temper; after this the surface is hand rubbed with pumice stone and oil, producing that wonderful velvet-like polish so often found and admired by the possessors of quality furniture.

Modern College and University Library Equipment

By Grace E. Lockart

AMERICA today is a reading nation. Books have become as essential a part of our well-being as electric lights, telephones and radios. Education is ours almost for the asking, and libraries have become a vital factor not only in our cultural but in our practical life as well.

A couple of generations ago the library was a place of retreat for scholars, for the "learned." Each volume was fastened to its case by a heavy iron chain, and in many libraries abroad even today readers are required to put in a request for a research book one day and return for it the next. Bruce Barton describes how, in his mid-western boyhood home, men gathered every Sunday from far and near to listen to a sermon by the one man of their community who had *time to read*. But life today is rich and full of varied interests and

pleasures. And books play an important part in every man's life. To make them readily available, to minimize the effort and time in handling so that librarians may spend that effort and time more profitably, are major problems in the educational scheme of things.

The tempo of the times requires that what we do be done with energy, with efficiency and speed. To this end university authorities, architects, designers and engineers have cooperated to adapt our libraries to the age we live in and to key library facilities to modern high-pressure demands. Three fundamental principles have been kept in mind. First, books and their preservation; second, comfort of students and research workers; third, equipment as simple, durable and inexpensive to operate as possible.

A brief survey of our modern college and

university libraries shows how American mechanical skill and inventive genius is solving these problems with the same energy and efficiency which has been applied to the problems of industry. One of the most interesting modern efficiency devices is the new automatic book distributor recently perfected by Snead & Company, century-old firm of bookstack engineers and designers. The invention, which represents the result of three years' study and for which patents are pending, will shortly be installed in four libraries under construction in the United States and Canada, according to Mr. Angus S. MacDonald, president of Snead & Company. It has been installed in the University of North Carolina and the Toronto Public Library, and is being installed in Rochester University, the University of Cincinnati and the Sterling Memorial Library at Yale University.

Features of the new book distributor of lively interest to librarians, Mr. MacDonald says, are that it operates in two directions: conveys books horizontally, vertically and around corners; has distant control; is made to discharge books automatically at any given point; contains a number of ingenious safety devices, and is constructed so simply that it does not get out of order.

Mechanically speaking, the device consists of an endless chain running continuously down the stacks, beside the main delivery desk, and back up the stacks. Carriers eight feet apart

convey the books to their destination, where, with what seems human intelligence, a comb arrangement takes off, at each tier, the books in cars directed to the particular floor where they are desired, and slides them neatly into a cushioned compartment. From library shelf to reader with speed plus accuracy! The compartment into which the mechanical carrier drops its books contains a spring bottom which sinks with the weight of the books, and if

they continue to pile up unretrieved, the sinking bottom rings a bell announcing to attendants that the receiving capacity has been reached. Books may be loaded on carriers going up or down. They are removed by the automatic comb, however, only on down cars. If a wrong button is pushed, it can be automatically corrected by pushing the proper button. All carriers can be sent to one floor, if desired, without directing each car individually, simply by pushing a repeat button. Each carrier will hold several books 12 inches by 16 inches in size, lying flat, or it will take a large folio 16 inches by 24 inches

Snead Book Distributor, University of North Carolina. Continuously carries books from any stack tier and automatically unloads them at central station; at the same time returns books to their proper tier. See page 214 for other types of distributors

standing on a slant. The cost of operating the device is very small. At the University of North Carolina the entire system will run by a three-quarter horsepower motor at a cost of from two to three cents an hour. At the Rochester University Library, which will have a bookstack tower twenty stack stories high, the operating cost will be less than ten cents an hour.

Snead Light Reflector. Designed for Sterling Memorial Library of Yale University. Made of steel and finished with white vitreous enamel. Eliminates glare

Here's the way it works: The librarian at the main desk, let us say, has a call for *The Theory of Relativity* which is filed in a third-floor stack. The request slip is sent via pneumatic tube to the third floor, where the book is loaded on the carrier by an attendant and delivered to the reader before he has time to turn around. An hour later it is returned to the main desk. The librarian places it on a passing carrier and pushes button number three, which releases a small red metal flag on the car. Attendants on other floors seeing the flag, numbered "three," know that car number three is en route to floor three. Arriving at the third floor, *The Theory of Relativity* is politely removed by an aluminum fingered comb and dropped into a cushioned compartment. The comb then returns to its horizontal position, the flag drops, and the carrier is again free for other books going to other floors, or for *The Sex Life of the Polyp* en route to the main desk. Where time is an element, which it certainly is in this busy, hurrying world, it is interesting to note that the longest time required for de-

livery of a book to the main desk from the most distant point in the tallest stack is less than four minutes. The carrying capacity can be increased, of course, by placing the carriers closer together. Nor are the advantages of the new distributor confined to *new* libraries. In old libraries, where reading rooms and storage spaces are crowded to overflowing, it is possible, using this mechanical system of distribution, to build bookstacks at distances from the main library without any loss of time in the delivery of books to readers. The importance of expansion flexibility is reflected in a recent statistical study of college libraries made by Snead & Company, which shows that the number of volumes is doubled in from twelve to twenty years. Old library buildings, therefore, not constructed to take care of expansion, must find some outlet for their constantly growing collection.

Not as spectacular as the distributor, though just as interesting, are the new study cubicles which have proved so successful at Dartmouth, the University of Michigan and the Widener Memorial Library at Harvard. In certain sections of stacks adjacent to the cubicles all books pertaining to one subject are grouped together near individual reading desks. Thus the student is able to isolate himself from his fellow student and, in the midst of the books he requires, complete the problem in hand with the least possible delay or confusion. Furthermore, he can leave off his labors, and return later to find the same books in the same place. Library experts have estimated the space allot-

Individual study cubicles at Widener Memorial Library, Harvard University. Provides quiet seclusion with necessary reference books at hand for the serious student

ment per student in the ordinary reading room to be about thirty square feet, so that in the general reading room, with ceilings from fifteen to thirty feet in height, each reader occupies from 450 to 900 cubic feet of space. In the study cubicle the student occupies only about twenty square feet in a stack tier seven and a half feet high, or about one hundred and fifty cubic feet.

One of the all-important things for library comfort is proper light. Stack tiers are low compared to the ordinary ceiling and with low ceilings and narrow aisles. High power incandescent bulbs are extremely hard on the

eyes. The problem of distributing proper light with uniformity over the face of the books is a serious one, books close to the light getting eighty to one hundred times the intensity of light of those on lower shelves. This problem has been solved by Snead & Company by the use of stack aisle reflectors which protect the eye from direct glare and distribute the light evenly over the face of the books by a pierced shade which decreases the amount of light on the nearest books and reflects the light downward on books on the lower shelves. Made of steel for durability, the reflector is finished inside for reflection purposes with white enamel.

Chairs

CHAIRS for library use must be strong and comfortable. They should not be too large, in order that unnecessary floor space shall not

be wasted, and, in the case of public libraries, should not be upholstered. Chairs with a solid saddle seat have the lowest maintenance cost and, when properly de-

signed, are as comfortable as the ordinary upholstered chair. To prevent noise, a rubber composition or felt tip should shoe the leg, and in the case of swivel desk chairs, some provi-

WINDSOR CHAIR
No. 22180

WINDSOR SWIVEL CHAIR
No. 22182

Simmons chairs used in the Philadelphia Public Library. Entire construction is of steel of walnut color, hand-grained to stimulate finish of natural wood

be wasted, and, in the case of public libraries, should not be upholstered.

Chairs with a solid saddle seat have the lowest maintenance cost and, when properly de-

sion should be made to lock the swivel at a predetermined height in order that the chair may not become higher or lower when it is revolved in use.

Ordinarily, chairs may be divided into two groups:

A. Metal.

1. Steel.

2. Aluminum.

B. Wood.

Metal—Metal chairs have a decided advantage in that they do not loosen up with changes in temperature and that they cannot be wracked by balancing on the two back legs. The maintenance cost is nil except for touching up, if and when the finish is worn off the arms.

Metal-Steel—Probably the earliest metal chairs were those of cast iron, designed to use

Iron Works Company. The seat is a solid sheet of steel, perforated to represent cane, and is quite comfortable.

The Simmons Company, prior to 1927, was manufacturing two or three so-called bedroom chairs which were entirely unsuited for library use or use in public buildings. This firm, at the suggestion of Mr. John Ashhurst, librarian

Sykes Company, Philadelphia, specially designed library chairs. One of the largest manufacturers of wood chairs, including swivel chairs of special design and movable chairs for lecture hall use

in cemeteries. These chairs usually consisted of straight legs, back and arms with a perfectly straight grill or perforated seat, and their comfort left much to be desired.

The earliest hollow steel chair of which any trace could be found was manufactured by The Van Dorn Iron Works Company, of Cleveland, Ohio, which manufactured them for use in the rest rooms used by car and traction employees where strength was the first consideration. The first chair weighed approximately 70 pounds. After careful study this weight was finally reduced to 24 pounds, and it is understood that chairs of this type are still manufactured and sold by The Van Dorn

of the Free Library of Philadelphia, undertook to develop a Windsor chair, in steel, from samples and sketches submitted by the Free Library. This chair was designed and built for the Free Library of Philadelphia, which has more than 1300 in use in its building, and during the two and a half years that the library has been open, has not spent one cent for their maintenance. They weigh approximately four pounds more than a wood chair of similar design, and were purposely made heavy in order to gain strength, and because the chair was designed to be pushed on the floor rather than lifted. They are shod with a felt plug similar to the tip of a billiard cue, and it is estimated

that, in constant use, these tips will last from three to five years, expense for replacement of tips being about five cents per chair.

There are several manufacturers making a chair similar to the Uhl steel chair, which consists of pressed metal frame, supporting a wood veneer seat. These chairs, while suitable for factory or office work, are not considered satisfactory for use in public rooms or libraries.

Metal-Aluminum—The Aluminum Company of America developed a cast aluminum

have an upholstered seat in leather or similar material.

At the suggestion of the Free Library, the American Body Works of Buffalo, N. Y., a subsidiary of the Aluminum Company of America, undertook to develop, in aluminum, a chair of the Utica type (a straight chair without arms, which has been used in public libraries throughout the country).

This chair was unique for the reason that it had a solid metal seat and, when complete, weighed four pounds less than a wood chair of the same design. These chairs were placed

Alcraft chairs, Aluminum Co. of America, principal manufacturer of aluminum chairs suitable for library use. Light weight, easily cleaned or scoured, and metal-covered rubber insert deadens sound from contact with hard floor. Sales offices in principal cities of the country

chair, for the Mellon National Bank of Pittsburgh, which weighs approximately 40 pounds. By the time the Free Library of Philadelphia was ready to equip its building, this company had succeeded in reducing the weight of this chair by substituting hollow welded aluminum in place of casting, and was using chairs of this type on some of the railroad dining cars throughout the country. They had not manufactured any chair, however, which did not

Very ornate chairs, in period designs, can be secured in cast aluminum from several firms. Chairs of this type are only suitable (owing to their high cost) for use in specially designed reading rooms, officers' or board rooms, where a limited number of chairs are desired which must match in design the architectural features of the room or rooms where they are used. Chairs of this type should be secured from the architect of the library building owing to the necessity of having them conform to the design of the room where they are to be used.

B. L. Marble No. 128 side chair, Bedford, Ohio, one of the largest manufacturers of wood chairs. This particular design is considered above the average type of library chair, and its decorative value and sturdy strength have secured its widespread approval

in the Department for Children, the Department for the Blind, and in the Staff Cafeteria of the Free Library, and have given very satisfactory service. They are equipped with felt plugs similar to those used on the steel Windsor chairs.

Wood—Wood chairs have been in use so long and are so well known that no detailed description will be necessary.

B. L. Marble armchair No. 130. Offer a variety of chairs fashioned of mahogany, quartered oak, and American walnut in a wide range of finishes and color tones. Several hundred B. L. Marble Windsor chairs were supplied for the new Public Library at Cleveland

Care should be taken, however, to specify that they be made from wood having sufficient strength to insure satisfactory service.

Types—Libraries usually require four or five types of chairs.

1. The Windsor or other type used at the principal reading room tables.

2. Similar chair with swivel base for use at desks and low-charging counters.

3. Straight chairs similar to the Utica type for use in children's room or where space is at a premium.

4. Folding chairs for use in lecture rooms, meeting rooms, and for supplementary seating capacity in any rooms.

5. Special types, such as high swivel chairs or stools for use at high desks or charging

Right—Gaylord Library Chair. Made of carefully selected white oak with an attractive light oak finish harmonizing with "Library Standard" furniture. Stands 18 in. from floor

counters; low stools used while arranging books on lower shelves; right posture or other chairs of special design for stenographers or clerical workers, and tubular metal chairs, adjustable for height, for use of comptometer or adding machine operators.

All of the above chairs, except the last item, can be secured in either wood or metal.

Chairs used by most libraries in their main reading and reference rooms have the seat 18 inches from the floor. Usually a limited number of chairs of the same design, but of reduced size, are used in the children's room, with seats 16 inches from the floor, and a few, for the smaller children, with seats only 14 inches from the floor. These three sizes practically fill the need of the majorities of the libraries.

Lecture room chairs similar to those used in theaters and assembly halls are used by many libraries in their lecture rooms. Chairs of this type are manufactured and supplied by Heywood-Wakefield Company, New York City, and the National Theatre Supply Company, 624 South Michigan Avenue, Chicago, Ill.

Gaylord Table Bulletin Boards. All sizes carried in light oak, dark oak, or mahogany

Bulletin Boards

Above—Universal Bulletin Board. Frame of steel, electric-welded; metal "Bulletin" plate attached to one side. One-quarter-in. thumb-tack. Filler covered with Dundee burlap

Right — Globe-Wernicke double - faced cork board, 3 ft. 8 in. x 2 ft. 10 in. Double-posting surface and can be moved around to where attention value will be the greatest

Right—Universal Square-End Displayer for twelve or twenty-five Swing-Wings. Stands independently on floor without fastening

Below—Sectional view of Armstrong's Cork Bulletin and Tack Board. Thumb-tacks can be pushed easily into the cork, hold securely and removed readily without the use of knife or tack puller

Above—Gaylord Table Bulletin Board. Size 22 x 5½ inside the frame. See also page 186

Book Shelving

Steel shelving is usually divided into three groups: *Storage Shelving* (the cheapest form of metal shelving), used to store duplicates and in shipping room, etc., shelves usually adjusted with small bolts; *Bracket Type Stacks*, slightly cheaper than the standard type of stack; *Standard Type Book Stacks*, usually furnished with shelves adjustable one inch on center, and the design varies with each of the companies manufacturing. This type stack has been developed to a point where it is very reliable and usually from 10 to 15 per cent cheaper than wood construction. Four largest manufacturers of metal stacks in the United States are AllSteel, Art Metal, Sneed and Van Dorn Iron Works

Right — Globe-Wernicke Library Stacks, which have met with every test for over twenty-five years

Left — Globe-Wernicke high book shelving, double faced, free standing. Capacity per unit, 350 vol.

Below—Art Metal Standard Stack consists of two parts, the "one-piece" wrought shelf support and the "one-piece" plate shelf, both made of smooth plates of steel finished with baked-on enamel. No cast-iron parts

Below—Standard Conveyor Co., North St. Paul, Minn., control board, which makes it possible to dispatch books to any station automatically by merely indicating on the control board where book is to be delivered. See page 214

Above—The Hine Bookstack System stresses the value of its design, which is claimed to protect bookbindings. Its movable book support engages the rear of the shelf and keeps books closed. For the accommodation of over-sized books, a perfected shelf-extension may be attached to any shelf. This shelving is of steel, reasonably priced, and has been selected by many notable libraries. The Equipment & Supply Company, 51 Madison Avenue, New York City, is the sole distributor. See also page 188

Below—Snead Steel Bracket Stack, California State Library, Sacramento. This stack is 13 tiers high; similar stacks with interchangeable unit parts, finished with baked enamel, are furnished either to make one tier in a similar library or any number of multiple tiers

IV

For description of signs I, II, III, IV, see page 222.

Above—Sign placed in hotels, rest rooms and railway stations. Cost \$4 each per fifty. Jennings County, North Vernon, Ind.

Right—Grand Rapids, Mich., branch signs. Made locally by Haven-Busch Co. at a contract price of \$1,033.02 for 27 signs (contract included setting them at various places around the city as well as designing them). Uprights are of steel; signs themselves are of cast iron. Set 30 in. in the ground in concrete and stand the weather fairly well. Necessary to paint them once in two years at a cost of about \$3 each. Subject to all sorts of hazards by mutilation. Signs used formerly were of wood and the cost of up-keep was very great

Left—Allen County, Fort Wayne, Ind., branch signs. Two faced, made of wood, 8 x 24 in., cost \$18 each, painted rough black with gold letters and beveled edges, hung from brackets on iron posts 10 ft. above ground embedded in cement 2 ft. below ground. Made locally. Standing up very well

Librarian Authors

LOUISE PAYSON LATIMER, Director of Work with children in the Public Library of Washington, D. C., was born in Shepherdstown, W. Va. Her father served in the First Virginia Cavalry throughout the Civil War, being wounded many times. Since she lived in the Shenandoah Valley, the battle ground of the war, she knows something of the after effect of that war and the cruel Reconstruction days upon the Valley people. She was educated at Stephenson Seminary, Charles Town, W. Va.

After periods in the training class and central children's room of the Washington Public Library, she attended the Carnegie Library School of Pittsburgh. Returning to Washington, she became successively Children's Librarian, Supervisor, Work with Schools, Director, Training Class and Director, Work with Children. During 1923-24 she was vice-chairman of the Children's Librarian Section of the American Library Association, and chairman in 1926-27.

"Know books! Can a librarian be a librarian in any real sense until she does? Book knowledge should be acquired before the world is told about it, and, if acquired, the librarian need not bother with too much telling." This is Miss Latimer's basic professional philosophy, and every rookie arriving in the children's department, whether from library school or college, is reinoculated with this principle and embarked upon a program of continuous training.

Miss Latimer and her associates have built up an excellent system of cooperation with schools. In addition to successful interrelation established with public schools, service to Catholic schools has become an outstanding feature of the work.

Washington is a mecca for Americans and for foreigners traveling in America. This takes many people to its Public Library. The quality of the work in the children's department seems to be known since, in addition to these

LOUISE P. LATIMER

visitors, institutions and individuals from various parts of the country constantly write for assistance from the children's department in their capital city. Officials of the Army and Navy, and members of the diplomatic and consular service in foreign countries, carry out for their children programs of reading made for them in Washington.

One especially attractive vacation Miss Latimer allowed herself when, in 1913, she secured leave of absence and departed with friends for Johannesburg, South Africa, where she arrived in midsummer as the bells of the New Year were ringing out gayly. But within two weeks a great strike, fostered by deportees from other countries, raged with efforts

to arouse the Kaffirs. Since in the Crown Mines, Ltd., where she was visiting, about 15,000 natives were employed and less than 1000 white men, these were stirring times. In August came the World War, and German raiders patrolled the east and west coast of Africa. After a beautiful year's vacation and six months after the outbreak of war the somewhat hazardous journey back to the States was undertaken.

Out of admiration for Washington grew Miss Latimer's desire to write about it, but this impulse, busy as she was, might not have been compelling, but helping tired Washington teachers gather material needed on the subject spurred her on. Her book, *Your Washington and Mine*, was published by Scribner in 1924. She has also written a number of professional articles which have appeared in *Libraries*, *THE LIBRARY JOURNAL*, *Catholic Educational Review* and other periodicals. She is the compiler of *Illustrators; A Finding List*, published by Faxon in 1929, which gives examples of the work of the listed illustrators in an Illustrator's Room. It is a revised edition of a list published in 1927, with an author index added.

THE LIBRARY JOURNAL

March 1, 1930

Editorial Forum

A FIRST task to which the A. L. A. set itself after its formation was the development and standardization of library equipment. Its leading agency was the Cooperation Committee, headed by Charles A. Cutter, which did fine service from the start. There was then no standard card, sizes ranging from pretty nearly the great expanse of the University of Leyden card to the tiny one used by Harvard College. The size first adopted proved inadequate, but soon the present standard card was made the general rule and it is now well-nigh universal. The immense service done by this standardization can scarcely be overestimated, as it has made the L. C. and other cards the material for union catalogs and permitted inter-use of the printed card throughout our own and many foreign library systems. What a contrast between the meager equipment of those days and the variety and utility of today! In this equipment number a glance over the reading matter and advertising pages will show the present development to the utmost, and only those who half a century ago knew of the difficulties which came from inadequate equipment can appreciate the facilities which are now offered by individual devices or competitive developments. Thus progress is made.

WORK at A. L. A. Headquarters should not be so multifarious and confusing as to preclude carefulness and accuracy. Mr. Utley may well have been surprised to find himself in a recent release promoted or demoted, as he might think it, from the Newberry Library to the John Crerar librarianship, acceptably filled by Mr. Bay since Mr. Andrews' retirement. But a more serious matter is the conglomeration of errors in No. 46 of the Reading with a Purpose Series, *The Romance of Modern Exploration*, by Fitzhugh Green. More than thirty corrections were pointed out in a revised copy furnished by an authority on exploration and brought to the notice of libra-

rians by Mr. Cannon at the recent meeting of librarians and others in New York in support of A. L. A. and the strengthening of its headquarters work. A correspondent elsewhere laments the levity with which these corrections were received, but it may be observed that they were introduced at the close of the meeting intended for another purpose, and did not receive the attention they should and would have had at another kind of meeting. The pamphlet is introduced by a eulogy of its author quite beyond the achievements of the most fulsome toastmaster, and the happy-go-lucky style seems to have been rather unlucky in its chronology and other matters of fact. This is in a way the most important series of publications the A. L. A. has ever undertaken in popular relations, and the imperfections of this example are therefore the more to be regretted. It is a question, indeed, whether the subject of this number relates to purposeful reading. It is worth considering whether the series has not now covered the full scope of educational reading, and attention should rather be centered on the revision of issued numbers from time to time by replacing titles with those of later books which may have superseded in information or quality the books already scheduled.

THE TWELVEMONTH 1929-30 seems to be the year of retirement in the library profession, as so many of the elders pass on their scepters to promising successors. William E. Foster, one of the few survivors from the conference of 1876 at which the A. L. A. was organized, to whom Providence is indebted for the development of its great public library from the very beginning, passes from the post of responsibility for administrative relationship to that of Librarian Emeritus, which happily does not mean his severance from library work after more than fifty-three years of activity in it. We cannot refrain from quoting from a private letter in which Mr. Foster gives his own view of the change: "There are several circumstances attending my appointment as Librarian Emeritus that are particularly gratifying to me. It is expected that I shall still put in my day's work at the library, instead of passing my days in idleness, the difference being that I now have no feeling of responsibility for routine work. I shall find enough, and more than enough, to do—in the line of pieces of work which, in the past, have temporarily had to be laid aside, on account of the pressure of routine work. In the second place, my successor, Mr. Sherman, is a man whose exceptional fitness for the place has been more

and more impressed on my mind during the last few years. He amply fulfills all the conditions which, in my own mind, would constitute an ideal successor. Lastly, the unprecedentedly generous action of the Board of Trustees, in providing for my future, and their repeatedly expressed appreciation of my work, have been an added pleasure. These years at the library have been very happy years. In the gradual expansion of the institution, I have seen many things accomplished that I had set my heart on; and some of the others are now in the way of being accomplished, under the efforts of my successor." The Providence Public Library is fortunate in following the precedent set in the New York Public Library by Dr. Billings, and now by Mr. Anderson, in providing for the chief librarian an associate with succession in view, and Brown University adopted the same method last year in view of Dr. Koopman's coming retirement into the post of Librarian Emeritus, Dr. Van Hoesen coming from Princeton as his associate and successor. Dr. Hill as Librarian Consultant of the Brooklyn Public Library will also continue in more or less active association after his twenty-five years of headship, in cooperation with a successor as yet unnamed. Miss Alice S. Tyler's retirement as head of the Western Reserve University School of Library Science has left to her associate, Mr. Hirshberg, the post of Dean of the library school in addition to his work as librarian of the university. All these retiring members of the profession, it may be noted, have been honored by their associates as president either of the American Library Association or of the American Library Institute.

THE YOUNGEST of our forty-eight States may well be proud of its development in higher education, for the University of Oklahoma has several thousand students and within the fortnight has dedicated its new library building, while its campus has been developed from its flat site into a most picturesque bit of landscape. The State and its university may well be especially proud of its contribution to the library profession, for Milton J. Ferguson, graduating in 1901, became the university librarian 1902-07, and interested in library work during their undergraduate days Carl H. Milam, Class of 1907, and Jesse Lee Rader, Class of 1908. Mr. Ferguson has not only risen to the post of State Librarian of California but has done especial service as library scout and missionary, with the backing of the

Carnegie Corporation, in the development of the library system of Louisiana and in the library survey of the South African Union. Mr. Milam's varied library career has been crowned by his exceptional work as A. L. A. secretary since 1920, and Mr. Rader has been the university librarian of his Alma Mater from 1909 until the present time. Mr. Milam, it may be added, is indebted to the University of Oklahoma not only for his education but he found his wife also in that co-ed institution. These three graduates rightfully took prominent parts in the dedicatory exercises, of which full record will be made in a later issue of THE LIBRARY JOURNAL, and doubtless later Oklahoma graduates or present students will be stimulated by the example of their success to enter the library field. Harvard, the oldest of our universities, has been notably distinguished in the library field by the men it has contributed to the profession, and Oklahoma, the junior State university, is emulating its example.

REPRESENTATIVE Collins' speech on our national library, and the applause with which it was received, are indeed gratifying evidences of the interest which Congressmen have in their library, and Mr. Collins is heartily to be commended for his historical review of the library's development and for pointing out the possibilities of purchase which have passed, losing to other libraries collections which might well have been brought together in Washington. But \$100,000 in those days seemed more than \$1,000,000 seems now, nor was Congress in as appreciative a mood before Dr. Putnam began to make the library the great national institution which it is today. The Librarian of Congress has, however, indicated that much as he might wish the Vollbehr collection, he cannot rightly approve the appropriation by Congress of so large a sum for the special purpose, particularly in view of its generosity in providing for other and more urgent needs of the library. Mr. Collins pointed out the especial desirability of the vellum copy of the Gutenberg Bible, which Mr. Newton prophesies may be worth or at least bring \$1,000,000 within a few years, such is the appetite of collectors, but he erred in understanding that this Bible was included in Dr. Vollbehr's offer.* For the purpose of completing the national collection, this volume in itself is almost more important than the Vollbehr proffer of the 3000 incunabula out of the 4500 which he owns or controls.

*A letter arriving from Representative Collins, as we go to press, states that Dr. Vollbehr has now offered 3000 incunabula including the Gutenberg Bible on vellum.

- Wren, Percival C. *Mammon*. Stokes (March 6). \$2.

Library Signs

(Description of signs on page 216)

I. Allen County, Indiana, deposit signs follow the branch signs in design. They are two-faced on 16-gage galvanized iron with flange for nailing to building or post, painted rough black with gold letters. Size 10 in. x 24 in. and cost \$10 each. Made locally.

II. The black and gold shield used by the Wayne County Library, Detroit, Mich., has proved satisfactory in design but not in wearing quality. First ones were made of thin galvanized metal (16 in. x 22 in.) and cost \$8 when painted on one side, \$11.30 when painted on both. These were found suitable for hanging on the inside of windows, but were too small for outside use, especially when near commercial signs. A similar sign (21 in. x 28 in.), costing \$13, painted on both sides, proved a better size. "Experience has taught," states the County Librarian, "not to hang these signs on long chains, but to clamp them firmly close to a scroll bracket, which costs \$4.35. The wind soon destroys any sign that can swing about, and the many corners of this one are soon bent. These signs have not withstood the air rifles of small boys or the inroads of the weather. They have rusted within a year or eighteen months, as have the brackets. We are now experimenting with a double sign which uses the same design painted on an oblong of galvanized metal with a wooden frame, 28 in. x 34½ in., costing \$25. The background to the black and gold shield is dark green and the wooden frame is black. This sign has had three coats of paint and two of weather-proof varnish, and is to be washed and revarnished annually."

III. California County Library signs. Cost \$3.91 each in lots of 100. Size 12 in. x 17 in. They are enameled and wear indefinitely unless some ill-advised person uses them for a target for rocks or guns.

IV. Jennings County Library station sign. Cost \$2 each, including the material and painting.

From The Library Schools

Three California Schools for School Librarians

THERE are three schools in California whose courses are recognized by the State Board of Education for the special credential for school librarians. They are: The University of California, Riverside Library Service School, and San Jose State College. At San Jose the course is especially planned for the training of school and children's librarians. Several programs are offered which lead to both teaching and library credentials.

Los Angeles

THE MOST important event of the month was the action of the California State Board of Education on Jan. 6, which places the Library School of the Los Angeles Public Library on their accredited list. This means that the graduates who have met the other State requirements, such as a stipulated number of college credits in educational courses, may receive a State credential for school library positions, when recommended by the school.

The Library School students had the privilege of visiting the W. A. Clark Library, where were displayed many treasures; among them a copy of *The Nürnberg Chronicle*, 1493, several Shakespeare folios and quartos, first editions of Browning, Tennyson, Dickens, and a large collection of first editions of Dryden and works about him.

Chicago

THE UNIVERSITY of Chicago Graduate Library School announces that its work for the summer quarter may be carried for credit toward the Master's or Doctor's degrees. Three summer quarters (twelve weeks each) should be sufficient in most instances to complete the resident requirements for the Master's degree. There is the possibility of attending summer terms of six weeks only, since this quarter is divided into two terms. The library school research opportunities are available in the summer under the same faculty members (except Mr. Hanson) that are present during the other quarters, i.e., Mr. Butler, Miss Howe, Mr. Randall and Mr. Waples. In addition, for 1930, Mr. Van Hoesen will direct investigations in bibliography for experienced librarians. The opportunities for teachers in the library field, or for prospective teachers in this field, include: (a) The prerequisite courses in the school of education chosen under the advice and direction of the library school faculty; (b)

the course in teaching methods adaptable to the library situation, conducted as nearly as possible as individual research but with group discussions; (c) individual research on teaching problems; (d) and many other possibilities of selection, under the guidance of the library school faculty, from the other departments of the university according to the field of work pursued by the teacher.

Colorado

THE THIRTEENTH annual session of the Colorado Agricultural College Library Summer School, Fort Collins, will be held from June 9 to July 25. The course has been accredited by A. L. A. under Type IV of Library Science Summer Courses. It is planned for the librarian who wishes to make herself more effective in her work or to train herself to take charge of the smaller library, and for the teacher who wishes to qualify for teacher librarian in the States that require some training for such positions.

Riverside

TO ACCOMMODATE increased numbers and added courses, the upper story of the Riverside, Cal., library school building was remodelled during the summer and a handsome lecture room provided which can be divided by accordion doors into two excellent classrooms. During the autumn the entire lower story was renovated. Under pressure of applications the enrollment for the year course was increased from twenty-five students, hitherto thought the maximum, to thirty. The session began Dec. 30 with thirty students enrolled, drawn from seven States. The present educational requirement for entrance is two years of college work, but about three-quarters of the class exceed the requirement, half being college graduates.

St. Louis

THE MONTH between the two semesters will be devoted entirely to practice work as usual. Assignments have been made to eleven departments and thirteen branches of the St. Louis Public Library; the students specializing in children's work being sent to the children's rooms at branch libraries for contacts with children and experience in story telling. During the month, Friday mornings will be devoted to visits to two university libraries, the Washington University Medical Library, the Missouri Historical Society Library, the Mercantile Library and a printing plant.

The Open Round Table

Errors in A. L. A. Publication

To the Editor of THE LIBRARY JOURNAL:

At the meeting of local members of the A. L. A. held recently in New York it was reported that one of the recently issued Reading with a Purpose booklets contained many gross misstatements and distortions of fact. I was shocked to learn that our national library organization had puts its *imprimatur* on such a careless piece of work—but I was still more shocked at the unconcern with which this startling revelation was received by the large and representative group of librarians who heard it.

Were we disturbed to discover that our leading professional organization had issued and was recommending to the public a work so bristling with misleading statements? Did anyone inquire how it was that the editorial committee had failed to detect errors which even casual reference to *The World Almanac* or any high school encyclopedia would have disclosed? Was there any demand that this discreditable publication be at once withdrawn from sale out of fairness to the public and out of consideration for the good name of the profession?

Not a bit of it! The assembly received the report with levity and treated the whole matter as a grand joke. They laughed heartily at the statement—sponsored by the A. L. A., mind you!—that Faraday lived long before electricity was known, and that Amundsen went through the Panama Canal four years before it was actually opened. No indignation, no concern. "A good time was had by all."

KARLMANN JACOBSON.

Duplicate Clearing House

To the Editor of THE LIBRARY JOURNAL:

Lyk Banquo's ghost this wil never down til we get a praktikal solution. H W Wilson's recent artikl wil stimulate tho't. A jeneration ago I propozd such a clearing hous but as ofen was ahd of my tym. Sum milions of duplikate books exist, occupy needed room & do no erthli good. As bookmen we can't advyz the paper mil for whyl meni of them ar useles most of them wd be of servis sumwher. Most librarians lak tym, space & skil enuf to fix pryses without an amount of studi unjustifyd by eni probabl results.

Clearli thez books shd not ly ydl & shd not be destroyd. 1 solution is to sel them for the tryffing prys they wd bring to a great 2nd

hand center that wd handl the whol matr simpli to make muni.

Another is to catalog them all & condense the slips in a central buro but this wil cost so much that fu libraries wil do it. Their tym wil do the publik much mor good spent on their working kolekcion.

My solution seems best. Let each librari ship everi book stil in a readabl condition to a central buro run by A L A or endowd by sum one for the publik good so personal muni-making wd be eliminatd & librari trustees wd feel justifyd in shiping their entyr duplikate stok & leaving it to thez disinterested experts to fix fair values. Of cours everi librari shd send to paper mil books too far gone for repair. The rest of them ar our serius problem. At this central buro everi librari shd be credited at aktual cash valu as nearli as experts with wyd & growing experience cd determin. When turnd over to other libraries they shd be charjd at this same prys plainli markt on each book. The Trustees in control of the buro shd hav ful power to sel for old paper ani books they fynd ar not mor valuabl elswher, also to giv or to sel at nominal pryses to poor, strugling libraries or institutions needing mor reading matr. The salaries & other expenses of doing this wd be charjd pro rata to thoz sending books in, whyl thoz buying books wd hav them at the exakt prys markt on each.

This clearing hous shd be wher adequat space cd be had for lo rent or wher it wd be givn by sum one interested. Qyt posibli Carnegie foundation or sum wyz frend of education wd see this oportuniti for usefulness & pay runing expenses.

Sum wil suggest several centers to reduce transportation but the advantaj is great of having the entyr stok closeli clasifyd by DC numbers so that a visiting librarian cd look at eni subjekt he needs to strengthen by going to 1 central buro insted of to several rejional ones. It wd help 1000's of libraries & be a great relief to their librarians & trustees if the space & tym now givn to thez useles duplikates cd be saved.

Anything that is ryt & a real servis to the publik can always be dun. It isn't the question of *if* but *when*. Sooner or later sumbodi wil fynd means for this greatli needed work.

MELVIL DEWEY.

Still Short Five Copies

FIVE more copies of THE LIBRARY JOURNAL for Feb. 15, 1929, are needed. Can you supply them at 25c. each?

Complete Sets Compilation

To the Editor of THE LIBRARY JOURNAL:

The staff of the Reference Department of the Queens Borough Public Library has compiled from *The Union List of Serials* a list of those titles noted as "Complete Sets Generally Found in Large Libraries."

Any library wishing to have a copy of this compilation may write to me: The Queens Borough Public Library, 153-01 Jamaica Avenue, Jamaica, N. Y.

MARGARET S. GREEN,
Reference Librarian.

Wise to Inventory World Court Resources

WORLD affairs have to take their turn upon the stage. At present the act is set in London, and the plot is the limitation of armaments. The World Court discussion stands impatiently in the wings.

When the United States Senate begins its debate upon the question, "Shall the United States participate in the World Court?" the newspaper headlines will echo the sounds that come from Washington, and I have no doubt that reading matter on the World Court will become more popular than ever in public libraries. As it is, we find in Syracuse that no topic is more in demand as debate material, with one exception. Capital punishment is ahead of all other subjects for debate. The World Court ranks ahead of the Eighteenth Amendment and along with Installment Buying and Trial by Jury.

Nor, I suppose, will it be for debate purposes only that demands will be made for library material on the World Court. The Root Proposal will no doubt be the subject for themes and thesis in school and college, and research workers, lawyers and preachers may be coming to us for help before snow ceases flying. When they come they will want what they want pretty promptly.

I am indebted to Field Secretary Ernest Bryan of the World Peace Foundation for a fine list of titles on this subject. This I submit to THE LIBRARY JOURNAL in the hope that space may be found for it in an early issue.

For research workers the Foundation recommends Bustamente, *The World Court*, (New York, Macmillan Co., 1925); Hudson, *The Permanent Court of International Justice*, (Harvard University Press, 1925); Series A, B, E and F of the publications issued by the Court itself. These series may be procured, in the

United States, from the World Peace Foundation, Boston.

Searchers for legal and historical data will be interested in: Harriman, *The Constitution at the Cross-roads*, (George H. Doran Co., 1925); Ralston, *International Arbitration from Athens to Locarno*, Part V. *The Permanent Court of International Justice*, (Stanford University Press, 1929); together with the source material named above, which the Court itself publishes.

When only the various aspects of United States participation in the Court are needed, the inquirer may be referred to: Jessup, *The United States and the World Court*, (World Peace Foundation, Boston, 1929); Keller & Hatvany, *The United States and the International Court*, (New York, T. Seltzer, 1925); Harriman, *The Constitution at the Cross-roads*, mentioned above.

Among the general works recommended are: Hill, *The Problem of a World Court*, (Longmans, Green & Co., 1927); Hudson, *The World Court, 1922-1929*, (Boston, World Peace Foundation, 1929); Fachiri, *The Permanent Court of International Justice*, (New York, Oxford University Press, 1925), together with Bustamente: *The World Court*, and Ralston, *International Arbitration from Athens to Locarno*, Part V, which were previously listed.

In view of the importance of an informed public opinion on this great matter it would seem to me worth while for libraries to inventory the resources they have concerning the World Court and add to these resources if the present supply is inadequate.

PAUL M. PAINE, Librarian,
Syracuse, N. Y., Public Library.

Index to Stories of Hymns

TWELVE books on the history and content of familiar hymns are conveniently analyzed in the *Index to Stories of Hymns* compiled by Alice M. Richardson, cataloger and in charge of the Departmental Library of Religious Education, Hartford Seminary Foundation Library (Yardley, Pa., F. S. Cook & Son, 1929. bds. 76p. 50c.). Titles only of hymns are listed. An interesting appendix suggests pictures that may be used with certain hymns—and a statue in the case of Augustus Saint Gaudens' "The Puritan," which illustrates "How Firm a Foundation." Wartburg Castle is a happy choice for Martin Luther's "Ein Feste Burg."

In the Library World

The Vollbehr Proffer and the Gutenberg Bible

IN A speech in the House of Representatives on Feb. 7, Representative Collins from Mississippi spoke on the Vollbehr Collection of Incunabula. He stated that the greatest single accession ever made to the Library of Congress was in 1867, when the historical library collected by Peter Force of Washington was purchased by an act of Congress for \$100,000. During the Spofford régime of the library the annual appropriation never exceeded \$23,000, but Dr. Putnam, on taking office, immediately saw the inadequacy of the funds supplied by Congress, and within four years the appropriation had been raised to \$100,000 per annum besides \$3,000 for the law library and \$1,500 for books for the Supreme Court. Ever since that time appropriations ranging from \$90,000 to \$105,000 annually have been made for the purchase of books and other material for the library. During Dr. Putnam's thirty years of incumbency the library has grown so rapidly that it numbers now approximately 4,000,000 books and pamphlets, over 1,000,000 maps, over 1,000,000 pieces of music, nearly 500,000 prints, uncounted manuscripts and transcripts estimated as well over 1,000,000 pieces, over 70,000 bound volumes of newspapers, and is surpassed in number of books and pamphlets only by the Bibliothèque Nationale, Paris. The annual accession of books and pamphlets is about 170,000. Congress has in no sense been small or stingy with its library. In several instances, however, mistakes have been made in not taking advantage of unusual offers of valuable collections. For example, Congress had an opportunity to buy the library of George Washington and failed to take advantage of the offer. Another example was the original manuscript of Washington's *Farewell Address*. But perhaps the greatest loss of all resulted in the failure of Congress to purchase the library of George Bancroft, consisting of 14,606 volumes of printed books, 486 volumes of manuscripts, and 4648 pamphlets, offered to the Government for \$75,000. The Congress now has an opportunity to add still further to the greatness and richness of its library. The great collection of incunabula—fifteenth century printed books—belonging to Dr. Otto H. F. Vollbehr of Berlin, a collection unequalled in America and incomparable in its completeness and the beauty of its specimens, can be secured for our library for \$1,500,000, about half its actual value. "Standing at the head of

this rich collection of 3000 cradle books," states Mr. Collins, "is the Gutenberg or 42-line *Bible* on vellum, aptly called the Incunabulum Incunabulorum—the greatest of all the incunabula. The *Bible*, which our Christian civilization has termed the book of books, is represented in this collection by the most perfect example of fifteenth-century printing, done on vellum or parchment."

How the Gutenberg Bible has risen in value is shown by the following chronological table of recorded prices for the only remaining specimens on vellum:

Gaignat sale, 1769 A. D.	\$400
MacCarthy sale, 1817 A. D.	1,192
Perkins sale, 1873 A. D.	16,190
Hoe sale, 1911 A. D.	50,000
St. Paul cloister sale, 1926 A. D.	305,000

A. Edward Newton, perhaps the greatest foremost American bibliophile, says in his *Greatest Book in the World* (1925): "If we can imagine, in the far-off future, a Gutenberg *Bible* coming up for sale, some wise rich man or richly endowed museum might gladly pay a million dollars for it."

Multi-Counter Saves Time

A VERY simple machine for making counts of all sorts, especially for the counting of circulation, is the Multi-counter, used in the Montclair, N. J., Free Public Library. It is capable of recording desired variations at a moment's notice. With a circulation of 500 cards, it saves between twenty and thirty minutes of an assistant's time. This machine is one frequently seen in cafeterias for counting the articles of food sold.

Severance Bequests

WESTERN RESERVE University has received by bequest the library of the late Prof. Allen Dudley Severance, containing about 1150 volumes. The books in this collection lie mainly in the field of Medieval History and the Protestant Reformation, extending from the times of Constantine to the French Revolution. Among the many valuable works in the collection are two incunabula, one of these being a fine copy of the first edition of the *Nuremberg Chronicle*. A fund of \$5,000 is also received by bequest of Professor Severance, the income of which is to be spent for the purchase of additional books for the collection.

Three Recent Bills Before Congress

I—Authorizing the Secretary of the Treasury to pay to the Joint Committee on the Library the sum of \$1,500,000 for the purchase of the collection of 3000 incunabula to be deposited in the Library of Congress and known as the Herbert Putnam collection of incunabula.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby authorized to pay to the Joint Committee on the Library, out of any money in the Treasury not otherwise appropriated, the sum of \$1,500,000 to be by them applied to the purchase of the collection of three thousand incunabula, now owned by Doctor Otto H. F. Vollbehr, of Berlin, Germany, and that said collection be deposited in the library of Congress and remain a part thereof, to be known as the Herbert Putnam collection of incunabula.

II—To provide books for the adult blind.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purpose of providing books for the adult blind there is hereby authorized to be appropriated annually to the Library of Congress, in addition to appropriations otherwise made to said Library, the sum of \$75,000, which sum shall be expended under the direction of the Librarian of Congress for the purchase and the publication of books for the blind, such books to be loaned to blind residents of the United States, including the several States, Territories, possessions, and the District of Columbia.

Sec. 2. In order to facilitate the prompt and economical circulation of such books among the blind people of the United States, the Librarian of Congress may arrange with such local public libraries as he may judge appropriate to serve as local or regional centers for the circulation of such books, under such conditions and regulations as he may prescribe. In the lending of such books preference shall at all times be given to the needs of blind persons who have been honorably discharged from the United States military or naval service.

III—To authorize the designation of depositories for public documents, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Superintendent of Documents is authorized and directed, under regulations prescribed by the Joint Committee on Printing, to designate as a depository of public documents any college, university, society, or public library applying therefore if he should upon investigation determine that such library has a legitimate need for such documents and adequate facilities to care for them and make them useful: *Provided*, That the Librarian of Congress is authorized on request to advise with the Superintendent of Documents as to whether or not the library making application fulfills the requirements above specified: *Provided further*, That the total number of depository libraries, exclusive of those mentioned in Section 4 of this Act, shall at no time exceed one thousand.

Sec. 2. Every library applying for designation as a depository under this Act shall specify the classes

of public documents it desires to receive; and the Superintendent of Documents is authorized to distribute to each such library the classes of documents desired, if he determines that such classes are consistent with the purposes of the library. He may also upon like application at any time change the classes of documents to be distributed to any depository library.

Sec. 3. Whenever the Superintendent of Documents has reason to believe that a depository library no longer conforms to the requirements for depository libraries provided in this Act, he is authorized, after thirty days' notice, to strike such library from the list of depositories of public documents: *Provided*, That no final action under this section shall be taken without the approval of the Librarian of Congress: *Provided further*, That no existing depository library shall be stricken from the list for a period of two years from the date of the passage of this Act, except as provided in Section 70 of the Act of Jan. 12, 1895.

Sec. 4. The limitations of this Act shall not apply to the following libraries:

- (a) State libraries;
- (b) Territorial libraries;
- (c) Libraries of land-grant colleges;
- (d) Libraries of executive departments in Washington, District of Columbia;
- (e) The United States Military Academy and the United States Naval Academy libraries;
- (f) The Alaska Historical Society and Museum Library, Juneau, Alaska;
- (g) The Philippine Library and Museum; and
- (h) The American Antiquarian Society Library, Worcester, Massachusetts.

Sec. 5. Upon request of the Superintendent of Documents, the Public Printer is hereby authorized and directed either to increase or diminish the number of copies of publications furnished for distribution to designated depositories, so that the number of copies delivered shall be equal to the number of libraries on the list.

Sec. 6. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to conduct any investigation authorized in this Act and to carry out the provisions of this Act.

Sec. 7. Nothing in this Act, except the limitation as to number of depository libraries, shall be construed as repealing or modifying any existing law providing for the designation of depositories other than as provided herein.

Sabbatical Leaves for Professional Workers

THE BOARD of Trustees of the Montclair Free Public Library voted to adopt at once the Grand Rapids Public Library's plan for sabbatical leaves for its professional workers. The plan reads as follows:

"Extra leaves of absence with pay are granted to full-time senior assistants, chiefs of departments, the assistant librarian, and the librarian once in five years, to consist of three months in addition to the annual vacation, for the sole purpose either of travel outside of the United States or of full-time study in some accredited institution.

"These leaves will be granted within the discretion of the librarian at such times as the public business will permit.

"Sabbatical leave may be divided up so that assistants may use their vacations and some unused sabbatical leave to go to summer sessions of a college or university for a series of years."

Book News

Book Club Selections

(for March)

AMERICAN BUSINESS BOOK LEAGUE

Wall Street: the Power Behind the Market, by Earl Sparling. Greenberg.

Important and mysterious figures who move behind the stock market, manipulate its fluctuations and supply the drama.

BOOK-OF-THE-MONTH CLUB

The Crusades, by Harold Lamb. Doubleday, Doran.

The colour story of the Crusaders presented through the deeds of the Conquerors at the Holy Land, by the author of *Ghengis Khan*.

Bound Newspapers for Sale

Iowa State Teachers' College, Cedar Falls, Iowa, has the following bound newspapers for sale:

Chicago Times Herald, April 22, 1898-Sept. 24, 1898, inc.

Chicago Herald Examiner, January, 1909-December, 1918, inc.

Chicago Tribune, January, 1919-July, 1929, inc.

Elusive Quotations

A column designed to assist in the location of quotations and poems which cannot be found through the usual channels of anthologies and books of reference. Send replies to THE LIBRARY JOURNAL.

N. Y. S. L.—Requests the origin and signification of:

"The goose honks (or hangs) high."

E. W. B.—Requests the author, title, and source of:

"Far, far away, like bells at evening pealing,
The voice of Jesus sounds over land and sea;
And laden souls by thousands meekly stealing,
King Shepherd, turn their weary steps to thee."

H. P. T.—Requests any information about the source of:

"And Greece arose sublimely free."

Book Selection on World Affairs, VI International Organization

The World Peace Foundation Mobilizes the Opinions of Experts Throughout the United States

Potter, Pitman B. *Introduction to the Study of International Organization*. (14 votes) Century. 1928. \$4.

"A clear, critical statement of present-day status of international organization."

Recommended as Advanced by Berdahl, Gatke; as Intermediate by Barnett, Goodrich, Mander, Russell, Stone; as Elementary by Friedrich, Hickok, Hill, Houghton, Potter, Van der Zee.

Buell, R. L. *International Relations*. (9 votes) Holt. 1929. \$5.

"A clean-cut analysis of the fundamental forces of international relations and their expression in international organization."

Recommended as Advanced by Berdahl, Gatke, Kirby; as Intermediate by Houghton, Mander; as Elementary by Jerome, Russell, Stone.

Moon, Parker T. *Imperialism and World Politics*. (7 votes) Macmillan. 1926. \$3.50.

"A splendid statement of the economic forces working through and behind present-day economic organizations."

Recommended as Advanced by Berdahl, Gatke, Kirby; as Intermediate by Houghton, Russell; as Elementary by Jerome, Stone.

Howard-Ellis, C. *Origin, Structure and Working of the League of Nations*. (6 votes) Houghton. 1928. \$7.

"Excellent work on an aspect of international organization which should be given particular attention."

Recommended as Advanced by Berdahl, Goodrich, Potter, Russell; as Intermediate by Kirby; as Elementary by Hill.

Hudson, Manley O. *Permanent Court of International Justice and the Question of American Participation*. (6 votes) Harvard. 1925. \$4.

Cooperating Professors: James D. Barnett, University of Oregon; Clarence A. Berdahl, University of Illinois; Herbert W. Briggs, Cornell University; Carl Joachim Friedrich, Harvard University; Robert Moulton Gatke, Willamette University; Leland M. Goodrich, Brown University; C. H. Hamlin, Atlantic Christian College; Charles T. Hickok, Coe College; Norman L. Hill, University of Nebraska; N. D. Houghton, University of Arizona; W. J. Jerome, Linfield College; Ethyn M. Kirby, Wells College; L. A. Mander, University of Washington; Pitman B. Potter, University of Wisconsin; Frank M. Russell, University of California; Donald L. Stone, Dartmouth College; Jacob Van der Zee, State University of Iowa.

In presenting this selected list of books on International Organization, the World Peace Foundation aims to offer a guide to the best available material as recommended by composite expert opinion. To the end that these titles be indeed the most worth while the Foundation asked a large number of college professors teaching in the various fields relating to international affairs to recommend the best available books—elementary, intermediate and advanced—in the realm of their particular interest. All of the titles included here were recommended by three or more different professors and are arranged in the order of votes received. It is hoped that not only libraries, but study groups and individuals as well will find this list useful. The complete list of all titles on International Organization recommended as a result of this survey will be sent upon request.

"A learned treatment of the World Court by one who is eminently qualified to do it."

Recommended as Advanced by Barnett, Goodrich, Houghton, Kirby, Stone, Van der Zee.

Bustamante y Sirvén, A. S. de. *World Court*. (5 votes) Macmillan. 1925. \$3.

"A most comprehensive treatment."

Recommended as Advanced by Houghton, Potter, Stone, Van der Zee; as Intermediate by Hill. Potter, P. B., and West, R. L. *International Civics*. (5 votes) Macmillan. 1927. \$1.60.

"A 'book of much merit, written particularly for intermediate or elementary purposes.'"

Recommended as Intermediate by Berdahl; as Elementary by Barnett, Goodrich, Hill, Houghton. Baker, P. J. N. *League of Nations at Work*. (4 votes) Harcourt. 1926. \$4.

"A valuable description."

Recommended as Advanced by Berdahl, Houghton; as Intermediate by Goodrich; as Elementary by Kirby.

Bowman, Isaiah. *New World*. (4 votes) World Book Corp. 1928. \$4.80.

"Comprehensive scientific treatment of the geography and economic foundations of international organization and cooperation."

Recommended as Advanced by Berdahl; as Intermediate by Potter, Russell; as Elementary by Stone.

Hershey, A. S. *Essentials of International Public Law and Organization*. (4 votes) Macmillan, 1927. \$4.75.

"Devoted primarily to international law, but essential to any library on international affairs."

Recommended as Intermediate by Mander; as Elementary by Houghton, Potter, Van der Zee.

Poole, D. C. *Conduct of Foreign Relations Under Modern Democratic Conditions*. (4 votes) Yale University Press. 1924. \$2.

"Excellent analysis of the problem of control of diplomacy."

Recommended as Advanced by Goodrich, Potter; as Intermediate by Friedrich, Stone.

Ralston, J. H. *Law and Procedure of International Tribunals*. (4 votes) Stanford University Press. 1926. \$5.

"Technical and scholarly treatise."

Recommended as Advanced by Hill, Houghton, Potter, Van der Zee.

Shotwell, J. T. *War as an Instrument of National Policy and Its Renunciation in the Pact of Paris*. (4 votes) Harcourt. 1929. \$3.50.

"The history and meaning of the Kellogg Pact by one who can speak with authority."

Recommended as Advanced by Barnett, Goodrich, Russell, Stone.

Buell, R. L., and others. *Europe: a History of*

Ten Years. (3 votes) Macmillan. 1928. \$2.50.

"A general survey of Europe since the Peace Treaty."

Recommended as Intermediate by Mander; as Elementary by Kirby, Stone.

Hughan, J. W. *Study of International Government.* (3 votes) Crowell. 1923. \$2.75.

"A useful book tracing international government historically."

Recommended as Elementary by Potter, Russell, Van der Zee.

Rappard, W. E. *International Relations as Viewed from Geneva.* (3 votes) Yale University Press. 1925. \$2.50.

"Stimulating study of the League of Nations in non-technical spirit."

Recommended as Advanced by Goodrich, Houghton; as Intermediate by Potter.

Satow, Sir E. *Guide to Diplomatic Practice.* 2 v. (3 votes) Longmans. 1922. \$14.

"Comprehensive and scholarly treatise."

Recommended as Advanced by Hill, Potter, Van der Zee.

Satow, Sir E. *International Congresses and Conferences.* (3 votes) Out of print.

"Deals with one phase of international organization frequently ignored."

Recommended as Advanced by Hill, Van der Zee; as Intermediate by Friedrich.

Williams, B. S. *State Security and the League of Nations.* (3 votes) Johns Hopkins. 1927. \$2.75.

"Technical and profound, but . . . very lucid."

Recommended as Advanced by Barnett, Goodrich, Potter.

The Library and Modern Education Discussed

THE TWENTIETH meeting of the Puget Sound Library Club occurred in Rhodes Brothers' Department Store on Friday, Dec. 27, 1929, with an attendance of sixty-six representing libraries. The program deviated from the usual one of this club in that the executive officer did not make the principal talk. The subject discussed was "The Influence of Modern Education on the Work of the Public Library." Mr. H. F. Hunt, Assistant Superintendent of the Tacoma Public Schools, discussed the subject from the point of view of an educator, and Mrs. Louretta C. George, in charge of the Teachers' Room of the Seattle Public Library, talked from the angle of the work in a large public library. Miss Mary Lytle, of the Ballard High School Library, Seattle, gave a concise account of the past performance and future aims of the Library Section of the Washington State Education Association.

The electing committee brought in the name of Rosamond T. McCready of Auburn for president for the next meeting, which will convene at her pleasure.

Pennsylvania Library Club

A MEETING of the Pennsylvania Library Club was held Monday evening, Feb. 10, in the Lecture Room of the Free Library, Logan Square. In the absence of the president, A. Edward Newton, Esq., Mr. Ashhurst took the chair and called the meeting to order.

Mr. Ashhurst then read a resolution submitted by the committee appointed by the president at the meeting on Nov. 18, 1929, expressing the deep regret of the members of the Club at the death of Dr. Thomas Lynch Montgomery.

In introducing the speaker of the evening, Mrs. Anna Robeson Burr, whose address was on "The Carson Collection; the Giver and the Gift," Mr. Ashhurst said he had hoped that Mr. Hampton L. Carson would have lived to tell the Club about his wonderful gift to the Free Library, but since Mr. Carson had died, Mrs. Burr was the person to tell of the collection because for many years she had been associated with Mr. Carson in working with his books. Slides were shown of portraits of Mr. Carson as a child and as an adult; of famous lawyers whose books are in the collection; with title-pages and a few letters and manuscripts showing signatures of early famous jurists. "Mr. Carson took great interest," said Mrs. Burr, "in books which had had distinguished owners." Mrs. Burr said that a possession like the Carson Collection places the Free Library in the same class as the famous Bodleian Library.

California School Library Association, Northern Section

THE CALIFORNIA School Library Association, Northern Section, held its annual meeting with the Library Section of the California Teachers' Association, Bay Section, in the University High School Library, Oakland, Dec. 18, 1929. Mr. Milton J. Ferguson, State librarian, gave a very interesting account of his trip to South Africa. He told of the libraries there, and of his contact with many interesting people. Mrs. Helen H. White, McClymonds High School, Oakland, who was fortunate in being in Rome at the time of the Library and Bibliographical Congress, gave us a very entertaining account of the meeting and of her experiences while there. Polly R. Hatch, Polytechnic High School, San Francisco, spoke on "The Highlights of the Santa Barbara Meeting," this being an account of the delightful joint meeting of the northern and southern sections held in the spring.

School Library News

Books Overdue and Lost

THE FOLLOWING data on overdue books and book losses, methods used in recovering books and some explanation as to why books disappear was compiled by Miss Faye I. Beebe, librarian of the Southeastern High School of Detroit, and presented in a paper before the Michigan Library Association, School Section, in October.

PROCEDURE REGARDING OVERDUES QUITE GENERAL IN HIGH SCHOOLS

1. A member of the student council is chairman of the house library committee, cooperating with the library staff. The council chooses, under the direction of the librarian, a student assistant for house duty each period during the day, whose work is:

- (a) To see that library notices are read.
- (b) To distribute overdue slips.
- (c) To check on library attendance.

2. Use of different colored notices sent out for first, second or third warning. Each color represents state of librarian's temper at time of sending. The third, or final notice (which is red) refuses class admittance to the student until overdue book is returned, replaced or paid for.

3. Overdue notices placed in class room teacher's box after program of student has been consulted. These notices are given out at beginning of a class period (Math., Hist., Eng.). Delinquents are supposed to report to the library some time during the day. Second and third notices are sent if necessary.

- (a) If all signs fail, report cards are withheld until book is returned.
- (b) Library blacklist.
- (c) Merit system (citizenship).

4. Councilors report names of delinquents to teachers in charge of grade room, study-hall or home-room.

5. Parents are notified by phone or a letter is sent from the principal as a last resort.

RECOVERY OF LOST BOOKS

1. The student pays for the overdue book which becomes lost.

- (a) If he pays cash, full value is not charged.
- (b) He may pay cash or work in the library at the rate of 25 cents an hour.
- (c) If he refuses to meet payment, the matter is placed in the hands of the house principal.

2. At the end of the semester, students having fines or overdue books out are not allowed to pass into the next grade.

3. All students graduating, transferring to another school, or merely checking out of school must receive an O. K. from the library before he is given his credentials. If a student leaves school without this contact with the library (which occasionally happens in the case of transfers to special adjustment schools or sudden withdrawal of a child) the following methods are used:

- (a) Send notice to home, or telephone.
- (b) Notify library of the school to which he has been transferred.
- (c) Ask main library if he has a public library card and, if he has, notify branch.

4. Some schools check up at the door at the end of each hour. Others use a "conscience barrel" under the stairway or in the hall, where the absent-minded student may return his collection.

5. In one school, outside of Michigan, they have practically closed shelves, and because of this claim to lose very few books.

6. At the end of the semester, students are required to make a general overhauling of lockers, brief cases and any other sort of stowaway place for books.

- (a) At this time lost treasures are returned and no fines charged. Occasionally some culprit escapes the moral issue this way; but on the whole, books returned in this manner are really involuntarily mislaid volumes.

7. A Detroit librarian made the suggestion that losses might be reduced if we could secure an individual whose duty would be to recover outstanding books for all high schools in a city.

8. The names of delinquents are given to the attendance officer, who in addition to his numerous duties must also act as a collector of books. Sometimes this works—it all depends on the personality of the attendance officer.

9. At the close of school in June, when the lockers are opened, books from the public library and from the high school library are collected.

CAUSES OF STUDENT'S BOOK LOSSES

1. Too little time in assignment.
2. Too much teacher insistence on one title.
3. Too much general pressure of work.
4. Too heavy a premium upon special individual accomplishment, which makes a "fellow" almost steal to win.
5. Not enough group usage.
6. Not enough previous study of library's resources before assignments.
7. Libraries used for parties outside of school hours.
8. No trained assistant; library in charge of student or teacher during noon hour of librarian.

PARTIAL SOLUTION TO PROBLEM

1. Combined study between faculty and librarian of the library's resources.
2. Best method of getting the most out of these resources.
3. Student participation in problem and solution.
4. Adherence to regulations once adopted.
5. Report of failures back to teacher, librarian and student group for reorganization.
6. Library in charge of trained librarian or assistant at all times.

Not Fiction

A RECENT publication of the Yale University Press, *The Kingdom of Saint James: A Narrative of the Mormons*, written by Milo M. Quaife, is a book which condenses the fruit of more than ten years' effort on the part of the author to re-create the history of Saint James and his kingdom, who had a very real existence in the Great Lakes region three-quarters of a century ago.

Among Librarians

Marriages

HERBERT B. ANSTAETT, Columbia '27, librarian of Franklin and Marshall College, Lancaster, Pa., was married on September 3, 1929, to Alice Fowler.

MARIAN R. CLARK, Wisconsin '24, was married to Henry L. Cecil on June 22.

VIARDA M. CLARK, Wisconsin '22, was married on June 22 to Horace A. Brubeck, and is making her home in New York City.

FANNIE COX, Wisconsin '14 and Columbia '28, instructor in Bibliography at the School of Library Science, Drexel Institute, was married in December to Gardner Hendrie and is living at 44 Forrest Ave., Morton, Delaware County, Pa.

BINGHAM R. DOWNS, Columbia '27, and Anna Elizabeth Crooks, Columbia '27, were married August 17, 1929, at Newark, Del. Mr. and Mrs. Downs are living in Waterville, Me., where Mr. Downs is librarian of Colby College.

MARGARET DUNHAM, Columbia '28, was married on May 1 to John Edsall.

ANNA GUSS, Columbia '28, was married to Obed Williamson at Omaha, Neb., on August 31. Mrs. Williamson is acting as assistant librarian at the Horace Mann School for Boys, New York City, while her husband is working for his doctor's degree at Teachers College, Columbia University.

VIRGINIA HINNERS, Wisconsin '20, was married on June 8 to Spencer B. Meredith. They are making their home in New York City.

MARJORIE KENNEDY, Columbia '28, assistant in the Catalog Department of Columbia University Library, was married to Roy H. Carpenter at Ossining, N. Y., on June 29.

FRANCES ELIZABETH NEWMAN, Columbia '27, was married on September 18, 1929, to Vernon Martin Albers, at Morganfield, Ky.

CHRISTINE ROSS, Wisconsin '26, was recently married to Dr. Frank McNamee, an eye and throat specialist. Their home is in Kamloops, British Columbia, where Mrs. McNamee is on the new library board, and, since there is no librarian, is doing most of that work and training volunteers as assistants.

GRACE M. STINGLY, Wisconsin '18, was married on June 29 to Walter W. Mason. Mrs. Mason is continuing her work as county librarian, Rochester, Ind.

IVA C. WATSON, N. Y. S. '24, was married on June 8, 1929, to Harry R. Davidson. Her new address is Edwardsville, Ill.

Public Libraries

SIRI ANDREWS, Wisconsin '16, instructor in children's work, University of Washington Library School, has added fresh laurels to her work as translator of Scandinavian children's books. Two from the Swedish are *Aunt Green*, *Aunt Brown and Aunt Lavender*, and *Olle's Ski Trip*, both published by Harper. One from the Norwegian is *Olaf, Lofoten Fisherman*, published by Longmans, Green.

GRACE W. ESTES, Wisconsin '16, joined the staff of the New York Public Library on Jan. 1. As her first assignment she is to have charge of the Columbia sub-branch, a little branch for adults only, in Columbia University's library building.

HAIL FISCHER, Wisconsin '25, who has been on the staff of the University of Wyoming Library, Laramie, since 1928, was made head cataloger on Dec. 1.

WILLIAM E. FOSTER, librarian of the Providence, R. I., Public Library for more than half a century, has been elected librarian emeritus and Clarence E. Sherman, present associate librarian, has been named librarian.

ALICE A. FROST, Wisconsin '19, joined the staff of the Seattle Public Library in September as assistant to the head of the Circulation Department.

HESTER THOMPSON, B.A. (British Columbia) and a graduate of Michigan Library Training School, is spending the year in the Reference Division of the Toronto Public Library in place of Miss Marie Tremaine, who has a Carnegie Scholarship at University College, London, England.

Special Libraries

FRANCES McMANUS, Drexel '29, is teaching library practice at the McCall Continuation School, Philadelphia, Pa.

MARY L. MARSHALL, Wisconsin '14, was elected treasurer of the Medical Library Association of America in September, 1929. She is now not only librarian of the Orleans Parish Medical Society Library, but also of the Tulane Medical School Library, jointly administered.

LEDA WADSWORTH, formerly with the Carnegie Public Library, Ogden, Utah, has accepted a position with the U. S. Department of Agriculture Library.

RUBY M. WILSON has recently joined the library staff of the U. S. Department of Agriculture. She was formerly employed in the Evansville Public Library, Evansville, Ind.

Opportunities

This column is open to librarians

United States Civil Service Examinations

The United States Civil Service Commission announces the following open competitive examinations:

Junior Librarian, \$2,000 a year.

Library Assistant, \$1,800 a year.

Junior Library Assistant, \$1,620 a year.

Minor Library Assistant, \$1,260 a year.

Library Aide, \$1,020 a year.

Applications for the above-named positions must be on file with the Civil Service Commission at Washington, D. C., not later than March 25.

The examinations are to fill vacancies in the Departmental Service, Washington, D. C., and in positions requiring similar qualifications.

The entrance salaries are as indicated above. Higher-salaried positions are filled through promotion.

Full information may be obtained from the United States Civil Service Commission, Washington, D. C., or the Secretary of the United States Civil Service Board of Examiners at the post office or custom-house in any city.

Wanted—Cataloger of at least five years' experience, two or three of which have been spent in cataloging serial publications. Salary, \$1,800-\$1,900. Apply to Baker Library, Graduate School of Business Administration, Harvard University.

Librarian with about twelve years' experience in public, normal school, and document work desires position. Loan or reference work preferred. C-14.

Young woman, college and library school graduate with a year's experience in a college library, desires position for summer. C-15.

Branch librarian, five years' experience, who holds a college and library school degree, wishes position in or near Washington, D. C. C-10.

Library school graduate, with almost four years' experience, wishes position as assistant in college library, preferably seminary and on western coast. C-11.

Library school graduate with public library experience and fifteen years' experience in a university library desires position in the Middle West. C-12.

Children's librarian with training and five years' experience would like position in or near Chicago. C-13.

College and library school graduate would like a position in a college or university library, beginning in June, in the Middle West or West. Cataloging preferred. Two years' experience. Present salary, \$1,800. B-12.

Experienced head cataloger in a college library desires change Aug. 15 or Sept. 1. B-17.

Cataloger, university and library school graduate, with fifteen years' experience in large libraries, desires

position of responsibility in college or reference library, or in large public library. Available July 1. B-18.

Trained librarian with eleven years' experience in college administrative work desires position in the East. Special interests, Education and Art. B-19.

Position wanted, as assistant in library, by lady with many years experience in work with children and some library school training. B-13.

Young woman, college and library school training, with teaching experience and three years' experience as librarian of public library, desires change. Either high school or public library position considered. B-14.

Librarian with college and library school training and over ten years' experience in the West and Middle West desires executive position in or near New York. B-15.

Woman with college and library school training and several years' experience desires change of position. Desires organizing, administration or college reference work. Southwest preferred. Available now. B-16.

List of Readers and Primers

A NEW LIST, "Readers and Primers, A Selection for Use in Children's Rooms of Public Libraries," published by A. L. A., has just made its appearance. It aims to be not an exhaustive list, but a fair sampling of books in the reader and primer class which may be used in guiding little children's informal reading. It was prepared by a committee of the Section for Library Work with Children, of which Elizabeth Briggs of the Cleveland Public Library is chairman. Single copies are offered for 10c. Quantity prices range from 45c. for 10 copies to \$2.25 per 100.

The Calendar

March 27—Western Massachusetts Library Club, annual meeting at City Library, Springfield.

April 4—American Library Institute at Hotel Chelsea, Atlantic City.

April 4-5—Pennsylvania Library Club and New Jersey Library Association, annual meeting at Hotel Chelsea, Atlantic City, N. J.

April 10-12—Tennessee Library Association, annual meeting at Cleveland.

April 21-22—Ontario Library Association, annual meeting.

May 1-2—Louisiana Library Association, annual meeting at Monroe, La.

May 12-15—American Association for Adult Education, fifth annual meeting at Edgewater Beach Hotel, Chicago, Ill.

June 13-18—Northeastern Library Convention will be held at Swampscott, Mass.

June 23-28—American Library Association, annual meeting at Biltmore Hotel, Los Angeles, Cal.

June 30-July 18—A rural library extension institute at the College of Agriculture, University of Wisconsin.

Oct. 20-22—Montana Library Association, annual meeting in Billings.

The authorized life of the great adventurous writer with many Conrad letters hitherto unpublished.

"A magnificent book and one which, because of its peculiar values, will not be superseded as long as interest in Joseph Conrad remains."—*Boston Transcript*.

"G. Jean-Aubry has put together a romantic narrative of Conrad's early years that moves swiftly, is vividly conceived and POSSESSES ALL OF THOSE QUALITIES THAT ARE DESIRABLE IN FIRST-RATE BIOGRAPHY."—*N. Y. Evening Post*.

"Conrad lives in these pages as a man, complex, moody, generous, inspired, puerile. We get a thousand and one snapshots of him and the effect in general is that of a very proud, inwardly passionate being, tortured by a genius of sensitiveness that gives him no rest."—*Spectator*.

John Fiske's Philosophical Works

Studies in Religion.
Darwinism and Other Essays.
Excursions of an Evolutionist.
The Unseen World; and Other Essays.

The second novel
by the author of
**JOSEPH AND
HIS BRETHREN**

DOWN IN THE VALLEY

By H. W. FREEMAN

When **JOSEPH AND HIS BRETHREN** was published last year, the critics and public read it with high enthusiasm because it brought a new appreciation of the richness and fragrance of the soil as it affected human life. This time, instead of writing of farmers, Mr. Freeman brings a city man to the country and shows its gradual yet powerful effect upon him. **DOWN IN THE VALLEY** is colorful, rapid, and charged with drama. \$2.50

A New Novel by the author of **CROUCHBACK**

MISS BARRETT'S ELOPEMENT

By C. LENANTON (CAROLA OMAN)

A charming novel. Its pages, delicately scented with nineteenth-century conceits and delightful Victorian inhibitions, possess a keen wit, a sparkling humor, and the gentlest satire. This Prince-and-Cinderella romance of Elizabeth Barrett and Robert Browning is a strange tale surely, and quite unbelievable but for the evidence of fact. \$2.50

STENDHAL

The Life of an Egoist

By RUDOLF KAYSER

A fine biography of the author of "The Red and the Black" and the French predecessor of the modern psychological writers. Reads as easily as any novel. \$3.00

A HISTORY OF MODERN CULTURE

By PRESERVED SMITH

Volume 1—The Great Renewal: 1543-1687
An accurate and variegated survey of the intellectual progress of Western culture as a whole. \$5.00

THE ORGANIZATION OF KNOWLEDGE AND THE SYSTEM OF THE SCIENCES

By HENRY EVELYN BLISS,

Associate Librarian, The College of the City of New York

Dean William F. Russell—voicing the opinion of our leading librarians, educators and scientists—acclaims Mr. Bliss's book as "a monumental contribution not only to library science but to the organization of our thought."

Librarians in particular will find this book invaluable, both professionally and educationally. In the words of H. L. Koopman, it is "fundamental to a true understanding to the arrangements of knowledge embodied in classification for libraries."

"Mr. Bliss achieves a work that is profound in conception and little short of monumental in scope. . . . The librarian, educator and student should no doubt find it an invaluable source of information and a stimulating evidence of scholarship. And by dint of his vigorous and lucid exposition and clear, direct style, Mr. Bliss may well gain the attentive interest of the intelligent layman as well."—*The New York Times*. \$5.00

No library can afford not to buy this book.

Forthcoming Issues of THE LIBRARY JOURNAL

* April first will be a Small Libraries Number with an unusual collection of articles. Margery Quigley of the Montclair Public Library, N. J., will tell about the problems of the Suburban Library, a small library with problems of its own; Marian P. Green will take up problems of the Small Library in California; and Georgia MacAfee will face the problem from the Middle West and Ohio. This promises to be an interesting issue!

* The April fifteen issue will cover numerous schemes for Vacation Reading for Children from Charlotte, N. C., to Little Rock, Arkansas, and Schenectady, N. Y. Vacation Reading Plans from other libraries will be accepted up until April first, the closing date for this number.

* LIBRARY JOURNAL readers may look forward to special numbers in the near future on Business and Special Libraries, Budgets, County Library Work, Publicity and many other features. Let us know which numbers you are most interested in; it will help us make future plans.

B. E. W.

Your Children's Room!

Let it develop your
junior readers in-
to *lifelong* patrons

Every librarian realizes that the great libraries of tomorrow will be those that make their Children's Rooms most attractive and useful to junior readers today.

Education focuses attention on libraries

The modern trend in education is conducive to building up a more useful Children's Room. More and more, classroom lessons must be supplemented with after-school reading. Again and again text book authors are referring pupils to outside sources of information. And with every hour of the school day taken up, pupils find that library reference after school hours or on Saturdays is essential to class-room progress.

Compton's will attract the junior reader

Compton's is the favored reference work of text book authors. Note the partial list of approved text books whose authors again and again refer the student to "Comptons." With this constant reminder before them daily in their class-room work, it is natural that students should ask for Compton's when they come to the library. And if you have a set available in your Children's Room it will aid greatly in attracting and retaining the patronage of the junior reader throughout the entire school life. Thus you are encouraging the library habit—and building a library interest that will be lifelong.

Librarian endorsement

Compton's has the enthusiastic endorsement of librarians in the thousands of libraries now using it. And the comment of Isadore Gilbert Mudge (see 5th Edition New Guide to Reference Books) should recommend it highly to those librarians unacquainted with its usefulness. Sample pages of our newly revised 12th edition gladly sent on request.

F. E. COMPTON & COMPANY, PUBLISHERS
Compton Building, 1000 N. Dearborn Street, Chicago

Compton's is the favored reference work of textbook authors

Space permits the listing of but a few. Note that no matter what the subject may be, Compton's is the reference work.

COMMUNITY AND VOCATIONAL CIVICS

by Howard Copeland Hill
The author gives 41 specific references to Compton's

LITERATURE AND LIVING

by Lyman and Hill
In book 2 there are 54 references to Compton's and 58 in Book 3.

LABORATORY MANUAL FOR FIRST COURSE IN BOTANY

by Arthur T. Evans
Compton's is the only encyclopedia mentioned in this text book. The author says: "This work will be found of inestimable value to the young and should be available in every school library. It will be found valuable in many other subjects."

LITERATURE IN THE JUNIOR HIGH SCHOOL

ENCYCLOPEDIA

THE LIBRARY JOURNAL

~ MARCH 15, 1930 ~

Contemporary Italian Literature

By Professor Giuseppe Prezzolini

Casa Italiana, Columbia University

*Italy Publishes About Ten Thousand Books Each Year and
Unexpurgated Translations of Almost Any of the Con-
temporary Well-Known Authors Are Obtainable*

IN SPEAKING of the Italian books of today, I shall bear in mind, of course, some of the most marked differences between the Italian and the American publics—I ought to say between Latin and Anglo-Saxon countries. Perhaps one of the most important characteristics of the two publics is the different ways in which they allow the writer of novels or short stories to express himself about sex and love affairs. I do not agree with those who think that because the Latin writers are very free in their realistic descriptions and in the use of picturesque details that the Latin countries are less moral than the Anglo Saxons. But, I accept the difference as such and I will warn you against the books which might seem shocking to American readers. Meanwhile, may I point out that this difference is gradually disappearing. I have read some recent American novels which are very sincere about the problem which earlier represented so important a difference between the Latin and the Anglo-Saxon literature.

I shall not encumber our road with Italian authors who have an international fame and are probably well known by you. In a list published by an eminent American librarian containing the "thousand best books of our time"—or I should perhaps suggest the "thousand books best known in America in our time"—I have found seven Italian authors: D'Annunzio, Croce, Fogazzaro, Papini, Benelli, Ferrero and Sabatini. The latter does not really belong to Italian literature, being an author our romantic old ladies read translated from the English and printed in our cheap Sunday magazines.

I will not dwell long on these names, but

merely remind you that D'Annunzio is still enjoying a prolonged vacation, Fogazzaro died some years ago, Benelli does not produce anything of importance, Ferrero has passed from history to the novel, and this novel is a criminal story of poisons painted on the background of the beginning of the Kingdom of Italy, that has been translated into English and already published in America under the title of *The Seven Vices*. Papini, the youngest of all, has just published a *Life of Saint Augustine*, which will arouse much interest because it is the life of a convert told by a convert, and comes at a time when the Christian world is celebrating the Fifteenth Centenary of the death of St. Augustine. Croce is always in his full strength, and produces one and even two books a year. The last two are on the Baroque Period and on Contemporary Italy. I should like to give you some personal advice on Italian writers without a strict limitation of age and of school. I shall put next to a veteran of letters, a beardless beginner, and next to a fantastic writer, a realistic one.

Do you know the novels and short stories of Francesco Chiesa? They seem written for boys between the ages of sixteen and twenty. He is also known to us as a poet, but I do not like his poetry—I find more poetry in his prose than in his verses. He is a candid, simple writer, a very rare example in a literature as complicated as the modern Italian. This may perhaps be explained by the fact that he lives in a country Italian by language and tradition but politically separated from Italy—in Canton Ticino—the Italian part of the Swiss Federation. *Tempo di Marzo*, *Racconti Puerili*, *Villadorna* (Marchwinds, stories of children),

excellent books which you may put in the hands of any person, are simple stories of young country folk, and have the same flavor of the forests and meadows as you find in the Austrian writer, Rosegger.

Marino Moretti is a novelist who may be favored by people capable of emotions, Christian at heart and not inclined to an optimistic view of human life. He pictures a world of poor creatures chosen by Destiny to be unsuccessful and unhappy, poor women servants, orphans, stutterers, albinos, or even morons. Marino Moretti has now a large public in Italy, conquered, inch by inch, without using any means of publicity. He is the most modest author I know. *The Throne of the Poor*, *The Isle of Love*, *The Pure on Earth*, *My Mother*, are the best of his novels.

We have in Italy, as in America, our best sellers and, may I add, that in Italy as in America, they are not always the best from the point of view of art. Salvatore Gotta has a large series of novels which take their inspiration from aristocratic ideals. The best is the first—*The Restless Son*. Virgilio Brocchi has also a series of novels, taking their inspiration from democratic ideals. They could be better writers, but the public is interested in their plots and in their stories of love and social struggle developed on the background of contemporary bourgeois life. They are liked by the ruling class, which finds in them the same problems and the same manners of everyday life. Fausto Maria Martini is a remarkable writer, and I can recommend to you his novel, *Il Cuore Che Mi Hai Dato* (The Heart Thou Gavest Me), and a volume of stories, *I Volti del Figlio* (Childlife). He is a keen observer of the intimate life of man, and likes to study such sentiments as the jealousy of a father viewed by the son, and flourishing again in the son as soon as he marries. Of a different artistic value are the tales of Calzini, where history is an opportunity to tell love affairs, and of Milanese, where love affairs have a background of the war or adventures on the seas. The stories of Borgese are directed to make sensible an intimate world. His most important novel, *Rubé*, an outstanding portrayal of the after-war Italy, has been translated and published in America. Humorous and cold in his jesting is Massimo Bontempelli, with his novel, *The Son of Two Mothers*. He is, in a certain sense, a grandson of Edgar Allan Poe.

Among the young writers, the best novel has been written by Riccardo Bacchelli, *Il Diavolo al Ponte Lungo* (The Devil at Ponte Lungo). It is an amusing history of the anarchist Bakounin in Bologna about 1880, has been translated into English and is worth reading. Cam-

panile has had great success with his funny books, in reality not novels, but which have the titles of novels, as *Just What Is Love?* and *Boys, Hold Your Horses*. To give you an idea of what these writings are I find no better example than the comic section of certain American newspapers.

We have also feminine writers and poets, such as Ada Negri or Sibilla Aleramo. It has been asked why Italian feminine poets do not write about maternity, and it is a true observation. They prefer love or, what is less natural, they display in their books an extraordinary desire for literary success. But you certainly wish to hear something about novels written by women. We have not as many women novelists as has America or England. One of the oldest and most illustrious is Grazia Deledda, who last year received the Nobel Prize. She continues to produce a novel each year, not extraordinary but always bearing some outstanding feature. She has a religious sentiment of life and is an honest writer. I may also enumerate Carola Prosperi, Bianca de Mai, Milly Dandolo, Maria di Borio, Barbara Allason. It seems to me that the vision of life that these women writers present to us is generally sad. The heroines depicted are, as a rule, poor creatures, and the men are particularly cruel to them. The last discovery in feminine literature is Gianna Manzini, who has received very favorable criticism with her novel *Il Tempo D'Amare* (Time to Love).

And for children—literature for children has developed very much in Italy. Each year we publish many books for boys and girls. But, after the immortal *Pinocchio* of Collodi, I believe that only one or two other important books for young people were born in Italy. Luigi Bertelli, whose pen name was "Vamba," wrote *Il Giornalino di Gran Burrasca* (The Diary of Buster Brown) and *Ciondolino*, two first-rate books for boys. I prefer to mention only this one name and leave the matter to two very good guides, Miss Vincenzina Battistelli and Mr. Olindo Giacobbe, who have written two good books on the subject. You may find in them all the information you desire. I wish only to advise you to guard yourselves against Salgari, an author widely read by young people, who wrote numberless novels very like those of Nat Pinkerton and cheap books of adventures.

We have not a large production of biographies. Some publishing houses, such as Barbera, Paravia, Alpes, have a collection of biographies especially for schools. I think that the best biography published during the last year is that of *Masaniello*, by Michelangelo Schipa, Professor of History at the University of

Naples. It is the biography of a notorious and romantic fishmonger to whom the legend ascribed the merit of having directed during some months a revolution of the population of Naples against the Spaniards. This biography reduces to nothing the figure of Masaniello and shows behind him a man of the middle classes—a lawyer, the true spirit of the rebellion. This work is the result of thirty years of research in the archives of Naples, but you hardly find a document in it. You can read it as a novel and at the same time you know that it is not a novel.

The historical production of Italy is very large, but I cannot remember more than two works useful and interesting for the average reader—the two histories of contemporary Italy written by two men of great learning and ability from two entirely different points of view—*L'Italia in Cammino* (Italy Advancing), by Giacchino Volpe, the historian and now general secretary of the Italian Academy, and the *Storia D'Italia da 1870 a 1914* (History of Italy from 1870 to 1914), by the philosopher Benedetto Croce. The first takes a nationalistic and fascist point of view, and the second a liberal and democratic point of view. A very living book on the United States and especially on the cultural life of the United States is *Vita Americana* (American Life), written by Countess Irene di Robilant, a young lady who has resided in your country for ten years and who knows the universities, publishing houses, musical, scientific and literary activities of North America, as well or even better than many Americans.

I think the best work done by Italians within the last twenty-five years is in the philosophical field and in literary criticism. But I believe that the important books which I might enumerate would be of no interest for the general public. I feel certain, however, that you would like to know if we have books on the War. We have many of them, but they do not present the aspects of the war which you find in the most renowned French, German and English books. We have nothing similar to *Under Fire*, by Barbusse, and to *All Quiet on the Western Front*, by Remarque. Books on war in Italy have presented not only the gruesome aspect of this period but also the bright or gay aspects of war. Of this last kind there is a very fine book by Paolo Monelli, *War Is Beautiful But Inconvenient*, illustrated by amusing cartoons. Vivid descriptions of the life of our troops can be found in memoirs of war published by men who were writers before the war, such as those of Soffici, of Baldini, etc.

The present time is not rich in poetry. No great personality has appeared since Carducci,

D'Annunzio and Pascoli. The modern poets prefer poetical prose and free verse to regular poems. I will but mention Umberto Saba, fresh and musical, and Angelo Silvio Novaro, who has written some poems liked mostly by children and popular in schools throughout Italy. If you want an anthology of the contemporary poets and writers you may find a very suitable one compiled by Papini and Pancrazi, *Poeti d'Oggi* (Poets of Today). You must remember, however, that part of Italian poetry is dialectal. We have good poets in the Neapolitan, Roman and Milanese dialects. I would call your attention to the fact that this year the first complete edition of the poems in Milanese dialect of Carlo Porta has been published—a century after the death of the poet, and that each year we see new reprints of the poems in Roman dialect by Pascarella, *The Discovery of America*, and new reprints of Salvatore di Giacomo, the most famous Neapolitan poet who has been made member of the Italian Academy. I have noted in book reviews that six anthologies of dialectal poetry have been published during this year.

And now I come to the last generation. Here are perhaps the coming men of tomorrow. Some of these have already made a solemn arrival in Italian Letters, having won literary prizes which have been introduced in Italy recently. For instance, we have prizes given by the publishing house Mondadori, another by a club of journalists in Milan which derives its name from the restaurant in which the reunions take place, Bagutta, another of thirty booksellers, etc. Giovanni Comisso is a troubled and sensitive young man, who has given some highly appreciated stories of the time he spent with D'Annunzio in Fiume and on the Adriatic Sea and with its fishermen. The titles of his books are *Al Vento dell'Adriatico* (Cruising the Adriatic) and *Gente di Mare* (Seafaring people). Mario Gromo has won a prize with his *Sentimental Guide of Turin*. G. B. Angioletti was also praised for his *Il Giorno del Giudizio* (Day of Judgment), a little book of fantastic and modernistic tales which might recall to our mind the pamphlets of Swift—only the latter being more sarcastic and bitter. Other writers who seem to promise more in the future are Bonaventura Tecchi, who has a very fine, delicate book of stories, *Il Vento fra le Case* (The Wind Through the House Tops); Arturo Loria, who writes dark, deep and original stories of brigands and adventurers, *Il Cieco e la Bellona*; Orio Vergani, who has given us the story of a negro boxer from the blazing sun of Africa to the radiant electric lights of the ring, recently translated into English as *Poor Nigger*; Corrado Alvaro, who likes the

light and dark souls, sometimes in a Freudian way, and writes in a compact style reminding one of some German novelist, and Delfino Cinelli, who still carries on the traditions of Tuscan story tellers with his pictures of country life, and humorous and savage mockeries of deceived husbands. The greatest success among the new writers has been that of Moravia, *Gli Indifferenti*—I might translate The Devil May Care. It is a cruel novel, describing a corrupt family devoid of all faith, of all moral ruling, and of all feeling of human dignity. I hear that the book is to be published in America and with some large cuts.

I have come to the end of my rapid journey through Italian books of today. I know that I could continue glancing to the right and to the left of our racing car, and not only have I probably forgotten books of the same value as those I have mentioned, but there are other fields of intellectual activity which I have left aside, for instance, science, history of art.

Italy publishes about ten thousand books each

year, although the official bulletin advertises about six thousand, and among these a certain number are translations. You may read good and unexpurgated translations of almost any of the contemporary well-known authors of Russia, Poland, Scandinavia, Great Britain, Germany, France, Spain and South America. Jack London has had a great success in Italy, where Poe, Walt Whitman, Bret Harte, Cooper and Hawthorne, or, to pass to another field, Emerson and William James, were already popular. Collection of classics is going on, and one of much interest for you is that on foreign classics like Shakespeare, Byron, Shelley, with Italian translations next to the English text. A splendid encyclopedia, splendid for its illustrations and very valuable for its text, is published under the direction of the philosopher Giovanni Gentile. Specimens of all these books and collections you may find in the Exhibit of Italian books in New York. I am personally at the disposal of those librarians who desire some more detailed information.

School Libraries

In Planning the School Library the Knowledge and Skill of an Experienced Architect Should Be Combined with That of the Librarian in Order to Insure a Result That Is Practical, Economical, and Artistic

By Edward L. Tilton

Architect

LIBRARIES in school buildings have developed rapidly since the "library idea" has permeated the brains of boards of education, with a resultant realization that a student obtains greater benefit from original research among reference books than from a textbook containing the condensed results of another's researches.

Libraries are being installed in the lower grade schools as well as in the junior and senior high schools, but unfortunately, when the building is planned, sufficient space is not always allocated to, nor properly arranged for, library purposes. Too often only classroom units are provided which are not suitably proportioned for library requirements.

Location

The library reading room and accessories should be centrally located with regard to the school activities, and readily accessible from the study hall, either by direct contact or by a special passageway, so that students may go to the library from study hall without the complication of permits or passes. Should the plan, however, preclude such an arrangement, the

library should be located as near as possible to the study hall. The library should not be used as a study hall nor for recitation purposes, nor for meetings that might interfere with its necessary quiet.

Light

Ample day lighting is assured when the glass area of window and ceiling sash equals twenty per centum (20 per cent) of the floor area. Ceiling sash should be supplementary only, to light spaces remote from windows. They collect dust and require frequent cleaning to maintain efficiency. Furthermore, they are prone to overheat the room beneath, and the skylights above them are apt to leak. Under certain conditions, monitor or clerestory windows may be provided to light the central portions of the room.

The top of the window sash should extend to within a few inches of the ceiling, and the light therefrom should be available in the room for a distance equal approximately to twice the height of the head of the sash from the floor. If the window head is 13 ft. above the floor,

For ceiling sash the market offers collapsible screens, like venetian blinds, made of slats covered with fabric and operated with cords from the floor. Artificial lighting is most effective and economical from ceiling fixtures depending to within 12 ft. above the floor, and offering direct light from a series of small wattage, opalescent or ground lamps in each fixture. Where the ceiling is ordinary class-

Table lights are not desirable when the general illumination is sufficient, but base plugs

DIAGRAM OF SUGGESTED SCHOOL LIBRARY
EDWARD L. TILTON

may well be installed to admit stand lamps and easy chairs, whereby to enhance the room's comfort and inviting aspect. Should a portable vacuum cleaner be used, base plugs will also be required for it, and possibly for a stereopticon, in one of the class rooms, although it is of questionable propriety in a reading room. The panel or gang switches which control the ceiling lights of the reading room should be near the charging desk. At times these have been built in the charging desk. Individual switches will be required in each of the smaller rooms. The stacks should be lighted by 25 or 40-watt lamps from outlets on a level with the top of the stack tier, and spaced six feet apart in each gangway. Switches should be placed at the ends of the stacks to control the lights.

Areas

The following areas are suggested as a basis; they may be advantageously increased where conditions permit.

The space allowed for the reading room should suffice to seat simultaneously ten (10) per cent of the student body.

The shelving and stack should together accommodate 100 volumes per reader.

One or more small conference rooms should be provided, separated from the reading room by glazed partitions, with the sash extended to the ceiling from a height of three or four feet above the floor.

A small classroom for instruction in library use and purposes may be profitably included. If space, however, precludes, one of the conference rooms may be used.

A small workroom should be located near the charging desk. The charging desk, with ample space about it, should be strategically located to command the entrance to the room and to a room for brief case racks and squad lockers.

A stackroom should be easily accessible from the charging desk. Its size may be computed on a basis of 20 volumes to each square foot of floor space, with the stacks seven shelves high and spaced four feet on centers.

Where free standing double shelving is ranged like stacks in the reading room, to be used as "open shelves," more space between them is desirable.

A teachers' room may well be provided, but, if impossible, an alcove or space adjacent to the main reading room and separated therefrom by glazed partitions.

Space for exhibit cases is desirable.

The area of the reading room should allow a minimum of 20 sq. ft. per reader's seat (25 sq. ft. is better), based on the use of tables $7\frac{1}{2}$ ft. long by 36 in. wide, and

six chairs to a table. Under compelling conditions, an additional chair may be temporarily added at each end of a table, but this crowds uncomfortably, since each reader should have 30 in. by half the width (18 in.) of the table.

Standard 3 ft. x 5 ft. tables with four seats each will require approximately 25 sq. ft. per reader. Round tables introduced sparingly add to the interest of the room. The rectangular tables should be placed at right angles to the windowed walls.

There should be $4\frac{1}{2}$ ft. minimum between tables and a similar distance between tables and walls. Five feet is preferable where condensing is not obligatory.

For every hundred readers there should be in the midst of the tables a desk for the librarian or assistant where the students may apply for information, and from which the occupant may supervise that portion of the room.

Space will be required for miscellaneous pieces of furniture: Atlas and dictionary stands, filing cases for prints, bulletin boards, magazine racks, possible exhibit cases, book display racks, and near the charging desk catalog trays.

Given the number of students, for which a new school building is being planned, it should be possible to estimate the space required for an efficient library department.

For example, with a student body of 3000, 10 per centum or 300 readers' seats should be provided at a minimum of 20 sq. ft. each, or 6000 sq. ft. for the reading room.

Allow an equal amount, or a total of 12,000 sq. ft., to accommodate the entire library department.

The accompanying diagram illustrates the above remarks. Light is assumed to enter from courts on both sides and the ceiling to be only 13 ft. high.

The reading room contains 48 tables with 6 seats each, or 288, plus 3 round tables at 4 each, making 12 more, or a total of 300 readers, which at 20 sq. ft. requires 6000 sq. ft. The dimensions shown are 72 ft. by $81\frac{1}{2}$, or 5868 sq. ft., which would permit of a slight increase if desired.

The wall shelving is assumed to be 5 ft. or five shelves high, which allows approximately $7\frac{1}{2}$ ft. height for windows with a 13-ft. ceiling. The spaces to be lighted by windows are each 72 ft. by $26\frac{1}{2}$ ft., or 1908 sq. ft., of which 20 per cent equals 380 sq. ft. as the glass area required. With the sash above the shelving $7\frac{1}{2}$ ft. high, there should be 50 linear ft., or 10 windows, each 5 ft. wide, as shown on the diagram.

The remainder of the library department is

contained in 73 by 8½ ft., or 5959 sq. ft., making a grand total of less than 12,000 sq. ft.

The wall shelving below the windows, 87 linear ft., or for both sides 174 ft., by 5 shelves high equals..... 870 ft.

Wall shelving at end wall 75 ft. by 5 shelves 375 ft.

Free standing low shelving in room 144 ft. by 3 shelves..... 432 ft.

Free standing higher shelving, 240 ft. by 5 shelves 1200 ft.

Stackroom shelving, 1 tier high, 261 ft. by 7 shelves 1827 ft.

Conference and class and teachers' rooms, 126 ft. by 7 shelves 882 ft.

Total 5586 ft.
5586 linear ft. at 8 volumes equals 44,688 volumes.

This total exceeds the limit imposed by our thesis, and proves that the allowance is ample for future accessions.

The diagram is self-explanatory with regard to the other elements, viz., conference, class, teachers, work, stack and locker rooms; charging desk, catalog and filing cases; dictionary and atlas stands; display racks, exhibition cases and bulletin boards.

Finishes

For furniture and shelving, quartered oak withstands hard usage better than other woods.

The manufacturers of standard library equipment have stock finishes in light and dark shades, from which it is well to select, in behalf of economy, rather than to order a special stain.

The ceiling and walls should be finished in light, pleasing tones selected by a color artist for harmonious effect.

The floors should be covered with linoleum as the cheapest resilient material to deaden sound. Color subject to selection and to harmonize with walls.

Shelving

Where shelving is to be placed against walls, all projections such as bases and chair rails should be omitted in order to avoid the needless expense of removing them when the shelving is installed. This remark applies also to thermostats, switch plates and similar constructions which should be located above the line of the shelving.

The shelving is an important element in the library, and with the rest of the equipment should be intrusted only to manufacturers experienced in that line of cabinet work.

For school libraries, the wall shelving may well be limited to five shelves in height at 11 in. apart on centers, which with a 4-in. high

base and 2-in. cornice gives a total height of 61 in. (5 ft. 1 in.).

A base of marbled rubber, like the U. S. Rubber Co. No. T 52, or similar, is not impaired, as a wood base is, by the onslaughts of the cleaners' mops. Where heating is installed back of the shelving, the base should be open to admit air. In such cases the shelving should have framed-up backs of yellow poplar with flush panels, insulated from the heat by asbestos ½-in. thick sheets, upon which ½-in. thick wood strips spaced 16 in. apart serves to support bright tin or galvanized iron sheets and provides an air space between the asbestos and the metal.

In general, the shelves should be of uniform length, preferably 36 in., from center to center of uprights. Where odd lengths are necessary to fill spaces, they should be conspicuously shorter. The shelves should be of yellow poplar with an outer edging of the wood (preferably quartered oak) used for the finish. A groove for label holders should be provided. The ends of the cases where exposed should be 1½ in. thick, framed up with flush panels. The partitions, ¾ in. thick, should, together with the ends, have holes bored 1 in. apart vertically (staggered on opposite sides to avoid penetrating the uprights) near the front and rear to take shelf holders, which, in turn, should be countersunk in the under side of the shelves.

The depth of shelves in general should be 8 in. with a modicum 10 in. deep for reference books. A few sections might have lockable glazed doors for books under special control.

In school libraries, newspapers may generally be ignored, but magazines must be cared for, and where floor space precludes free standing racks the magazines may be accommodated in some of the sections on sloping or flat shelves. Such sections should be 12 in. deep, which admits of 13-in. sloping shelves. An alternating arrangement of sloping and flat shelves is convenient, the former for the current magazines and the latter for the antecedents. The bottom display shelf should be 24 in. above the floor, and the space below can be utilized as cupboards, wherein to collect the magazines before binding.

If a few newspapers are to be cared for, they may be in a section of shelving on holders supported on cleats running diagonally from rear top to bottom front of the sectional partitions.

Except where insulation is required against heat, the wall shelving needs no wood backs, but the plaster back of the cases may be painted to harmonize with the wood.

Free standing shelving is usually double

faced, and needs no longitudinal division. The previous remarks on shelving are applicable.

Stackroom shelves may be either of wood or metal if only one tier high, but necessarily of metal if more than one. There are several makes on the market.

Bulletin Boards

These are important adjuncts to the library, and may be placed against piers, as shown on the diagram, or on free wall spaces near the entrances. They should be properly framed

together and covered with cork carpet or similar material to permit the use of thumb tacks. Where money is not lacking, attractively glazed and illuminated bulletins may be recessed on the walls.

General

The limits of a JOURNAL article preclude detailed descriptions of the equipment indicated on the diagram, but the School Board should invoke the combined knowledge and skill of experienced architect and librarian to insure a result, practical, economical and artistic.

University of Oklahoma Library

AN INSPIRATION to students, a shrine for the booklover who finds romance on the pages produced by the pioneer printers hundreds of years ago, and throughout a beautiful example of the finest type of Collegiate Gothic architecture in America—this is the University of Oklahoma's new library, which was dedicated Feb. 20-22. Four features of the building are of unusual interest: the brick and stone exterior, the stack rooms which provide space for 300,000 volumes, the large reading room, and the "treasure room," where the university's priceless collection of ancient books and manuscripts is kept.

No effort has been spared in producing conditions conducive to study. Following the style of many of the ancient centers of learning, and an almost exact replica of the architecture of Christ College, Oxford, the building is constructed of white stone and red brick. Twin towers, surmounted by frowning gargoyles, guard the entrance, and

beneath these, tall Gothic portals of stone hold heavy oak doors. Throughout the building the panelling is of heavy, carved oak. Four leather-covered, sound-proof doors open into the reading room, which extends the full length of the building, and at each end has 30-ft. bay win-

dows of carved Bedford stone. Narrow windows of the same height give a maximum of light, while for night illumination fourteen 500-candlepower bulbs hang in medieval lamps from the ceiling beams. Each of these ceiling beams, 40 ft. above the floor, terminates in a carved oak figure. The reading room, which is lined with bookshelves, is furnished with heavy oak reading tables and comfortable chairs.

The new library structure stands as one of the finest examples of Collegiate Gothic architecture in the

Twin Towers over entrance of University of Oklahoma Library, showing the details of stone carving

United States. Its glass-floored steel stacks, which extend seven stories from basement floor to roof, provide shelves for 300,000

volumes, and its reading room, guarded by carved oak figures on the arched beams 40 ft. above the floor, is only slightly smaller than the reading room in the Library of Congress. Six carloads of steel were used in the 15,000 shelves in the stacks, and more than a

The University of Oklahoma Library. Dedicated Feb. 20-22, 1930

mile of metal conduit, protecting five miles of electrical wires, was used in wiring the stacks. Nine thousand pounds of special putty were used in cementing the 110,000 pounds of glass flooring in the stack rooms.

Ten rooms are given over to research and seminar study, offering concentrated facilities for students working toward masters' and doctors' degrees at the university. This need is apparent, since more than 160 students were

Delivery Desk and part of seven-story stacks

enrolled in the summer session courses working toward advanced degrees in history and English alone, and 139 students were taking advanced courses in education.

The League of Nations Publications A Simplified Treatment

By Thomas Franklin Currier

Assistant Librarian, Harvard College Library

A SIMPLIFIED arrangement of the publications of the League of Nations is being experimented with at the Harvard Library and may interest those librarians who deem it advisable to keep the collection of League publications together and who begrudge the expense of adopting one of the several classified plans that are being worked out at various libraries.

The Harvard plan is patterned after the method which has for a century or more been followed by the British government in collecting and issuing its Parliamentary Papers. As is well known to those who use the British documents in the large libraries, each year's product is issued as a collection of uniformly bound volumes, to which is added an index volume. Each volume has a title page and a contents sheet showing the documents contained in the volume. Following this pattern, Harvard has divided by years such League documents as bear the sales number in the lower right corner, and has bound up volumes

in which the documents are arranged under each year in order of this sales number. A typical binder's title, accordingly, may read: "League of Nations. Publications. 1927. III. No. 27-70." Such unnumbered publications as we receive are assigned a class number (I to XIII) and bound at the end of the class.

The objection has been made (with some degree of justice) that, except for the class numeral, the sales number has no significance and, therefore, should not be used as a guide to arrangement. This is partly true, but what will you? The librarian must have a means of placing and identifying a given piece, and here is a means ready to his hand by which he can record and assign to its place each item on receipt, without delay, and with a minimum expenditure of effort. The expense of handling the League documents is already putting too great a strain on library budgets. It has been proposed, in order to produce a better arrangement, to wait until the documents are all issued for a given year and then to

classify and bind the year's product. This necessitates the working out of an ideal classification intended to hold good for future years—practically an impossible task. If some agency of the League were in a position to promulgate an ideal official arrangement, by which documents could be arranged alike whether belonging to a set in Rio de Janeiro or Washington, such a plan might be desirable even at the cost of the delay. As things now stand, the sales number forms the only means of an undisputable arrangement that can be adopted by widely separated offices or libraries and produce everywhere a like result.

The plan thus outlined does away with the necessity of establishing for shelving purposes the connection between continued publications that have changed titles, split into parts or combined; it saves the trouble of maintaining a complicated methodic classification about which it will be difficult for two persons to agree; it has also the advantage, and this will be greater twenty-five years from now, of bringing into close proximity on the shelves contemporary questions and segregating them from questions that have only a retrospective or historic importance. Just imagine the chaos of a classed arrangement of the documents and reports now stored chronologically on the four hundred shelves of British Parliamentary Papers!

Three difficulties arise in following the Harvard plan. The League has issued a goodly number of monograph volumes which bear sales numbers. It has been found necessary to separate these from the set and place dummy sheets at proper places in the bound volumes of the collected publications; these sheets give the titles of the omitted monographs and indicate their location. Monograph volumes of this nature do not seem to have been issued of late; but if the practice should continue, it is not impossible that the League would co-operate to the extent of issuing them in a separate numbered series.

The second difficulty is occasioned by the variation in dimensions of the documents. The binders of the Parliamentary Papers get around this by what is known as "staggering," and combine octavos and folios in one volume. For 1927, Class II, Harvard has bound the quartos and folios separately, lettering the volumes as follows: 1927, II¹, No. 1-75; II² (quarto), No. 1-7; II³ (quarto), No. 8-24, and dummy sheets have been inserted in each series referring

to the other series for a missing document.

The third difficulty concerns continued series, like the minutes of the sessions of the Permanent Mandates Commission. There is an almost irresistible impulse to remove such continued series from the collected volumes and bind them in a separate series, particularly when they are supplied with general indexes covering many parts. By using dummy sheets such separate treatment is possible, but twenty years from now we should probably wish them back in their regular places with other documents of corresponding years. When the demand warrants it, a second set of some much used series can be kept in temporary binders until the run stops.

As a matter of fact, are we not in danger of confusing two uses of these documents: the live, present use as information on questions of the day, and the future generation's use as sources of history, and are we not trying to make one method of treatment cover both uses? The low prices of the documents permits a certain freedom in procuring duplicate copies, which may be made available for the present day current use. The needs of the future must be secured by prompt binding before the loss or misplacement, perhaps, of some eight-page document. Proper binding demands an arrangement that cannot be questioned and which encourages uniformity between sets kept in different places; it also demands an arrangement which simplifies and facilitates references in indexes, footnotes, or in a research worker's private notes. The brief indication, "Int. 6653.27, League Publ., 1927, II, 60," immediately produces the document from the Harvard stack; no need to quote its title or look it up in a complicated catalog.

As an adjunct to the set of documents, Harvard uses the Library of Congress cards. These are turned over to a typist, who mechanically transfers the "added entry" and subject headings to the tops of the cards. These are filed in a separate case provided with a wealth of guide cards and placed on a shelf beside the documents. Important documents are given, in addition, at least subject analytic entry in the main public catalog. It is to be regretted that the Library of Congress cards cannot be depended on to provide an absolutely complete index. In using them it has been found necessary to check up with the set of documents and supply typed entries for many not covered by the printed cards.

A Library in a Shopping Centre

By Charles R. Sanderson

Assistant Librarian, Toronto Public Library

MR. ANDREW CARNEGIE, when commenting on some city's application for help in its library building programme, used to say that this primary interest in subsidizing new libraries was not to erect grandiose buildings but to insure that the books should be "carried nearer to the homes of the people." This, of course, is the ultimate aim of any branch-library policy;

a reasonable amount of noise is not in practice the hindrance that it is theoretically shown to be; perfect convenience of situation is more important than the absolute quiet that was once argued to be a primary essential for a library. The most successful branches are those which are most easily linked up with the normal life of the community, and the location of branches at intersections places them not only near the local shopping centers, but also where a street-car "transfer" will allow a passenger to stop off for a minute or two during up-town and down-town journeys.

(2) This library, therefore, is surrounded on all sides by store buildings, and, as a result, though a definite individuality of building is retained, the influence of store architecture is reflected in its design and planning. Nothing seems more difficult than to take over a building which has been erected as an ordinary store and to adapt it for really efficient and effective work as a library. The ceilings are too low, or the window frontage is too exposed or too obvious, or work-room and

The Circulation Room of the Danforth Branch, Toronto, looking west

it is the ultimate aim of the "inter-loan" and of the "pool-stock." But in considering any individual branch, library practice today is no longer content merely to set that branch down in a convenient spot in its suburb; full consideration is also given to the problem of making the branch "fit in" with the life of its area; throughout the planning and equipment a business psychology is applied in order that the "atmosphere" and "appeal" of the branch may be (so to speak) focussed on the people whom it is to serve.

Not always is the problem so successfully worked out as it has been in connection with the new Danforth Branch, the sixteenth branch of the Toronto Public Library. Take the various points in sequence:

(1) The branch is located at a popular street-car intersection. We now recognize that

staff-room accommodation can be obtained only at the expense of partitions which block out

Boys' and Girls' Room. The doorways lead into the Club Room or Story Hour Room

light or otherwise spoil the circulation area. But this Danforth Branch shows that where the building is definitely planned as a library these difficulties are not inevitable in the store type of architecture.

The front of the building is in the style of an old English shop front: bay windows, small glass panes, an overhang to the upper story, a timbered front, a heavy paneled door, a shingled and gabled roof. A swinging sign, painted in bright colors, is to complete

*Danforth Branch, Toronto Public Library
Old English shop front style*

the scheme. The windows are used for display work, have paneled backs and are illuminated by overhead floodlighting, with colored spotlights for display after working hours.

(3) There has been a definite aim to secure atmosphere and attractiveness in the interior. Note the heavy molded basswood beams and carved brackets of the adult circulation room, the indirect artificial lighting and the banked windows giving a wealth of natural light from the opposite sides of the

FIRST FLOOR PLAN

SECOND FLOOR PLAN

room directly upon the shelves. The photographs which illustrate this room were taken before the building was open and before the "layout" had been completed. This accounts for the somewhat bare appearance. One of the aims, however, was to secure as wide and unimpeded floor space as possible, with full facility of access to the shelves. Closely linked with this is the method of using prominent main guides to the shelves. Over each bay there is an inset cork lino panel 24 in. x 3 in., which allows of a lettered card guide being easily attached. The lettering is done with an Econosign stencil in black on a goldenrod background, and the letters are large enough to be read from any position in the room. At busy times the librarians doing floor duty can thus effectively direct an inquirer for a particular author or subject without having to walk the length of the library. Tonks metal stripping has been used for the easily adjustable shelf supports. This adult circulation room has accommodation for between six and seven thousand volumes, thus allowing of an adult stock of about 10,000 volumes. The shelving on the south side, near the window, is devoted to Intermediate books.

The Boys' and Girls' Division is on the upper floor, where there are both a main circulation room and a clubroom. Here the same principles have been applied as on the lower floor, but the bookcases are lower, the windows have been supplemented by top lights in both rooms, and each room has an open fireplace. Here, again, our photograph was taken in the initial stages of stock equipment; hence the

bare shelves. There is shelf space for about 6000 volumes, or a stock of 10,000 if necessary.

Finally, the general problem of the architect was a difficult one. The lot was only 110 ft. deep and 40 ft. wide. To get an adequate floor space, the building had to cover the whole site, so that light was available at two ends only. To overcome this, a kind of well or light area was planned on the south side, and maximum window space was provided there. To leave sufficient shelving room, the radiation is practically all banked on the south side, allowing unbroken shelving on the north and east walls of the main circulation rooms. The plan seems simple in result, but in reality is very carefully worked out.

A work room excellent in size and lighting, with a built-in bench, runs almost the width of the building, and there is a large staff room, kitchenette, and lavatory accommodation on the upper floor, with janitor accommodation in the basement.

Owing to the narrowness of the lot, a separate boys' and girls' entrance was not possible. Access is, therefore, by a stairway from the main entrance hall, but this is spacious enough to prevent congestion. The rear entrance is on a back thoroughfare, so that stock and other deliveries are made direct to the work room, while coal deliveries for the low pressure steam heating system are made direct from the same thoroughfare to the coal bunker.

The architects were Messrs. George, Moorhouse and King (Toronto), and the total cost of the building, inclusive of everything except book stock, was approximately \$39,000.

Letting Books Speak for Themselves

By Faith Holmes Hyers

Library Publicist, Los Angeles Public Library, California

HOW MANY librarians have wished that books might become vocal and so speak that all who lend their ears would become alert to the meaning and beauty that the library has to offer! For, after all, reading the printed page is a lonesome business, and while folks are folks, the majority of them will enjoy personal contacts, company to share their thoughts and the inspiration of a good speaker.

In a public library lecture room on the Pacific Coast, almost every evening from October to June, an audience of about three hundred gather to hear books become articulate, to drink in inspiration from the makers and users of books—doctors of philosophy, of literature, of science and economics, professors of languages, distinguished artists, authors, edi-

tors and leaders in civic affairs. Such programs constitute an ideal extension course, extending the meaning of the books within the library and offering to many who have never entered a college the most democratic phase of university privileges, contact with those who have achieved distinction in fields of learning. A record of 607 free lectures is reported by the Los Angeles Public Library for the year ending June 30, 1929, given in the lecture room and a smaller seminar room. Conservative estimate of the attendance at the main lecture room at the Central Library is approximately 50,000. Lectures covered the subjects of literature, philosophy, child psychology, economics, popular science, art, music and travel.

How is such a program possible in a public

library and how was it evolved? First, through the vision of a Librarian and a Library Board who believe that the library is the logical cultural center of a community, and that people will respond eagerly to opportunities offered for self-education; second, through the enthusiasm of a staff of department heads who make contacts with city leaders in all fields and convince them of the place the library holds in the education of the community; third, and perhaps most important of all, through the generous giving of time, skill and unstinted interest by professors of local universities and colleges, prominent city leaders in many fields, and visiting authors, artists, and scientists. Once established as a center for such programs, the library proves a magnet to draw to itself both a supply of distinctive programs, and the demand for such programs by the public.

During the first year that the library occupied the new building, 1926-1927, the lecture room was available to local organizations for gatherings of cultural and civic nature, and the room was engaged for almost every evening. But in 1928-1929 the plan was evolved by the Library Board to use the lecture room only for programs which might be linked directly with library book collections and to have each lecture sponsored by one of the library departments (literature, science, art, sociology, etc.). Heads of departments conferred with the librarian in charge of the lecture room and drew up a program for the year. In almost every case the university, college, organization or individual invited to lecture at the library responded generously. For each series of lectures, printed announcements were published for distribution, usually carrying a list of books recommended by the department for a study and enjoyment of the subject. In some instances a small collection of representative books is taken to the lecture room, and these books may be borrowed after the program.

To give a survey of the highlights of last year's program will serve as illustration of the variety and value of this form of library extension work. Outstanding are the two lecture courses dealing directly with books which are sponsored and financed by the Library Board. Helen E. Haines, well known in the library and editorial world and book reviewing fields, is engaged each year to give a series of fifteen lectures on current and contemporary books, with the motto "Open the Book." Miss Haines mentions in the course of a year more than 1000 books, relating the newest books in each field to older and standard volumes and giving her listeners a valuable survey of the

various types of writing. In her audiences are found not only the usual book-loving public, but also many students, several book sellers, and an unusual proportion of men who avail themselves of this opportunity to keep up with the trend of books. Miss Gertrude E. Darlow, who has been connected with the Los Angeles Public Library since 1893, and whose appreciation of the finest in literature is highly valued by all who know her, gives book reviews twice a month of the leading titles of new books with a fine literary flavor. A number of Miss Darlow's followers depend upon her selection for their reading. All other lectures are given without remuneration by professors of our universities and colleges, members of civic or educational organizations, and visiting or local lecturers of prominence.

A popular but scholarly series is that on philosophy conducted for the last three seasons under the auspices of the Philosophy and Religion Department. Last year's course, under the direction of Dr. John E. Boodin of the University of California at Los Angeles, surveyed the story of philosophy from its Occidental beginnings to contemporary teachers. Among the lectures on philosophy drawn from our several universities and colleges are distinguished names, such as Dr. Ralph Flewelling, Dr. Herbert Wildon Carr, and Dr. Hartley Burr Alexander. Though no attempt is made to popularize these lectures, they draw capacity audiences, and late comers are apt to stand patiently at the doors and windows to catch scraps of the lecture. Dr. Boodin calls the series a community school of philosophy and believes it is unique in its freedom of admission and distinction of speakers.

Contemporary foreign literatures and writers have been featured in three series of lectures in French, German and Spanish, arranged by the Foreign Department, and given by professors of these languages in the universities, with an occasional lecture by a visiting writer or lecturer. Stimulation of demand for books is immediately reflected in the foreign book circulation, and many patrons find in these courses a delightful opportunity to keep up with the new books in their mother tongue. Students are not particularly urged to attend, as the hall is small and an audience outside of the university circles is desired.

Each series is directed by the head of the language department in one of the universities, but the program is arranged and sponsored by the library foreign department. Thirty-five lectures in these three languages were offered last year, attended by more than 5000 people. Lectures on archæology and travel were arranged by the History Department, and a balop-

tion machine was provided for projecting slides. Lectures on the theater, sponsored by the Literature Department, were given by Kenneth Macgowan during his stay in Los Angeles, and by Archibald Flower, former Mayor of Stratford-on-Avon. Short series were arranged by the Sociology and Science Department on political science and popular science. In some instances, as in the case of the lectures on "Relativity for the Layman," by D. M. Morandini, a visiting professor of physics from Budapest, the lectures were offered by the speaker and accepted by the library. In connection with a city hall exhibit of the work of city departments, our Municipal Reference Department outlined a series of talks on the workings of city departments, and secured speakers from the departments. Notices of these lectures were sent with the bills issued by the Water and Power Department of the city, and lecturers by the fire, health, water, park, police and library departments were well attended.

In the spring the Teachers' Department ventured to give an unusual series, entitled "Skillful Parents," inviting specialists in child psychiatry and leaders in city and State departments of adult education to speak. One lecture was combined with a parental education conference group. The number of mothers who attended these lectures and applied to the library for books on parenthood was exceedingly gratifying. The Music Department sponsored, among other programs, a course in symphony orchestra interpretative lectures given by a local musician. A reproducing piano was sent to the library for each lecture by a neighboring music store in order that orchestral numbers might be illustrated. Members of the orchestra were generous enough to visit the class occasionally, to demonstrate the use of their instruments. The audience was invited to make use of the library collection of music scores (including miniature orchestral and opera scores), to become acquainted with the facilities of the department for studying program notes and lives of musicians, and to use the piano room.

The crowning delight of the musical year for the past three seasons has been the gift of chamber music concerts by Mrs. Elizabeth Sprague Coolidge, the music philanthropist who has established a foundation in the Library of Congress. Mrs. Coolidge selects local organizations of note to give the programs or engages such visiting groups as the London String Quartet to give a free program at the library. On one gala occasion the library held a three-day music festival, and Mrs. Coolidge consented to play the piano part of a Beethoven

trio. Needless to say, these concerts drew many times more people than the hall would seat, and everyone fortunate enough to find a seat longed to broadcast Mrs. Coolidge's gift to the whole world.

Though this is but a sketch of the highlights of the year, it serves to show the variety and range of the entertainment offered. The art exhibits displayed throughout the year are a story in themselves. Unfortunately, the library was planned to combine the lecture and exhibit room. This arrangement makes a delightful setting for lecture audiences, but makes the exhibits unavailable while the lecture is going on. Several local art critics believe that the library's "gallery" has a very special place in the city's art circles because of its lack of any commercial phase, and since it affords groups of young artists an opportunity for a showing. In addition to annual exhibits of local groups, such as the California Water Color Society, the Painters and Sculptors, the Los Angeles Camera Club, and the Los Angeles Print Group, there are traveling exhibits offered to the library by the American Institute of Graphic Arts, the Procter and Gamble Soap Sculptures, the Division of Graphic Arts of the Smithsonian Institution, and others. Once a year the library exhibits its own print collection and fine photographs of library sculptural details. Since the first year the room was opened more applications have been received than can be placed. Exhibits are displayed for a period of three weeks.

Publicity for lectures and exhibits is handled in the following way: A weekly schedule is compiled by the librarian in charge of the lecture room, and 600 copies are mimeographed in the library. Each library department and branch receives a copy for the following week, and a mailing list of 400 names is maintained for patrons who request notices, and for schools and organizations interested in the programs. A large bulletin board is placed outside the lecture room, and smaller notices are placed at each library entrance. Newspaper notices of every lecture and exhibit are sent to the six metropolitan dailies and special announcements are sent to literary, art and local weeklies. Radio program managers give occasional free announcements for lectures of special interest. In addition to this, a printed folder is issued for each series of lectures, and copies are distributed through the mailing list at the lectures, from library desks, in clubs, high schools, and among other groups. The lecture room, which seats 450, is nearly always two-thirds full. Such book extension offers one solution of the part libraries may play in the great movement for "voluntary education."

THE LIBRARY JOURNAL

March 15, 1930

Editorial Forum

THE NOMINATION of Adam Strohm for the presidency of A. L. A. is another happy example of the welcome the American library profession gives to those who have come to us from across sea, as President Strohm, born in Sweden and educated at the University of Upsala, succeeds President Keogh, who brought to us English experience as reference librarian at Newcastle-upon-Tyne. Mr. Strohm, after graduating in 1900 from the University of Illinois Library School, in his ten succeeding years as librarian at Trenton served, as it were, his apprenticeship for his greater work in developing the Detroit Public Library until it was worthy of one of the finest library buildings in America for which he planned, and his service to the national association has been noteworthy especially as the first chairman of the Board of Education for Librarianship. The nomination by the Nominating Committee is in fact equivalent to an election for the scheme of submitting more than one name was not productive of good result. It is a pity, however, that the precedent has been so long established of giving an effective president but a single term, since it does no more than get him in fair touch with the work at headquarters, and the Association might be not less well off if a vigorous president, of fresh view, especially if within easy distance of headquarters, should be elected, as at the beginning of the Association's history, for continuing years. Interesting recognition of the growing importance of the South as a library field is made in the selection of both vice-presidents from southeastern states.

THE INCLUSION of the Gutenberg *Bible* by Doctor Vollbehr in his extended proffer of his collection of 3000 incunabula at the price of

a million and a half, put a new light on the situation when, on March 10, the House Committee on the Library held a hearing upon Representative Collins' bill for the appropriation. The library profession was represented in person by several librarians, and the entire session was a compliment to the national library as showing both professional and congressional appreciation of the rank which Doctor Putnam's administration has given to it. Those who spoke were among the best informed and best noted in the field of incunabula, and that they journeyed from several parts of the country to urge favorable action is the best possible endorsement of Representative Collins' proposal. As "parity" is now in the air, it may be observed that the acquisition of the third known copy of the vellum Gutenberg *Bible* by our own national library will put it on a parity with the British and French national libraries which have the other copies. It may be added not only that this inclusion makes the purchase an extraordinary bargain but that the acquisition by the Government of such a collection might serve to draw many a gift of similar material of a value ultimately beyond that proposed in this measure—collectors being prone to favor institutions whose application of their own resources indicates appreciation of such rarities. It may be taken for granted that Librarian Putnam would be delighted to have this addition to the treasures under his charge, though he does not permit himself to be a proponent of the transaction and would not like to see other appropriations put in jeopardy by this appreciation by the Congress of the library which bears its name.

IT is sometimes forgotten that, though New York has in the libraries of the three boroughs of the metropolis the greatest library system in the world, there are still parts of the Empire State which lack library facilities, so that the adoption of the county system in this as in other states is altogether to be desired. The bill now pending in the legislature authorizing the establishment of county library systems supported by taxation not exceeding one mill on the dollar has, accordingly, the support of the New York State Library Association and of librarians generally throughout the state. It is to be hoped that it may become law during the present session of the legislature and add New York to the many states where this system is so usefully in action.

ONE OF the most remarkable developments of recent years in the field of library literature is the cooperation of libraries and learned societies in the production of reference works and library guides. Most notable is the cooperation of such leading associations as the Economic, Historical and Statistical and also the N. E. A. in the publication of the *Encyclopedia of the Social Sciences* under the general editorship of Professor Seligman and directly in charge of Dr. Alvin Johnson. This is to extend to fifteen volumes at the rate of three volumes a year, the first issued this January. The scheme of the *Union List of Serials*, one of the most important products of library cooperation, gives precedence for important contributions in specific fields, as the *Guide to Material on Crime and Criminal Justice* listing books and periodical articles to be found in thirteen libraries, carefully selected for their regional relations and indexed by the same initials utilized in the *Union List* and also in the subject index to special collections in the 1928 *Supplement* to the *American Library Directory*. It is largely the intelligent demand from our libraries that has led to the production of so many valuable reference works and guides, which indeed are becoming a good-sized library in themselves.

THE *American Library Directory*, to be issued early next autumn, is already well under way, in direct charge this year of Karl Brown, recently associated with Charles H. Brown in the Iowa State Agricultural College Library and formerly of the New York Public Library. The promptness of reply from libraries to which inquiries were sent out in January and February has been most gratifying, and those libraries which have not responded are urged to follow their creditable example. The present plan is to issue this directory every third year, as the surprising cost of collecting and editing material makes an annual publication impracticable in view of the limited, though substantial, demand. The demand, exhausted some months since, the edition of 1927 so that the new volume should be doubly welcomed. It is intended to include in this volume any additional material supplementing the subject index to special collections included in the 1928 *Supplement*, as the general ground proves to have been well covered in that first index. In connection with the *American Book Prices Current* annual volume, which this year will be advanced in publication to April under changed publishers, there will be a directory of dealers in rare books which incidentally may be of ser-

vice to libraries as well as to collectors in this special field.

A REPORT recently published by the American Association for Adult Education, entitled "Alumni and Adult Education," by Wilfred B. Shaw, states that one of the forms of alumni education which seems destined to grow is the distribution to alumni of reading lists compiled by various members of the college faculty. The report predicts that "the problem of supplying the books recommended is sure to arise. . . . While the books can in some cases be secured through the local libraries, or by purchase, many alumni will find themselves unable to find the books." Various plans to meet the difficulty are then described, including book service from a shop in one of the college towns, book service under the auspices of the alumni organization or of the college libraries, etc.

The obvious implication that college graduates frequently cannot obtain such books from their public libraries is disturbing. Is it true? Wherever such demands are manifest, surely alert libraries satisfy them. Even small libraries can borrow books which they cannot buy. If readers in any considerable city or town actually cannot obtain from their public library such books as are described, the public and the librarian should wake up and remedy the situation. It would be unfortunate to have to establish other agencies for a service so clearly belonging to the public library. H. C. W.

A REPRESENTATIVE of the younger librarians, whose letter is printed elsewhere, voices the feeling of the newcomers into library work that criticisms from their fresh point of view are not welcomed by their seniors. It is an error to suppose that the columns of THE LIBRARY JOURNAL have not been freely open to criticisms from this point of view, but the fact is that, perhaps from motives of modesty, we have not received such material, which is hereby cordially welcomed. The wise executive should be always on the alert to obtain suggestive criticism from new viewpoints, and especially to avoid crystallization of old fogey methods in our temples of progress, the public libraries. Of course, some of the younger folk may be hasty in their generalizations or too ready to voice personal prejudices, but this should not prevent careful attention to what they have to say, whether directly to their executives or at library staff meetings or through the library periodicals. They may often have a word to the wise which the wise can ill afford not to receive with open ears.

Librarian Authors

"AND OUT of the woods there came a giant with three heads and fire and smoke coming out of all of his mouths . . ." The story-hour children wriggled ecstatically, their eyes brightened with interest, one or two of the more vividly imaginative breathed an half-audible "Golly!" The charm of the big stupid fellows is universal. At least, that is what Kathleen Adams and Frances Atchinson discovered.

They went to Evansville, Ind., to fill appointments as children's librarians; Miss Adams from the St. Louis Library School and Miss Atchinson from Carnegie Library School, Pittsburgh. They found much in common; similar positions in different branches, a love of children and children's books, and ideas and enthusiasms that ran in the same channels. They even shared an apartment.

That first fall they both told a series of giant stories, using the outline prepared by Miss Carrie Scott of the Indianapolis Public Library. The children enjoyed the cycle very much and clamored for more when the list was exhausted. So giants of all descriptions were hunted out, in dusty and unlikely books, very often. But the children were not satisfied with just hearing the stories. They wanted to read about the giants themselves. The oft-repeated request, "Please gimme a book of giant stories, teacher," at last made the story-tellers decide to do just that—give the children a book of giants. For the book they selected those tales which were most popular at their story-hours and also from as many national folk lores as they could.

The task of securing permissions to reprint the stories gave them some delightful letters, both from publishers and authors. Seumas MacManus, author of *The Giant of Bang Beggar's Hall*, granted permission only on condition that "Bang" was used and not "Band," as some other compiler had printed it, also providing they would spell his name Mac, as all good Irishmen do, and not Mc.

Then the book had to be placed with a pub-

lisher. To these novices a publisher seemed almost as formidable as one of the giants in their compilation. But, much to their surprise, publishers turned out to be very nice men. And so the manuscript was sent off, and after an eternity of waiting had been endured, from

April to October, 1926, *A Book of Giant Stories* was published. This was followed in 1927 by *A Book of Princess Stories*.

When Miss Atchinson became Mrs. Bacon and Miss Adams went to Los Angeles as children's librarian at the Ascot Branch, it seemed that the work together was at an

end. But when the publishers asked them to do another volume, they decided to try it at long distance. Thus *A Book of Enchantment* was compiled with the aid of air mail and telegraph. The arrangement worked out so satisfactorily that they again collaborated, although Mrs. Bacon had moved to Baltimore and was in the children's department of the Enoch Pratt Free Library. The second giant book, *Tehere Were Giants*, was published in the fall of 1929.

Serials in Watkinson Library

WHEN William Isaac Fletcher, assistant librarian at the Watkinson Library at Hartford, Conn., was editing the *Poole's Index* of 1882, the interest of the library was turned toward periodical literature, with the result that it is now unusually rich in serial publications as compared with other libraries of the same size. Titles as listed and annotated in a bulletin published in 1929 cover eighty pages. Special attention has been given to those published previous to the present century. Some special year-books have been included, but the old-fashioned almanacs such as were published in the Confederate States during the Civil War, the familiar family almanac and government publications issued periodically have not been included. The list is "deeply indebted to that incomparable work, the *Union List of Serials* (Gregory), and additional titles and corrections have been made to it."

FRANCES ATCHINSON BACON

KATHLEEN ADAMS

A. L. A. Travel Notice

LOS ANGELES, JUNE 23-28

REGULAR round-trip tickets are on sale from all eastern and central points, at but little over the single fare. They permit stop-overs, and are good all summer. Tickets are good going one way and returning another, except that those going north of San Francisco must add \$18 to return over northern routes. Route going and returning must be specified when purchasing ticket, and changes of line *cannot* be made later.

The various routes are (southern and central):

The Southern Pacific, "Sunset Route," via New Orleans and Texas.

The Santa Fe, via the Grand Canyon.

The Union Pacific, or Denver & Rio Grande, via Utah (giving Salt Lake City, Bryce and Zion Canyons).

(Northern, costing \$18 extra to Los Angeles.)

Canadian National, via Jasper Park.

Canadian Pacific (with Lake Louise and Banff).

Great Northern (Glacier National Park).

Northern Pacific (Yellowstone Park).

Chicago, Milwaukee & St. Paul.

It is also possible to go by steamer through the Panama Canal, though the expense is more.

Delegates from the Pacific Coast States will find the regular round-trip excursion rates to Los Angeles about 1 1/3 the one-way fare, with a 16 days' limit, or slightly higher with an Oct. 31 limit.

Round-trip fares to Los Angeles from some of the larger cities, and Pullman lower charge one way, via central and southern routes are, including San Francisco railroad ticket (if desired and specified when buying tickets):

	ROUND TRIP RAIL- ROAD FARE	PULLMAN LOWER ONE WAY TO LOS ANGELES ONLY
New York	\$138.32	\$32.63
Boston	147.66	33.38
Philadelphia	133.14	31.50
Cleveland	105.65	27.38
Detroit	101.70	27.38
Chicago	90.30	26.63
St. Louis	85.60	22.50
Kansas City	75.60	19.88
Minneapolis	91.90	23.63

SPECIAL PERSONALLY-CONDUCTED PARTY

A special train will be provided for the going trip, via the Santa Fé R. R. Eastern delegates will join this train at Chicago. Special Pullmans will be run from New England (register with F. W. Faxon),

North Atlantic States (register with F. H. Price), Minnesota, Iowa and Prairie States (register with C. H. Brown). J. F. Phelan will register those from the Central States, join special at Chicago, Kansas City (except Mr. Brown's party) or other points on the Santa Fe.

ITINERARY OF SPECIAL TRAIN

Leave Chicago, June 17, 8:10 p. m.

Leave Kansas City, June 18, 8:50 a. m. (or on arrival of St. Louis connection).

Arrive Santa Fé, N. M., June 19, 7:20 a. m. Transfer to La Fonda Hotel for a day and a half, including trip to Indian pueblos, cliff dweller ruins, and opportunity to see the city of Santa Fé.

Leave Santa Fé, June 20, 1 p. m.

Arrive Grand Canyon of Arizona, June 21, 7 a. m. Spend full day at Grand Canyon, with an A. L. A. session at El Tovar Hotel in evening. Meals included. Excursions at individual expense: auto ride along rim, \$3; mule to canyon, \$4.

Leave Grand Canyon, June 21, 10:30 p. m.

Arrive Riverside, Cal., June 22, 2:30 p. m. Two hours, including auto ride and visit to Mission Inn.

Arrive Los Angeles, June 22, 6:30 p. m. Expense of going trip, exclusive of railroad ticket, but including Pullman, meals, and all expenses at stopovers, Santa Fé, Grand Canyon, and Riverside, as follows:

From Chicago—With lower berth, \$87.80; with upper berth, \$81.55; with 1/2 compartment, \$100.60; with 1/2 drawing-room, \$11.45; with 1/3 drawing-room, \$93.76.

From Kansas City—With lower, \$82.05; with upper, \$76.70; with 1/2 compartment, \$93; with 1/2 drawing-room, \$102.95; with 1/3 drawing-room, \$87.

From Boston, via B. & O., train leaving June 16, 3:15 p. m. (meals, Boston to Chicago, at individual expense)—With lower, \$97.95; with upper, \$89.65; with 1/2 drawing-room, \$130.45; with 1/3 drawing-room, \$105.75.

From New York: train leaving, via Baltimore & Ohio R. R., 1:35 p. m., June 16 (meals, New York to Chicago, at individual expense)—With lower, \$97; with upper, \$89; with 1/2 drawing-room, \$129.50; with 1/3 drawing-room, \$104.50.

From Philadelphia: train leaving, via Baltimore & Ohio R. R., 4:19 p. m., June 16 (meals, Philadelphia to Chicago, at individual expense)—With lower, \$96.25; with upper, \$88.25; with 1/2 drawing-room, \$127.75; with 1/3 drawing-room, \$104.

From Washington: train leaving, via Baltimore & Ohio R. R., 7:35 p. m., June 16 (meals, Washington to Chicago, at individual expense)—With lower, \$96.25; with upper, \$88.25; with 1/2 drawing-room, \$127.75; with 1/3 drawing-room, \$104.

Note: The North Atlantic States party will travel in special Pullmans which will go through to the Coast without change. This train will arrive in Chicago at 2:05 p. m., June 17, which will allow 6 hours for sight-seeing in Chicago. New England party will have special Pullman arriving in Chicago in afternoon of June 17.

Tentative reservations should be made with members of the Travel Committee, with preliminary payment of \$10 to hold place. State if Pullman lower, upper, half-compartment, half- or third-drawing-room is wanted, and give name of roommate at La Fonda Hotel, Santa Fé. (Few if any single rooms).

Those joining special parties from other points will pay Pullman to junction with party, and the Travel Committee will, on registration, assign Pullman accommodations on special cars.

Post-conference trip, Yosemite, San Francisco, Bryce and Zion Canyons, Salt Lake City

and Royal Gorge to Colorado Springs. Personally conducted by Mr. Faxon. Register as soon as possible, sending him \$10 before May 15.

ITINERARY

June 28—Leave Los Angeles, 6:10 p. m. (special Pullman).

June 29—Arrive El Portal, 9:55 a. m.; motor trip to Yosemite.

June 29 (Sunday)—Leave El Portal, 10 a. m. Arrive Yosemite Valley, 10:45 a. m. 2:15 to 4:15, 20-mile drive in valley. Night at hotel or Camp Curry. Leave Yosemite Valley 7 a. m., June 30, for trip to see sunrise, Mirror Lake.

June 30—Leave Yosemite Valley, 4:30 p. m. Arrive Glacier Point, 6:30 p. m.

July 1—Leave Glacier Point, 8 a. m. Arrive Mariposa Grove Big Trees, 11 a. m. Leave Mariposa Grove, noon. Arrive Wawona Hotel for lunch, 12:45 p. m. Leave Wawona Hotel, 2 p. m. Arrive Merced, 5:15 p. m. End of motor trip.

July 1—Leave Merced, 5:49 p. m. Arrive Oakland Pier, 9:47 p. m. Arrive San Francisco, 10:05 p. m. (Three nights at hotel. Meals at individual expense.)

July 4—Leave San Francisco, 7:45 a. m. (coast line trip). Arrive Santa Barbara, 4:45 p. m. Leave Santa Barbara, 7:30 p. m. Arrive Los Angeles, 10:45 p. m. Night at Biltmore Hotel (breakfast not included).

July 5—Leave Los Angeles, 9:40 a. m.

July 6—Arrive Cedar City, 7 a. m. Bus trip, Bryce and Zion Canyons, the most remarkable coloring of any canyons in the world. Recently made available to tourists.

July 6—Leave Cedar City, 8:30 a. m. Arrive Zion National Park, 11:30 a. m.

July 7—Leave Zion National Park, 1 p. m. Arrive Bryce Canyon National Park, 6 p. m.

July 8—Leave Bryce Canyon National Park, 1 p. m. Arrive Cedar Breaks, 3:30 p. m. Leave Cedar Breaks, 4 p. m. Arrive Cedar City, 6 p. m. End of bus trip.

July 8—Leave Cedar City, 8:30 p. m.

July 9—Arrive Salt Lake City, 6:20 a. m. (sight-seeing ride). Leave Salt Lake City, D. & R. G. R. R., 6:15 p. m.

July 10—Royal Gorge, 1:27 p. m.; Arrive Colorado Springs, 4:50 p. m.

July 11—Leave Colorado Springs in evening.

July 12—Arrive Chicago in early a. m.

Expense (exclusive of railroad return ticket which everyone will have), including Pullmans, hotels, auto trips, meals (except seven in San Francisco, and breakfast in Los Angeles, July 5), Los Angeles June 28, to Chicago, July 12, \$176.00 with lower berth; \$170.00 with upper berth. This includes stay at Camp Curry in Yosemite Valley. If hotel and bath is wanted there, add \$7.75.

TRIP TO HAWAIIAN ISLANDS

Trip to the Hawaiian Islands, sailing from Los Angeles, July 1, S. S. *Calawaii*, due Honolulu, July 8. Eight days in the Islands, including side trip to Hilo and Kilauea Volcano, auto trip around the island of Oahu and to Mt. Tantalus, scenic Hamakua R. R. trip, and five days at Niunalu Hotel, Honolulu. Leaving Honolulu, July 16, S. S. *Matsonia*, due in San Francisco, July 22. The all-inclusive expense of this 22-day trip, Los Angeles to San Francisco, about \$325. Registration with F. W.

Faxon before April 15 is necessary, with deposit of \$25, as travel is heavy, and staterooms cannot be held long. Refund of deposit if you cannot make the trip.

OTHER RETURN TRIP SUGGESTIONS

(a) Return via Panama Canal and Havana to New York, sailing from Los Angeles, July 14, due New York, July 28. Cost, New York to New York, \$375 and up, first class; \$235 and up, tourist class on steamer. This includes only railroad ticket west, but all expenses on the return by steamer.

(b) Trip to Mexico City. Several inquiries about a trip returning via Mexico City have been received. If a sufficient number register, a trip may be planned, under the personal conduct of G. M. Patison, of Hollywood, Cal., who has had a large experience in taking parties through Mexico. The trip would cover about 18 days, going by the new Southern Pacific West Coast Line from Tucson, Ariz., via Guadalajara to Mexico City, going trip taking four days with opportunity en route and while in Mexico City to visit many interesting and wonderful places, there being about 50 hours of automobile excursions included in the trip. Thus a very good idea can be had of old Mexico, which travelers who have been in Europe declare to be more interesting in many respects than the old countries. Expense, approximately, \$295, including everything except meals, from Los Angeles to Los Angeles. Those taking this trip as part of the return can use return ticket if bought via the Southern Pacific R. R. from Los Angeles to Tucson, and thereby make a saving, and the return ticket can be taken up again either at Tucson or, if a return from Mexico by a different route is desired, at El Paso or San Antonio. Correspond concerning this trip with G. M. Patison, P. O. Box 128, Hollywood, Cal., with a \$25 first payment to hold place in party. Full refund can be made if anyone is unable to take the trip, provided notification is sent Mr. Patison within ten days of its start. The success of Mr. Patison's tours is well known, and he is vouched for by members of the staff of the Los Angeles Public Library who have traveled with him.

TRAVEL COMMITTEE

F. W. Faxon, chairman, 83 Francis Street, Boston, Mass.

John F. Phelan, 78 Washington Street, Chicago, Ill.

Franklin H. Price, Free Library of Philadelphia, Logan Square, Philadelphia, Pa.

Charles H. Brown, Iowa State College Library, Ames, Iowa.

If You Are Stopping Over in Santa Fé

By Edwin Sue Goree

Librarian, The Woman's Board of Trade and Library Association, Santa Fé, New Mexico

AN A. L. A. stop-over in Santa Fé has been definitely arranged, and we are looking forward to a brief visit from a hundred or more librarians. There are many books on the Southwest, but the time is so short that perhaps you can find only an evening or so in which to skim a few magazine articles about Santa Fé and its vicinity. Here are some of the most helpful:

GENERAL

"The Santa Fé Trail," by Frederick Simpich. *National Geographic*, August, 1929.

THE PEOPLES OF NEW MEXICO

"Where Americans are Anglos," by R. L. Barbour. *North American*, November, 1929.

"New Mexico's Mexicans," by Erna Ferguson. *Century*, August, 1928.

"My Neighbors, the Pueblo Indians," by E. L. Hewett, *Art and Archaeology*, July, 1923.

CLIFF DWELLINGS

After reaching Santa Fé, you will leave almost immediately for Puyé, and perhaps some of the Pueblos. Read:

"Master Builders of Prehistoric America," by F. H. Trego. *Travel*, September, 1928.

"America's Mystery Land," by R. W. Crawford. *Mentor*, August, 1925.

SANTOS, KATCHINAS, RUGS AND POTTERY

If you return early enough in the afternoon, you may want to visit some of the many curio stores. What a visiting librarian described last summer as "those crude little wooden dolls" may be New Mexico Santos. They are described in,

"Saints of the New World," by O. S. Halseth. *International Studio*, September, 1929.

"Santos y Bultos," by Elizabeth De Huff. *Touring Topics*, January, 1930.

There is another kind of little wooden doll, but it is Indian. Look up Katchinas in the twenty-first annual report of the American Bureau of Ethnology.

A good, brief article on Indian rugs by George Wharton James is found in the *Mentor* for June, 1922. I am sorry I do not know of a good magazine article on the Chimayó, or Mexican rugs.

There are many good articles on Pueblo Indian Pottery. Try "Life Forms in Pueblo Pottery Decoration," by K. M. Chapman, *Art*

and *Archaeology*, March, 1922, or "Post-Spanish Pueblo Pottery," by K. M. Chapman, *Art and Archaeology*, May, 1927.

"Indian Arts for Indians," by Mary Austin. *Survey*, July 1, 1928.

INDIAN DANCES

After dinner the hotel plans to arrange for an Indian dance for your entertainment. See:

"Plastic Prayers," by Oliver La Farge. *Theatre Arts Monthly*, March, 1930.

"Dance Rituals of the Pueblo Indians," by Alice Corbin Henderson. *Theatre Arts Monthly*, April, 1923.

"Dance of the Redskin," by L. H. Warner. *National Republic*, November, 1929.

THE CITY DIFFERENT

The next morning, you will see Santa Fé. If you have *Holland's Magazine* for January, 1926, read E. W. De Huff's "Where Art Is in the Air." The Camino del Monte Sol, the old San Miguel Church, the Cathedral built by the Archbishop in *Death Comes for the Archbishop*, the Palace of the Governors, and the New Museum of Art will be on your route. Be sure to see the old altar in the Cathedral, but first read Witter Bynner's poem about it in the *Saturday Review of Literature* for October 26, 1929. The title is "Plea to the Archbishop."

There is an entire Art Museum number of *Art and Archaeology*—January-February, 1928, and a recent article called "America's Only Real Palace," in the *National Republic* for February, 1930.

We have asked the Transportation Company to leave you at the Woman's Board of Trade Library. It is not starred on the Santa Fé map, or written up in magazines. It is just the town's public library, started by a handful of Anglo women thirty-four years ago in one room of an old army barracks, and now fast growing into county-wide proportions. I suspect you are thinking that the name is slightly absurd. It is. When we were new here, we suggested that the name was confusing and should be changed; but we were told that "the women of Santa Fé had traded everything from old shoes to town lots for the library, and they liked the name." At any rate, it will serve as the place of transition from the paths of prehistoric America, to the main trail which leads to Los Angeles.

Current Library Literature

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in Cannons' "Bibliography of Library Economy," to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

ART LIBRARIES. See PERIODICAL INDEXES.

BOOKS AND READING

Van Dyne, Catherine. Young people turn readers' advisers. *Libraries*. 35:77-78. 1930.

How the junior members of the Newark (N. J.) Public Library staff compiled six book lists.

CALIFORNIA. See COUNTY LIBRARIES.

CATALOGING

Walton, C. E. Classifying, cataloging, and binding League of Nations publications. *LIB. JOUR.* 55:155-159. 1930.

Dr. Sevensma's *Short Guide to League Publications* is a useful aid. Opinion is divided on the usefulness of the L. C. special catalog.

CATHOLIC LIBRARIES. See PERIODICAL INDEXES.

CHICAGO (ILL.) PUBLIC LIBRARY. SOUTH SHORE BRANCH LIBRARY.

Gerhardt, Paul. The Chicago South Shore Branch Library. illus. plans. *LIB. JOUR.* 55:148-150. 1930.

ROYAL COLLEGE OF PHYSICIANS LIBRARY, LONDON

Boswell, Eleanore. The Library of the Royal College of Physicians in the Great Fire. *Transactions of the Bibl. Soc.* n.s. 10:313-326. 1929.

An effort toward identification of the books saved from the Harveian Library at the time of the fire and still in the collections.

SALARIES

Howard, J. A., comp. Salary statistics; public libraries in cities of 25,000-70,000 population. *A. L. A. Bull.* 24:53-55. 1930.

Thirty-eight libraries from 21 States are represented.

SCHOOL LIBRARIES

Wood, H. A., comp. *School Library List. Part I: Elementary and Junior High School*. St. Paul: Minn. Dept. of Ed., Library Division, 1930. pap. 136p.

Includes 12p. manual of school library practice.

STAFF TRAINING

Bowerman, G. F. *Some Library Personnel Problems*. pap. 10p. Reprinted from *Essays Offered to Herbert Putnam*. Yale Univ. Press, 1929.

The most marked characteristic of the standard library staff is its extreme feminization. This has had its effect on prevailing library salaries. The disproportionately large amount of time spent on semi-mechanical tasks is another serious handicap to enlisting and holding a progressive personnel.

VIRGINIA. See COUNTY LIBRARIES.

WILLESDEN (ENGLAND) PUBLIC LIBRARIES

Dealing with outlying districts. II—Willesden. plans. *Ln. and Book World*. 19:167-170. 1930.

Four Willesden libraries were unified in 1920 under the Public Libraries Acts.

WORLD CONGRESS

Bravo, F. S. El Primer Congreso Mundial de Bibliotecas y de Bibliografía, celebrado en Roma y Venecia durante la segunda quincena del mes de junio de 1929. Madrid. *Revista de Archivos, Bibliotecas y Museos*. 33:227-251. July-December, 1929.

BOOKS BY AND ABOUT LIBRARIANS

Hicks, F. C., ed. *Famous Speeches by Eminent American Statesmen*. St. Paul: West Pub. Co., 1929. 990p. \$5.

Professor Hicks is professor of law and law librarian at Yale University. This is a companion volume to his *Famous American Jury Speeches and Arguments*, and *Addresses of Joseph H. Choate*. "By statesmen are meant not merely officeholders or 'dead politicians,' but any one of either sex who deals with public questions in a statesmanlike manner."

Free on Request

PRINCETON University Library will send to any library on request *The Edinburgh Review*, 79 volumes bound in 60, falling between years 1802 and 1892, various imprints. The volumes are bound but several of them need rebinding. Transportation will have to be paid. Apply direct.

A. L. A. Withdraws Reading Course

THE AMERICAN Library Association has withdrawn from circulation the reading course, *Romance of Modern Exploration*, by Fitzhugh Green. Notice of this withdrawal was not transmitted to THE LIBRARY JOURNAL until March 8, when it was accompanied by the following statement:

Criticism of the course because of a number of alleged misstatements was made to the Association, the author of the course, and several librarians by one interested in exploration. The author of the course was asked to reply. His reply and the original criticisms were submitted to two experts in the field. Though all criticisms were not sustained, there were enough errors to make it advisable to withdraw the booklet. Action was delayed until the opinion of the judges had been received, as the Association did not feel justified in basing a decision upon criticisms originating from one unknown source, especially as the field itself is one filled with controversy. The author of the course had been well recommended to the A. L. A. He was chosen not only because of his participation in exploration, but because of his facile style of writing. The course was planned as one of the more popular of the series, its purpose being twofold: to give the reader a new conception of the numerous types of exploration now in process, and to awaken in the casual reader an interest in books other than fiction. Subscribers wishing to return copies of the course will be credited by the A. L. A.

Has Your Library Been Overlooked?

THE PREPARATION of the American Library Directory, 1930, is now under way. Every available source which might yield the names of new libraries or of those not listed in the 1927 edition is being consulted, but there is a possibility that some may be overlooked. If your library has not received a questionnaire, please fill out the following form and mail at once to American Library Directory, R. R. Bowker Company, 62 West 45th Street, New York City.

Criticisms and Suggestions

To the Editor of THE LIBRARY JOURNAL:

Since the publication in your columns of the Bibliographical Review: "Dictionaries in English and Foreign Languages," Oct. 15, 1929, a number of criticisms and suggestions have been received, several from abroad, proving that the JOURNAL receives careful attention in Europe as well as in this country. With a view to having all the information as regards books and authors as accurate as possible, it is simple justice to have all such criticisms and suggestions appear in order that the readers of the JOURNAL may have the benefit of them.

JAMES GEDDES.

(Translation)

It is with great pleasure that I have read your article on "Dictionaries in English and Foreign Languages," and I am delighted that you did not neglect to speak of Esperanto, which is growing more strongly every day.

I regret, however, that your library does not possess dictionaries of Esperanto, at least the more important, and that for that reason the works which you cite are few and very old. We now possess a considerable number of these, and it may prove interesting to complete your article with a fuller note on dictionaries of Esperanto.

I am ready to furnish notes for an article on dictionaries and encyclopedias in Esperanto.

I am permitting myself to send you at the same time a copy of *Nauingva Etimologia Lebsikono* for your personal library, and a page of the *Dictionnaire Complet* (Esperanto-Esperanto) which will appear in January-February, 1930, and of which I am one of the authors.

S. J. GRENKAMP-KORNFELD,
Membre de l'Union Syndicale
Des Correspondants Polonais en France
Et de l'Association Syndicale
De la Presse Etrangère à Paris.

I happened to note that you do not say anything about the two-volume Hoare, of which the price is not so terrifying as for the large one (Italian and English), and which I have at times recommended to inquirers merely because I had found the larger Hoare to be the best English-Italian one that I had been using; and I wonder if I have been misleading my clients—for I confess that I have never, that I can now remember, actually used the two-volume Hoare myself! This will have to be looked into!

H. D. AUSTIN,
University of Southern California, 3551 University Avenue, Los Angeles.

It might be of interest to you to know that Miles Hanley and I are both from Wittenberg College, where we got our start in phonetics from Dr. and Mrs. K. F. R. Hochdoerfer. Mrs. Hochdoerfer was a Miss Hettie Bearce and came, I believe, from Massachusetts. She studied with Rousselot and Passy.

Appropos the German dictionaries, I don't believe I understand why you have not mentioned Grimm's *Deutsches Wörterbuch*, which with all its faults is indispensable. Then there is the new Meyers *Kon-*

versationslexikon, now almost finished—the *Brockhaus* has just begun its new revision. Another very useful smaller work is Moritz Heyne *Deutsches Wörterbuch* in three volumes, while Paul *Deutsches Wörterbuch* is exceedingly useful to the student who is bothered by adverbs, prepositions, case sequences, etc. Viëtors *Deutsches Aussprachewörterbuch* appeared in the third edition in 1921, by E. A. Meyer, an outstanding phonetician, and is a very different book from the old Viëtor, in that the pronunciation indicated is much less that of the careless Umgangssprache than that of Standard German—so far as there is any such thing. In that connection, Siebs *Deutsche Bühnenaussprache*, eleventh edition, 1915, might be mentioned. In matters of Orthography *Duden Rechtschreibung der Deutschen Sprache* is to be consulted. My copy is the ninth edition, 1915, but there is a later edition. Another indispensable book is Hans Schulz *Deutsches Fremdwörterbuch*—*fortgeführt von O. Basler*, the second and last volume of which is nearing completion.

ROE-MERRILL SECRIST HEFFNER,
Harvard University.

Among the greatest Italian works you quote that of Boccardo: *Nuova Enciclopedia Italiana*. This is exact indeed, but you forget the *Dizionario della Lingua Italiana*, published by the Accademia della Crusca, which is the true work corresponding to the *Oxford Dictionary* in English. The *Dizionario della Crusca*, as you may know, for lacking of financial means, is not finished, and the last volume arrives only to the letter "O."

Petrocchi's *Dictionaries* are of two kinds and sizes. The bigger in two volumes is the best and the most complete; the smaller is for school use, in one volume, but it is also an excellent reference work.

I would have wanted to see in your paper much more importance to the Lysle's English-Italian and Italian-English dictionary, which is the best of that kind. Its price is \$7.50, as you quote, in America, and probably at some Italian booksellers of New York, but you may tell your readers that it is more convenient and cheaper to get the books directly from Italy for nearly \$4 less than that sum.

I have myself had the same experience when I was in America.

Finally, please, do not say that Melzi's *Dictionaries* are "very good." They are small and popular desk-encyclopedias rather than dictionaries of the language.

Among the bi-lingual dictionaries should be remembered also Roberts's *Dizionario Inglese-italiano e italiano-inglese* (Firenze, Barbera).

VITTORIO CAMERANI,
Institut International D'Agriculture, Roma.

Has Subscription Been Refused?

To the Editor of THE LIBRARY JOURNAL:

Will librarians who have been refused subscription to any periodical because the publisher's policy is to decline subscriptions from public libraries, please communicate with the undersigned at the Acquisition Division, New York Public Library, giving the name of the periodical.

CARL L. CANNON,
Chairman A. L. A. Bookbuying Committee.

Suggested Junior Criticisms

To the Editor of THE LIBRARY JOURNAL:

I wish in this letter merely to ask whether it would be possible for THE LIBRARY JOURNAL to open its columns for a time to the younger graduates of library training schools and encourage them to give their ideas on the worth of the library profession, the best method of training for it, the best method of administering libraries, at least as they see it, and altogether anything which it may occur to them to criticize in library work.

I am a graduate of the University of California School of Librarianship with the class of 1928, and for the past year and a half I have been employed on the staff of a small public library in southern California. I may be wrong in my estimate, but it seems to me that criticism is very decidedly discouraged among librarians generally, and that in training school at least it is very nearly worth anyone's professional life to indulge in it. I have never been able to see the value of a profession which through fear, or for other reasons, discouraged the play of critical intelligence among its younger members. Libraries are not perfect, and while no one, to my knowledge, has declared that they are, the tacit assumption that criticism will not improve them hardly makes for the stability of the library profession.

I wish it clearly understood that I am by no means advocating smart or flippant criticism of libraries in any phases of their work. I realize as well as anyone that criticism for the fun of finding fault has no value; but criticism, whether constructive or not, has very decided value if it is sincere and honest. I am sure that a great many young librarians find the professional atmosphere in which they are compelled to work stifling in the extreme. If they have opinions they are not allowed to express them, and if they are dissatisfied with the work they are doing they are not allowed to say so on pain, sometimes, of rather severe penalties.

I realize that criticism of particular libraries cannot help being personal, and I admit that indulgence in such criticism should be moderate. But there is a relatively impersonal kind of criticism which is extremely valuable, and, in my opinion, it is the kind which members of library schools may be properly expected to give. Students in library schools are presumably selected on the basis of their intelligence. Is it not very unfair, then, to expect them to stifle it in their work after graduation, or at least to indulge very moderately in suggestions

for the improvement of the profession which they have decided to make their life work?

I believe that it would be the best possible thing for the library profession if the young people enrolled in it were given a chance to express their ideas. And if THE LIBRARY JOURNAL should open its columns temporarily to all recent graduates of approved library schools I think that it would receive in place of reports on actual work accomplished some very pertinent suggestions for the improvement of libraries given with a freshness of outlook which the younger members of any profession usually have in abundance. I believe that for the time being at least the exchange would be a good one.

LOUISE DAVIES,
Santa Paula, Cal.

The Author's Annual, 1930

IN ITS second year of publication *The Author's Annual* again collects in convenient and compact form much information on the literary prizes, best sellers, book club selections, and statistics of book publishing of the past year. It is also made extremely readable by the skillful manner in which the editor has alternated his array of facts with such literary *hors d'œuvres* as Guy Holt's amusing article on "The Care and Feeding of Authors," Dale Warren's "Why Authors Leave Home," and Elizabeth C. Moore's twenty-three-page list of the "Book Vices Current" of misspelling and misuse of words which so often infuriate the conscientious editor and the literate reader. (*The Author's Annual*, 1930. Edited by Josiah Titzell. New York: Brewer & Warren, Inc.; Payson & Clarke, Ltd. cl. 202p. \$2.)

The annotated bibliography of unfinished novels compiled by Earle F. Walbridge (p. 83-112) is an outgrowth of a list originally published in THE LIBRARY JOURNAL (50:215-216, 662, 1925) and may be regarded as a supplement to the *Bibliography of Unfinished Books in the English Language*, by Albert R. Corns and Archibald Sparke (London: Bernard Quaritch, 1915), which lists only four novels, as compared to fifty-seven in the present list. Stephen Crane's *The O'Ruddy*, completed by Robert Barr, and Guy de Maupassant's two unfinished novels, *L'Angélus*, and *L'Ame Étrangère*, are additional candidates for inclusion, as well as the unfinished and apparently unpublished novel about Owen's colony by Mary Hartwell Catherwood, which is mentioned in the third volume of the *Dictionary of American Biography*, and Sir Walter Scott's forthcoming *Siege of Malta*. E. F. W.

Library Organizations

California Library Association

THE SIXTH District met at San Diego Feb. 1 with County Librarian Eleanor Hitt and City Librarian Cornelia D. Plaister in charge. The meeting opened with a talk by Lyman Bryson, Director of the California Association for Adult Education, "New Life in Old Books." Mr. Bryson said that reading is a vicarious experience and the librarians can help make it so by encouraging book conversations; in this way the borrowers will be able to draw new life from the older books and so not need to demand the newest titles hot from the press of today. Mrs. Jack Valley of Los Angeles gave witty and comprehensive reviews of twelve current books. Luncheon was served at El Cortez Hotel, where the members were delightfully entertained by Lee Shippey, editor of the *Lee Side o' L. A.*, a feature of *The Los Angeles Times*. Mr. Shippey, a former library worker, gave personal glimpses of famous authors. The afternoon session opened with stories from Tschaikowsky's *Nutcracker Suite*, as told by Mrs. Ritza R. Freeman, with orchestration by the Sweetwater Union High School Orchestra. Two special guests were then introduced: Mrs. Julia G. Babcock, President of the California Library Association, and Miss Mabel R. Gillis, Junior Past President. Mrs. Babcock reported on the Executive Committee meeting held in January, and said that the annual meeting of the C. L. A. would take the form of a short business session held in Los Angeles during the week of the A. L. A., thus enabling all members to profit from the A. L. A. program. Miss Faith Smith reported for the "Committee of Children's Librarians, Psychologists and Representatives of the Public School Course of Study Department," appointed at the 1929 meeting of the Sixth District to keep the membership in touch with developments in psychology as applied to library work. The report was gratefully accepted and the committee asked to continue its work. "Professional Advancement" was the topic which closed the meeting, presented by Miss Helen E. Vogleson; other speakers on the subject were: Willis H. Kerr, Mrs. Theodora R. Brewitt, Miss Emily W. Kemp and Miss Inez Kilton, the latter telling of the requirements laid down for teachers' advancement. In the general discussion, two themes seemed paramount—that of adequate salary compensation and that of further opportunities for study.

District of Columbia Association

A MEETING of the District of Columbia Library Association was held on Jan. 30 at the clubhouse of the American Association of University Women. The president, Claribel R. Barnett, presided. Capt. Byron McCandless, U. S. N., exhibited his camera with which he had assembled a wealth of material on flags during his world-wide travels. The film, prepared by the University of Denver Library, for teaching students how to use the library, was shown. An effort to increase the membership is to be made, and for that purpose a special committee was appointed. The formal meeting was followed by a social hour with refreshments.

Northeastern Library Convention

AS MANY Eastern librarians will find it impossible to attend the A. L. A., the state library associations of New England, New York and New Jersey have arranged a meeting in Swampscott, Mass., at the New Ocean House, June 13-18.

Annual Convention S. L. A.

THE SPECIAL Libraries Association will hold its twenty-second annual convention in San Francisco June 18-21 inclusive; headquarters of the convention will be at the Clift Hotel. The date was selected so that members who desire may attend the convention of the American Library Association at Los Angeles the following week. Miss K. Dorothy Ferguson, librarian of the Bank of Italy, San Francisco, is Chairman of the program committee and promises a program which will give delegates an insight into the work of libraries in the motion pictures industry in Hollywood, the oil industry, mining and hydro-electric power projects, such as those at Boulder Dam.

Illinois Regional Library Conference

THE FIFTEENTH annual regional library conference will be held in Illinois during March and April, under the direction of the Library Extension Division. The date and place of each meeting is as follows: March 18, Lake Forest; March 19, Aurora; March 20, Harvey; March 25, Granite City; March 28, Champaign; April 1, Fairbury; April 4, Mount Sterling; April 8, Marion; April 9, Olney; April 15, Pekin; April 16, Galesburg; April 29, Moline; April 30, Polo.

Massachusetts Library Club

THE MIDWINTER meeting of the Massachusetts Library Club was held at the Boston Public Library on Feb. 7. At the business meeting the name of the Committee on Work with New Americans was changed to Committee on "Inter-Racial Service."

The general topic of the morning meeting was the Acquisition and Use of Reference Material. The first address was by Mr. Frank H. Chase, Reference Librarian of the Boston Public Library, on the subject "Recent Significant Reference Books." Miss Barbara H. Smith, Librarian, Levi Heywood Memorial Library, Gardner, Mass., followed Mr. Chase with a paper on "First Choices of the Limited Budget" in which she considered reference work from the viewpoint of the smaller library and Mr. Leslie T. Little, Librarian, Waltham Public Library, spoke on "The Subscription Book Situation." At the afternoon session Frank Chouteau Brown of Boston spoke on "The Tercentenary and the Public Library."

The afternoon program was a cooperative one, sponsored by the Division of Public Libraries and the Division of University Extension of the Massachusetts Department of Education, the Massachusetts Library Club, the Massachusetts Association of Americanization Teachers and the Department of Inter-Racial Unity of the Massachusetts Federation of Women's Clubs. Miss Mary L. Guyton, Supervisor of Adult Alien Education, spoke on "The Co-operation of Library and School in Work with the Foreign Born," and Mrs. John Figmic, Librarian, Plymouth Public Library, discussed a selection of books on the Slavonic peoples. The main address was by Dr. William J. Rose, Department of Sociology, Dartmouth College, and editor of the magazine *Poland*.

The evening meeting of the Club was held at the University Club. The main speaker was Dr. William S. Stidger, pastor of the Copley Methodist Episcopal Church of Boston, who took for his subject "The Place of Books in the Life We Live," placing emphasis on the fact that books are the keys to unlock the world and our minds.

Mexican Cultural Relations Seminar

AN INTRODUCTION to Mexican life and a comprehensive survey of the Mexican scene will be given at the fifth cultural relations seminar, to be held in Mexico City July 5-25, 1930, under the auspices of the Committee on Cultural Relations with Latin America. Several librarians interested in international relations and especially in recent educational and social developments in Mexico are planning to attend

the seminar, following the A. L. A. conference at Los Angeles, June 23-28.

Anyone who would like to join a special party going to the seminar from Los Angeles should write immediately for further information to Hubert C. Herring, executive director, the Committee on Cultural Relations with Latin America, 112 East 19th Street, New York City. The A. L. A. Travel Committee is calling attention to a special excursion to Mexico under the supervision of Prof. G. M. Patison. Information about this trip may be obtained from Mr. F. W. Faxon, 83 Francis St., Boston, or from Professor Patison, P. O. Box 128, Hollywood, Cal.

All-India Conference

THE SEVENTH All-India Public Library Conference was held at Lahore, Dec. 26-27, 1929, under the presidentship of Sir P. C. Ray. Several interesting papers dealing with different aspects of library work were delivered by distinguished educationalists; important resolutions were discussed and passed. Also, along with the conference an All-India Library Exhibition was held, Dec. 26-28, 1929, where picture books, juvenile literature, traveling library boxes, rare manuscripts, materials for library equipment, and books on library science were exhibited.

Twin City Catalogers' Round Table

THE WINTER meeting of the Twin City Catalogers' Round Table was held on Wednesday evening, January 29, 1930, at the Minnesota Union, University of Minnesota. Dinner was served at 6:30 and the club discussed informally the advisability of the publication of a yearbook by the Catalog section of A. L. A., and the financing of such a publication. Following adjournment to the lounge Miss Jessie L. Arms of the University of Minnesota library read and commented on her "Short Bibliography of Classification, 1920-1929"; Miss Bryan of Hamline University spoke of progress in changing the library into the L. C. classification, Sister Marie Cecilia of the College of St. Catherine gave the reasons which influenced them in deciding to make the change from D. C. to L. C. classification, stating that with the exception of being obliged to use two distinct catalogs—one catalog constantly expanding and the other shrinking—few real difficulties are being encountered; Miss Goss of the University of Minnesota library gave an informal account of the winter meeting of A. L. A. at Chicago; and Miss Starr of the James J. Hill Reference library spoke of recent developments of the projects of the A. L. A. Catalog section.

Book Reviews

THE ORGANIZATION OF KNOWLEDGE AND THE SYSTEM OF THE SCIENCES, by Henry Evelyn Bliss, Associate Librarian of the College of the City of New York; with an Introduction by John Dewey. New York, Holt, 1929. xx, 433 p. Reviewed by Henry Bartlett Van Hoesen, Librarian, Brown University.

IN PRACTICE, in prospect or in retrospect, every librarian is a classifier; and this book should be prescribed as a hurdle for every classifier. "Classification is fundamental to the organization of knowledge," and, "Classification for libraries can be adequate and efficient only if grounded on the fundamental principles of the organization and classification of knowledge." The unphilosophical student may emerge a bit bewildered from his first excursion into neorealism, reading (p. 158) that "Relations are modes of existence . . ." (p. 159). "They are not existent, but they may be real," and (p. 129) "Reality is existence verified or verifiable." But, in general, the author has minimized the difficulty of our hurdle in every possible way—clearness of exposition, exemplification, detailed table of contents, abstracts at heads of sections, concluding summaries, tables and graphic presentations, and various typographical devices.

The form and style of the bibliographical references are not beyond criticism. For example, one reads on p. 149 the footnote "Gibson *op. cit.*" and turns the pages backwards, to find the same note on pp. 140, 139, 137, and finally (p. 135), "Gibson, *The problem of logic.*" One might, of course, turn from p. 149 to the index, but there he would find "Gibson's *Logic.*" Mere inconsistencies of style like "Jevons. *Principles of Science*" (p. 145), "Mill, *Logic*" (p. 146), and "Mill's *Logic*" (p. 149) do no real ("existent" or "conceptual") harm, but the reviewer has his hobby.

The historical approach to the subject of classification is relegated to Part 4, but we mention it first to get it out of the way, and, with it, our grievance against histories of classification in general. It "treats the historical material in a broader topical and comparative way" than other works on the subject, but like most of these, though better than most, it too often rates earlier classifications according to their applicability to present-day knowledge. Of course, Merlin and Comte did not recognize Psychology as a fundamental science! How could they? These old classifications are sig-

nificant only when treated in relation to the knowledge of their times, and then they are relevant to a history of learning rather than to the organization of present-day learning. Nevertheless, the story is well and briefly told, gives us the historic background and has its morals, and the few lasting contributions of the old philosophers are duly emphasized.

Part 1 of the book is devoted to the need for, and the movement toward, "more adequately organized knowledge" and "more efficient cooperation in obtaining and applying it." Library students should read this, librarians should know it already, and all should find it interesting. Chapter 5 deals specifically with the organizing of knowledge by librarians and publishers. In Chapter 4 we begin to get a line on the author's theory of classification. Organization is "the correlation of . . . organs to . . . functions." With this we agree, but the statement (p. 80) that this work treats of "the culminating scientific, systematic, educational and bibliothecal organization of knowledge in its structural aspect . . . rather than in its functional aspect as the education . . . of minds and the bibliothecal . . . services," indicates that our turn as librarians is really to come in Mr. Bliss's next volume. However, Mr. Bliss may succeed in showing the structural and the functional to be less conflicting than we imagine them to be, and, besides, like educationists who take the objective or functional as their starting point, we may be in danger of getting the cart before the horse. And whether the following volume, on book classification, places first emphasis on structural or on functional, we may fairly expect more than usually thorough consideration of the practical ends of classification, for (p. 108) "hardly less important than the selection of books is the classification and grouping of books with regard to their contents and the interests in which they are most likely to be used for good purposes."

The second part, "Classification, Synthesis, and the Order of Nature," is philosophical but necessary. Perhaps the classifier's most unfortunate human frailty is lack of ability to define and differentiate precisely the rubrics in his schedule. How many of us even realize that we are, not *classifiers*, but what Mr. Bliss would call *classers*, and that, as such, we must look up not only to a group of classifiers but also to another grade still higher, that of the *classificationers*? Again, we know that classification is based on likenesses, but are we able

to analyze clearly the particular likeness that dictates the classification—I mean *classing*—of a particular book? Or can we always define clearly the class which the likeness fits? What are the characteristics of the class “Small arms,” and does the likeness between rifle and machine-rifle place both in this class? And again, are we all aware of the relations other than likeness which govern our classification? (Cf. p. 159-60.)

Classification proceeds by definition and differentiation to logical division (Chap. 7), subject to the limitations imposed by the ever imperfect state of knowledge and by the practical principle of maximal efficiency. There are various forms of classification (p. 151ff.), of which the one-dimensional serial form of our library classification schedule is, of course, the least adequate to distinguish the coordinate from the subordinate and to show the ramifications due to different aspects, interests and purposes. The practical library classifier may not be inclined to go the whole way with Mr. Bliss (in this book) in subordination, at least in cases where the subordination is not clear or not established by consensus of opinion. He may, for example, prefer to set up Sports and Games as a major class rather than to subordinate it to Fine Arts, to Education, or, along with Manners and Customs, to Ethnology, History of Civilization, or Sociology. Again, in subdivisions, he may prefer to substitute the alphabetical for a debatably logical arrangement, as Andrews recommends (*L. J.* 50 (1925) p. 939). The alphabetical arrangement is, strictly speaking, a grouping rather than a subject classification, but the practical convenience is obvious where subdivisions are so minute and distinctions so fine as to confuse the layman and to invite the necessity of change as knowledge progresses or the point of view changes. We personally favor, for example, the alphabetical author arrangement of literary texts under a given language, without regard to either form or period. On the other hand, we agree with Mr. Bliss that there is a “subject-index illusion,” and we wish he had said more about it.

A “System of the Sciences” (part 3) based on the principles of “The Order of Nature” (chap. 10) when extended to the anthropologic, and “Gradation by Specialty” (chap. 12) “is scientists and philosophers . . . and . . . most likely to prove valid and acceptable to relatively permanent” (p. 219). Are these two principles never in conflict? Are Social Sciences more special than Psychology?—and the author himself says (p. 299) that Philology, “in one aspect . . . is no less comprehensive than . . . Philosophy.” We cannot fully agree that the

“Order of Nature,” “The Logical Developmental Order of Knowledge,” “The Pedagogic Order,” “The Logical Order” and the order “By Specialty” run so closely parallel as Mr. Bliss shows them in his Synoptic Tables (p. 232-35. Cf. also the synoptic table of the “Classification of Knowledge,” pp. 302-03). To take just one more example—reading the book on Sunday afternoon, we were shocked to have to run the whole gamut of the sciences before finding Theology, under Sociology (it is under Philosophy in the “Specialty” column, and under both Philosophy and Sociology in the “Logical” column). Practically, there is something to be said for this arrangement—and, practically, in our perhaps misguided opinion, it doesn’t much matter in what order our large classes of books are placed in relation to each other. What *does* matter and what is most interesting and instructive, is the similarity of the corresponding classes in the different schemes, whether or not we agree with the orders of the classes. Equally interesting and valuable are the brief discussions of alternative classifications, from the points of view of Philosophy, Ethics, Psychology, Education and History.

In Mr. Bliss’s own “System of the Sciences,” we wish he had supplemented his discussion of “fundamental,” “special,” “derivative,” and “composite” sciences by lists of them. In the course of Chapters 11-12, we learn that Physics, Chemistry, Biology, Psychology and Sociology are fundamental (though Sociology is “recently synthesized”), that Geography and Anthropology are composite, and that Astronomy, Bacteriology and Geology are special. But we are not sufficiently expert to place the others.

To us, as a classifier, the most valuable part of the book is the brief and somewhat uneven, but encyclopædic survey in chapters 10-12 of the scope, content and relations of the different classes. The lack of this background is all too common among classifiers and is not supplied in our condensed tabular classification schedules. Not the least valuable feature of this survey is its up-to-dateness. Neglecting several points of disagreement, should we not all like to follow Mr. Bliss in his Physics subdivisions, and, if our specialist would only let us, in his classing Statistics under General Methods, Geology as a physical science, Psychology between Biology and Social Sciences, and Education as Applied Psychology? Is the book equally prophetic in the portions where the reviewer is not sufficiently enlightened to follow?

A review of *Author’s Annual* will be found on page 271.

Through the Looking Glass

*A Monthly Review of Children's Books
and Reading*

A Few Books for Young People
By Jean C. Roos

Head of the Stevenson Room for Young People, Public Library, Cleveland, Ohio

"AND THE thoughts of youth are long, long thoughts," and who can tell into what realms they may be guided—romance, poetry, adventure, dramatic biographies and books of achievement?

One of the best books to make our thoughts soar is the *Winged Horse Anthology*, by Joseph Auslander and Frank Hill. While reading *The Winged Horse* we felt, with the authors, that an anthology was inevitable. The background and development of poetry was so ably presented in the former book that it has already made a place for the companion volume. The anthology has come up to our expectation in encompassing "the best verse done in English and only the best." We need not be surprised that some of our favorites have not stood this test, but we can always keep near at hand *The Oxford Book of English Verse*.

Then there is David Loth's *The Brownings*, a Victorian idyll, which gives an intimate and personal interpretation of these two gifted writers. Robert and Elizabeth Barrett Browning. In this vivacious account we have Browning as an impetuous youth, a much-sought-after dinner guest, a social success, the hero of a unique but romantic love story, and a writer of verses too difficult for most of his readers to appreciate. The happiness of his own early life is in strange contrast with the somber youth of Elizabeth Barrett.

In *A Great Rich Man*, by Louise Boas, we have both romance and adventure. This is a dramatic and fascinating biography of Sir Walter Scott, the writer of "best sellers" in the first quarter of the nineteenth century. The title is taken from the prediction of Charlotte, his wife, that he would sometime be "a great rich man." We see him as an incurably boyish and rollicking man who loved to weave romantic tales. "It was through his own creations that Scott realized his life's hopes; he could not himself, lame giant, serve his country; he could not overcome the enemy, he could not sheath his sword after a valiant fight; but he could do all these things vicariously in the persons of his own literary creations."

The spirit of T. R. lives again in Earle Looker's *The White House Gang*. "Theodore

Roosevelt started the rollicking, joyous career of the White House Gang by sending his youngest son, Quentin, to the Force Public School. Here the Gang was recruited, and here each day after school it went into a huddle, to confound all rules of deportment in high places, mingle in the lives of Presidents and policemen, win victories, taste honor, suffer punishments and engage in escapades which were swept along the wires to national publicity." What boy will not enjoy reading the pirate gang's search "for gold buried therein," on the banks of the Potomac, and who would not enjoy the thirty minutes of Gang-chasing with T. R. in the huge attic of the White House?

Bruce Gould in his *Skylarking* has given us a most unusual and informative book on flying. His descriptions of flying as a joyous adventure are poetic and his chapters on the "pathfinders of the air" are written with much spirit and more restraint.

Commander Ellsberg's *On the Bottom*, a tale of fortitude and heroism, is the account of the salvaging of the submarine S-51. "The task is done . . . to the navy we brought back its ship, and to the nation we brought back a story of victory over the sea, wrought by the quiet courage of men who could face death in solitude, disregard failure, and still fight on till they had wrested from the ocean the tomb of their shipmates."

William S. Davis has re-created the period of the French Revolution and the turmoil of life in Paris, with its dangers and intrigues, in *The Whirlwind*. The plot is concerned with Chevalier René de Massac, a favorite of the court, who forfeits his position by his determination to marry Virginie Durand, the daughter of a bourgeois merchant. René espouses the cause of the people and only just escapes the guillotine. This book will thrill many a reader and send them scurrying to the shelves to find out more about the Reign of Terror.

Cuts, at top of page, of the "White Knight sliding down the poker" are taken by permission from the Tenniel edition of *Through the Looking Glass* published by Macmillan Co.

For Bibliography of books reviewed see p. 280.

In the Library World

The Carnegie Library in 1929

BY LENDING 2,855,283 books for home reading the Carnegie Library of Pittsburgh broke all former records. This is an increase of 304,697 over 1928, and is the largest year's gain ever recorded. These figures do not include the Carnegie Free Library of Allegheny, which serves residents of the North Side. Almost every

agency showed a gain, with East Liberty, South Side and Wylie Avenue branches running a close race for honors among the branches. The Knoxville branch, established in 1928 in the school building at Knox and Rochelle Avenues, has shown a phenomenal growth, lending more books than several older and larger branches.

If the number of books which were borrowed from the Carnegie Library, Pittsburgh, during 1919 could be placed in one line, that line would stretch from Pittsburgh to Wheeling, W. Va.

Americana Has Dana Article

THE January, 1930, *Americana Illustrated* contains a most comprehensive article on the Life and Work of John Cotton Dana, by Edgar Holger Cahill, of Newark, N. J. Pages 69 to 84 are devoted to this article, which contains a full-page portrait of Mr. Dana. The article is rather full with reference to Mr. Dana's activities before he entered library work, and special emphasis is also laid on his work in connection with museums.

Change in Code

THE Chairman of the Committee who presented the "Code of Ethics" at the midwinter meeting at Chicago, reports the following change regarding the responsibility of the trustees for raising money for the library:

"Responsibility for bringing the needs of the library before the authorities who control the appropriation of funds and for using all proper influence to get such increases as are necessary for the growth and development of the work."

New Buildings

DURING 1930 North Carolina expects to erect two public library buildings. One, the Sheppard Memorial Library at Greenville, is now in process of going up; it is to cost \$50,000, the gift of Harper D. Sheppard, a former resident of Greenville, in honor of his father. The Y. M. C. A. at Gastonia has presented \$25,000 to the city with which to erect a library building; the city has furnished the lot and the building will be started in a few weeks. At Goldsboro the remodeling of the home of Mr. and Mrs. Sol Weil for a public library is almost complete; the home, and \$5,000 to remodel it, is given by the Weil children.

MONTCLAIR Branch of the Oakland Free Library, Cal., was dedicated Feb. 28, 1930.

BREADEN Family Branch of the Reuben McMillan Free Library, Youngstown, Ohio, was dedicated Feb. 14, 1930.

Baltimore Project

IN MAY, 1927, a \$3,000,000 loan (including \$600,000 for additional properties) was passed by a majority of 50,000 votes for the Enoch Pratt Free Library of Baltimore. The architects were not appointed until a year later. The old building site with additional necessary properties for enlargement, was approved; this involved the condemning of surrounding property. As one owner was loath to move, condemnation suit was carried to the State Court of Appeals and was not decided in favor of the library until January 6 of this year. Since that date the work on the final blueprints has been pushed ahead, and it is hoped that bids will be secured in May and actual building operations begun in July.

County Libraries in New York State

BILLS have been introduced in the State Senate and Assembly authorizing the Board of Supervisors in each of the counties of New York State to establish a free county library, and to raise by tax for its maintenance an amount which shall not in any year exceed one mill on each dollar of taxable property. The trustees of a library (five residents living in different towns) are empowered to establish a central library or library headquarters in the county seat or some other place conveniently located with such branches or book stations as may be necessary. They may also provide one or more book trucks for distribution of books.

Or they may contract with any public or free library to provide such facilities for the county by aid of the money appropriated. The bills further provide that the Legislature shall appropriate on behalf of the State an amount sufficient to pay one-half the cost of the maintenance of the library service and one-half the necessary salaries and expenses of the county librarian and assistants. They also carry a specific appropriation of \$25,000 to pay the quotas and an additional sum of \$7,500 for the salaries and expenses of a county library supervisor and assistant in the State Education Department. This last stipulation is to make sure that proper standards are maintained.

Editorial Board Named

AN EDITORIAL Board for the proposed Journal of Discussion has been appointed by Andrew Keogh, president of the American Library Association. The members are:

J. C. M. Hanson, Chairman, Graduate Library School, University of Chicago, Chicago, Ill.

Edith M. Coulter, University of California School of Librarianship, Berkeley, Cal.

Carleton B. Joeckel, Library Science Department, University of Michigan, Ann Arbor, Mich.

H. B. Van Hoesen, Brown University Library, Providence, R. I.

Joseph L. Wheeler, Public Library, Baltimore, Md.

C. C. Williamson, School of Library Service, Columbia University, New York City.

American Library in Paris

FOR THE fifth time, the American Library in Paris has triumphantly met the condition placed upon it by the Laura Spelman Rockefeller Memorial, that it secure a total of \$35,000 from other sources in order to receive a grant of \$10,000 from the Memorial. Three days before the end of the year, some \$13,000 was needed to complete this total, and a short, sharp campaign was undertaken by the director of the library, Mr. Burton Stevenson, which succeeded in securing considerably more than the amount needed.

One of the pleasantest features was the voluntary contributions, of which the following letter, in which was inclosed a check for \$1,000, is an example:

"I read in yesterday's New York *Herald* that you needed to collect \$14,000 immediately in order not to forfeit the next Laura Spelman Rockefeller donation. I am, therefore, inclosing a contribution, with my best

wishes for a successful campaign. I visited the library for the first time two weeks ago and was so much impressed by it that it is a great pleasure to be able to help its activities."

Furthermore, two friends of the library, independent of each other, agreed to make up any deficit, and another cabled from New York that he would double his contribution, if it was necessary to do so. This is the last time any stated amount will have to be raised by the library, as the Rockefeller Foundation grant of \$35,000 covering the next three years has been made without condition of any sort.

The library is now in financial shape to develop its work considerably, and plans for the year will soon be announced by the Director. They will probably include the establishment of two new departments, and the development and organization of the special library of the International Reference Department. The publication of the *European Economic and Political Survey*, which has been issued by this department for the past four years, has been discontinued, as it was felt that the total resources of the department could be more usefully devoted to the development of the special reference library, in order to make it of greatly increased usefulness to students and research workers in the field of current European economics and politics. Other collections of the same sort in Paris will also be indexed, so that information can be given as to exactly what material is available in Paris, and where it may be found. This may eventually be published in some such form as the finding-list of "American Law Books in Paris," issued by the library some months ago.

Cleveland Organizes Business Information Bureau

IN AN effort to serve the business men of Cleveland better and more intensively, the Cleveland Public Library has organized a Business Information Bureau with a trained staff, and with a trained business research librarian in charge. The literature of business is vast and the library needs of business men cover many subjects which it will not be feasible at present to collect in any one room assigned for this work; but the Business Information Bureau will function as a coordinating unit between the other divisions of the library, thus making the entire business resources of the main library accessible to its clients. A *Bulletin*, issued each month, devoted to notes on current business information, as found in books, services, pamphlets, and periodicals, and to lists on specific subjects, will be sent regularly to libraries which request it on receipt of 25 cents to cover the annual mailing charge.

Twelve Issues of "Booklist"

ANNOUNCEMENT of the publication of twelve instead of ten issues, annually, of the A. L. A. *Booklist* has recently been made. Need for a September issue has been pointed out by librarians who have been obliged to wait until October for information on new books, and a special issue will be published each August in connection with the annual index. The new subscription rate will be \$2.50 per year and will go into effect with the September number.

Harvard Receives Rare Hebrew Books

TWO vast and valuable collections of Hebrew literature, which date from the introduction of printing to the present time, have recently come into the possession of Harvard University, according to an announcement made in *The New York Times* of Feb. 18. The larger of the two, a collection of about 12,000 volumes, is the gift of Lucius N. Littauer of New York City, in honor of his father and will be known as the Nathan Littauer Library. The second collection, which is extremely rich in Oriental prints, consists of about 3000 volumes and was presented in honor of Judge Julian W. Mack, a member of the Harvard Board of Overseers.

The Parents' Bookshelf

LIBRARIANS who have not already made the acquaintance of *The Parents' Bookshelf*, a ten-page reading list designed as a guide to the new literature on child training, may secure a sample copy on request to the A. L. A. Prepared in cooperation with the National Congress of Parents and Teachers, the folder suggests books which translate the results of scientific research into everyday terms.

Bibliography

(Continued from "Through the Looking Glass" on page 277)

- Auslander, Joseph & Hill, Frank. *The Winged Horse Anthology*. (Doubleday) \$1.50.

Gerhard R. Lomer, McGill University Library, Montreal, Que.

John Ridington, University of British Columbia Library, Vancouver, B. C.

Spanish Literature

TO THOSE who are looking for a source of supply for Spanish books it will be of interest to know that an organization exists in New York City for this express purpose. The Casa Editorial "La Nueva Democracia" is part of a movement established to promote friendship and understanding between North and Latin America. This Publications Department was founded some ten years ago and has a staff which is specially equipped to render service, not only in the purchase of books in Spanish but also in advising what books are available for any given purpose. There is a very considerable volume of literature appearing in the Spanish language, but it is published in widely separated cities over the Hispanic world, and there is no one complete organ of Spanish bibliography. Books published in Buenos Aires, Santiago, Lima, Caracas, Havana, Mexico, Madrid and Barcelona, to mention only some of the principal centres of publishing activity, are not listed together anywhere. It is therefore not easy to keep up-to-date on this constant and varied stream of books. This Publications Department was founded to supply the best of both Spanish and Latin American literature and is in a position to render a **unique** service to librarians who are looking for books in Spanish. Catalogs and book lists are issued by the department from time to time and are sent gratis to all whose names are on the mailing list. Correspondence should be addressed to "La Nueva Democracia," 419 Fourth Avenue, New York City.

Among the recent books:

Ingleses, Franceses y Españoles (an essay on comparative psychology), by Salvador de Madariaga, professor of the University of Oxford.

Elelin (a drama in verse in three acts), by Ricardo Rojas, rector of the University of Buenos Aires and famous Argentine writer.

El Sermon Sobre la Paz, by Juan Zorrilla de San Martín, a well-known Uruguayan writer.

Luis Vives y la Filosofia del Renacimiento, posthumous work of A. Bonilla y San Martín, ex-professor of philosophy in the Central University, Madrid. (Three volumes.)

"... Mas Yo Os Digo," by John A. Mackay, ex-professor of Philosophy in the University of San Marcos, Lima.

La Revolucion Mexicana, sus orígenes, sus hombres, su obra; by Luis Araquistain, notable Spanish writer and critic.

El Hombre Nuevo (novel), by Ricardo León of the Real Academia Española.

Among Librarians

Dr. Frank P. Hill—*An Appreciation by George H. Locke*

I WAS at a "dinner group" a few weeks ago when the subject under discussion was the existence of reality, and during the animated debate the word "evolution" was used very often and seldom twice in exactly the same sense. I had no idea of the immense scope of the word when used in debate. One man insisted on the point of view of the oak being in the acorn, but more attractive to me was the suggestion that we might look at it from the other end and say that in the mighty oak one might recognize the acorn. That is how I feel when the Editor of this JOURNAL calls on me to write something about the prospective passing of that giant of Brooklyn, Frank P. Hill, the Chief Librarian of the Public Library. I am but a youth in the Library world. I am willing to acknowledge it, but being human I prefer to say it myself. I did not know Doctor Hill when he went to Dartmouth, nor when he lived in New England, nor even when he was unconsciously preparing the way in Newark for the coming of John Cotton Dana. When I first met him he was already a vigorous oak well set in the soil and umbrageous to the timid as well as sturdy against the windy.

You knew he was an oak. You never mistook him for a basswood. There was no mistake about the bark—I am still speaking botanically—and you felt that he would not be disturbed by the zephyrs which might sing through a poplar, or the sudden blast which might snap off the apparently strong elm.

But enough of that figure, although it is alluring! Dr. Frank P. Hill has a definite personality and a seemingly unwilling idealism, a singular and attractive combination, of which we have not enough in this material and man-made day of method and efficiency. The boldness with which he sometimes expresses himself is never without a bit of that New England reticence which while not in favor of

FRANK P. HILL

compromise yet hesitates to be dogmatic. There will be many who will regret that he passes over from "the active work," as we used to say in the days of the good old Wesleyan Church. We are glad to hear that he will not be wholly lost to library work but that he will pass into an "intermediate state" where he will be called a Library Consultant. I hope that we shall have the advantage of his experience for many years, and that the Library Board of Brooklyn will see to it that he attends the meetings of the American Library Association, for he is one of those individuals whose presence and personality are assets to our profession.

And to get back to my original figure of speech, wasn't it Scott who said:

"Ours is no sapling chance-sown by the fountain
Blooming at Beltane, in winter to fade."

William Eaton Foster—*An Appreciation by Harry Lyman Koopman*

IN ATTEMPTING to characterize the work of my friend and neighbor, William Eaton Foster, I can fortunately refer to it as not yet complete, for, though he is nominally in retirement, he will still be active in the preparation of the library's monthly publication, *Books For All*, which is descended in a direct line from his earlier and widely influential reference lists. With the problems of general management off

his hands, he will be free also to give attention to the development of the special collections in the library, notably the printing collection.

Very few librarians have had a professional career like that of Foster. In fact, it may be a unique record to have had charge of a library from its beginnings for nearly fifty-three years and during that time to have multiplied its contents by thirty, to have designed a library build-

ing and then to have outgrown it, and also to have developed, with its branches, sub-branches, stations and deposits, 149 outside contacts with the public.

WILLIAM EATON FOSTER

In his work for Providence he has been in certain directions a pioneer and in others he has set standards of excellence that have made his methods subjects of study by his fellow librarians. The reference lists issued in his earlier period are an example of this leadership. These lists were an outgrowth of his reference work, a department in which his library has from the first held high rank. His reference lists on American history were later made publications of the Society for Political Education.* He was one of the first librarians to develop contacts with schools, to establish an art department, an industrial department, a foreign department and a business branch.

By his volume, *Libraries and Readers*, by his contributions to the earlier volumes of *THE LIBRARY JOURNAL*, as also by his presidency of the Massachusetts Library Club and the Rhode Island Library Association, he has further repaid his debt to his profession. He has contributed to the literature of the Civil Service movement and has written two important historical volumes, *Stephen Hopkins, Rhode Island Statesman* and *Town Government in Rhode Island*.

If I may speak in the language of the old Boston Public Library, I should say that Foster has a Bates Hall mind which has not flinched from Lower Hall problems but has successfully grappled with them. No one can

know Foster's career intimately without realizing that a superb university librarian was lost to fame when he dedicated his abilities to public library work. He is by nature a scholar and interested in the scholarly aspect of librarianship. He is as much interested in the deepening as in the diffusion of knowledge. He has therefore bequeathed to his successor and to the city of Providence a library that represents a scholar's approach to literature. He has set a standard so firmly based that it is likely to maintain itself.

While entirely sympathetic with the entertainment aspect of books, Foster has not given such books an unduly prominent place in expenditures for purchase or administration. In this attitude he seems likely to have been prophetic of American library development, which must choose between rivalry with the moving pictures and cooperation with the schools and colleges in the continuous education of the community. The seal of the Providence Public Library bears for its motto "Enlightenment." It is also the keynote of Foster's career.

College and University Libraries

MARY ELIZABETH COBB, N. Y. S. '14, librarian of the New York State College for Teachers, Albany, has been granted a leave of absence for the school year and is attending the Graduate Library School, University of Chicago.

FLORENCE E. HOFFA, Iowa '29, has been added to the staff of the Order Department of the University of Iowa Libraries beginning January 1.

ISABEL HOWELL, Columbia '27, has resigned her position as reference librarian at Vanderbilt University to become reference librarian and executive secretary of the Library of the George Peabody College for Teachers at Nashville, Tenn.

JOHN H. KNICKERBOCKER, N. Y. P. '24, on October first, became librarian of Gettysburg College, Gettysburg, Pa.

KWOH-CHUIN LIU, Wisconsin '24, is now librarian of the University of Nanking, acting Dean of the College of Arts, and teacher in philosophy, library science and bibliography.

Still Short Five Copies

FIVE more copies of *THE LIBRARY JOURNAL* for Feb. 1, 1929, are needed. Can you supply them at 25c. each?

**THE LIBRARY JOURNAL*, V. 6, 1881.

School Library News

Rural Schools of Jefferson County, Kentucky

DURING the past year 251 classroom libraries were placed by the Children's Department in 78 schools in Jefferson County. The books were changed once, and sometimes twice, during the year. The big project in the rural schools this past year has been the effort to have a library table and chairs in every school room in Jefferson county. The Supervisor of Reading under the County Board of Education is encouraging this plan. In many instances, the tables are old tables brought from home and enameled by the children in bright colors. Some of the schools are making chairs from orange boxes, and the older girls are making chair cushions of bright cretonne. The parent-teacher associations in the various schools are subscribing to outstanding children's magazines. The bright tables, chairs, books, and magazines are very gay and cheerful, and add much to the atmosphere of the school room.

Book Pageant

TO CELEBRATE Book Week at Southeastern State Teachers College, Durant, Okla., a book pageant was presented by children from the Training School. This was given at the regular Wednesday Assembly hour and was appreciated by the entire student body. Mrs. John Cowan, Assistant Librarian, originated and worked out the idea with pupils from the six Elementary Grades.

Nine children holding up large story books formed a background on the stage, while the librarian's desk at the left and two small pages with placards helped to make a fitting setting for the huge wooden book on hinges, which was appropriately lettered "Book Week."

When a group of children asked the librarian for books that were interesting and adventuresome, she suggested that she show them some books. This she did by turning the front cover of the huge wooden book, and out stepped Peter Pan, who was followed by First Grade children, costumed to represent Little Black Sambo, the Pig, the Duck, the Dog and Mrs. Tubbs. The Second Grade represented Raggedy Ann and Raggedy Andy, Little Red Riding Hood, Jack and Terry, the Bobbsey Twins and the Good Wolf. Third Grade characters were the Brownies, Doctor Dolittle, Careless Jane, Red Arrow, Miss Humpety, Bunny Rabbit, while the Fourth Grade presented the Japanese Twins, King Arthur, Goody Two Shoes, Uncle Wiggly and the Overall Boys. The

Fifth Grade chose Heidi, the Puritan Twins, Huckleberry Finn, Boy Scout and Pied Piper as their characterizations, Mary, Colin and Dickson from *Secret Garden*, Amy, Beth, Jo, Marmee, and Meg from *Little Women*, Jim Hawkins, Rip Van Winkle, Mother Goose and Two Little Confederates were presented by the Sixth Grade.

After characters from every land and age had emerged from the pages of this magic book, Peter Pan suggested a march. A muffled drumming was heard, and the characters easily fell into step for Peter Pan's parade. This gave the audience a good opportunity to observe the costumes, which had, for the better part, been designed by the children themselves.

School Library Film

"BOYS, GIRLS and Books in the Modern School Library," a film prepared by the A. L. A. Education Committee with the aid of the Publicity Assistant at A. L. A. Headquarters, was shown for the first time at a meeting of the Education Committee at Atlantic City, Feb. 25. It was also displayed in the A. L. A. booth at the N. E. A. Meeting of Superintendents, in connection with which the meeting of the Education Committee was called. The film showed school library activities in elementary, junior and senior high schools, and floor plans of several types of school libraries. The film may be shown in an automatic projector or a Society for Visual Education Pictorial projector,

Maine Library Has Reading Course

THE Thornton Academy Library, Saco, Me., reports a most interesting library reading course conducted among the students of the school. The object is to create a reading habit of wide range; one book leads to another. Each book and its author is discussed with the librarian and the students read plays, biography, fiction and many other books of interest. The plan is made possible through the small enrollment of the school; student enrollment numbers approximately 260. The present enrollment in the reading course is thirty-one and no two students are following the same course. Other means of cooperation between the library and the school are library instruction, eight lessons being given through the project method and credit being allowed to students completing the course in a reasonable length of time, and through a special reserve shelf for all teachers, facilitating quick reference work for their classes.

Opportunities

This column is open to librarians

Wanted—A librarian of experience and training to act as Head of Circulation in a growing library near New York City. College and library school required. Salary \$1,800. C-25.

College and University of California library school graduate, with ten years' experience, desires position in a college, public, or business library. C-16.

University and library school graduate, with M.A. degree, wishes administrative position, order or reference. Experienced in college library work. C-17.

Position wanted in New York City by librarian with six years' public and two years' business library experience. C-18.

Position wanted in library by librarian with A.B. degree, library school training, some experience, and twenty-three years of age. Moderate salary. C-19.

Librarian, with M.A. in English from Columbia University and library school training, desires position for summer months. C-20.

Librarian with training and excellent experience desires to make change by Sept. 1. C-21.

Trained and experienced cataloger, wishing to make a change between now and September, would like cataloging position of responsibility in small city or town in East or South. C-22.

Young woman, college and library school graduate, with little experience, would like a position as assistant in a public or college library. East preferred. C-23.

College librarian wishes librarianship of a small college or reference position in a big college or university for next year. C-24.

Librarian with about twelve years' experience in public, normal school, and document work desires position. Loan or reference work preferred. C-14.

Young woman, college and library school graduate with a year's experience in a college library, desires position for summer. C-15.

Branch librarian, five years' experience, who holds a college and library school degree, wishes position in or near Washington, D. C. C-10.

Library school graduate, with almost four years' experience, wishes position as assistant in college library, preferably seminary and on western coast. C-11.

Library school graduate with public library experience and fifteen years' experience in a university library desires position in the Middle West. C-12.

Children's librarian with training and five years' experience would like position in or near Chicago. C-13.

Use of Book Jackets

IN A RECENT talk to the librarians in Rhode Island, Miss Alice Jordan, Boston Public Library Children's Librarian, suggested another use of book jackets besides the usual one of putting them on bulletin boards. She suggested that librarians who give talks on books to children would do well to take the jackets along to visualize the volume to those to whom they were speaking. To carry a full collection of books is impossible, but the jackets give the children a sense of the reality of the books and hold their attention better than the mere calling of titles.

The Calendar

March 27—Western Massachusetts Library Club, annual meeting at City Library, Springfield.

April 4—American Library Institute at Hotel Chelsea, Atlantic City.

April 4-5—Pennsylvania Library Club and New Jersey Library Association, annual meeting at Hotel Chelsea, Atlantic City, N. J.

FABRIKOLD

“Public librarians consulted have been unanimous in their approval.”

FOR the information of those who may not have seen a copy of the American Library Association Booklist for October, we take pleasure in reprinting verbatim the review of the New Edition of the Encyclopaedia Britannica which appeared in that publication—

The Encyclopaedia Britannica. 14th ed. A new survey of universal knowledge. Lond. The Encyclopaedia Britannica Company, Ltd; N. Y. Encyclopaedia Britannica, Inc., 1929. 24v. illus. maps. diag. \$129.50; \$325.

The first complete revision since 1911. Maintains the high tradition of earlier editions, although its field has been greatly widened and articles and bibliographies show that the work has been simplified, made more popular and more usable. There are thousands of excellently selected and reproduced new illustrations. The paper, while thin, is of good quality and high rag content. Now “re-made for the English-speaking world”; the departmental editors are about equally divided between Great Britain and the United States, and in many, if not in all, subjects a fine balance has been maintained. Its up-to-dateness is revealed not only in dates and figures and new subjects, but in its recognition of the changing attitudes of the day. Public librarians consulted have been unanimous in their approval. Opinion of high school librarians appears to be that, while the new Britannica is a fine addition to a high school collection, and in science and civics the best, there is still need in school libraries for a simpler encyclopaedia when only one can be afforded.

We would also suggest reference to the first report of the Committee on Subscription Books (Subscription Books Bulletin, Jan. 1930) wherein the new Britannica is reviewed and listed as “Recommended” by the Committee.

CROWELL'S LATEST BOOKS

THE PAVED PATH

By Phyllis Hambleton. \$2.00

A story of middle English life. It is a distinct contribution to new fiction.

NINETY SIX

By E. C. McCants. \$2.00

A historical novel which reconstructs for the reader a phase of the Revolution which is very little known.

HEROES OF THE AIR

By Chelsea Fraser. With 42 illustrations and 29 charts. 594 pages. \$2.00

The author has taken advantage of the need of a new edition—making nine printings up to the present—to add stories covering flights to the end of 1929—including Byrd's dash to the South Pole.

FAMOUS DOGS IN FICTION

By J. Walker McSpadden. Revised and enlarged edition with color frontispiece by Margaret S. Johnson and 12 halftones. \$2.00

A collection of tales from famous authors, in praise of their dog friends.

FAMOUS GIRLS OF THE WHITE HOUSE

By Kate D. Sweetser, author of "Ten Girls from Dickens." Illustrated with color frontis and 12 portraits. \$2.50

Every girl will like this book. It is charming.

CROWELL'S DICTIONARY OF BUSINESS AND FINANCE

Revised Edition. \$3.50

The definitions and terms have been carefully revised to apply to conditions of 1930.

SOCIAL CONTROL OF THE MENTALLY DEFICIENT

By Stanley P. Davies, Ph.D., State Charities Aid Association. With 12 illustrations. \$3.00

Portrays the striking evolution of social attitudes and programs relating to mental deficiency from the earliest times to the present.

A HISTORY OF THE MODERN CHURCH

By J. W. C. Wand, Dean of Oriel College, Oxford. With two maps. \$3.00

ROME AND THE PAPACY

By Gilbert Bagnani. With 9 illustrations. \$3.00

AMERICA THE DREAM

By Katharine Lee Bates, author of "From Gretna Green to Land's End." \$2.50

PRINCIPLES OF PROPERTY INSURANCE

By F. E. Wolfe, Ph.D. Formerly Professor of Economics, University of Illinois. \$3.00

Portrays the part played in modern social economy by risk-bearing organizations in the field of insurance.

LABOR PROBLEMS

By Gordon S. Watkins, Ph.D., Professor of Economics, University of California. Revised and Reset. \$3.50

The most comprehensive and most recent treatment of the subject to be had in a single volume.

AMERICAN CITY GOVERNMENT AND ADMINISTRATION

By Austin F. Macdonald, University of Pennsylvania. Author of "Federal Aid." \$3.75

A complete picture of present-day municipal problems.

FROM GRETNA GREEN TO LAND'S END (New Printing)

By Katharine Lee Bates. A Literary Journey in England. With 24 illustrations. \$3.50

THE ORGANIZATION OF KNOWLEDGE AND THE SYSTEM OF THE SCIENCES

By HENRY EVELYN BLISS

Associate Librarian, The College of the City of New York

In the last issue of *The Library Journal* Mr. Henry B. Van Hoesen, in a lengthy review of Mr. Bliss's book, says in part:

"In practice, in prospect or in retrospect, every librarian is a classifier; and this book should be prescribed as a hurdle for every classifier . . . In general, the author has minimized the difficulty of our hurdle in every possible way—clearness of exposition, exemplification, detailed table of contents, abstracts at heads of sections, concluding summaries, tables and graphic presentations and various typographical devices."

"It ought to be prescribed and discussed in every library school, though even then one should not expect too much from it. Librarians will be better when they will know more not simply of the forms and classes but of the things themselves, when they will have some familiarity with at least one kind of knowledge. In the meanwhile, Bliss's book will help them to realize more clearly the intellectual needs of their profession."—Mr. George Sarton in *Isis*. \$5.00

A Review by the BOSTON TRANSCRIPT worth your reading

"Private Presses and Their Books," by Will Ransom, contains in its 494 octavo pages a record of a fascinating field of publishing which is today attracting more attention than ever among collectors. The author tells of the development of the private press and of the noted personalities that figure in its history; of the work of more than 300 presses, and gives a list of nearly three thousand "items" that have come from them, and an exhaustive index including the operators who have provided the material for this output. Not only are the American private presses described, but those of England and some continental places. Here also are described those presses which have worked in the spirit of the private press, like the Merrymount, Nonesuch, Random House and others. The book itself, designed by Mr. Ransom and printed at the Lakeside Press under the supervision of W. A. Kittredge, is an excellent example of the quasi-private press.

It is not an easy matter to define a private press. The Laboratory Press, conducted by Porter Garnett at the Carnegie Institute of Technology, with a purpose purely educational and having no commercial function, is strictly a private press. Yet it is, according to Mr. Ransom's definition, an "educational" rather than a "private" press. Various definitions are given of what constitutes the latter, the one accepted being of "a press that does work to express the sincere personality of the creator," whether it pays or not. The Strawberry Hill Press of Horace Walpole was what is generally understood to be a private press, yet it offered its works, or many of them, for sale, although Walpole expressed his purpose as "amusement." For our own part, we believe the best definition is that which Falconer Madan used in describing the Daniel Press: "A press carried on unofficially by a person or group of persons for his or their private purposes." This would seem to be sufficiently broad to allow the inclusion of all the presses enumerated by Mr. Ransom.

In view of the present widespread interest in fine printing, this book will be of value to many more than those who are collectors. The first section, giving a general view of the different private presses, American, English and Continental, also deals with the personalities back of these presses, the makers and designers of books. This view of the subject will be found not only informative, but entertaining, for Mr. Ransom writes with a facile pen. The check-list of private press issues is of course of more direct interest to the collector and the typographer, and to the former is indispensable. The details given are all that could be desired in most cases, and for the most of the presses the lists have been carefully checked. Mr. Ransom's book is one of the outstanding ones of the year in its class, and as an aid to the collector it merits the use of the word *indispensable*.

☛ "The best laid plans o' mice and men . . ." has excellent application to this number. One of our scheduled articles did not arrive in time, but two, quite unexpected and excellent, dropped from the skies just in time to be included. You will want to read them all of course, but we draw your attention to the hitherto unannounced articles: one by John Fogg of New Brunswick, N. J., who presents many problems of the small library in an excellent manner, and the other by Jessie Smith of Hiram College, Ohio, who certainly has an unique solution to the problem of training assistants in a small college library.

☛ In addition to the previously announced articles on Vacation Reading, scheduled for April 15, the story of the World Cruise at Rice Branch, Cleveland Public Library, will be told by Anne Fox Oliphant, children's librarian.

☛ The Business and Special Libraries number is planned for May first and, due to the cooperation of several special librarians, interesting articles are forthcoming.

Progress View of the 16-tier Main Stack, Sterling Memorial Library, Yale University, New Haven, Conn.
James Gamble Rogers, Inc., Architects *Marc Fiddits & Son, Inc., General Contractors*

WHEN the stone exterior of a library rises to cover a Snead Bookstack installation it covers more than just steel bookshelving. A Snead Bookstack installation means that the heating and ventilating of the stack room has been studied, so that the temperature and humidity which are best for preserving the books may be maintained. Present and future needs of the library are studied. Elevators, book-lifts, book conveyors, study compartments, lighting arrangements and special provision for rare volumes—all these have been carefully planned . . . Our 50 years experience in the installation of bookstacks is at your disposal. Let us aid you with your equipment problems—whether the library is very large or small.

Some Problems of Small Libraries

*A Homogeneous Relation Between Board of Trustees, Librarian,
and Staff Is Essential to an Efficient Library Service, Either
Large or Small, No Matter Where Located*

By John B. Fogg

Directing Librarian, Free Public Library, New Brunswick, N. J.

THE PARAMOUNT problem faced, almost without exception, by small libraries everywhere is that of adequately financing the program that the librarians and trustees would set up. Seriously attacking this problem, these same librarians and trustees find themselves facing the inevitable circle. To be sure, a library's service is limited by the financial support it receives, but can it rightfully expect to receive support beyond the value placed on it by those who pay the bills—the taxpayers? For just a moment, put yourself in the place of a city councilman who is constantly reminded that taxes are fast reaching the point beyond which the average taxpayer cannot pay. You are asked to vote for an increased appropriation for an institution serving at the most one-third of the municipality. You only hear of it when it needs more money; few people talk about it, and those who do are not overly enthusiastic about the service they receive. Would you, honestly, in his place, vote that increase? But, you hasten to remind me, we are doing the best that we can with our meager appropriation. We would like to do all of these things, but we simply haven't the necessary funds. And there is your circle.

So long as libraries are confined to this circle no one can expect any real progress. The real problem is to break up this everlasting "beating around the bush" and get started toward somewhere. In the first place, a definite pro-

gram of library service must be decided upon which will include service to all interests of the city. To develop just a more elaborate program for only part of the community would be suicidal. Remember, our cities include business and industry as well as schools and recreational readers. All interests, I repeat it, must be represented in this program in proportion to their prominence in the community's life.

With these constructive plans tabulated, and their costs over a period of years evaluated, the library trustees will then be able to go before the city officials requesting something definite instead of vaguely asking for additional appropriations to meet "normal growth" or "enlarge an overcrowded building." We have found it helpful in New Brunswick to send our officials individually the requirements of the library outlined in budget form and showing definitely where the increases are. In this way they can see exactly how the money is to be spent. Previous to acting officially on the library's needs, the city officials and the finance committee of the board of trustees meet in conference, at which time all the various items are explained in full. The officials have a chance then to question any portion of the budget. An interesting expression from one of our city officials when we were discussing library needs in conference was that "you couldn't accuse the library trustees of extrava-

gance." That was his impression of our set-up for the coming year. A six per cent increase in the library appropriation with an 18-point rise in the tax rate in New Brunswick shows the effectiveness of this procedure.

It is well to remember in emphasizing the library's needs to city officials that they are more interested in the benefits to the voters than in the detailed needs of the library. They will usually not be interested in knowing that this increase you are asking for will enable you to buy more books, that you can then employ another person to help out, or that you will then be able to buy a new magazine rack. These details are only a means to an end. What they want to know is what difference it makes if you do or do not receive all these things.

The discussion of financing a library program just completed presupposes that the program has been worked up into a budget covering all expenditures. In this day and time one need not elaborate on the advantages, in fact, the indispensability, of the budget plan. No business can long exist or expect to prosper under a less careful accounting plan, and libraries which do not adopt modern business methods cannot hope to warrant the support they desire. It is absolutely essential that libraries adopt a business-like manner of financing their programs. If they can show at the end of a year that they have been run according to up-to-date business methods, and that the money appropriated has been spent both carefully and wisely and entirely to the benefit of the municipality, the chances are just that much better for a more healthy support the following year. In the majority of cases such a procedure should net increased revenue in proportion to the appeal of the program set up and the success of the committee's persuasive abilities. However, if your library is among the few that may receive a complete turn-down, do not give up in despair, but try to determine the limiting factors and go back with a vengeance the next year. If you have done your job well, you may be sure that the city officials know more of the real purpose of a library than they ever did before. Your efforts will not have been in vain.

One of the pleasantest and yet one of the most responsible duties of a librarian is the building of a book collection that will be worthy of the title, library. It is most important that librarians give the selection of books a prominent part of their time, and the growing needs of the community must be their guiding star. Beginning the year with a new book fund, it is advisable to set aside certain amounts to cover reference books and replace-

ments, and to provide for the improving of various sections requiring special attention from time to time. The collections of foreign books, scientific books, business and industrial books, and classical writings are a few which need special attention. Of course, it is impossible to keep all sections up to date at all times, but occasional special attention would be decidedly helpful, and a small fund should be set aside for this purpose.

The selection of current books is a real delight, especially when you can see the books themselves instead of working from lists. By an arrangement with our local book dealer, through whom we purchase most of our books, opportunity is given the library to see the publisher's lines in advance of publication and as a whole. As the publisher's salesmen appear at the book store with their spring or fall lines, they are sent up to the library, giving us the opportunity to select titles that we are certain of buying when published. The salesmen are usually well informed on their publications, and the information that they are able to give is helpful in making a selection. A word of caution should accompany this suggestion, that extreme care be exercised lest you overbuy. The lines will all be very attractive, and the interest in the books may put you off your guard, so that you may order books that are really not the type for the library. Used with due care, however, this preliminary buying is timely, in that you have the books for circulation shortly after publication and also the librarian has an opportunity to "size up" the season in advance.

This selection should account for only the "sure buys," and where there is a question the decision should be left until the book has been published and either read or reviewed favorably. It is not difficult to find reviews of books, as the field is full of them, but the real difficulty is to get the review soon after the book is published. Most reviews of any value appear from one to three months after the book is published. Book reviews of particular interest to small libraries are: *The Retail Bookseller*, including *The Blue List*, published by Baker & Taylor, Jobbers, New York; *The Book Review Digest*, published by H. W. Wilson Company; *The Booklist*, and the Book Supplements of Sunday papers, of which that of the *New York Herald Tribune* is perhaps the most consistent and reliable. Of the review sources listed above, *The Blue List*, published monthly as part of *The Retail Bookseller*, is the most timely and is a very good list for small libraries. Brief reviews accompany the lists, which include many prepublication titles. Except for its lack of timeliness, *The Booklist*

is exceptionally fine, as it not only lists the books with a review, but gives the classification and subject headings. In addition, a selected list for small libraries appears in the back of each number. The other reviews are very good for final checking and should be looked over regularly.

Just as system is applied to the selection of books, it must also be applied in the purchase of them. Other things being equal, it is always best to deal "at home." If you are as lucky as we are that way, you should most certainly buy your new books from your local book dealer. We receive a 25 per cent discount and free delivery, with a privilege of exchange, together with excellent service. In case you are not so fortunate, there are several jobbers who will give the terms listed above. Such jobbers are Wanamaker's in Philadelphia; Baker & Taylor, New York; Library Book House, Springfield, Mass., and several others. Many libraries find it advisable to buy the popular fiction and children's books resewed and in buckram bindings. Baker & Taylor, Library Book House, and Rade-maekers & Son of Newark supply new titles in these bindings.

The replacement of worn-out copies is a problem in itself and provides an excellent chance for visiting second-hand book stores and remainder dealers. I look forward with rare delight to my more or less regular visits to Philadelphia and New York for this purpose. It usually happens that while looking for replacements you run across publisher's remainders or review copies of books you have turned down from current lists of new books. As these are usually priced at 50 per cent off, you are thus able to get books you otherwise could not afford. I frequently pass up a high-priced book when new and pick it up later at 50 per cent off. This is common practice among many librarians and is well worth the consideration of all. Particularly should small libraries with limited funds avail themselves of such "honest-to-goodness" bargains.

Unless a book is badly torn or marked inside, it usually pays to rebind rather than replace even at second-hand prices. The price of binding is lower than for second-hand books, except on reprints; a rebound book is superior to even a new book in wearing qualities and, with the bright colors now being used, attractiveness. Before having any books bound be sure to look into all the new materials being developed for this purpose. There are many new and bright colors and also attractive designs in use at the present time. Experience has proved that bright colors and attractive bindings circulate books much faster

than the older types of ultra-conservative binding. If you want a book read, be sure it has good-sized type and an attractive binding, and you are practically sure of attainment.

Having solved the financial problem and bought the books, the librarian, with the assistance of the board of trustees, faces the problem of providing the personal equation to care for the books and see that they are systematically distributed and returned. The selection of assistants is all important and requires careful consideration of personal qualities. In fact, I would be inclined to place personal qualities, such as willingness to work, accuracy, ability to meet the public courteously, inherent desire to advance the ideals of library service, and the placing of service above self ahead of educational qualifications. The education can be got later, but the lack of personal qualities is seldom made up. Most of our assistants come to us as part-time workers from our local high school. Our full-time assistants are selected from the best of the part-time workers, and thus have experience in the basic principles of the library before they begin full-time work. The first summer after they graduate from high school and are appointed to full-time work they are expected to begin their work at summer school, and it is an unwritten law that raises in salaries are contingent on summer school training. Where possible, it is always best to replace vacancies by moving up members of the staff and taking on some one for the lowest position. In small libraries this procedure could be adopted in almost every instance except for replacing a librarian, providing the staff makes a practice of attending summer session courses.

Staff meetings or conferences held at regular intervals are decidedly helpful, even in small libraries, for developing a unity of purpose of the library as a whole. Separated according to duties, it is easy for assistants to lose sight of the real ideal they are working for and to think only of their particular tasks. A unified staff with an ideal of "service" can best be attained by talking over the problems of the library and solving frequently problems which, if allowed to remain unsolved, might completely disrupt the service the library is rendering. We use our staff meetings to review current books as well, and find them highly interesting as well as enlightening.

It is well to remember that, after all, the staff is made up of human beings and their interests must be considered in arranging the work of the library. Schedules of small libraries frequently call for the assistants to make three trips to the library in a day, i.e., they may be scheduled 9-11, 1-5, 7-9, or some-

thing like that. Although the total hours for the day are no more than a 9-1, 2-6, or 1-5, 6-9 schedule the difference to the assistant can be readily seen. If possible, arrange it so that the time can be blocked instead of spread out. This will add considerably to their comfort and they will be able to give much more to their work as they will not be worn out tramping back and forth.

Most libraries require between thirty-eight and forty-two hours per week of assistants, the deciding factors usually being the size of staff or number of hours the library is open daily. A forty-hour week is recommended, but each library must make its own decision according to local conditions. If there is much sickness among the staff it might be well to develop a definite system of so much sick leave per year. Several of the more progressive libraries have already developed such a system with unused portions applying toward an extended leave of absence with pay after a certain number of years. This is, of course, an ideal condition, but beyond the reach of most small libraries. Librarians and trustees will usually find that the interest given the welfare of staff members will be returned many times in better attitudes toward work and toward all the library is striving to accomplish.

Service to outside agencies, including schools, hospitals, industries, etc., should be developed as much and as quickly as local conditions warrant and will permit. Unless the schools have their own libraries under the Board of Education, they should receive the first attention of the library. Even if they do have their own libraries there should be a healthy cooperation, one with the other. Class visits to the library with instruction in the use of the library should be carried out regardless of the library situation in the schools. This is easily accomplished by a definite scheduled arrangement decided by the schools and the library.

If there are no libraries in the schools, classroom or school libraries should be arranged through the cooperation of the Board of Education and Board of Trustees of the library. In most cities the Board of Education pays part of the expense, usually purchasing the books. The relations between the schools and the library can be further strengthened by a special program during Book Week. The library at New Brunswick has supplied speakers for the assemblies of local high schools during Book Week each of the past few years. Each year the students look forward to the Book Week speaker from the library and the speakers are always enthusiastically received.

In all the library is striving to do there must be faith and cooperation between the librarian and Board of Trustees. Ideally, the Board of Trustees will provide the money through the annual appropriation and, with the librarian's help, formulate the policies of the library. The librarian's position is to carry out these policies and to recommend new ways of improving the library's service. In all the librarian does where a matter of policy is involved the Board of Trustees must be informed and taken into confidence. Nothing bothers a trustee more than to be told from the outside, first, something new the library is doing. Then, too, a trustee through his contacts can be a great aid to the librarian in starting new services or in meeting people outside the library. The trustees, on the other hand, must be just as thoughtful of the librarian's rights.

A homogeneous relation between Board of Trustees, Librarian and Staff is essential to an efficient library service no matter where it is located. That library in which this homogeneity is most highly developed and where there is a sincere desire to provide the city it serves with the best and most up-to-date library service, will go farthest toward reaching the library ideal of "The best books for the most people at the least cost."

Increasing the Usefulness of My Public Library

The Librarian in the Small Library Must Act the Rôles of Children's Librarian, Cataloger, Chairman of Book Committee, Desk Assistant, Reference and Chief Librarian

By Anna Mower

Librarian, Morristown Centennial Library, Vermont

ACCORDING to the old adage, "A cat may look at a king," so the small town librarian may look at the methods employed in the large institutions, but only to see how far they can be adapted to her needs and problems.

We read in our professional magazines of the small library of fifty or sixty thousand volumes which shows that *small* is a relative term. Ours is a small library of 6300 volumes in a town of about 3000 inhabitants, and two years ago about 23 per cent of the population were active borrowers. The library is open every afternoon and on four evenings. There is no assistant librarian, so whatever projects are undertaken must be selected with the idea that they cannot interfere with the daily routine of work.

In most places I am sure the library year begins with September, not with the calendar year, for September brings to the library quite a different life. We are located near both high and graded buildings, and most of the children on their way to and from home pass our doors. So it is in the autumn that we begin the story of our activities. We have made sporadic attempts to teach the use of the library to the students before, but never until last year did we give systematic instruction on the book, its contents, on the catalog, the use of the *Readers' Guide*, and the most common reference books. This instruction did not permit of our observing Children's Book Week, but we did visit each of the grades from the third up, talk with them about their reading, and leave lists of books which they would enjoy.

Most of the teachers in our rural schools had collections of books which the children were permitted to take home. To these teachers at the end of the school year letters were sent to be read to the children expressing the hope that they had enjoyed our books and inviting them to get reading matter for themselves during the summer vacation. This year also we tried a new summer reading project. Before the schools closed in June we visited the grades from the third to the sixth inclusive, and invited the children to a vacation trip by means of books. The idea had been tried in

Bridgeport, Conn., Springfield, Mass., and other large libraries, but we had to adapt it to our facilities. For both younger and older children, lists of books were made, telling of people or places of historic interest or dealing with different sections of America. It was recommended that, if they wanted to take the trip, they should read eight books, two of which should be true stories. The only attraction offered was some little outline maps of the United States, upon which they traced with colored pencils the various stages of their trip and took home with them when their journey was ended.

Thus far we have been speaking as a children's librarian, but there remain the rôles of cataloger, chairman of the book committee, desk assistant, reference and chief librarian in which we act. The cataloger has too little to do, since the number of new books is small, but that makes the second job, that of chairman of the book committee, doubly responsible, since the book money must be wisely expended. On her falls the duty of seeing that she offers her patrons a well-balanced ration. Some of the books must contain vitamin *A* to feed the ideals and aspirations, vitamin *B* to prevent mental rickets, vitamin *C* to guard against moral scurvy, and vitamin *D* to help them face this kaleidoscopic twentieth century with honesty and courage.

As desk attendant she offers this mental diet to borrowers, carefully distinguishing between the farmer who wants something exciting enough to keep him awake after a long day in the open and the convalescent who needs something soothing; the leisurely person who wants something to help pass the time away and the busy one who honestly desires to keep in touch with the worthwhile in literature; the detective story addict who explains that President Hoover reads them, and the person who longs for the good old-fashioned love story with the happy ending.

As reference librarian, the demands are varied, ranging from information on the religion of the colonists for a member of the local D. A. R. to "dope on muskrats" for someone considering entering the business of raising them. These activities are only a part

of the general policy of the institution which the librarian, together with the trustees, must shape. How shall we make the entire community conscious of its library? Serving as a community center helps. The local Red Cross holds its annual business meeting here. The village woman's club meets regularly when the building is not open for library purposes, and it, together with the club organized in the outlying district, asks that the librarian have a place on its program, and this gives an opportunity to emphasize some of the worthwhile books. The editor of our local weekly newspaper helped to solve the problem of publicity by giving us a particular place in his sheet, where each week "The Library Corner" offers news items, book reviews, current happenings in the world of books or authors, or, when ideas run low, just a quotation appropriate to the season.

Thus simply and persistently we try to make the library fill its niche in the community. That this niche is slowly enlarging is shown in part by the circulation. Fifteen years ago

we had a per capita circulation of 3.6. In spite of the multiplicity of present-day distractions, last year there was a per capita circulation of 7.1. I do not offer these facts and figures as anything unusual. Many other libraries, working under greater handicaps, can offer a better record. They just suggest the reason why a good many people work in these small libraries when they might clerk in a store, work in an office or teach school more profitably. We believe with Kathleen Norris, "Once get into the habit of really enjoying books and you have put into your life something that is pure gain. Nothing restores a sense of true proportion, the true values of our harassed and undignified lives, like a background of books. Little detached flashes of life they are—a Russian interior here, a cold bit of New England ice poetry there, they begin to build themselves together, to take form, to give an expanding interest in the big world, and a willingness at least to decrease one's own ignorance."

To paraphrase the title of a recent popular book, "I Like Librarying."

Books in Suburbia—The Suburban Library's Book Buying Problems

The Suburban Library Is Really a Small Library with Problems Peculiarly Its Own

By Margery Quigley

Librarian, Public Library, Montclair, N. J.

WHEN I unlock the library's front door in the morning and discover outside two or three chauffeurs in livery who have been waiting beside their Packards and Isottas in order to return a few books on Spanish art or stained glass which their mistresses have been studying upon for club papers, my librarian's heart swells with pride. "If a man can build a better mousetrap—," I say to myself. "If a suburban community is willing to tax itself properly for a public library—," I continue to muse, as I beam over the gratifying circulation figures of yesterday, "there is no limit to the suburban library's usefulness."

When the golden glow has worn off, when I read over the Regional Plan and with its authors try to think what our clientèle and the communities of neighboring suburban libraries will be ten and twenty years hence, I am forced to recognize two truths about suburban libraries: that we are not giving our suburban readers either the books they actually need nor the books they want (two quite different matters), and that the traditional library methods of book

purchase if persisted in by the suburban library are going to lay the suburban library low.

No public libraries in the United States are at such a crisis in their lives at the present moment as the suburban libraries. We are neither delivering the goods our borrowers want from us nor reaching the persons we should reach, and pretty soon the three groups of us, the library folk, the unsatisfied and the untouched, will all find it out, and then, what?

In general the average suburban town consists of The Rich, Those-with-Superior-Brains-but-with-no-Great-Amount-of-Capital, Servants—a class which makes up the suburban library's foreign born and colored patrons to a great extent—a few nice lads who work in chain stores on the order of the A. & P. and Commuters. Some phase or other of life in the city affects the mental life of each suburban resident. If he reads, the urge which made him get the book in hand has some very close connection with the city.

A good many suburban libraries, those with fair book funds, are therefore panting for

breath. They are trying to get the new books bought and on the shelf before inveterate readers of Sunday book reviews and daily book columns and persons who stroll down the Avenue and look in book shop windows can call up on the telephone and ask to have a long list of books purchased because of special request. No more waiting nowadays for authoritative library reviews, no more patient delay until one of the library assistants or her relatives can read the novel from cover to cover to see if it is pure enough for inclusion in the Public Library's collection; no more order cards and letters in triplicate and express bills and long waits for shipments held for lacks. Instead, at least a weekly trip to the city to publishers or to shops where one can snatch the latest titles off the display shelves and decide then and there on inclusion. More and more suburban libraries are using the book sections of department stores, because of deliveries in less than twenty-four hours, at no cost for carriage, and with no letters to be written.

The book-purchasing agent of the suburban library is at present its pivotal assistant. She must keep a jump ahead of the readers of *The New Yorker* and *Herald Tribune Books*, she must have the current plays and movies in book form, if possible before the plays open, she must know what exhibitions and what commercial movements in the city will affect the reading interests of the suburbs and what lecturers may be expected to address suburban audiences during the coming lecture season.

By the same tokens, gone, or rather almost gone, is meticulous censorship as practised in all good libraries even as short a time as five years ago. It is simply futile in the face of suburban maturity. I recently borrowed *Point Counter Point* from the shelves of the public library where I work and decided, after reading it, that I had no moral right to distribute it to Montclair readers from under the roof of the Public Library. Two weeks after I had withdrawn all copies, it was assigned for study to a group of our most conservative club-women; and into the collection once more it had to go.

Every change in the zoning law to permit the erection of apartment houses in suburbs increases the number of potential fiction readers in the town. Every apartment house actually built changes the Public Library's relationship to the circulation rental libraries in bookshops and drug stores, for women in apartment houses read a lot of fiction. This relation is something which will have to be settled sooner or later by conference and treaty based on reciprocity. Public libraries practically al-

ways suggest the neighboring rental library when reporting a new novel "out." It does not work the other way round, however; so, as long as the rental library refuses or neglects or does not know enough to recommend the public library to persons who inquire for material not at the rental library and properly the province of the public library—the novels of Dumas, for instance—no suburban public library is likely to cut down its purchases in the new fiction field.

But to go back to *The Totally Untouched*—by-suburban-libraries. These are chiefly *The Rich* and *The Commuters*, a good half of the suburban town's population. It is safe to say that the majority of *The Rich* is completely indifferent to the local public library. It has every reason to be, except one (divulged two paragraphs below).

The Rich are used to beauty and comfort in their homes, and most suburban libraries are neither beautiful nor comfortable. They are accustomed to quick service and super-service, because money buys both. The suburban library at present is so geared that it can give neither. The clerks and shopkeepers of the suburban town go in for obsequiousness; the library assistants unconsciously have a different manner which is not always pleasing to Mrs. Gold-rocks.

One of the stock justifications for the absence of the wealthy from the program of the suburban library is, "The wealthy person buys all the books he requires." He buys a good many, it is true. Almost every best seller and Book-of-the-Month title may be found around his house. It is equally true that never in the history of books did wealthy persons need the services of the public library as much as today. How does a wealthy person dare to buy a bit of expensive furniture or lay out a garden or build a wing on his house, to take simple illustrations, without first reading up on the subject—not simply reading a few books which one's favorite bookshop happens to have in stock, but titles found on sensible annotated bibliographies furnished by the public library? How can a Junior League probationer get along without the public library? How can a wealthy person build up a workable family library without consulting the public library and using its wealth of experience with subscription books and with children's favorites? The obligation of the rich to read is much greater than that put upon the rest of us who consume print. The rich never needed to make up their minds on great problems so much; to do so they must read wisely and widely.

The suburban library has only begun to make its contribution to the rich. We spend so much

time at libraries trying to teach children how to use card catalogs and *Readers' Guides* and *World Almanacs*. If we invested a commensurate amount of time on groups of wealthy women and held classes to teach them how best to spend their money on books, we would pack the library curb with limousines.

Then the whole range of telephone service and delivery by messenger and parcel post waits to be developed with the rich, and the faster the suburban library goes in for adequate publicity here, the better for everyone. I was in an exclusive little bookshop in Suburbia the other day when a distinctly capitalistic mother, evidently at her wits' end, rushed in and said to the clerk, "Have you a book which tells how to play dominoes?" "No; I'm sorry," replied the clerk, and the incident was closed. Almost any suburban library, if called on the telephone, would have read off the fundamental rules to her or set the book aside for her. Speed the day of the public library's concern for the rich and the consequent enthusiasm of the rich for the public library. Both parties would make money by the union, bookstores would make more sales, and the diffusion of knowledge from the printed page would at last be more diffused.

We may as well confess also that the average suburban library scarcely touches the commuters. To prove it one has only to walk down the aisles of any suburban train. Out of a train load of passengers I doubt if one can find ten persons reading books. If an imaginative librarian allows her mind to run on schemes to equip commuters with books as well as with newspapers and *The Wall Street Journal*, she glimpses all sorts of services; slot machines for books operated with a library registration disk, a library branch in the station made up entirely of pocket-size volumes, the commuter's ticket acting as a perfectly good "identification card," and so on. In the only case I have heard of where a public library planned to set up a commuters' branch under most liberal lending terms in a great union station the owners of the newspaper and magazine concession in the station had the permission rescinded.

The suburban library's disgruntled customers are the poor souls who "take courses for credit." Scratch almost any suburbanite around New York and you find she is taking a course; at Columbia, at N. Y. U., Rutgers extension, in Newark, in her own home town, or by correspondence. Although it is not uncommon for five hundred persons to be referred to the same book at the same time to the librarian's certain knowledge, the adult suburban student is reluctant to believe that anyone else in the community could want the book he or she wants.

Suburban librarians make desperate efforts to buy required readings well in advance of the demand. They try to drag by mail from instructors the names of texts and supplementary recommendations. Zeal dies after a few such answers as, "There is a copy of each book on reserve for my class in the University Library," "I try to compel my students to own copies of the book, or at least to have one in class at each meeting."

The tired, hard-pressed students who for one reason or another are not buying these essential texts will continue to tell the world that the suburban library "simply doesn't have a thing I want," just as long as instructors in extension and adult education classes insist upon the reading of definite pages and chapters, instead of saying, "Read everything you can lay hands on around this subject."

The suburban library will properly come to do in a general way for books and information and special libraries in the metropolitan district what the *Union List of Serials* does in print for magazines—tell the seeker after information the nearest library where he can get it. This service will often take time, time, for instance, to borrow or time to photostat pages. It will cost someone money. For example, it recently cost the Montclair Library fifty-five cents in telephone calls to tell the father of a college student home on a short vacation where in the vicinity she could borrow or buy a copy of Dorothy Wordsworth's *Journals* before night-fall. The recognition of such a policy will put an end to that feeling of frustration so many persons have in dealing with libraries, and it will also give the librarian the pleasure of seeing a library inquiry through to its end. Many more letters of introduction to librarians of special libraries, much fuller understanding of what the special libraries contain and what service they are equipped to give, many more books purchased by individuals will be among the results of selling this "metropolitan area" idea to readers and to information assistants.

Suppose the Board of Library Trustees in Suburbia should say to their librarian, "Just what can this library do in the way of books and printed matter that no other agency in town—schools, bookstores, art museum, women's clubs—can do at all or even do fairly adequately?" Suppose this board then said, "When we find out what the library is best fitted to do in this town we will go ahead and do that and nothing else."

What answer could the librarian make? I think she could say with truth, "The suburban library stands alone in this town in the completeness of its files of magazines and the indexes which open them up. No other institu-

tion in town can have the collection of expensive and up-to-date reference books we have. No one is equipped to give so many kinds of information by telephone, from nine to nine daily. Theoretically at least our advice about books to buy ought to be the best in town, for we have ready access to all sorts of authoritative printed bibliographies. We can act as a clearing house to tell where the nearest source

of information is, if the information is not available here."

"Magazine—reference books—telephone answers to questions—bibliographies—local information; all right! Get some superb reference librarians, and don't care what the telephone bills are henceforth," reply the trustees. "It won't come to a cent more than the present program, either," they add cannily.

Statistics in a Small Library

By Marian P. Greene

Librarian, Alhambra Public Library, California

"Statistics prove so many things:
The size of towns, the height of kings,
The age of children in the schools,
The skull development of fools,
The wealth of lucky millionaires,
The price of hens and mining shares—
All things below and things above,
It seems to me statistics prove.

But no; statistics never yet
Appraised a single violet,
Statistics never caught the gleam
That dances on a meadow stream
Or weighed the anthem of a bird
In forest aisles, devoutly heard;
Statistics never proved a soul
In high or low, in part or whole;

How much statistics cannot prove."

—*Library Occurrent.*

THE ONLY way, apparently, that a small or medium-sized library can obtain funds from whatever governing body controls it is to prove by statistics of circulation, reference work, telephone calls, or what not that it is underfinanced and undermanned, or, I should say, underwomaned. This constitutes a real menace to the soul of the library in that part of the work that "statistics cannot prove," which is more vital, more necessary to true growth than any number of more or less useless volumes on the shelves, or than any amount of daily circulation records. The soul of the library is the staff thereof. At various State and national meetings for the past seventeen years (and longer, for all I know), in *Libraries* and *THE LIBRARY JOURNAL*, the qualifications of a library assistant have been discussed. Around and around we go, like the patient horses of old-time, one-ring circuses, and these discussions apparently are nothing but variations on the same old theme, with nothing new or really constructive to give the young and growing library assistant fresh courage and revived interest in her work.

At a recent meeting of the Sixth District of the California Library Association the topic for the afternoon session was "Professional Advancement." Librarians spoke from various library angles, and urged that the staff be encouraged to attend lecture courses, read more, travel, and sit at the feet, spiritually, of those who have attained prominence in the library world. How travel when the salaries

are so low that only the assistant who can make her own clothes, cook her own meals, and live at home can exist from one salary check to another? How travel, even, if funds have accumulated, when the long vacation never exceeds three weeks, and in many local libraries has been cut to two? How read more and take extension courses when her eight-hour day leaves the average assistant bodily and mentally numb, even though she be young and healthy? What she wants, and what she needs, at the end of a library day is fun and recreation—a complete change of thought.

Librarians and library assistants, to be efficient, must come refreshed and happy to their work each day. It is the duty of the librarian, and it should be her chief interest and pleasure, to help her subordinates feel the dignity and importance of their tasks, to realize that there is life in even minute detail. What can we do to keep those who must necessarily do a large part of the drudgery, that belongs to all daily tasks, alive and growing in spirit? How can we make the staff, the soul of the library, happy in its work? In a large library, where there are many heads of department, there is a goal toward which all may work, but in the small or medium-sized library there is really only one person, the librarian herself, who has much chance of professional recognition.

In *Libraries* for July, 1927, a short article on "Salvaging the Specialist," by Fred Telford, director of the Bureau of Public Person-

nel Administration at Washington, D. C., expressed the writer's surprise at the way library workers flit about, not only from city to city, which is good for us, but from position to position. To quote: "I was wholly unprepared to find that the trained librarian, who last year was doing children's work apparently with a considerable degree of success, might be found this year handing out books to adults at a loan desk, next year giving assistance to a rather crotchety lot of readers wanting help with metaphysical problems, and the following year cataloging current fiction."

This seems to me a waste of force, and even in a small library we ought to be able to salvage the specialist by studying the individuality of each assistant, and giving her the type of work she is best fitted to do, with freedom to try out her own ideas and methods. However humble the task, there is joy and pride in doing it just as well as it can be done. In this particular library, with a staff now grown to twelve, including the librarian, we have a special reserve assistant, a school assistant (not the children's librarian), a statistician and periodical assistant, a registration assistant, as well as the reference librarian, cataloger, and children's librarian. Even the "overdues" assistant, surely one of the most thankless positions, is bound to feel a thrill when "no fine" week produces more than forty long-lost volumes, as well as an aftermath of "conscience books" returned anonymously to the shelves. Those who have had training in accredited library schools, there are four on this staff, take keen pleasure in instructing an under-

study in their own particular line of work. The reserve assistant has brought up her reserves from a negligible quantity to 2000 books in the last year, and we only reserve non-fiction. As for the statistics that "prove so many things," they show a healthy increase all along the line.

Since the beginning of the new fiscal year all phases of the various library activities have been increasingly prosperous. Now what lies in the future? When each of the present assistants reaches the maximum salary for her position, what can the librarian do to keep her happy and contented? Who can blame her if she goes to pastures new, where financial opportunities are better and advancement more sure? The problem is the biggest one facing the medium-sized library, and the only solution is to create an *esprit de corps*, a morale, that will be proof against all temptation. Vacations should be longer, and extra time allowed to those who do attend extension courses during the year.

Here in California, as far as I know, the Alhambra Public Library is the only one where each assistant is given one whole free day a week. Two half days, with their scattered hours, are nothing as compared to the bliss that comes when, on awaking, the first thought is: "I am free today!" Yet the statistics that prove so many things demonstrate that we have one assistant to every 25,000 in circulation, which does not admit of idleness, and the good will and kindly attitude of our ever-increasing public shows, as statistics cannot possibly do, that success is a thing of the spirit.

Training of Student Assistants in Small College Libraries

By Jessie J. Smith

Librarian, Hiram College Library, Ohio

WHEN I came to Hiram College, student assistants were assigned to the library on the basis of their need of earning money to finance their way through college. They were good, bad, and indifferent. I soon realized we must have better help. I remember the first time I heard Dr. Dewey talk on the qualifications of a librarian; almost the first thing he said was: "You can polish an agate, but not a pumpkin." Regardless of all that has been said in the past about the superiority of students who work their way through college, anyone who has had to work with student help knows that neither

the inability or the unwillingness of parents to meet the college expenses of their children furnishes an infallible guarantee that the children are worth educating or that they can render valuable service in a library. The selection of those who shall be admitted to the privilege of library training while they are in college can in no case be left to those who are promoting student enrollment with promises of library work as a means of self-support. It involves the rights of the librarian, who is responsible for the service they are to render in return for their instruction, the rights of other students in the school who desire this opportunity to prepare for lives of service and who can bring greater ability to the task.

Paper presented at College Librarians Section, A. L. A. Mid-winter Meeting, Chicago, Ill.

The system we have evolved in Hiram has many advantages. Each fall we start a training class in which the students compete for the student assistant positions which will become available upon the graduation of the seniors the following June. The course consists of one class hour and two hours of supervised work per week for one full school year. It is understood there will be no tuition, no credit for the course, and no pay for the work hours; consequently, only those who desire the knowledge apply for admission. The course is so popular that some years we have had twenty-six applicants. We give three lessons to all applicants, and choose the ten with highest standing for the class which is to continue throughout the year. This selected group of ten compete for the positions on the paid staff. These awards are made at the end of the school year, so that students who are eligible for paid positions know what they can count on for the coming year. I find ten the number which I can handle to the best advantage without their having to wait for the use of library tools when we are doing problems.

During their years on the paid staff, students are required to attend staff meeting once each week, and work about ten hours per week at desk work. These staff meetings are virtually classes in library methods and reference work. Thus a student who secures a position on the student staff at the end of his freshman year receives 144 hours of class instruction during his four college years, an equivalent of four hours per week for one school year. Through this selective system we always have exceptionally bright and dependable students on the student staff. Here is one place where the shibboleth, "Nothing succeeds like success," is true. The excellent service which these selected students are able to render is the thing which popularizes the library training. We always use seniors at our reference desk. Reference librarians might be surprised at the per cent of problems these students are able to handle without assistance. Our reference desk is near the door into the librarian's office, and when a student assistant has a problem he cannot handle, he comes in and asks help. This policy of making students appear capable increases their pride and interest in their work and certainly helps in popularizing the library course.

Now that we have briefly sketched the practice in our small library, let us take up in more detail some of the phases of the course. First, there is the policy of no credit. There has been some agitation to make this a credit course. But we feel we cannot be bothered with the students who are seeking what they hope will

be a "snap" course. We say firmly, "If you want a knowledge of library work, to help you judge if you would like librarianship as a profession, if you want to know how to use library resources to advantage while in college or in later life, if you want to know how to do research work in a university, or how to organize a library in rural high school which is too small to employ a trained librarian, we will be glad to have you enter the class, but if you feel that the knowledge you will gain is not sufficient recompense for the time you must spend, three hours per week for one school year, we do not want you." My observation is that credit classes in any applied subject usually draw the froth. Insistence that knowledge is the only reward that can be expected certainly skims the cream. When more students apply for training than can be successfully trained in such necessity for a library classification which embraces the whole field of knowledge, each student is then given nine slips of paper, each of which is headed with one of the main divisions of the Dewey decimal system. Then we read in miscellaneous order the subjects of the second summary, asking him to assign each to its proper slip. This reveals which students can think logically, and incidentally forms an excellent introduction to later work in the study of the classification. For the second lesson we have the class make catalog cards by dictation. This lesson reveals which students can follow directions accurately and, incidentally, makes a splendid introduction for later work in the study of cataloging. For the third lesson we give a quiz on their knowledge of books and affairs, which gives an appraisal of their background for library work. With these three insights it is not difficult to choose from the applicants the ten who will do the best work in the class.

Some years I have conducted two classes. One year a boy who was "going out" for debate came and asked me if I would take a class of ten boys who wanted to learn how to collect debate material. Before that, the library class had always been composed entirely of girls. Since that time we have always had a fair number of boys in each class. When the class is finally organized we require a \$5 deposit from each member. Fifty cents is deducted from this deposit each time he is absent from class or work period without being excused in advance. In every class there are a few who receive all of the \$5 back at the end of the year. But sometimes there are a few who forfeit the whole amount. Naturally these are deemed too undependable for staff positions. Work periods are assigned to each student where he has vacant periods on his class

schedule. Usually during the training year students are assigned morning hours at the reserve desk. Our reserve desk is not very busy during the morning hours, and we can give them busy work; they do a great variety of manual and filing tasks and accessioning, although it sometimes results in a mottled appearance of the accession book. The training class always takes a thorough invoice of the library each year.

In the class we aim to give them a survey of all kinds of library work. Because too much college work consists of lectures and assigned readings, I try to teach this class through projects and problems. Leonard in his recent life of Steinmetz, speaking of the marvel of Steinmetz's success as a lecturer, says, "Lecturing to undergraduates is as specialized a profession as acting on the vaudeville circuit. You have to hold down the writhing, unwilling minds with one hand while you cram knowledge into them with the other. Undergraduates have a way of drawing in their ears until they become round, perfectly polished, and words glance off them harmlessly." Our course is planned entirely with the idea of making the student familiar with library tools and reference books. We feel guilty when we take any part of his one hour for getting acquainted with these tools and books for lecture work. Our methods may be erratic, but we are never annoyed by lack of attention. For example, in teaching subject heading, after a few minutes spent in explaining the principles of subject heading, I give each member of the class a volume of the *Smithsonian Institution Proceedings* and the volume of the *Readers' Guide*, which indexes the same, asking him to find one subject entry for each article in the appendix. The students learn more about subject heading in this one hour than a dozen lectures would teach them. Reference books are presented in the same way. Perhaps ten minutes are taken to point out the characteristics of a group of reference books, and the remainder of the hour spent in problems in them. I find having each problem printed on a separate slip, which can be signed on the back by the student who solves it, is a much better policy than having all of the problems printed on one sheet. I think it possible that many educators carrying on their tasks in traditional manner do not realize that educational practice is changing from the lecture method to the laboratory method quite as rapidly and as surely as it changed from the text-book method to the lecture method in the recent past. The student assistant doing supervised work in the library is in reality having a laboratory course in library work, and if his

class work is also conducted upon laboratory methods he is doubly fortunate.

At the end of the training year, two or three of the best students in this class are chosen to fill the places on the staff made vacant by the graduation of seniors. The first year a student serves on the paid staff he works either afternoon or evening hours at the reserve desk. In the junior or senior year he is promoted to the reference desk. With three siftings, first when we refuse to give credit, second when we reduce the class to ten, third when we accept only the best in the training class for paid positions, we always have dependable, efficient student assistants. The class conducted for the paid student assistants aims to cover the various subjects much more thoroughly than was possible in the training class. We aim to give enough knowledge of cataloging to enable a student to use a catalog intelligently and to compile a creditable bibliography, but, of course, we do not train catalogers. However, I have known of some of our graduates doing creditable cataloging in rural high schools which were too small to employ a trained cataloger. So with the other subjects, we aim to give a thorough general knowledge. It is out of the question for a small college such as ours to give complete technical training. In the class which we conduct for the paid assistants we spend about half of the year on reference work each year, and rotate the technical subjects on a three-year schedule, so that any student coming into the class at the end of his freshman year gets the whole course. Perhaps all other small college libraries have evolved some such system as this. There are several reasons why small college libraries should train student help. They cannot usually afford to pay for trained help enough to carry on all of their work, they furnish employment to deserving students who need work to help finance their way through college, and they give valuable training to students which could be made valid only through actual work in a library. (I have had students return from study in a university and say "my library training was of more use to me in my work at the university than any of my other college work.") The attitude of the whole student body toward the library is materially affected by having several of the outstanding students in college have an inside view of library problems. The loyalty of the student staff makes infringement of library rules less frequent. And, lastly, such a selective system as we maintain at Hiram College furnishes a splendid group of recruits for the library profession.

This last point brings me to the point of this talk. Since it is clear that in no other way

could a group of young people be selected who would be as capable and as definitely suited to the library profession as through a selective system applied to student assistants in a college library, it is regrettable that more of them do not enter the profession. If a selective system could be adopted in all small colleges, so that college librarians could certify that their graduating student assistants were superior and especially fitted for library work, it seems they might be given preference over applicants with no training whatever for library positions which do not require technical training. Students who have had such training and supervised practice throughout their college years have a better technique for handling reserve desk problems in schools, colleges and universities which are large enough to employ assistants for such positions than library school students who have not had a thousand hours of desk practice. Usually students who have had four years in college feel that they must earn their own money for subsequent education. This results in these students who have shown especial fitness for librarianship being forced to find employment in some other field before they go on to library school, and the majority of them are lost to the library profession. I have wondered why a library school in connection with some large university might not offer working scholarships for students whose ability has been thus tested, and who have had supervised practice in the various kinds of library work

peculiar to college and university libraries. The other suggestion for saving to the library profession this selected and partially trained group of potential librarians is that some summer school meet their especial needs. We have enough summer schools giving courses for the general public, so that one in each section might be spared to render this special service. Of course, this would mean some standardization of the training given in small colleges, so that the school could have a definite basis on which to proceed and could know what subjects had been covered. I am quite aware that standardization, if carried to any great extent, tends to destroy interest, but it might be carried as far as the adoption of a uniform practice in the selection of assistants to guarantee their exceptional ability and fitness for the task; an outlined course for the first year, to insure that each student has received an introduction to all phases of library work, a required number of hours of supervised work, and a minimum number of class hours in each subject necessary for the comprehension of the whole task. Upon such a basis a summer school might develop a course which would produce much greater ability than is produced in the average summer school. This would give a summer school where all of the students were college graduates of superior ability and with practical knowledge of library problems, and offer a chance for a course radically different from the summer courses now given.

The DeWitt Clinton High School Library

By Harriette Arden

Librarian

THE NEW DeWitt Clinton High School for boys, New York City, with a registered attendance in the main building of over 5,600, and an additional attendance in its four annexes of about 3,000, is very attractively located on high ground facing Mosholu Parkway to the north, and with a beautiful view of Jerome Reservoir to the south; adjoining the school property, on the east side of Jerome Reservoir, are the grounds of Hunter College, the buildings of which are now under construction. The school building is rectangular in form with a large court in center. This court is divided from north to south by a connecting section which unites the front and rear portions of the building. In this section on the main floor is the auditorium, and directly above it, and reached from the third floor, is the library. The library was planned by the late

principal, Dr. Francis H. J. Paul, assisted by the advice of Mr. C. C. Leland, the Supervisor of School Libraries of the Board of Education of New York City, Mr. Datz, and his staff of the Library Bureau, and the DeWitt Clinton Librarian. The students assembled in the new school on the first of May, 1929, but the school building was not formally dedicated until October 29, 1929.

The library is entered from the "Hall of Colleges," so named from the photographs of universities which are hung upon its walls. On either side of the wide entrance is a check-room for student's brief cases; beyond this, and facing the entrance, is the main charging desk, sufficiently removed from the reading tables as to prevent any noise about the desk from disturbing the readers. The large library, a room 70 ft. by 86 ft., seating 300 students, is directly

beyond the charging desk, a railing on both sides separating the desk space from the main room. To the left of the charging desk is a very attractive reading room for teachers; to the right two conference rooms and a work room. Opening from the work room is a large

Entrance to DeWitt Clinton High School Library. To the left of the Charging Desk is a Reading Room for Teachers; to the right two Conference Rooms and a Work Room

stack room. The library class room is across the hall from the library.

The lighting is admirable; it is from high windows on three sides, with the addition of a carefully planned number of skylights in the center of the ceiling. The heating and ventilation is by preheated fresh air forced in under the windows, the impure air being withdrawn through ducts at either end and at the center. The floor covering is of tan-colored cork. The walls are a light buff, and upon the rear wall have been placed two very large mural paintings by C. Y. Turner, representing the opening of the Erie Canal by DeWitt Clinton in 1825. These beautiful frescoes are the most decorative feature of the room. The woodwork, shelving and furniture are all of a dark oak finish. Curtains of tan, shot with blue satin mohair, are draped gracefully at the windows.

The book shelving, with the exception of the wall shelving, has been furnished by the Library Bureau. Approximately 19,000 books can be shelved in the main library and the teachers' reading room. Double faced ranges

of book stacks have been placed on either side in the front of the library to enable both students and librarians to readily reach the most used collections. In the stack room additional capacity for about 19,000 books is furnished by steel shelving. The furniture of dark oak to

match the woodwork was planned and furnished by the Library Bureau. Tables 3 ft. by 7 ft. 6 in., each seating eight students, were selected on account of the size of the room, and they have proved most satisfactory. A small number of round tables add to the attractiveness of the room. The main charging desk was specially designed for this library and has ample space on the inside to allow six or seven student helpers to work comfortably together. It is fitted with drawers of different sizes, two large cupboards, and a great deal of shelf space for returned books. Four desks for the librarians, and attendants' desk for student helpers are suitably placed around the library. Two glass display cases are both useful and ornamental. Bulletin boards are placed on the pillars down the center of the room, and in the hall just outside of

DeWitt Clinton High School Library, 70 ft. by 86 ft. Has comfortable seating capacity for 300 students at one time

the library, four large glass-covered bulletin boards afford a further opportunity for display. Pamphlet cases, catalogs and dictionary stands complete the furnishings of the library, which now contains about 15,000 books, and which comfortably seats 300 students at one time.

Randolph-Macon Woman's College Library

THE NEW library at Randolph-Macon Woman's College, Lynchburg, Va., is situated on the east side of the campus and is joined by an arched arcade to the main group of college buildings. In keeping with the general type of architecture, the library is Georgian in design, built of red brick with white Ionic columns. The entrance most used by the students is through the arcade directly into the

space for the display of special exhibits. Opening from the gallery at the front of the building is a rare book room which houses an interesting and rapidly growing collection of rare books and manuscripts. On the mezzanine floor one also finds a cozy browsing room and a rest room and kitchenette for the use of the staff. On the first floor are several pleasant seminar rooms, two work rooms and the stack room, which provides shelving space for 100,000 volumes.

The building is beautifully equipped with mahogany furniture which forms a pleasing contrast to the light walls and woodwork; colorful hangings at the windows and some excellent pictures add much to the attractiveness of the rooms. The entire appearance of the library is one of beauty and dignity, and yet there is an informality about it which at once gives a feeling of "at-homeness." The architects for the library are Messrs. Johnson and Brannan of Lynchburg, Va., and Mr. E. F. Tilton of New York City, consulting architect.

Below—South Reading Room beautifully equipped with mahogany furniture. High arched doorways and windows give impression of spaciousness; light walls and woodwork contrast pleasantly with dark furniture and colorful hangings add to attractiveness of room.

The Delivery Hall in the Randolph-Macon Woman's College Library. On either side are large reading rooms, one containing the reference collection, the other periodicals.

delivery hall on the second or main floor. Cream-colored walls, ivory woodwork, high arched doorways, windows and ceilings give one an immediate impression of spaciousness and light. On either side of the delivery hall, with its built-in charging desk and catalog case, are large reading rooms, one containing the reference collection, the other periodicals and a selected group of books. Opening from the reference room and conveniently located to the charging desk and the stacks, is a reserve book room. On this floor are also located the librarian's office and the cataloging room. A gallery on the third, or mezzanine, floors looks down upon the delivery hall. This provides excellent

THE LIBRARY JOURNAL

April 1, 1930

Editorial Forum

ADEQUATE financial support as the paramount problem faced almost without exception by small libraries, is emphasized in both Mr. Fogg's and Miss Greene's articles, elsewhere in this number, discussing problems of this type of library. One help, though not a solution perhaps, would be to have a definite program established, tabulated, and presented to cover a period of five or ten years in the hands of the library trustees when they approach town or city officials for financial aid. It is the right of every citizen who has contact with the public library, including town officials, trustees, library personnel and especially the public, to be made familiar with the goal and the aspirations of future growth in the small library. Such a program, recently worked out in Montclair, N. J., presents future plans for growth for five years and will be noted in the next issue of the JOURNAL.

THE CENSORSHIP issue called forth last month two remarkable debates, one in the United States Senate, the other in the Massachusetts lower house. The whole question was thrashed out ably on both sides, and the decision reached by these respective legislative chambers is practically the same, although neither is fully satisfactory from the library point of view. A vital objection to the provision in the tariff bill, where this subject does not properly belong, was that customs officers, incapable if not ignorant in this field, were made the judges, and there has been a decided gain in referring the question of the admission of any particular book to be passed upon by a Federal court, although this method involves a serious delay. In Massachusetts the phrase adopted banned a book "which is obscene," thus inferentially leaving the question to be passed upon by a State court unless a precedent has been made by a Federal decision. Action in the other house is in each case necessary, as well as signature of the Executive before either bill becomes law.

THE SMALL library has the advantage that the limitation of book purchases because of meager funds saves it from some of the dilemmas in purchasing which confront libraries of larger income. While appeals for censorship have been progressing through national and State legislatures, with discussion raging in legislative halls, in the public press and in organizations dealing with books, there has been a curious and regrettable emergence in the publishing world of books whose titles suggest salacious contents or else are open to the other objection that they fool those salaciously minded. The series of confessions by an ex-this or an ex-that and some light books bear the imprint of publishers of good standing whose books are usually safe and in favor with libraries, and it is a pity that if such books are to be published at all they are not left to publishers whose imprint is not expected to carry recommendation of a book's contents.

ONE OF the most appreciated features of THE LIBRARY JOURNAL in recent years has been the annual contribution of Miss Isadore G. Mudge in extension and revision of her admirable and standard work on reference books, which began in January, 1921, with reference to approximately one hundred and ten titles covering ten pages of the periodical. This valued contribution has steadily increased in volume until in 1929 it covered approximately two hundred and twenty titles, or nearly twenty-eight pages, involving its division into three parts in February-March issues of THE LIBRARY JOURNAL, lessening by this necessary division its value for reference purposes. Miss Mudge's remarkable industry and breadth of scope had led her this year, when the manuscript reached us last month, into a contribution extending to an estimated forty-eight pages, or a full issue of the JOURNAL, covering approximately two hundred and sixty books, some of these in such careful detail that the references amounted to reviews, thus also lessening its value for ready reference. It was with extreme regret that this extension forced us to give up the use of this valuable material in THE LIBRARY JOURNAL, especially as this was to be the first supplement to her latest revised volume, published by the A. L. A. last year. It is to be hoped that the A. L. A. will decide to make a supplementary volume of this valuable material, whose usefulness is attested by the inquiries which have reached this office as to publication. Meantime Frank H. Chase of the Boston Public Library has compiled for ready reference, and had printed for distribution at the Massachusetts Library Club meeting of February 7, a compact list of 120 titles of recent significant reference books.

Librarian Authors

CHARLES S. GREENE, Librarian Emeritus of the Oakland Free Library, California, was born in Bridgeport, Conn. He was graduated from the East Greenwich Academy and received his A. B. from the University of California. For twelve years he was associated with *The Overland Monthly* magazine as Assistant Editor, Manager, Associate Editor, and as Acting Editor. In 1899 he became Librarian of the Oakland Free Library, a position he held until 1927, when he became Librarian Emeritus. He has served as President of the California State Library Association, as trustee of the California State Library and as a member of the A. L. A. Council.

Mr. Greene says that the first poem he remembers to have written was the following, hitherto unpublished:

Lovely little Alice,
If I had a palace
And a pearl ring, too,
They should both be for you.

"From this you will see," says Mr. Greene, "that the motive to write on my part came rather from the heart than the hand, and I think my critics will agree that that has continued to be true.

"The second influence that led to my writing verse was when I attended the University of California in 1876, while Prof. Edward Rowland Sill occupied the chair in English. He was always so encouraging to anyone who was the least bit inclined to write verse, and especially anybody who took an interest in the sonnet form, which was his favorite, that a strong impulse came to several of his pupils at that time, though they fell far short of his example.

"The third impulse to write verse came from the fact that for six or eight years, after I gave up college at the end of my sophomore year, I was an invalid most of the time and was unable to read, except fifteen minutes or so a day, or walk more than four blocks a day. This left plenty of time for meditation and writing verse, especially sonnets, which can be held in the mind and completely composed before writing them on paper. It will be seen that this was a very great resource. After recovering somewhat, I joined myself to the office of *The Overland Monthly* for a dozen years or so and was connected with that magazine in almost every one of its various desks. The need of the magazine for verses of short lengths to fill a page were often the occasion of the

CHARLES S. GREENE

shorter poems. The result was that during the last fifty years I have from time to time written verse which has at last been gathered in the little book *From the Sierra to the Sea*," from which the two quoted below are taken:

SILENCE

Goddess of dusky brow,
Refuge of broken hearts,
Healer of them that grieve,—
The veil that thy fingers weave,
The balm that thy touch imparts,
Grant, I beseech of thee now!

MILTON

Upon my bookcase shelf I see with shame
Thy poems stand, their pages long unread,
And think how oft my midnight lamp has shed
Its light on work of far less worthy claim.
For thou are like an eagle—on the same
Exalted air thy mighty wings are spread,
And thou dost fix upon the fountain-head
Of day thy steady gaze. My grosser frame
With effort rises to that lofty air,
The sun in blinding to my weaker sight,
And soon I sink to lower regions, where
I find a denser air, a softer light:
A thousand simple pleasures charm me there,
And common griefs my sympathy invite.

The April Forecast

A check list of books of general interest whose publication dates fall during the coming month

(Exact date of issue is given when known)

Biography

- Anon. *A Quaker Forty-Niner*. Univ. Penn. Press. \$3.50.
- Brooks, Van Wyck. *Amiel's Philine*. Houghton Mifflin. \$3.
- Clemenceau, Georges. *Grandeur and Misery of Victory*. Harcourt, Brace. \$5.
- Easton, Emily. *Roger Williams, Prophet and Pioneer*. Houghton Mifflin. \$5.
- Eckenrode, H. J. *Rutherford B. Hayes: Statesman of Reunion*. Dodd, Mead (April 25). \$5.
- Ellinger, Esther P. *Thomas Chatterton*. Univ. Penn. Press. \$2.
- Ford, Worthington C. ed. *Letters of Henry Adams, 1858-1891*. Houghton Mifflin. \$5.
- Hardy, Florence Emily. *The Later Years of Thomas Hardy*. Macmillan. \$5.
- Howard, James L. *Seth Harding: Mariner*. Yale Univ. Press (April 4). \$3.
- Lucas, Veronica, tr. *Letters of George Sand*. Houghton Mifflin (March 26). \$4.
- McClure, Norman E. *The Letters and Epigrams of Sir John Harington*. Univ. Penn. Press. \$5.
- May, J. Lewis. *George Eliot*. Bobbs-Merrill. \$5.
- Maynard, Theodore. *De Soto and the Conquistadores*. Longmans, Green (April 2). \$3.50.
- Newman, Alfred. *Guerra*. Knopf (March 28). \$3.
- Palmer, John. *Molière*. Brewer and Warren (April 14). \$5.
- Papini, Giovanni. *Saint Augustine*. Harcourt, Brace. \$3.50.
- Pétain, Henri Philippe. *Verdun*. Dial (April 15). \$4.
- Pound, Arthur, and Day, Richard E. *Johnson of the Mohawks: A Biography of Sir William Johnson*. Macmillan. \$6.
- Russell, Charles Edward. *Charlemagne, First of the Moderns*. Houghton Mifflin. \$4.
- Stahl, John M. *Growing with the West; The Story of a Busy, Quiet Life*. Longmans, Green (April 9). \$5.
- Wiley, Harvey W. *Autobiography*. Bobbs-Merrill. \$5.
- Chaucer, Geoffrey. (Trans. from original into modern English verse by Frank Ernest Hill). *The Canterbury Tales*. Longmans, Green (April 16). \$3.50.
- Cherry-Garrard, Apsley. *The Worst Journey in the World*. Dial (April 15). \$5.
- Clark, Henry W. *History of Alaska*. Macmillan. \$2.50.
- Crane, Stephen. *Collected Poems*. Knopf. \$2.50.
- Crockett, William D. and Sarah G. *A Satchel Guide to Spain and Portugal*. Houghton, Mifflin. \$4.
- Field, Rachel. *Points East, Narratives of New England*. Brewer and Warren (April 19). \$2.
- Hughes, M. V. *America's England*. Morrow (April 10). \$2.50.
- Hunter, R. C. *Old Houses in England*. Wiley (April 10).
- Laughlin, Clara E. *So You're Going to Germany and Austria!* Houghton Mifflin. \$4.
- Lee, Bourke. *Death Valley*. Macmillan. \$4.
- Moore, Thomas. *Lalla Rookh*. (New edition.) Dial (April 1). \$4.
- Nichols, Nicolas. *Quaint and Quotable Sayings and Incidents*. Stratford. \$2.
- Puleston, Fred. *African Drums*. Farrar and Rinehart (April 4). \$4.
- Richter, Grisela. *The Sculpture and Sculptors of the Greeks*. Yale Univ. Press (April 25). \$12.
- Rittenhouse, Jessie B. *The Silver Bird*. Houghton Mifflin. \$2.
- Schultz, James W., and Donaldson, Jessie L. *The Sun God's Children*. Houghton Mifflin. \$3.
- Stoney, Samuel G., and Shelby, Gertrude M. *Black Genesis*. Macmillan. \$5.

Religion, Ethics, and Psychology

- Adler, Dr. Alfred. *The Education of Children*. Greenberg. \$3.50.
- Bacon, Benjamin Wisner. *Studies in Matthew*. Holt. \$5.
- Davis, J. J., and Wright, J. C. *You and Your Job*. Wiley (April 15).
- Dell, Floyd. *Love in the Machine Age*. Farrar and Rinehart (April 4). \$3.50.
- F, Mrs. *From Beyond*. Stratford. \$1.50.
- Furfey, Paul Hanly. *The Growing Boy*. Macmillan. \$2.

Literature, History, and Travel

- Beard, Charles A. ed. *Toward Civilization*. Longmans, Green (April 16). \$3.

- Josephus, Flavius. *The Messiah Jesus*. Dial (April 1). \$5.
 Langdon-Davies, James. *Man and His Universe*. Harper (April 4). \$5.
 Mathews, Shailer. *The Atonement and the Social Process*. Macmillan. \$2.
 Morgan, C. Lloyd. *Mind at the Crossways*. Holt. \$3.75.

Miscellaneous Non-Fiction

- Balderston, C. C. *Group Incentives*. Univ. Penn. Press. \$2.50.
 Bell, V. M., and Helser, M. D. *Essentials in the Selection of Meats*. Wiley (April 10).
 Billings, Dr. W. A. *Livestock and Poultry Diseases*. Macmillan. \$3.50.
 Carothers, Neil. *Fractional Money*. Wiley (April 25).
 Chalfant, W. A. *Death Valley: The Facts*. Stanford Univ. Press. \$3.50.
 Chenoweth, W. W. *Preservation of Food*. Wiley (April 15).
 Coons, Arthur G. *The Foreign Public Debt of China*. Univ. Penn. Press. \$3.
 Deming, Horace G. *In the Realm of Carbon*. Wiley (April 15).
 Dresden, Arnold. *Solid Analytical Geometry and Determinants*. Wiley (April 15).
 Fleming, R. *Wind Stresses in Buildings*. Wiley (April 10).
 Fry and White. *Big Trees*. Stanford Univ. Press. \$2.
 Hahn, Emily. *Seductio ad Absurdum*. Brewer and Warren (April 1). \$2.
 Harding, T. Swann. *Aren't Men Rascals?* Dial (April 1). \$2.
 Hesse, A. W. *Principles of Coal Property Valuation*. Wiley (April 25).
 Hoxie, George L. *Stock Speculation and Business*. Stratford. \$1.
 Ingram, Kenneth. *Modern Attitudes to the Sex Problem*. Stokes. \$2.
 Kneen, Orville H. *Everyman's Book of Flying*. Stokes. \$3.50.
 Kuznets, Simon S. *Secular Movements in Production and Prices*. Houghton Mifflin. \$2.50.
 Legrain, Leon. *Terra-Cottas from Nippur*. Univ. Penn. Press. \$15.
 Macy, John. *About Women*. Morrow (April 10). \$2.50.
 Scarth, G. W., and Lloyd, F. E. *Elementary Course in General Physiology*. Wiley (April 15).
 Schauffer, Robert Haven. *Graduation Day*. Dodd, Mead (April 25). \$2.
 Smith, C. B., and Wilson, M. C. *Agricultural Extension System of the U. S.* Wiley (April 25).
 Snyder, Harry. *Bread*. Macmillan. \$2.50.

- Stone, Herbert L. *The American Cup Races*. Macmillan. \$2.50.
 Tucker, Dr. Beverley R. *The Gift of Genius*. Stratford. \$2.50.
 Wilm, Grace G. *A History of Music*. Dodd, Mead (April 25). \$3.50.
 Wilson, Ernest H. *Aristocrats of the Trees*. Stratford. \$15.
 Woldman, N. E. *Physical Metallurgy Laboratory Manual*. Wiley (April 25).

Juvenile

- Braden, James A. *The Carved Sea Chest*. Harper (April 2). \$2.
 Bunzel, Madeline. *A Picture Book of a Big City*. Knopf (April 11). \$1.25.
 Coatsworth, Elizabeth. *The Boy with the Parrot*. Macmillan. \$2.
 Forbes, Helen C. *Apple Pie Hill*. Macmillan. \$1.75.
 Fyleman, Rose. *Tea Time Tales*. Doubleday, Doran (March 21). \$2.
 Kerr, Estelle M. *The Town Crier of Gevrey*. Macmillan. \$2.
 Maeterlinck, Maurice. *The Magic of the Stars*. Dodd, Mead (March 21). \$2.50.
 Raymond, Margaret Thomsen. *Linnet on the Threshold*. Longmans, Green (April 2). \$2.
 Sanford, A. P. *Outdoor Plays for Boys and Girls*. Dodd, Mead (March 21). \$2.50.

Fiction

- Abbott, Jane. *Beggerman*. Lippincott. \$2.
 Barnes, Margaret Ayer. *Years of Grace*. Houghton Mifflin. \$2.50.
 Benoit, Pierre. (Rita Wellman, trans.) *Axelle*. Dial (April 15). \$2.50.
 Buchan, John. *Salute to Adventurers*. Houghton Mifflin (April 9). \$2.50.
 Christie, A. *The Mysterious Mr. Quinn*. Dodd, Mead (April 25). \$2.
 Clausen, Carl. *The Gloyne Murder*. Dodd, Mead (April 4). \$2.
 Cole, G. D. H. and M. *The Berkshire Mystery*. Brewer and Warren (April 14). \$2.
 Cottrell, Dorothy. *Tharlane*. Houghton Mifflin. \$2.50.
 Dawson, Coningsby. *Fugitives from Passion*. Doubleday, Doran. (April 18). \$2.50.
 Dutton, Charles J. *The Shadow of Evil*. Dodd, Mead (April 4). \$2.
 Evans, Hubert. *The Silent Call*. Dodd, Mead (April 4). \$2.50.
 Farjeon, J. Jefferson. *Following Footsteps*. Dial (April 1). \$2.
 Forbes-Mosse, Irene. *Don Juan's Daughters*. Dodd, Mead (April 4). \$2.50.
 Fulcher, Paul M. *Guests of Summer*. Macmillan. \$2.50.

Green, Anne. *The Selbys*. Dutton. \$2.50.
 Greig, Maysie. *The Man She Bought*. Dial (April 15). \$2.
 Hammock, Claude Stuart. *Why Murder the Judge?* Macmillan. \$2.
 Hergesheimer, Joseph. *The Party Dress*. Knopf (April 11). \$2.50.
 Irwin, Wallace. *Days of Her Life*. Houghton Mifflin (April 9). \$2.50.
 Marlowe, Christopher. *The Black Forest*. Dodd, Mead (April 4). \$2.50.
 Mordaunt, Elinor. *These Generations*. Brewer and Warren (April 21). \$2.50.

Palmer, Frederick. *Look to the East*. Dodd, Mead (April 25). \$3.
 Ripley, Clements. *Devil Drums*. Brewer and Warren (April 7). \$2.
 Rollins, William, Jr. *The Obelisk*. Brewer and Warren (April 28). \$2.50.
 Walpole, Hugh. *Rogue Herries*. Doubleday, Doran (April 18). \$2.50.
 Weale, B. L. P. *The Port of Fragrance*. Dodd, Mead (April 25). \$2.50.
 Yates, Hannah. *Dim Stars*. Morrow (April 10). \$2.50.

School Library News

Graph of Circulation

THE SCHOOLS Division of the Denver Public Library, with the cooperation of the Woodbury Branch Library, has made graphs of the circulation at the branch library from two schools in the neighborhood. The circulation of books taken by children over ten and under ten from these two schools was recorded, and at the end of a year the curves were worked out. The graphs show that the visits of the library representatives and other means of stimulation at these schools did influence children to borrow books from the public library. One school has classroom libraries, so an additional graph was made of this circulation. In the future other library problems may be worked out in this way.

Allures to Reading

WE ARE experimenting with various allures in the Bulkeley High School, Hartford, Conn., to get boys and girls to read only the best. When they enter as freshmen we take each English class for two lessons; each student is given a plan of the library and is made to feel at home in finding material for himself.

One alert English teacher assigned the following subjects for themes in the Junior class: The Bible Through the Centuries; Beautiful Books, Old and Modern; Earliest Printed Books; Book Making of William Morris; Suggestions on How to Read and What to Read from Well-known Writers; Appreciation of the Finest Books; Experiences of Some Famous Book Collectors; Running a Book Store; Some Well-known Libraries.

Also a poster, BOOKS AND READING, was made with colored manuscripts, pictures of Oxford, Morgan, Huntington, etc., libraries and among the titles put on reserve were: Addison, *Arts and Crafts in the Middle Ages*; Newton, *Magnificent Farce*; Mitchell, *Morocco*

Bound; Newton, *Greatest Book in the World*; VanDyke, *Companionable Books*; Johnston, *Biography: Literature of Personality*; Bennett, *Literary Taste and How to Form It*; Erskine, *Delight of Great Books*; Woolf, *Common Reader*; Lowes, *Of Reading Books*; Drew, *Modern Novel*; Macy, *Story of the World's Literature*; Winterich, *Books and the Man*; Rogers, *Fine Art of Reading*; Drinkwater, *Outline of Literature*, v. 1; Ivans, *Arts of the Book*; Jenison, *Sunwise Turn*; Langstaff, *David Copperfield's Library*; Campbell and Thomas, *Magazines and Newspapers of Today*; Becker, *Adventures in Reading*; Becker, *Books as Windows*; Orcutt, *Kingdom of Books*; Mott, *Rewards of Reading*; Smith, *What Can Literature Do for Me*; Crawford, *What to Read in English Literature*.

It has been a most happy assignment for the students are not only unconsciously gaining a broadened outlook on the world of books, but they are becoming interested in the particular books themselves.

Evenenden Standards Adopted

THE EVENENDEN Standards for libraries in teachers' colleges were adopted by the Association of Teachers Colleges at its meeting in Atlantic City, Feb. 22. The standards will be published in the association's proceedings, to be printed in a few months, and in a later issue of THE LIBRARY JOURNAL.

A Use for Thumb Tacks

IN ORDER to get the catalog drawers back to their proper place, Miss A. V. Jennings, of Kearney, Neb., reports that she ordered numbers on thumb tacks from John W. Iliff & Co., Chicago, Ill., and placed these at the upper left-hand corner of the drawers. (Patrons can count, but they do not know the alphabet.)

Book News

Book Club Selections

(for April)

BOOK LEAGUE

Gentleman Rebel, by J. H. Preston. Farrar & Rinehart.

The "Gentleman Rebel" in question is Mad Anthony Wayne, one of the most romantic figures of the American Revolution.

BOOK-OF-THE-MONTH CLUB

Gallows' Orchard, by Claire Spencer. Cape & Smith.

A short novel of a country town in Scotland.

BUSINESS BOOK LEAGUE

Robots or Men? by H. Dubreuil. Harper.

A French workman's experience in American industry.

CATHOLIC BOOK CLUB

De Sota and the Conquistadores, by Theodore Maynard. Longmans, Green.

The story of De Sota, who is the supreme example of the Spanish Conquistador.

CRIME CLUB

Mystery Mile, by M. Allingham. Crime Club, Inc.

FREETHOUGHT BOOK CLUB

The Sacred Fire, by B. Z. Goldberg. Liveright.

JUNIOR LITERARY GUILD

Adventures of Marion (boys and girls 8-12), by Waldemar Bonsels. Boni.

Linnet on the Threshold (girls 12-16), by Margaret S. Raymond. Longmans, Green.

Jump: Tales of the Caterpillar Club (boys 12-16), by Don Glassman. Simon & Schuster.

LITERARY GUILD

The Bystander, by Maxim Gorki. Cape & Smith.

The first American translation of a work which has appeared serially in Russian newspapers and magazines and which Russian critics have called "the sum total of all of Maxim Gorki's experiences in life and in art."

PAPER BOOKS

Prize Poems, edited by Charles A. Wagner. Paper Books, Inc.

Thirty-three American poets, winners of the most important poetry prizes offered from 1913 to 1929, are included in this anthology.

Best Sellers

(from the Book Stores)

FICTION

Young Man of Manhattan, by K. Brush. Farrar and Rinehart.

All Our Yesterdays, by H. M. Tomlinson. Harper.

All Quiet on the Western Front, by E. M. Remarque. Little, Brown.

Coronet, by M. Komroff. Coward-McCann.

A Farewell to Arms, by E. Hemingway. Scribner.

Passion Flower, by K. Norris. Doubleday, Doran.

Pure Gold, by O. E. Rølvaag. Harper.

The Hidden City, by P. Gibbs. Doubleday, Doran.

The Million Pound Deposit, by E. P. Oppenheim. Little, Brown.

The Woman of Andros, by T. Wilder. Boni.

NON-FICTION

Lincoln, by E. Ludwig. Little, Brown.

The Rise of American Civilization, by C. A. Beard. Macmillan.

Is Sex Necessary? by Thurber and White. Harper.

The Specialist, by C. Sale. Specialist Pub. Co.

The Art of Thinking, by E. Dimnet. Simon and Schuster.

New Worlds to Conquer, by R. Halliburton. Bobbs-Merrill.

Franklin, the Apostle of Modern Times, by B. Fay. Little, Brown.

The Tragic Era, by C. Bowers. Houghton, Mifflin.

Escape, by F. F. Nitti. Putnam.

Grandmother Brown's Hundred Years, by H. C. Brown. Little, Brown.

Gorki Invited to Visit United States

THE LITERARY GUILD of America has invited Maxim Gorki, said to be the greatest of living Russian writers, to visit the United States in time for the publication of his newest novel, *Bystander*. Maxim Peshkov, Gorki's son, and his secretary, Madame Mura Boudberg, have been asked to accompany the famous novelist. His only previous visit to this country was in 1906. His visit will be entirely of a personal character and quite without political intent. An extensive lecture tour of New York, Boston, Philadelphia, Chicago, Detroit and other centers is being planned for Gorki, and it is understood that the great Russian will speak in his native tongue, his remarks to be translated into English by an interpreter.

Book Selection on World Affairs, VII

International Finance and Statistics

The World Peace Foundation Mobilizes the Opinions of Experts Throughout the United States

Cassel, Gustav. *Money and Foreign Exchange After 1914*. (7 votes) Macmillan. 1922. \$2.25.

"It should be read by all those who desire a firm grasp of the . . . problems European peoples have faced since the beginning of the Great War."

Recommended as Advanced by Bober, Dye, Fossum, Lucas, Preston; as Intermediate by Burns.

Furniss, E. S. *Foreign Exchange*. (7 votes) Houghton. 1922. \$2.50.

"A clear, well-organized explanation of foreign exchange."

Recommended as Advanced by Beatty; as Intermediate by Bober, Dye, Lucas, Preston; as Elementary by Burns.

Hobson, C. K. *Export of Capital*. (6 votes) Macmillan. 1914. Out of print.

"An excellent work on the relation of trade and foreign investments."

Recommended as Advanced by Dye, Lucas; as Intermediate by Knight, Schluter.

Mills, F. C. *Statistical Methods*. (5 votes) Holt. 1924. \$3.60.

"Well written and complete with examples from business."

Recommended as Advanced by Beatty, Blackburn, Hunt; as Elementary by Fossum, Riegel.

Angell, J. W. *Theory of International Prices*. (4 votes) Harvard University Press. 1926. \$5.

"A good history of the various theories; good criticisms of modern viewpoints."

Recommended as Advanced by Bennett, Bober, Preston, Smith.

Cross, I. B. *Domestic and Foreign Exchange*. (4 votes) Macmillan. 1923. \$4.50.

Recommended as Advanced by Lucas, Preston; as Intermediate by Dye, Schluter.

Edwards, G. W. *International Trade Finance*. (4 votes) Holt. 1924. \$3.60.

"A well-rounded treatment of methods in financing trade between nations."

Recommended as Advanced by Dye, Preston; as Elementary by Lucas, Schluter.

Mitchell, W. C. *Business Cycles*. (4 votes) National Bureau of Economic Research. 1927. \$6.50.

"An excellent general treatment of the business cycle."

Recommended as Advanced by Beatty, Blackburn, Burns, Riegel.

Moulton, H. G., and Lewis, C. *French Debt Problem*. (4 votes) Macmillan. 1925. \$2.

"A careful analysis."

Recommended as Advanced by Dye, Fossum, Smith; as Elementary by Bennett.

Thorp, W. L. and H. E. *Business Annals*. (4 votes) National Bureau of Economic Research. 1926. \$4.

" . . . An exhaustive and impressive account."

Recommended as Advanced by Beatty, Blackburn, Riegel; as Elementary by Bober.

Whitaker, A. C. *Foreign Exchange*. (4 votes) Appleton. 1919. \$5.

"Well arranged and presents a difficult subject in an excellent manner."

Recommended as Advanced by Lucas, Preston; as Intermediate by Dye, Smith.

Willis, H. P., and Beckhart, B. H. *Foreign Banking Systems*. (4 votes) Holt. 1929. \$7.50.

"This book gives a clear but brief discussion of every important banking system in the world."

Recommended as Advanced by Beatty, Burns, Dye, Preston.

Yule, G. Udny. *Introduction to the Theory of Statistics*. (4 votes) Lippincott. 1923. \$6.

"The standard theory text of statisticians since its first edition in 1908."

Recommended as Advanced by Blackburn, Gordon, Hunt; as Intermediate by Riegel.

Edie, L. D. *Money, Bank Credit and Prices*. (3 votes) Harper. 1928. \$3.50.

" . . . Up-to-date and thorough."

Recommended as Advanced by Fossum, Preston; as Intermediate by Bennett.

Escher, Franklin. *Foreign Exchange Explained*. (3 votes) Macmillan. 1917. \$1.75.

" . . . Concise . . . clear . . . well arranged and well written."

Recommended as Elementary by Lucas, Preston, Schluter.

Fisher, Irving. *Making of Index Numbers*. (3 votes) Houghton. 1927. \$7.50.

"The standard book on index numbers."

Recommended as Advanced by Hunt, Riegel; as Intermediate by Blackburn.

Cooperating Professors: Willard C. Beatty, Brown University; William W. Bennett, Union College; R. F. Blackburn, University of Pittsburgh; M. M. Bober, Lawrence College; A. F. Burns, Rutgers University; Earl V. Dye, Pennsylvania State College; George W. Edwards, College of the City of New York; Mercer C. Evans, Emory University; Paul R. Fossum, Carleton College; Mary Agnes Gordon, Mills College; Stanley B. Hunt, Temple University; Melvin M. Knight, University of California; Arthur F. Lucas, Clark University; Roswell F. Phelps, Boston University; H. H. Preston, University of Washington; C. F. Remer, University of Michigan; Robert Riegel, University of Buffalo; W. C. Schluter, University of Pennsylvania; Lawrence Smith, Wellesley College; Ivan Wright, University of Illinois.

In presenting this selected list of books on International Finance and Statistics, the World Peace Foundation aims to offer a guide to the best available material as recommended by composite expert opinion. To the end that these titles be indeed the most worth while the Foundation asked a large number of college professors teaching in the various fields relating to international affairs to recommend the best available books—elementary, intermediate and advanced—in the realm of their particular interest. All of the titles included here were recommended by three or more different professors and are arranged in the order of votes received. It is hoped that not only libraries, but study groups and individuals as well will find this list useful. The complete list of all titles on International Finance and Statistics recommended as a result of this survey will be sent upon request.

Friedman, E. M. *International Finance and Its Reorganization*. (3 votes) Dutton. Out of print.

"A good historical background presenting a complete summary of conditions in international finance serving as a basis for present reorganization of currencies and finance."

Recommended as Intermediate by Knight, Schluter.

Koren, John, ed. *History of Statistics*. (3 votes) Macmillan. 1918. \$7.50.

"A good summary of what is being done in other countries."

Recommended as Advanced by Blackburn, Burns; as Elementary by Riegel.

Moulton, H. G. *Reparation Plan*. (3 votes) McGraw. 1924. \$2.50.

"A simple discussion of the Dawes Plan."

Recommended as Intermediate by Preston, Smith; as Elementary by Bennett.

Moulton, H. G., and McGuire, C. E. *Ger-*

many's Capacity to Pay. (3 votes) McGraw. 1923. \$2.50.

"A good, realistic discussion of this important problem."

Recommended as Advanced by Bober, Dye, Smith.

Taussig, F. W. *International Trade*. (3 votes) Macmillan. 1927. \$3.50.

"An excellent presentation of the basic principles of the present-day problems, and of various experiences in the past."

Recommended as Advanced by Bober; as Intermediate by Evans, Smith.

Young, J. P. *European Currency and Finance*. (3 votes) U. S. Government Printing Office. 1925.

"Contains much valuable information concerning monetary conditions in Europe during and immediately after the war."

Recommended as Advanced by Preston, Smith; as Intermediate by Bennett.

Book Reviews

Supplement to Granger

BURTON STEVENSON'S *Home Book of Modern Verse*, Braithwaite's *Anthology of Magazine Verse* for 1924 to 1926, the *Copeland Reader*, two Oxford books of verse, and four volumes of Thomas Moulton's *Best Poetry* are only a few of the 126 collections and compilations indexed in the new *Supplement to Granger's Index* (1919-1928), published by McClurg last year (cl., 519p., \$8). The book follows the general plan of the original *Granger's Index to Poetry and Recitations*, and gives particular attention to the section devoted to special days, seasons, months, humorous and inspirational selections, pieces for musical accompaniment, readings and monologs. The Index proper is divided into three sections: title, author and first line.

The only important omission noted is *The Haunted Hour*, Margaret Widdemer's anthology of ghost-poems (Harcourt, 1920), which might usefully have swelled the rather meager Hallowe'en section. Several poems carry the location-symbol of SWC. No such collection is listed in the Key to Symbols. In the author index Hans Christian Andersen is spelled "Anderson," and there are several other misprints: "Laconte" de Lisle, Holman "Frances" Day, Thomas "De Quincy," Elizabeth "Cleghorn" Gaskell, etc.

Percy MacKaye is separated from his daughter, Arvia, by two columns. All women writers are referred to by their married names with the exception of Alice Hegan Rice (Mrs. Cale Young Rice); Dorothy Canfield, who has no cross-reference from Fisher; and Virginia Sackville-West (Mrs. Harold Nicolson), whose

identity appears to have eluded the compilers. For some curious reason Booth Tarkington's family name is asserted to be Booth. The author entry runs "Booth, Newton (Booth Tarkington)." We also learn that Oscar Wilde's real name was Fingal Wills, although his father was Sir William Wilde.

Horticulture Society Award

THE FIRST award of its Schaffer Memorial Medal for any book has been made by the Pennsylvania Horticulture Society to Susan Delano McKelvey for her monograph *The Lilac*, published by Macmillan. The medal is awarded only at such times as the society feels that a sufficiently meritorious work in the interest of horticulture has been done to merit it. It was established as a memorial to William L. Schaffer, president of the society from 1868 to 1884, and has previously been awarded to but five other persons.

This is the second medal to be awarded Mrs. McKelvey in recognition of her contribution to horticulture in *The Lilac*. The Emily Renwick Achievement Medal of the Garden Club of America for "the most distinguished achievement" of 1928 also came to her.

Prison Libraries Bibliography

THE CURRENT bibliography of the Russell Sage Foundation is on Prison Libraries. Bibliographies are issued bi-monthly and cover subjects relating to the social field. This organization is prepared and willing to render to individuals free bibliographic help in this field.

In The Library World

Growth of Circulation, 1929, in Montclair, N. J.

American Law Library Given to London Bar

AN AMERICAN law library in London in connection with the historic Middle Temple Library has recently been established. The 2,000 books which make up the library include the reports of various Federal and State courts in the United States. The need for such a library has been manifest for some time; British lawyers felt it and expressed their desires for such a library and the librarian of the Ancient Middle Temple Library, H. A. C. Sturgess, set out to get the necessary American law books and place them on the shelves of his library. The matter was brought to the attention of the Carnegie Endowment for International Peace with the result that the endowment appropriated approximately \$7,000 for getting the requisite books and sending them as a gift of the endowment. In each volume a bookplate indicates that the gift was brought about through the good offices of the Association of the Bar of the City of New York and its library committee. These books will be made available not only to English lawyers but to American lawyers properly accredited by the Association of the Bar of the City of New York.

Kansas Mail Loan Service

KELLOGG Library, Kansas State Teachers' College, Emporia, maintains, as one of its distinct departments, a Mail Loan Service. Through this service books, pamphlets, clippings, mounted pictures, etc., are loaned by mail to residents of Kansas, and to alumni and correspondence-study students in other States. This work requires most of the time of one of the full-time professional members of the library staff and during the last year 3521 books, 193 pamphlets, 1014 clippings and 44 magazines were sent out. These packages reached 376 Kansas towns and 24 towns scattered through 14 other States. All but six of the 105 counties of Kansas were aided by this service last year.

Information Wanted

H. O. SEVERANCE, Librarian of the University of Missouri, Columbia, Mo., Chairman of the Committee for the Encouragement of Research, would be pleased to know of any research problems completed or any books written in 1929 by members of the Library profession and books and problems in process at the present time.

News from China

AFTER THREE and a half years of independent existence, the Metropolitan Library of Peiping (Peking) has been amalgamated with the Peiping Library, formerly maintained by the Ministry of Education, and is now known as the National Library of Peiping. Pending the completion of the new fireproofed building originally designed for the Metropolitan Library, the two collections are being housed at two historical buildings at the Middle Sea and North Sea. The National Library is now administered under the general direction of a self-perpetuating board which nominates the Director and Associate Director, who are appointed by the Ministry of Education. Chancellor Tsai Yuan-Pei has been appointed Director, but during his absence Mr. T. L. Yuan, formerly of Columbia and Albany and until recently Director of the Metropolitan Library, has been appointed Acting Director. The amalgamation, combining, as it does, the resources of two of the most important libraries in China, is of far-reaching importance to scholars.

Besides collecting Chinese books, the National Library will devote itself to occidental sciences and important reference works published abroad. The National Library is trying to build up a center of research in Peiping, and in this it has received generous support from foreign learned institutions and governments. The National Library publishes a *Chinese Monthly Bulletin* devoted to bibliography, and also distributes the *English-Language Bulletin* of the Fan Memorial Institute of Biology.

A notable addition to the National Library was made in November, 1929. In that month a collection of one hundred volumes of Tangut sutras, mostly printed during the Yuan, or Mongol, Dynasty (1280-1368), and a few Buddhist paintings, were purchased. These were recently discovered near Ning-Hsia, a city in northern Kansu. The importance of the purchase may be gauged from the fact that before this collection was acquired by the National Library, no such material could be found in Chinese libraries. The Tanguts played an important part in North West China in the 11th Century, but their language was somehow lost to the world, and was rediscovered only during the opening years of the present century. The Tangut language, which is ideographic and looks somewhat like Chinese, has not yet been completely deciphered. The sutras were translated from the Chinese Tripitaka, and it is expected that through a comparative study of the text our knowledge of the language will be materially advanced.

The National Library is preparing for publication a classified catalog of the Chinese books

formerly kept at the Peiping Library and the Metropolitan Library. The whole collection consists of over 200,000 volumes, of which 25,000 are known as Chinese Incunabula.

In cooperation with the Peiping Research Institute, the National Library is also editing for publication a union catalog of books and periodicals in occidental languages found in Peiping libraries. There are some twenty libraries in Peiping where important foreign books may be found. It is hoped that the union catalog will be published before next fall. The union catalog will be kept up to date by a card supplement filed at the National Library.

Report Free

THE FIRST report of the Philadelphia Municipal Court Survey Series, entitled "History and Functions of the Municipal Court of Philadelphia," is now obtainable free of charge upon application to the Bureau of Municipal Research, 311 South Juniper Street, Philadelphia, Pa. This survey was undertaken several years ago at the request of the presiding judge of the court and has been financed by the Thomas Skelton Harrison Foundation.

Santa Fé, New Mexico, Bookmark

SANTA FE, N. M., has issued an intimate Bookmark report to friends and patrons of the everyday work of the Public Library. Seven years' growth in circulation, new borrowers, gifts from children and adults, hours of opening and various other bits of news are given on this 3-in. x 7½-in. report.

A Home Library for the White House

A YEAR ago, on the evening after the inauguration, a friend of President Hoover's noticed that members of the family wished to turn to books for relaxation after the strain of the day, and that none were available. There has never been a "home library" in the White House, although there are reference shelves in the business office and numerous books to be had from the Library of Congress. Word of this came to John Howell, a San Francisco bookseller, who presented a plan which won the hearty approval not only of the Western Booksellers at their meeting in San Francisco, but of the National Convention. A committee was appointed of which Frederic Melcher, Editor of *The Publishers' Weekly*, is chairman, to make up a list of 500 books for the library and carry out the plan. A letter is being sent at this time to all booksellers inviting them to join in the presenting of a "home library" to the White House, the booksellers' gift to the Nation.

Ontario Suffers Losses

THE LIBRARY world of Ontario has suffered greatly this year. Mr. W. O. Carson, the energetic and capable Inspector of Public Libraries, passed away in the summer; James Steele, Esq., the president of the Ontario Library Association and for upward of twenty years a member of the Board of the Public Library of the City of Stratford, died very suddenly; and even more suddenly during the first week in March, E. J. Hathaway, Esq., the just-elected chairman of the Public Library Board of Toronto, was taken.

All these men are distinct losses to the library work of the province. Mr. Hathaway, after serving seven years on the Board, was about to assume the chairmanship and just on the eve of the opening of the great new Central Lending Library.

Men Readers Lead

CONTRARY to popular supposition, the number of men participating in the benefits of the Norfolk, Va., Public Library is greater than that of the women visitors, according to the annual report of the Librarian for the last year. At the Main Library 64 per cent of the grown people using the reading room were men and at the Van Wyck Branch 51 per cent were men. The circulation of the whole library showed an increase over the preceding year of 20,653, nearly half of which gain was made at the Van Wyck Branch.

Survey of South Being Made

SARAH C. N. BOGLE, secretary of the A. L. A. Board of Education for Librarianship, assisted by Tommie Dora Barker, librarian and director of the library school of the Carnegie Library at Atlanta, began a survey of training agencies in thirteen southern states March 10, as the first result of recommendations made by the Policy Committee of the Southeastern Library Association last December, when a broad program of southern library development was outlined. The survey is being financed by the Carnegie Corporation of New York, and will be completed some time in April. In addition to recommending the complete study of demands and facilities for library training in the southeastern area, the Policy Committee program covered the establishment of a strong State library agency in each State, with a trained field worker attached; the appointment of a regional field agent for library extension, with headquarters in the South but attached to the A. L. A.; the appointment of a State school

library supervisor in each State; aid for the development of negro public library service; the establishment of scholarships and fellowships to southern library schools and for research elsewhere; and aid in building up more adequate book collections in college libraries.

A thorough study of school library conditions in the South is now being made by Dr. Frank P. Bachman, director of surveys and field studies, George Peabody College for Teachers, Nashville, Tenn., which, together with the A. L. A. survey, will give definite information in regard to the whole school library situation in that area.

Navy Book Circulation

THE *U. S. Daily* for March 15, 1930, has the following report of book circulation in the United States Navy:

The per capita circulation of books in the United States Navy during the last calendar year was 18, exceeding by 7 books the greatest known per capita circulation of any public library in the country for the same period, according to figures made available March 14 by the Department of the Navy.

A total of 1,023,085 books was read in the service, both aboard ships and at naval stations, the compilation shows. The number read in hospitals was 434,432, for an average circulation per person of 24. For other stations, exclusive of hospitals, the number loaned per capita was 14.9, making the number loaned per capita for all stations 18.

"The greatest known per capita circulation for any public library in the country for the same period was that of San Diego, Cal., where the score was 11," it was stated at the Bureau of Navigation.

Success of Rental Collection

THE SUCCESS of the rental collection in the Central Missouri State Teachers College, Warrensburg, Mo., which was established seven years ago, is shown by the following statistics submitted by the librarian:

Original number of volumes.....	163
Original cost.....	\$326.41
Vols. transferred to General Library	1,102
Original cost	\$1,925.53
Vols. now in the Rental Collection..	390
Original cost	\$770.04
On deposit at Citizens Bank.....	\$213.12

Note: The uniform rent per book is ten cents for the first week and two cents per day after that.

Have You Collection Like This?

THE LIBRARY for the Institute for Research in Land Economics and Public Utilities at Northwestern University has a collection of public utility employees' magazines as complete as it can be made. The library wishes to know whether another collection of this sort exists?

Book Review Club of Greater Boston Lists XXIII, March, 1930

RECENT FICTION

Novels of Literary Value, or Included Because of Author's Prominence.

Cleugh, Dennis. *Wanderer's End: Odyssey of Don Paradise*. Doubleday. \$2.50.

Charming tale of some traveling players.

Deeping, Warwick. *Exile*. Knopf. \$2.50.

Story of an English girl's successful business career in a lazy Italian town, and of her love affairs. Read before buying.

Freeman, Harold W. *Down in the Valley*. Holt. \$2.50.

A story of the Suffolk farming country delightfully written. The complications of the hero's love affairs will make some libraries hesitate. Better read before deciding.

Hamilton, Mary Agnes. *Three Against Fate*. Houghton. \$2.50.

Powerful story of the effects of the war on three finely drawn English characters, two men (devoted friends) and the wife of one of them.

Hodson, James L. *Grey Dawn—Red Night*. Doubleday. \$2.50.

The war seen through the eyes of a clean-living and clean-thinking English boy—a starkly realistic story. His early life in an English manufacturing town (Grey Dawn) is extremely well told.

Kaye-Smith, Sheila. *Three Against the World*. Dutton. \$2.50.

An interesting, though tragic, tale of the Sussex farming country—typical of this author's best work. Printed in this country for the first time.

Komroff, Manuel. *Coronet*. Coward-McCann. 1v. ed. \$3, 2v. ed. \$3.50.

The background is 500 years of history. The Coronet is the symbol of the arrogance of aristocracy.

Marshall, Archibald. *Miss Welby at Steen*. Dodd. \$2.50.

Pleasant story of English country life in a big house. Not up to the author's best.

Roberts, Elizabeth M. *Great Meadow*. Viking. \$2.50.

Historical novel of Revolutionary Virginia, of Daniel Boone and the settlement of Kentucky. Wilderness life of pioneers.

Tomlinson, Henry M. *All Our Yesterdays*. Harper. \$2.50.

A cross-section of England from the time of the Boer War to 1918, showing how the human as well as the material factors made the war inevitable. The descriptions are extraordinarily vivid and powerful.

Wilder, Thornton N. *The Woman of Andros*. Boni. \$2.50.

Story of simple villagers on a small Grecian island, based on the opening acts of the "Andria" of Terence.

Stories of Popular Appeal

Benson, Therese, pseud. *Go-Between*. Dodd. \$2.

A charming little story of a popular type.

Brush, Katharine. *Young Man of Manhattan*. Farrar & Rinehart. \$2.

Highly entertaining story of love and marriage in the New York journalist's world, interspersed with plenty of cocktails. Read before buying.

Cannon, Cornelia J. *Heirs*. Little. \$2.50.

Interesting story of rural life in New Hampshire, contrasting the Polish farmers with those of English ancestry. Local color very good. Story somewhat sentimental.

Cary, Lucian. *One Lovely Moron*. Doubleday. \$2.

Humorous tale of the love of the Professor of Psychology for the daughter of the College President. Light weight.

Case, Robert Ormond. *The Yukon Drive*. Doubleday. \$2.

A tale of the gold rush to the Klondike.

Clark, Judith. *Arrows of Desire*. Minton. \$2.50.

A refreshing picture of young Americans of the present day. Scene is laid in Northern Virginia and in Washington. Will appeal to women.

Coolidge, Dane. *Horse - Ketchum*. Dutton. \$2.50.

Western story of romance and adventure.

Gibbs, Sir Philip H. *Hidden City*. Doubleday. \$2.50.

The story of a young London doctor who sees the city through the lives of his patients.

Haworth, Paul L. *Caverns of Sunset*. Bobbs. \$2.

Adventures of an English girl who, disguised as a boy, goes to Canada to find her brother, a prisoner in an Indian village.

Le Gallienne, R. *There Was a Ship*. Doubleday. \$2.50.

Adventure, romance and swashbuckling on land and sea in the days of Charles II.

Neville, M., pseud. *Giving the Bride Away*. McBride. \$2.

How a young Englishman contrived to give away the bride he did not want!

Niles, Mrs. Blair. *Free*. Harcourt. \$2.50.

A novel dealing with the convicts who have served their prison terms, and are free to starve in the towns or jungles of French Guiana, but not free to leave the penal colony. Very interesting.

Roberts, Kenneth L. *Arundel*. Doubleday. \$2.50.

Very well-told story of Steven Nason of Arundel, Maine, and how he went with Benedict Arnold on the secret expedition to Quebec. Plenty of thrills.

Seton, Graham. *W Plan*. Cosmop. \$2.

The tale of a stupendous scheme for crumbling a whole sector of the British front in the Great War.

(Continued on page 326)

Elusive Quotations

A column designed to assist in the location of quotations and poems which cannot be found through the usual channels of anthologies and books of reference.

M. R. L.—Requests information about the source of the expression:

Give me a child until he is seven and I care not who has him after that.

C. H.—Desires help in obtaining the author and in quoting the poem of which the first line is:

The world is at its best. I feel a triumph in the work I do.

Accompanying the poem was the picture of a workman at a potter's wheel. The theme of the poem was suggestive of three lines from the first stanza of Van Dyke's poem entitled "Work."

E. W. B.—Requests author, title and source of:

"Far, far away, like bells at evening pealing,
The voice of Jesus sounds over land and sea;
And laden souls by thousands meekly stealing,
King Shepherd, turn their weary steps to Thee."

Answer:

E. M. S.—Gives complete hymn found in *Favorite Songs for School and Home*, ed. by J. P. McCaskey. c. 1899. Amer. Book Co.

ANGELIC SONGS ARE SWELLING

Hark! Hark! my soul, angelic songs are swelling
O'er earth's green fields and ocean's wave-beat shore.
How sweet the truth those blessed strains are telling
Of that new life when sin shall be no more.

CHORUS

Angels of Jesus, angels of light,
Singing to welcome the pilgrims of the night.

Onward we go, for still we hear them singing,
"Come, weary souls, for Jesus bids you come!"
And, through the dark, its echoes sweetly ringing,
The music of the Gospel leads us home.

CHORUS

Far, far away, like bells at ev'ning pealing,
The voice of Jesus sounds o'er land and sea;
And laden souls by thousands meekly stealing,
Kind shepherd, turn their weary steps to thee.

CHORUS

Rest comes at length; tho' life be long and dreary,
The day must dawn, and darksome night be past;
All journeys end in welcome to the weary,
And heaven, the heart's true home, will come at last.

CHORUS

Angels, sing on! Your faithful watches keeping;
Sing us sweet fragments of the songs above;
Till morning's joy shall end the night of weeping,
And life's long shadows break in cloudless love.

CHORUS

—REV. F. W. FABER, 1850.

Note: Twenty other answers were received and forwarded to E. W. B.

N. Y. S. L.—Requests the origin and significance of:

The goose honks (or hangs) high.

Answers:

G. H. F.—States that above quotation is given in H. H. C. *Dunwoody's Weather Proverbs* in the following form:

Everything is lovely, and the goose hawks high (not hangs high, as is usually stated). Geese flying high is a sign of fair weather.

The following quotation, taken from *Strange Metamorphosis of Man*, 1634, in regard to the goose and weather-lore, may be of interest:

She is no witch, or astrologer, to divine by the starres, but yet hath a shrewd guesse of rainie weather, being as good as an almanack to some that believe in her.

M. N. B.—States that the above quotation is given in *Everyday Sayings*, by Charles N. Lurie, New York, Putnam, 1928, page 182, with the following explanation:

When the goose hangs high, all is well; whence we get the expression, "everything is lovely, and the goose hangs high." Some say that the expression should read, "The goose honks high." When the geese made their flight near the clouds, and honked as they flew, it was a sign of fair weather, according to ancient belief. From "honks" to "hangs" was an easy change. Others declare, however, that in places where wild geese are short it is the custom to hang high before the kitchen door the one that is to be roasted for dinner, and the prospective diners seeing it there exclaim, "The goose hangs high today!" Still others trace the saying back to olden days in England, when the cruel sport of goose pulling was in vogue. A live goose was hung by its feet from the limb of a tree. The men rode their horses at full gallop under the tree, and the one who succeeded in pulling down the goose kept it. The signal for beginning the contest was, "The goose hangs high!"

She also states that this quotation is found in *Nuggets of Knowledge*, by George W. Stimpson, New York, Sully, 1928, page 113, with the following explanation:

The origin of this common expression is obscure. It means the prospects are good. Most etymologists are inclined to regard it as a corruption of the *goose honks high*, referring to the noise made by wild geese in flight, especially in fine weather. It may, however, have originated in connection with the tournaments formerly held in many parts of the South. In these tournaments rings were suspended some distance apart and gallant knights were rivals in trying to center the largest number of rings while riding at full speed. The knight who caught the largest number usually received a prize and was permitted to choose the prettiest girl for the dance which followed. In some sections such tournaments ended with *gander pulling*, in which a tough old gander whose neck had been picked clean of feathers and greased was suspended at a considerable height. Each knight would attempt to pull the gander down while riding at full speed. Frequently the knight was pulled from his horse. The signal for the knight to start was, *the goose hangs high*.

Proposed A. L. A. Mexico Post-Conference Trip

PRICES

From Los Angeles back to Los Angeles, either both ways via Nogales, or with optional return via El Paso—Lower berth basis, \$285; upper, \$275; lower shared, \$262.

From Tucson back to El Paso or to San Antonio—Lower berth basis, \$250; upper, \$243; lower shared, \$233. (The Tucson rate to apply only to holders of tickets routed east via Southern Pacific R. R.)

Meals for the duration of the tour should be estimated at approximately \$28 or \$30, or about \$15 more if the best uptown restaurants are patronized.

ITINERARY

- June 29—Leave Los Angeles, 4:00 p. m.
- June 30—Arrive Tucson, 10:00 a. m.
Leave Tucson, 10:40 a. m.
Arrive Nogales, Ariz., 12:50 p. m.
Leave Nogales, 3:00 p. m.
- July 2—Arrive Guadalajara, 3:00 p. m.
- July 3—All-day trip to the Lake Chapala country; two-hour motor boat ride on the lake; side trip to the Falls of Juanacatlan.
- July 4—Sight-seeing in Guadalajara; trip to the town of San Pedro Tlaquepaque, noted as the pottery-making center of Mexico.
Leave Guadalajara, 5:30 p. m.
- July 5—Arrive Mexico City, 8:15 p. m.

HEADQUARTERS IN MEXICO CITY FROM JULY 5 TO JULY 11

- July 5—Desert of the Lions; Toluca (capital of state of Mexico).
- July 6—San Angel, Excavations of Copilco, Coyoacan; bullfight in the afternoon; jai-alai games at night.
- July 7—Churubusco, Pyramid of Cuicuilco, Xochimilco and the Floating Gardens.
- July 8—Cuernavaca (capital of Morelos), Pyramid of Teopozalco; Falls of San Antonio.
- July 9—Puebla (capital of Puebla); Cholula and Pyramid of Cholula.
- July 10—Archaeological zone of San Pedro Teotihuacan (including Pyramids of the Sun and Moon, Temple of Quetzalcoatl, Museum of Antiquities, underground dwellings, etc.); stop at Guadalupe on return trip.
- July 11—Los Remedios and Pyramid of Tenayuca.
Note: On some of the trips mentioned above, the party will return to Mexico City early in the afternoon; on these days cars will be used for conveying members to various interesting points in Mexico City, such as Chapultepec Castle and Park, National Palace, Flower Market, National Library, National Theater, etc.
- July 11—Leave Mexico City, 5:40 p. m.
- July 15—Arrive Tucson 3:35 p. m.
- July 16—Arrive Los Angeles, 7:20 a. m.

Optional: Leave Mexico City, July 11,

Note: This is personally conducted by Mr. G. M. Patison, for years a conductor of Mexico trips, whose qualifications are vouched for by the Los Angeles Public Library. Register for the trip direct with Mr. Patison, P. O. Box 128, Hollywood, Cal., as soon as possible, with a first payment of \$25.

9:00 p. m., arrive San Antonio, Tex., July 13, 1.50 p. m.

Or: Leave Mexico City, July 12, 8:50 a. m., arrive El Paso, Tex., July 14, 12:25 p. m.

Accommodations: Standard Pullmans; closed automobiles used for all motor trips; rooms either with private bath or connecting bath while in Guadalajara and Mexico City; two persons to be assigned to each room, with separate beds if desired. First-class hotels in Guadalajara and Mexico City.

Those booking for this trip who are returning east should specify, when buying ticket, return via the Southern Pacific, as that ticket can be used from Los Angeles to Tucson and thence east after the trip, either from El Paso or San Antonio.

Those attending the Conference on Cultural Relations, opening in Mexico City, July 5, can journey to Mexico with this party from Los Angeles, if desired, paying actual traveling expenses plus the slightly extra charge for the two days' Guadalajara stopover.

An Offer to Reference Librarians

THE CARDED Woolen Manufacturers' Association, 146 Summer Street, Boston, Mass., has taken an active and influential part in the discussion of the tariff on wool and wool goods and has published many statements on this question. Sets of the statements have been bound and are available to reference libraries of the United States on condition that the volume is not to be circulated, but is to be kept in the library building.

Book Review Club

(Continued from page 323)

Whitechurch, Victor. *First and Last*. Duffield. \$2.

A pleasant story of life in an English seashore town. Above the average.

Wright, Ruth. *Stars for Sale*. Penn. \$2.

Clean, pleasant story of a girl who is orphaned and left with the care of an invalid brother. She chaperons a four-year-old girl across the Atlantic and meets romance on the way.

Detective and Mystery Stories

Oppenheim, E. P. *The Million Pound Deposit*. Little. \$2.

Walling, R. A. J. *Man with the Squeaky Voice*. Morrill. \$2.

Freeman, R. H. *Mystery of 31, New Inn*. Dodd. \$2.

Older book, reprinted. Very well worth having. By the dean of mystery writers.

Propper. *Ticker Tape Murder*. Harper. \$2.

First-class detective story. Ingenious, exciting, plays fair with the reader.

The Open Round Table

The Handling of Duplicates

To the Editor of THE LIBRARY JOURNAL:

Mr. Dewey's letter in your issue of March 1 recalls not only his earlier efforts in the direction of pooling duplicates but also the more recent discussion of this question at the last meeting of the American Library Institute. The suggestion made by the writer of this letter that a big central storehouse be set up was met with a number of objections, none of which were necessarily final. It appeared, for example, that some libraries are not at liberty to handle duplicates in that way, and for these Mr. Wilson's method would seem the only feasible one at present.

The very promising suggestion was offered by Mr. Johnston, of the Bureau of Railway Economics, that, instead of one clearing house for duplicates, there be several according to specialties. For example, the Bureau of Railway Economics, provided it were willing to undertake the handling of duplicates concerned with railroads, could certainly handle them (whether for exchange or sale) in the most effective way, knowing, as this bureau probably would, just the most likely library in which to place individual items. Would not various libraries volunteer to handle in this fashion books on various subjects in which they are respectively interested?

HENRY B. VAN HOESEN,
Associate Librarian, Brown University.

A Union-Catalog of Early Printed Books

To the Editor of THE LIBRARY JOURNAL:

It is hardly necessary to remind librarians that Oxford is one of the greatest literary treasure cities of the world. The Bodleian Library, founded in 1602, has been a depository of national literature since 1610, when Sir Thomas Bodley made his famous agreement with the Stationers' Company. There are the libraries of twenty-one colleges founded before 1640, the year in which the Civil War began, besides important specialized libraries, like the Taylorian and the Radcliffe (Science) Library. These libraries together probably contain 3,500,000 printed books and 60,000 manuscripts. Among the hindrances to research in this university, according to a distinguished American professor, "must be counted the libraries. They are hopelessly un-coordinated and so decentralized that it requires years to learn what books on one's own subject may be

found there. With the expenditure of a few hundred pounds, the treasures already in Oxford libraries could be rendered more accessible by a card-index of the whole." The need was, however, recognized long ago. As early as 1652 Doctor Langbaine, afterward Provost of Queen's College, began the compilation of a subject catalog of all books in our public library and in any of our private college libraries. In the next century the Bodleian Curators tried to collect lists of books in college libraries not in the University Library; and a few years ago another attempt was made privately. The results were practically negligible.

Last year a new effort was made. The Bodleian Library, Magdalen College Library, and the Oxford Bibliographical Society by cooperation compiled and published a list of books (English and foreign) at Magdalen printed before 1641 not in the Bodleian, but with references to all English books before that date which are in both libraries. The year 1640 is convenient for English books because at the outbreak of the Civil War the country was flooded with pamphlets; it has, of course, no special significance in foreign history, but it set a definite limit and made it possible for the Oxford Bibliographical Society to print the list out of its own resources. To have taken a date such as 1800 financial assistance from outside would have been needed.

This was an experimental step. After consultation with College Librarians it was decided to put forward a proposal for the preparation of typed lists of all books printed before 1641, of which the colleges possess copies, and to form a card-index to the whole to be deposited in the Bodleian Library, the ultimate intention being to publish a complete catalog of early printed books before 1641 in Oxford College Libraries. This proposal, which has the approval of the Curators of the Bodleian Library, was communicated to the various college authorities, who have received it with favor. The typing of entries has already begun, and the work will now proceed steadily. It is true that the main Bodleian catalog is not yet printed but the vast majority of the early books in it are to be found in the published catalog of 1843 (4 volumes, still on sale at the Clarendon Press for £4 net) supplemented by the catalogs of the Malone collection (1836) and the Douce collection (1840, Clarendon Press, 15s. net). It is hoped, however, that within the next few years the Bodleian catalog will be printed.

S. GIBSON,
*Secretary to Bodley's Librarian and President
of the Oxford Bibliographical Society.*

From The Library Schools

Michigan

UNIVERSITY of Michigan courses in Library Science for the Summer Session of 1930 will be given from June 30 to Aug. 22. Early registration is desirable, as the prospects are that a large number of students will limit the number. Courses open for seniors presenting 90 or more hours of credit, with at least one and one-third as many points as hours, and a reading knowledge of French and German, are Cataloging and Classification of Books, Book Selection and Ordering, Administration, Care and Use of Ephemeral Material, Reference, School Library Work for Teacher-Librarians, Special Collections, and the Making of the Book. Advanced courses for those with a Bachelor's Degree, a reading knowledge of French and German, and one year of study in Library Science, include National and Regional Bibliography, Library of Congress Classification, and Advanced Cataloging Problems.

Oregon

SEVEN COURSES in library methods will be given at the 1930 summer session of the University of Oregon, June 23 to Aug. 1. Three courses constitute a full load of work. Miss Clara E. Howard, director of the Library School of the New Jersey College for Women, New Brunswick, will give a course in "The Administration of High School Libraries," both senior and junior, and a course in "Books for High School Libraries." Miss Della J. Sisler, University of California School of Librarianship, will give a course in "Elementary Cataloging" and one in "Classification and Subject Headings." Miss E. Lenore Casford, periodical librarian of the University of Oregon, will give a course in "Elementary Reference Work," one in "Children's Literature," and one in "Library Work with Children."

Pittsburgh

DUE TO a grant from the Carnegie Corporation, the Carnegie Library School of Pittsburgh is again able to offer courses for more extensive and specialized training to those engaged in public library work with children and elementary school library work. With one exception, the courses offered will be the equivalent of those given in the regular session of the school.

The school is fortunate in having Miss Martha C. Pritchard, director, Library School, New York State College for Teachers, for the instruction in Administration of the Elemen-

tary or Platoon School Library. Miss Elva S. Smith, head of the Boys' and Girls' Department, Carnegie Library of Pittsburgh, and instructor in the regular session of the Carnegie Library School, will give the course in Book Selection for Children. Miss Elizabeth Nesbitt, instructor in the Carnegie Library School, will give the courses in Story-Telling, Administration of Children's Rooms, and Reference Work, while a simplified course in Cataloging and Classification, Subject Bibliography for elementary school use will be taught by Miss Helen McCracken, teacher-librarian of the Westinghouse Junior-Senior High School, Pittsburgh, Pa.

The library of the H. C. Frick Teachers' Training School will again be operated as a demonstration library by the University of Pittsburgh and Carnegie Library School for the benefit of their summer students. Miss Laura C. Bailey, former librarian of the Mount Auburn Training School, Cleveland, will be in charge. Demonstration work in book appreciation and in teaching the use of books in the grades, as well as the introduction of literary and visual material which correlates with curriculum, will be featured.

A catalog will be sent upon request.

Toronto

WITH the beginning of the year the first semester of the Librarians' Course, University of Toronto, was completed. Final examinations and sessional tests were given during the last week of January. The second semester started with several new classes. Mr. Stewart Wallace, University librarian, resumed his lectures, beginning a course for the whole class in Canadian literature. Miss Lillian Smith is continuing her class in Children's literature and a number of students who are not specializing in Boys' and Girls' Work have elected to take this course. The elective course in school libraries under Miss Jean Merchant, Librarian, Normal School, Toronto, has a large registration. Story-Telling with Miss Enid Endicott, Boys' and Girls' Division, Toronto Public Library as lecturer, is another elective course which is very popular. Miss Dorothy Thompson of the Public Libraries Branch, Department of Education, has just finished three interesting lectures at the school on the relations between the Public Libraries Branch and the public libraries in the Province, maintained through the medium of the *Ontario Library Review*, visits to libraries and other organized methods too numerous to mention.

Simmons

MISS BROTHERTON, as assistant director, will be in charge of the six-week summer session, July 7 to Aug. 15. She is offering six-week courses in library work with children and in school libraries.

Miss Kauffmann will conduct the six-week cataloging and bibliography course, and Mrs. Hartzell will give a four-week course in elementary reference.

For college graduates most of these courses give credit toward the degree of Associate in Science. Usually others may attend, though without receiving credit toward a Simmons College degree.

Tennessee

THE UNIVERSITY of Tennessee announces summer courses for teacher-librarians in continuation of those which were given last year, thus enabling those who began the work at that time to complete the twelve weeks' training required by the Southern Association of Secondary Schools. The three courses given last year will be repeated for the benefit of beginners. The instruction will be given by Miss Helen Harris, Association Professor of Library Science at the University of Tennessee; by Miss Carrie M. Wiseley, Librarian, Scott High School, Toledo, Ohio, and by Miss Sarah C. Currell, of the University of Tennessee Library, who will be released from her regular duties for this purpose. The enrollment in the Library Science courses given during the winter session has been double that of the first year and considerable interest is manifested in the work for the summer session.

Western Reserve

BEGINNING with the summer of 1930, the School of Library Science of Western Reserve University will offer in consecutive summers a regular one-year library school curriculum. The session in 1930 will be for six weeks, beginning on Monday, June 23, and ending on Friday, Aug. 1. The unit courses offered are equivalent to those in the regular session and yield credit, subject to the regular admission and curriculum requirements. In 1930 special emphasis will be upon courses in school library service and in library service for children. The school library courses are designed to meet the needs of teacher-librarians and school librarians in active school library work who have not had special library training, and of those who have prepared for teaching and desire to enter

school library work. Admission requirements of the school presuppose at least three years of college, admitting to senior standing; but, with the permission of the dean, other qualified persons may be admitted. Those desiring to enroll in the courses in high school library service must, however, hold a bachelor's degree from an approved college or university.

An advanced course is offered in library service for children, leading to an M. S. degree. Instruction covers administration in all fields of library work with children, with emphasis on evaluation of comparative methods in organization. Book selection courses include studies of type books and sequences in reading with reference to individual differences and trends in group interests. The history of children's literature in relation to modern books is also considered. Each student is required to present a written thesis on a subject approved by the faculty of the school. This course is offered to a limited number of persons who present the following qualifications: 1. A bachelor's degree from an approved college. 2. A certificate or a degree from an accredited library school. 3. Successful library experience in work with children under approved conditions.

Readable Books Experiment

AS AN experiment the Springfield, Mass. City Library recently started a case of "Readable Books" in the delivery room. Only books that it was hoped the general reader would enjoy were chosen, and no book was given more than a week's chance. In four weeks 750 books were placed upon these shelves and 600 went out. Thus, in their six-day probation only one-fifth of the total number were turned down by gentle readers. Of the various kinds, biography led—only 17 books of the 122 offered were not taken; literature was the least popular, with 41 rejected out of 192. Translations of foreign literature went out almost to a book and works on religion, sociology and art made an excellent record; better than the average for the whole collection. Antiques, murders or cats were almost sure of a reading, archæology was apparently not to anyone's taste, and as for individual books and authors, there were many surprises.

Wanted

WANTED—By Dalhousie University Library, Halifax, Nova Scotia, the Index to Volume No. 6 of the *Botanical Series* of the University of California Publications.

Library Organizations

Arizona Conference of A. L. A.

LIBRARIANS from all parts of the country are planning to attend the Arizona conference of the American Library Association, to be held June 21 at the Grand Canyon. This event, the first of its kind to take place at the Canyon rim, will precede the A. L. A. national convention, opening June 23 in Los Angeles.

Governor John C. Phillips of Arizona will give the address of welcome and Dr. Andrew Keogh, of the Yale University Library, president of the A. L. A., will preside at the special program on library development. The conference will aim to arouse interest in greater library activity throughout Arizona.

Speakers on the program will include Julia Wright Merrill, executive assistant of the committee on library extension of the A. L. A., who will discuss "The County Library"; C. B. Lester, secretary of the Wisconsin Free Library Commission, who will talk on "The State's Function in Library Service"; Estelle Lutrell, librarian of the University of Arizona, who will speak on "The Library Movement in Arizona," and Dr. Keogh, who will conclude the program with a brief discussion of "The College Library."

Fourth District Meeting of C. L. A.

THE FOURTH District met at Modesto Feb. 15. The morning session was given over to business and to the discussion of County Library Branch work. Neva Hunsberger, Custodian of the Sanger Branch of the Fresno County Free Library, spoke of the kind of shipment the Custodian likes to receive from the Main Library; she cited regularity of shipments, the sending out of attractive posters and the pasting of reliable reviews in the books as aids in serving the local public. The other side of the question was presented by Mrs. Phoebe Winkler, in charge of the branches of the Tulare County Free Library, who discussed the kind of cooperation the county library likes to receive from the custodian; she emphasized loyalty to the head librarian and the impersonal attitude toward the borrowers as cooperative aids. The afternoon session opened with an address by Mrs. Julia G. Babcock, President of the California Library Association, entitled, "California Is Hostess to the American Library Association." Following this, Miss Edna M. Stangland, Associate Chief of the State Division of Adult Education, spoke on her observations on Adult Education Abroad. The meet-

ing closed with the dramatic reading of St. John Ervine's "The Ship," by Prof. De Marcus Brown, director of the Little Theatre of the College of the Pacific.

United Staff Associations Dinner

THE THIRD annual dinner of the United Staff Associations of the Public Libraries of the City of New York was held in the ballroom of the Hotel Commodore on Sunday evening, Feb. 9. Over 700 librarians and guests were in attendance. The purpose of the dinner was to promote closer fellowship for unity of action looking toward the betterment of economic conditions throughout the staffs and more adequate library service to the people of the five boroughs of the city of New York. Hon. James T. Hallinan, former trustee of the Queens Borough Public Library, was the toastmaster. The Library in Its Civic Relations was presented by Robert E. Simon, Wilson M. Powell, and Laura A. Cauble. Speakers representing the Arts were John Mason Brown, dramatic critic of *The New York Evening Post*; Mrs. Louise Closser Hale, well-known actress and author; David Mannes, director of the David Mannes School of Music, and Nicholas Roerich, director of the Roerich Museum. Andrew Keogh brought greetings from the American Library Association and spoke of the unique position of the public library in America as compared with libraries in Europe, and emphasized the debt of librarians to their profession. Claude G. Bowers, author of *The Tragic Era* and other popular works, was to have spoken, but was unable to attend on account of illness. Other guests were Hon. William T. Collins, Theodore L. Frothingham, Darwin L. James, Prof. Howard L. McBain, Hon. Martin G. McCue, Monsignor Joseph H. McMahon, Hon. Frank L. Polk, Hon. Ellwood M. Rabenold, and Ferdinand L. Feurbach.

Kansas Association Considers Extension

IN ACCORDANCE with the recommendations passed at the Kansas Library Association meeting last October, the president called a meeting on Jan. 27 of representatives from various State organizations and institutions interested in possible extension of library facilities for Kansas. Miss Ruth Hammond, librarian of the Wichita Public Library, and president of the K. L. A., presided. Attention was called to a map prepared by Miss McNeal, State Librarian, showing eighteen counties in Kansas

with no libraries and thirty-one counties with no public tax-supported libraries. Miss Hammond presented statistics from California and compared them with Kansas. After an election of officers, the meeting was thrown open for general discussion. Three motions were passed by the group before adjournment: That a committee of five be appointed by the chairman to act as an executive committee in organizing and carrying forward the movement among interested organizations in all counties of the State; that this meeting request the Kansas Council of Women to sponsor legislative action necessary for providing a field worker to assist in the advancement of library work in the State; and that this meeting go on record as favoring the establishment of county libraries throughout Kansas, and that the members present report back to their respective organizations the action of this meeting.

State Publicity Lectures

A SHORT series of lectures on Publicity for Librarians has been arranged by the Publicity Committee of the New Jersey Library Association. These talks will be given at the Newark Public Library on Tuesday mornings at 10.00 on April 15 and 22, and May 6 and 13. There will be no charge for the course.

The program has been arranged by Miss Grace D. Ross, librarian of the Morristown, N. J., Library. The dates, topics and speakers follow:

April 15—"Book News and How to Judge It," by Mr. Frederic Melcher, Editor, *Publishers' Weekly*, New York City.

April 22—"Newspaper Publicity," by Miss Marjorie Shuler, Central News Bureau, New York City.

May 6—"Printing and Posters," by Miss Chapman and Miss Travis, Newark, N. J., Public Library. A feature of this talk will be the actual setting up and printing of library signs on the printing press of the Newark Public Library.

May 13—"A Publicity Program," by Miss Margery Quigley, librarian of the Montclair, N. J., Public Library.

Columbian Library Association

LIBRARIANS from Maryland, District of Columbia, Virginia, Pennsylvania, and Delaware attended the annual meeting of the Columbian Library Association, held Feb. 15 at Johns Hopkins University. Dr. John French, librarian, welcomed the delegates and told them something about the University Library. Among the speakers were Dr. John Rathbone

Oliver of Baltimore; Miss Margaret Jackson, librarian of the Hoyt Memorial Library, Kingston, Pa., who spoke on "Of the Making of Books There Is no End," and Dr. Gilbert Chinard, professor of French literature at Johns Hopkins University, who delivered the concluding address of the conference on "The Librarian and the Scholar."

Are You Listed in Directory?

RESPONSE to the notice about the preparation of the 1930 edition of *The American Library Directory*, which appeared in the last issue of THE LIBRARY JOURNAL, has been excellent. As it appears to have proved a reminder to some librarians who had not sent in their information, this note is inserted with the hope that it will stimulate response from the remaining few.

Late information is desired. In some cases it may be obtained from State Libraries or Commissions, but it is more desirable to get facts from direct source. Below is the form in which such information is desired. If the JOURNAL cannot be cut, or if the original blue form has been mislaid, kindly follow arrangement below, using letterhead paper:

State	City

Year's Circulation	
Total Income	
Expenditures for Books and Periodicals....	
Special Collections	

Court Censorship on Foreign Books Adopted

The United States Senate adopted without roll-call on March 18 the Smoot amendment on censorship, slightly modified, extending the present law to make district courts the final arbiters of obscenity in literature and art, and treasonable publications. This action upset the Cutting amendment, which eliminated books from censorship but created for the first time a real censorship by judge and jury, taking from the custom officials and the Treasury the authority to decide what is obscene or immoral. The amendment may cause some delay in the arrival of certain books imported by reference or university libraries, and there is still room for difference of opinion between different courts, but decisions upon this very important question are in the future to be decided by the tribunals which are clothed by the Constitution with the authority to pass upon questions of social policy.

Among Librarians

Special Libraries

MARY K. LOGAN, Simmons '22, has been appointed librarian of the Cooper Union Museum Library, New York City.

FLORA MOFFAT, N. Y. P. L. '25, has resigned the position of head cataloger at Queen's University, Kingston, Ontario, to accept a position in the Catalog Department of Union Theological Seminary.

JANE E. MOLENAER, Pratt '29, who has been indexing technical periodicals of the McGraw-Hill Publishing Company, has been made assistant in the Reference Department of the Engineering Societies Library.

HELEN L. ZANES, Pratt '29, who has been serving as substitute assistant in the library of the Young Men's Christian Association since her graduation, has been appointed assistant in the library of the Children's Museum in Brooklyn, N. Y.

College and University Libraries

HESTER CODDINGTON has resigned as head cataloger at the University of Wisconsin Library.

FAYE A. COLLICOTT, Columbia '28, resigned the librarianship of the Mamaroneck Junior High School, White Plains, N. Y., to accept the position of assistant librarian in charge of children's work, State Teachers College Library, West Chester, Pa.

VELMA GOODE, Atlanta '21, has been appointed assistant in the Emory University Library.

LEOTA HULSART, Atlanta '29, has been appointed assistant cataloger in Ohio Wesleyan Library, Delaware, Ohio.

EVELYN JOHNSON, Simmons '26, has gone to the State Normal School at Westfield, Mass., to assist with the cataloging reorganization.

DELLA MCGREGOR, Wisconsin '11, head of the Juvenile Department, St. Paul Public Library, is giving two courses at the University of Minnesota, on Library Work with Children and on Work with Adolescents.

GEORGE V. MARAIS, Columbia '28, completed nearly a year of service as assistant in the Washington Square Library of New York University before returning last September to his permanent position in the Library of the University of Stellenbosch, South Africa.

MARY BEVERLY RUFFIN, Columbia '28, went to the Library of the University of Florida last September as acting head cataloger.

Public Libraries

RICHARD ASHTON, Borough Librarian and Curator of the Blackburn Public Library, Museum, and Art Gallery, England, completed fifty years in the service of the Blackburn Corporation on March 1, 1930.

RAY STANNARD BAKER (David Grayson, pseud.), noted author, was elected a trustee of the Jones Library, Amherst, Mass., on March 4 to succeed the late Dr. John Tyler, who died last spring.

CLARA BALDWIN's thirty years of service to Minnesota libraries has just been celebrated by the Minnesota Library Association, which expressed its appreciation with a purse of \$225 and a sheaf of letters neatly mounted in book form.

WELTHA BROWN has been librarian of the Columbus, Mont., Public Library since last September. It was recently reported that Mrs. Rosalia Lee Bell was librarian. Miss Brown replaced Mrs. Bell in this position.

ELLA B. COOK, Pratt '14, has recently accepted a position as chief of the Catalog Department in the Trenton, N. J., Public Library.

ELIZABETH MCCARRICK, Atlanta '23, is joint author with Florence Adams of *Highdays and Holidays*, published by Dutton. Miss McCarrick has been a children's librarian in the branches of the New York Public Library since graduating from the Library School, and is now in charge of the children's work in Muhlenberg Branch on West 23rd Street, New York City.

BESS MCCREA of the Cincinnati Public Library has been appointed assistant librarian of the Providence, R. I., Public Library.

LAURENCE M. SHAW, Brown University '99, has been promoted from head of the Order Department to assistant librarian of the Providence, R. I., Public Library.

HELEN G. STEWART, former librarian of the Victoria, B. C., Public Library, has accepted the directorship of the demonstration of rural library service which the grant of \$100,000 from the Carnegie Corporation (*LIB. JOUR.* 55:128, 1930) makes possible.

MARY E. ROSSELL, N. Y. P. L. '15, formerly head of Circulation in the Fort Wayne, Ind., Public Library, has become head of Circulation in the Charlotte, N. C., Public Library.

LOUISE GRAHAM HINSDALE, Pratt '98, for sixteen years librarian of the East Orange Public Library, died at her home in New York, Jan. 17.

Opportunities

This column is open to librarians

Wanted—A library school and college graduate to teach library science, six weeks' course, during the summer, 1930, in standard four-year college in Kentucky. D-15.

Wanted—By the Riverside Library Service School, California, applications for position of executive secretary. Applicant should be college and library school graduate, preferably with library and teaching experience, a good typist, able to drive a car, and willing to do whatever position requires. Address C. F. Woods, Director.

School librarian with five years' experience and M. A. degree desires position in North or Northwest. College library preferred. Available July 1 for vacation or permanent position. D-12.

Librarian of large senior high school desires position for July and August. College graduate with library training and several years' experience. D-13.

Classifier in ten languages with two years' experience desires position in library. D-14.

College and library school graduate, with ten years' experience in college and school libraries, desires summer position in camp, summer school, or substitute work. D-10.

College and library school graduate, having several years' experience with periodicals and some reference work in college libraries, desires position in Washington, D. C., in a public, special or business library, or with a publishing firm handling periodicals. Reference work preferred. D-11.

Cataloger wants position in public library. Circulation experience also. Z-20.

Trained and experienced cataloger, wishing to make a change between now and September, would like cataloging position of responsibility in small city or town in East or South. C-22.

Young woman, college and library school graduate, with little experience, would like a position as assistant in a public or college library. East preferred. C-23.

College librarian wishes librarianship of a small college or reference position in a big college or university for next year. C-24.

College and University of California library school graduate, with ten years' experience, desires position in a college, public, or business library. C-16.

University and library school graduate, with M.A. degree, wishes administrative position, order or reference. Experienced in college library work. C-17.

Position wanted in New York City by librarian with six years' public and two years' business library experience. C-18.

Position wanted in library by librarian with A.B. degree, library school training, some experience, and twenty-three years of age. Moderate salary. C-19.

Librarian, with M.A. in English from Columbia University and library school training, desires position for summer months. C-20.

Business Books List Free

THE MARCH number of *Book Marks*, the monthly publication of the Des Moines, Iowa, Public Library, contains a list of books for the business man and woman. A copy will be sent to anyone desiring it.

The Calendar

April 4—American Library Institute at Hotel Chelsea, Atlantic City.

April 4-5—Pennsylvania Library Club and New Jersey Library Association, annual meeting at Hotel Chelsea, Atlantic City, N. J.

April 10-12—Tennessee Library Association, annual meeting at Cleveland.

April 12—Ninth District of California Library Association will meet in Willows, Cal.

April 12—Ohio Valley Regional Catalogers' meeting in Indianapolis, Ind.

April 21-22—Ontario Library Association, annual meeting at Public Reference Library, Toronto.

May 1-2—Louisiana Library Association, annual meeting at Monroe, La.

May 10—New England School Library Association, annual meeting at New Haven, Conn.

May 12-15—American Association for Adult Education, fifth annual meeting at Edgewater Beach Hotel, Chicago, Ill.

June 13-18—Northeastern Library Convention will be held at Swampscott, Mass.

June 14—Utah Library Association, annual meeting at American Fork, Utah.

June 13-18—Vermont Library Association, annual meeting at Swampscott, Mass.

REPORTS FROM LIBRARIANS ON THE NEW BRITANNICA

NOW that the new Britannica is in actual use in the libraries, we are hearing enthusiastic reports from all sides. Hundreds of letters received attest to its popularity among readers and its value in making the library more serviceable to the community. The following comments are typical. They deserve careful consideration.

Highest Praise

Critics and educators, men prominent in all walks of life, acclaim the new Britannica.

The Hon. Charles Evans Hughes
—"The Encyclopaedia Britannica is comprehensive and authoritative. Nothing has been left undone to make it thorough and complete. It is worthy of the great tradition associated with its name."

James R. Angell, President of Yale University, in *The Saturday Review of Literature*—"A work of consuming interest, and one which establishes a record that will long remain unchallenged."

William Allan Neilson, President of Smith College—"Its freshness, its contemporaneity, the lavishness of the illustrations and the distinction of the contributors . . . make it a continual fascination."

Remember this is a new work.
Only a small amount of text that could not be improved in any way has been retained from previous editions.

Montclair, N. J.—"As popular as the latest detective story."

Springfield, Mass.—"Of inestimable value."

Pratt Library, Baltimore—"Reference work in all branches has been stimulated by the new Britannica."

Eugene, Ore.—"All our patrons express their pleasure in having the new Britannica in the library and are enjoying the use of it."

Graham, Texas—"In constant use and very satisfactory."

Mobile, Ala.—"The world's premier encyclopaedia—fulfills a long-felt want."

Clarksville, Tenn.—"In constant use . . . a great addition to the service of the library."

George Washington University—"Our most valuable reference work."

Pocatello, Idaho—"One of our most valuable acquisitions of the year."

Eldorado, Ark., H. S.—"Since the first day has filled our great need for contemporary reference."

Cambridge Springs, Pa.—"Should double the service of the library to this community."

THIS new Britannica represents the greatest encyclopaedia value you could buy. It contains fully half again as much material as any other encyclopaedia or general reference work published today.

Up-to-date, accurate, written by 3,500 acknowledged authorities, with 500 maps and 15,000 illustrations, it is, to quote the New York Sun, "the finest Encyclopaedia in English." Yet the price is the lowest in the major encyclopaedia field.

The new Britannica belongs high in the list of library indispensables. Order your set today. *Special Form for Library Use.*

The DETROIT SYSTEM of BOOK CHARGING

*a time saver for busy
libraries!*

AN almost automatic system of book charging, such as has been so successfully employed by the Detroit Public Library, can now save time for any size library. Because of the basic simplicity of the system little new equipment is required. A few signs of instruction and supplies are the only things necessary—PLUS a thorough understanding of how the system works.

Just Published—

Mr. Ralph A. Ulveling, Chief of Branches in Detroit and originator of this new system, has just written a paper on this unique and altogether revolutionary advancement in library practice. We have just published this explanation in brochure form. We will be pleased to send you a copy—of course, free to you.

✿ The May first number will be devoted to Special Libraries. Two symposiums will be given; one covering Libraries and Business Men in Financial, Industrial, Insurance, Newspaper, and Advertising Libraries, the other discussing the problems of training for special librarianship. The first part of the report of a survey of Public Business Library Work in Large Cities conducted by Marian C. Manley of the Newark Business Branch will be given; the second and final part to be continued in the May 15 number. Other interesting articles, such as an article on book selecting by Miss Burnett of the Federal Reserve Bank, an article on the Boyce Thompson Institute for Plant Research by Miss Troy and an article entitled, "An Ideal Library for Research Purposes," by W. C. Schluter of the University of Pennsylvania, have been planned for.

✿ We have two articles on budget-cuts scheduled for May 15; one by Samuel Ranck of the Grand Rapids Public Library, Michigan, the other by Miss Plaister of San Diego, California.

✿ The June 15th number will be a special coast number, representing the work of California, Oregon, Washington, and British Columbia and will be distributed at the Los Angeles Conference.

Artificial Light in Library Stack Rooms

Illustration shows Sneed Time Switches for controlling lights . . . Library of Congress, Washington, D. C.

Forty years ago the problem of light in stack room aisles was a difficult one because daylight was considered to offer the best solution.

For the past 15 or 20 years, however, daylight has not been considered necessary not only because electricity is so inexpensive, but because artificial light can be directed exactly where it is needed.

Scientifically correct stack room lighting is only one of many details which our engineers have worked out in connection with our bookstack installations.

The Millicent Library Book Tour

By Avis Miller Pillsbury

Librarian, Millicent Library, Fairhaven, Mass.

Where shall I go a-traveling,
Traveling, traveling, traveling?
On the sea, in the air,
On the land—I don't care,
For I love to go
Traveling, traveling.—J. S. TIPPETT.

THIS LITTLE verse sounds the keynote of the children's reading contest which was held during the summer of 1929 at the Millicent Library, Fairhaven, Mass. The contest was conducted for children from the first grade through the first year in high school, and was called a Book Tour. Its sole aim was to encourage the children to read, and because it was the first time in years that any such project had been carried on in the library, everything that could be thought of was done to make it alluring rather than formidable to the child. The plan

One of the passengers having his name inscribed on ticket with stylus

was adopted from suggestions gathered here and there from ideas carried out elsewhere, with variations and the introduction of original innovations to make it appeal to the children of this community.

To begin with, publicity items were issued through various channels. The librarian visited the school and talked to the children of the different grades, in sixteen different groups, on the two days preceding the close of school. The June issue of the *Millicent Library Bulletin* had one page devoted to the contest. The local newspapers were generous in in-

cluding in their columns noteworthy items and, as the work with the children progressed, even sent photographers to get pictures of certain events.

Efforts were made to present the travel book idea in such a way as to appeal to the child's imagination, and as children seem to be more interested when they see some reward ahead, they were told that when the contest was over there would be a surprise for those who had done the most and the best reading. They were invited to travel over the MILLICENT LIBRARY RAILROAD and on the *S. S. Libraria* to North America, South America, Asia, Africa, Europe, Australia, Fairyland (included so that the children in the first two or three grades could find books suitable to their age), and to the Homes of Great Men and Women (listed to bring into the contest a different type of book, with the element of biography and a background of some one of the countries).

The janitor of the library made a ticket office out of wooden boxes covered with green crepe paper; this was made to fit the top of a desk in the children's room. Posters were attached, one reading thus:

TRIP AROUND THE WORLD
FOR BOYS AND GIRLS
OVER
THE MILLICENT LIBRARY RAILROAD
VIA
BOOKLAND

A small poster just above this read:

Tickets may be obtained between July 8 and 22.

Ticket agent on duty between 10:00 and 11:59 a. m. daily.

The regulations for passengers were as follows:

REGULATIONS FOR PASSENGERS

1. Tickets must be secured at Ticket Office.
2. Plan your route. Consult the globe of the world and choose the place you wish to visit first.
3. Select books from the tables that are labeled, or from shelves that have signs.
4. When you have read the book thoroughly:
Return it to the desk.
Bring ticket to be punched.
Secure a slip on which to write notes about your journey. It may be in the form of a diary if you wish. After you have read five or more books, you may have a booklet in which to write your notes.
5. Watch the tables for new books.
6. For colors representing various countries, consult list on bulletin board. After you have written your first note, your name will be added to the list of passengers. Following it will be placed colored pins representing the countries you visit.
7. Do not lose your ticket. Deposit it in the hands of the Conductor, or Captain for safe keeping, if you wish.

These regulations were posted on one side of the ticket booth, while on the other side the progress of the passengers was recorded. Two lists, namely, "Everyland" and "Children of Many Lands," were checked and the call numbers of the library books written in the margins. The "Everyland" pamphlet was

Poster advertising story hour

marked TIMETABLE and hung on the ticket office, as well as a sample of the Gaylord booklet, "Books I Have Read," a copy of which each child was promised when he or she reported at least five books read; sample tickets were posted, too. A globe of the world, which had previously attracted the children, was placed in the juvenile room where it could be easily consulted. Around the room, on tables and on top of the low bookcases, were arranged groups of books, the subjects corresponding to those on the ticket.

Much latitude was given the children in making their selections. No attempt was made to have them read from any special list of travel books; the "Timetable" was simply a guide. Desirable as systematized reading is, it did not seem to be the opportune time for it in the Millicent Library chiefly because, in the estimation of the librarian, the children needed to acquire the reading habit. They were allowed to choose any book which had some national background. The impression, "Aw, gee, we don't want to read geography books," was soon dispelled, as the children learned that they could read such books as *Heidi*, *Hans Brinker*, *Little Maid of Massachusetts Colony*, and the like.

Promptly on the morning of July 8 the children gathered to secure their tickets, some thirty or more arriving on the scene at an early hour; a press photographer snapped the group, and the picture appeared in the evening paper. Each child awaited his turn at the ticket office and was given a ticket on which his name and grade was written with the electric stylus, in any one of several colors

he himself selected (red, blue, green, yellow, orange, black). This proved a great fascination, so much so that one child who came out of hours insisted that his name must be written on with the stylus rather than in the usual fashion. The ticket was a long strip of green porous paper (2¾ in. x 15 in.), made to resemble a Pullman ticket. It read thus:

THIS TICKET ENTITLES
THE BEARER
John Smith
Grade 5
TO ONE CONTINUOUS
PASSAGE TO THE POINTS
PUNCHED BELOW, OVER
THE MILLICENT LIBRARY RAILROAD
via
BOOKLAND

Then followed the names of the continents, "Fairyland" and "To the Homes of Famous Men and Women," with a space left after each subject.

When a child reported on a book read, the name of the country was written on the ticket, under the proper heading, with a punch opposite it. The child's name was placed on the chart only after a review of the book had been written when a colored pin, or map tack, was placed beside the name; the continent or place visited being denoted by the color of the pin. The colors represented places, as follows: North America: United States, red; Canada, green; South America, black with white spot; Europe, blue; Asia, yellow; Africa, black; Australia, rose; Fairyland, crystal; To the Homes of Famous Men and Women, gold.

Some children aspired to include one or more pins of each color beside their names; others cared only to read those books which most interested them. It was astonishing to see how eager the children were and how real the Book Tour seemed to them. As was to be expected, the first interest was the greatest, and a few of the youngsters dropped out after two or three weeks. One noticeable result which seemed most satisfying was the fact that some of the children, while not continuing to read in the contest, did continue to read along other lines. And

since the intention of the whole thing was to instill the love of reading into the boys and girls, we felt that our efforts had been well spent.

The greatest difficulty encountered was to check the feeling of "beating the other fellow," and reading just for a pin won or a possible reward in sight. One girl in the eighth grade read too many books, 147 of them, from July 8, when the contest began, to Nov. 1, when it officially closed. This sort of reading cannot be called healthy reading and efforts were made to check it, but this particular girl had a great desire to surpass everyone else. In consequence, toward the end of the contest, she read books that were far too young for her. However, some of the reviews she wrote showed originality of thought, so what she gained amounted to something at least. The

Showing passenger list and indicating (by pins) the country visited

contest continued after school opened in the fall because of requests from the children to continue it. As some of the youngsters who were away during the summer wanted to join, it seemed only fair to give them a chance, too.

In connection with this summer reading, story hours were held by several of the townspeople most generous in giving their time. Kipling's *Just So Stories* were advertised in poster form: SIDE TRIP TO AFRICA. ALL ARE INVITED TO VISIT JUNGLELAND. Cut-out illustrations from the book jacket of *Little Black Sambo* were pasted on the poster. Another, JAPAN—COME AND LISTEN TO THE STORY OF OUR JAPANESE COUSIN. This story hour was particularly significant because it so happened, without any plans being made to have it coincide, that the delegation of Japanese students who come once a year to Fairhaven were scheduled to arrive on the very morning the story of Japan was to be told. By hasty telephoning and a slight change of schedule the children were kept waiting until the Japanese arrived. Most of the children sat on the floor, leaving the chairs for the guests. One of the Japanese, observing them, said: "So you are doing the way they do in our country." After the story hour, which was somewhat shortened, the children were honored by hearing one of the Japanese talk for a few minutes. It was a gala event and one long to be remembered.

The culmination of the contest came during Book Week. The surprise was kept a secret until invitations were sent to each child who had entered the Book Tour Contest, the invitation reading thus:

COME

WHAT: To the Millicent Library Party.

WHEN: Friday afternoon, Nov. 22, at 4:15.

WHERE: At the Banquet Hall in the Town Hall.

All who traveled over the Millicent Library Railroad during the past summer are invited,

BUT

BE SURE TO BRING YOUR TICKET WHICH WAS ISSUED TO YOU FROM BOOKLAND STATION

The Banquet Hall was secured because the library had no room large enough to provide for such a gathering. One hundred and forty-three invitations were sent to the boys and girls and the room was well filled. For entertainment, one of the elementary school principals

very kindly used his motion-picture projector, showing slides on Switzerland and the Grand Canyon of the Colorado. Besides this, three children, pupils of an elocution teacher of New Bedford, gave readings which delighted the boys and girls. Then came the announcements as to the results of the contest. The librarian asked questions about their tour, which the children were invited to answer. When the

librarian asked, "How many saw a queen on their travels?" one fifth grader could hardly contain herself until she told us that she was born in a country, Denmark, where there was a queen. The excitement was intense as the announcements were made, and over a dozen youngsters were puffed up with pride as they came, one by one, to the front to have a bright colored ribbon pinned on. It was most difficult to decide how recognition should be given. Some who read only a few books did so much better in their reports than those who had read many books just for points, that credit was given for what the child got out of his reading, conscientious effort being spent to place merit where it really belonged. There were five groups to which recognition was given, divided by grades, because the little ones could not compete with the older boys and girls. The groups were as follows: Second-third-fourth grades combined, the first grade being omitted because no reports were received from pupils in that grade; fifth, sixth and seventh grades recognized separately; eighth grade and first year in high school combined.

One of the local bookstore dealers offered to furnish three books for prizes, so with these and two others which the library bought, the first prize in each group was a book, besides the blue ribbon, on which were written these words in gold (the stylus being used):

Millicent Library Book Tour—1929

First Prize — Grade —

Name of child

The boys and girls winning first place were allowed to choose from a given list the books they preferred. The five chosen were *Heidi*, by Spyri (two girls choosing this title); *King Arthur and His Knights*, by Sir Thomas Malory; *Old Fashioned Girl*, by Alcott, and *Hans Brinker*, by Dodge. Yellow pencils to accompany the yellow ribbons were awarded the second place winners. The lettering on

The ticket

Honorable mention - Grade 6
Jeannette Doberck

these ribbons was in white. An honorable mention ribbon (pale green with black lettering) was given to each one holding third place honors. Every child who had written one or more reviews of books read was given a "Dutch Twin Book Mark," on the back of which was written, "This certifies that during the summer of 1929, ——— (child's name and grade) was a member of the Book Tour Party, and traveled at home and abroad over the Millicent Library Railroad and on the S. S. *Libraria*."

As a special honor, five of those winning mention of one kind or another were chosen to represent book characters, and helped serve tea to a group of mothers and teachers on Thursday afternoon of Book Week.

The question naturally arises as to what the Book Tour reading really amounted to, and whether it was worth while, considering the amount of energy expended on it by librarian and staff, who cooperated in every way to secure results. In the estimation of the librarian, the intangible results seem of greater significance than those which can be written in black and white. The spirit of the children toward the library, their increased reading and interest, the attitude of their parents, all combined give a feeling that the work was not in

vain. In actual figures, the following is of interest:

143 tickets were issued.
77 boys and girls reported on books read.
600 books were read for which credit was given.

Tours Through Books

By Birdie Vaughan Lambright

Director of Literature Appreciation, Little Rock Public Schools, Arkansas

LAST YEAR, in the early spring, we planned and carried out a scheme for encouraging and recognizing broad and extensive reading. The results were so satisfactory that at the suggestion of our city librarian, Miss Vera Snook, we enlarged the plan and included in its scope books of interest to every child. First, we decided to "go around the world" in books. The children discussed books which they liked and we classified them in regard to their local color, or where it happened. We had an overflowing number of books of our own country, but we decided that boys and girls who go around the world should have an intimate acquaintance

with *Tom Sawyer* or *Little Women*. Most of the children chose the former. Then a book was selected for Alaska and *Kak, the Copper Eskimo* was the one most favored. For Mexico we decided *Lucita* was the most interesting. South America has some charming literature but not so much, of course, as North America. We decided to read *Tales from Silver Lands*. *Dr. Dolittle* was selected for Africa and each child later related his travels in Africa with a twinkle, and a smile. We chose two books for Europe, *Heidi* and *Katrinka*. For Asia, some preferred *Gay Neck*, others, *Shen of the Sea*. This trip around the world, consisting of

only eight books (eight changes of trains or boat) proved so interesting that we decided to enlarge our numbers and we planned many tours. Instead of one book we gave the children the choice of several. For Alaska we had *Kak, the Copper Eskimo*, *Baldy of Nome*, *Eskimo Twins*, *My Life with the Eskimos* and *Polaris*; for other countries we had a correspondingly increasing number. The children were allowed to select the book that made the strongest appeal to them.

To make the trip more real a large picture of a steamboat which was hanging in the Library of our school, bore on its wide walls the names of all who were making the trip. The fact, well known, that the children were thousands of miles apart in their reading, some in Alaska while others were in Africa, did not keep the lively imagination of the children from accepting the picture as it was, all traveling in the boat together. Daily a group of interested youngsters stood near the picture and read their names and the names of others, and found that although they were side by side on the ship they were not even in the same countries in their reading. A large map of all the countries was near and was often consulted. Full recognition was given to each child who completed the tour. The tickets gave the names of books and when books were read the name of the country which it told about was punched.

The children planned the return home by giving a little program in the auditorium. The stage was set as a railroad station and the negro janitor, who was once a porter on a Pullman, called the trains. The weary travelers came tramping in a few at a time dressed as travel worn people should be and carrying suit-cases which bore the marks of much travel in foreign lands. They all arrived during the performance, but not together, as some came from Africa and others from China. Each contributed to the entertainment by telling interesting things about some remote corner of the world where he had been. And though *Tom Sawyer* was a true American and not so very far away, he figured largely and interestingly on the program.

For the summer reading other tours were planned on the same basis, with a wide range of trips suggested in the most approved form. The Mediterranean Tour included books with a setting in France, Italy, Spain, North Africa and other adjoining countries. "Our West with Smoky" not only featured Will James' prize book but other cowboy stories which made a strong appeal to boys.

The tour around the world has been very successfully used in school this winter, and these trips will be offered again this summer.

AROUND THE WORLD
BOOKLAND SPECIAL RAILROAD
1929 EXCURSIONS

GOOD FOR ONE ROUND TRIP
FROM

LITTLE ROCK, ARK., TO ANY OF THE
FOLLOWING COUNTRIES

Rules and Regulations

The Bookland Special will transport you from one country to another in three seconds.

No transfers necessary.

You will be brought home each night to sleep.

Stopovers allowed in each country, if desired.

All passengers must wear a smile.

Baggage checked. No tips allowed.

Books belonging to the Bookland Special must be treated with the utmost care. Neither babies nor puppies should be allowed to touch them.

Passengers may dine when they wish.

No new clothes necessary for these trips.

Quiet should prevail while traveling.

All Bookland Special books must be returned on time. Fines are charged for overdue books.

A World Cruise

By Anne Fox Oliphant

Children's Librarian, Rice Branch, Cleveland Public Library, Ohio

THE WORLD CRUISE at Rice Branch in the summer of 1928 issued passports (lists of travel books of different countries), one for the older and one for the younger children. They read a book a week, reported orally or on paper, and in the fall there was a special celebration for fathers, mothers and friends of all those who had reported on ten books. At this celebration Miss Power described chil-

nationalities in paper costumes and to meet Mrs. Sweet, Pinocchio, and dolls from different countries. Mrs. Sweet was both interesting and entertaining, and Anne Andresovsky read a poem she had written on the World Cruise. Our plans for next year have not reached any definite conclusion yet.

RICE BRANCH WORLD CRUISE PASSPORT 1929
NORTHWARD, SOUTHWARD, EASTWARD, WESTWARD, HO!

And there's no end of voyaging
When once the voice is heard
For the river calls and the road
Calls, and on! the call of a bird!

Outline map colored and filled in as books were read

dren's libraries in France and told of her visit to Captain Macmillan's ship, the *S.S. Bowdoin*, and the American dolls Captain Macmillan was taking to the Eskimo children; Mrs. Dunn of the Art Museum talked of her travels abroad; Miss Pennington spoke of her experience in Burma and told a few stories of elephants; some of the children told of the books they had read and what they would do if they went abroad; and the Honor Reading Certificates were presented.

The next summer, in 1929, there were three kinds of passports: yellow for the older, blue for the middle-sized and green for the first, second and third grades. Outline maps of the world were given to the yellow and blue passport cruisers, while the younger ones had their names on the World Cruise roster and stars were put beside their names as their books were read. The maps were colored as they chose and the titles of books were filled in as they read and gave reviews of the books. There was a suggested itinerary going round the world starting with "See North America First." Displays were made each week of the books of different countries. That autumn the World Cruisers (those who had read ten books during the summer), their fathers, mothers and five friends, were invited to represent different

Traveling By Way of Books

By Eva Leslie

Principal of the Department of Work with Children, Los Angeles Public Library

Sky, be my depth,
Wind, be my width and my height,
World, my heart's span,
Loneliness, wings for my flight

MANY people are unmindful of the fact that the majority of children are unconsciously striving to escape from the benevolent tyranny of their elders, as Christopher Morley has so cleverly brought out in *Thunder on the Left*. Children are not only eager to break through the immediate restrictions of their environment but are impatient to sweep over the confining boundaries of childhood itself and to grasp all of life at once. Fulfillment of this desire is possible only through books. Books are the ideal medium through which they may thrill over records of actual achievement, participate in daring exploits of imaginary heroes, wing through the world of fantasy, or penetrate the sense of loneliness which really underlies their hunger for escape from restraint. In the Los Angeles Public Library we have tried to meet these natural instincts of children by providing an opportunity for vicarious adventure in traveling, through books, and by giving them the privilege of planning their own itineraries, journeying alone or in groups.

Because summer is the season when the majority of people travel, BOOK TOURS were planned as a vacation activity, and inasmuch as all tourists must have passports, all BOOK TRAVELERS were required to use LIBRARY PASSPORTS. These were as nearly as possible counterparts of those officially used by actual travelers. They were printed upon sheets of heavy yellow paper measuring eleven by eight and one-half inches. The sheet was first folded from top to bottom, then refolded from side to side in the form of a booklet. On the outside fold of the passport appeared a line-drawing of a book superimposed upon a map of the western hemisphere, inclosed in a circle, with the words LOS ANGELES PUBLIC LIBRARY—BOOK TOUR. Under the cut appeared the caption,

PASSPORT

UNITED STATES OF AMERICA

(Space for branch name)

SEE THE WORLD THROUGH BOOKS

Inside the second fold or the width of the passport, a detailed description of the traveler was transcribed. One-half of the fold was headed,

UPON COMPLETION OF THE BOOK TOUR
PASSPORT WILL BE PRESENTED TO SIGNEE
and below,

NOTICE

THE TRAVELER SHOULD SIGN BELOW AS
DIRECTED

Here the child's name, school, grade and library address were inscribed. On the opposite fold appeared, "Description of Traveler." Then followed height in feet and inches, color of hair and eyes, and place and date of birth. At the bottom of the fold a space was left for a photograph of the traveler. The library gained interesting and sometimes surprising data from the "place of birth." The children were much impressed by the opportunity to have their pictures attached to the important document. When they had no photograph we suggested that a picture from a magazine be substituted or that they draw one. The effect and likeness were quite as good as the majority of those on official passports.

The first fold or the length of the passport was headed,

IMPORTANT

This passport is valid until———
19——. It is good for travel in all countries, but it is not subject to extension. Lines were ruled upon which the names of books read were entered, the first ten of which were numbered, as only ten books were required. The passport became the property of the traveler upon the completion of his tour. Under the headings "Country," "Route" and "Visa" were listed the country visited, the title of the book chosen, with the children's librarian's signature as a visa. The children were thoroughly impressed because of the realistic manner in which the plan was carried through. One little girl brought her grandmother's passport to the library for comparison with the book passports. Four words new to the children were used in connection with the activity, viz: "valid," "signee," "visa" and "itinerary" and aroused no little comment, everyone using them upon all possible occasions.

Great excitement reigned during the planning of routes and book itineraries. Steamship routes, atlases, Baedekers and all travel guides

obtainable were consulted with much interest. Means of travel were optional, airways being most popular. In our attempt to make everything connected with the activity realistic, no impossibly long flights were permitted. The children entered into the spirit of the idea with unaffected enthusiasm. Through the use of various types of pictorial maps, displayed in the branch children's rooms, the voyagers were able to visualize their trips.

A conscious effort was made to eliminate prosaic book reports by requesting the travelers to tell where they had been, what they had seen, and whom they had met, instead of relating the plot of the story. This afforded the children's librarians a splendid opportunity to emphasize, informally, racial traits and national customs of the peoples visited. One enterprising child made a very attractive scrap-book in which she pasted pictures of racial types she had met during her trip around the world. She called it "Friends I Have Made Through My Book Travels."

Some of the travelers proved to be veritable Cook's tourists and flitted from one country to another with great rapidity, but more chose to stop over in a place for two or three books—while a few remained for ten books. The greatest freedom of choice was given. The informality of this activity was so disarming that the children were off their guard and, as a consequence, were unusually frank in discussing their impressions of the peoples about whom they had read. This frankness was of great value to the children's librarian because it gave her a new approach to their interests. In describing his visit to Japan, one boy expressed great satisfaction over the fact that the Japanese hold one another in such high esteem, particularly approving of the deference little sisters have for their brothers, always addressing them as "Honorable Brother." He emphatically proclaimed his intention of seeing to it that his own little sisters read all of the books about Japan.

For the most part the children were introduced to a country through fiction or folklore; legends, history, and travel were suggested while their enthusiasm was still keenly alive. However, we were guided by the manifest desires of the travelers themselves, thus avoiding any semblance of insistence, the one idea being to extend their reading horizons and to provide them with a background of understanding for their world neighbors. In one branch library the travelers held a party at the end of their vacation, many attending in costume, at which they exchanged their experiences of the summer. It transpired that practically every part of the world had been visited through

books by the various members of the group.

Splendid translations of foreign books, stories with settings in other countries, carefully selected collections of folklore and legends, all tend to impress the children with a sense of kinship with other peoples. Naturally, this should help them to attain the tolerance that is so necessary to universal understanding and is so lacking in the world today. It certainly helps to bridge that tragic gap which too frequently exists between the foreign parent and his American child, because the parent is in a position to give a vivid background for the books read on the "Old Country," while the child becomes conscious of the contribution the "Old Country" has made to America. Some of the children gained a genuine pride in the country from which their parents had emigrated. The passport activity naturally leads to the seeking for further information about the world in general and, as a consequence, develops a sense of proportion toward the world as a whole.

The reactions of the children to this plan were interesting because they developed into group activities that have continued for a surprising length of time. For instance, Passport reading led to the organization of an International Relations Club which still meets at regular intervals in the children's room of a branch library. At first the meetings were extremely informal. Routes of travel were marked and countries were colored on a wall map and pictures, pottery, embroideries, in fact, anything that would contribute to the background of the country were used. Later the meetings became more formal with definite programs planned. Book discussion meetings alternated with talks given by natives of the particular "country of the month." At the end of two years the club is still active, the latest development being cooperation with a dramatic group on the neighboring playground, which provides a program characteristic of the country visited on the days the guest speaker is present. Living as we do on the Pacific Coast, emphasis is laid on our near neighbors, the oriental countries. A marked change in the type of questions the members ask the speaker is observable. Ignorance and prejudice have slowly been replaced by a friendly interest and understanding.

The Passport plan can be successful only when the imagination of the children is stirred. Its strength rests upon its informality, the occasion afforded the children's librarian for a closer personal contact with individual children, and the opportunity to develop group activities, also to follow up with suggestions for more intensive reading along special lines.

THE TREASURE CHEST

"The Treasure Chest" was a camp library at Camp Wasibo, Santa Cruz Mountains, where the San Francisco Camp Fire Girls had their summer camp. The books sent to this camp

were furnished by the San Francisco Public Library, and were selected under the supervision of a member of the staff interested in the Camp Fire Girls movement.

Special Collections for Summer Camps

By Grace N. Davendorf

Schenectady Public Library, N. Y.

AS THE summer vacation season approaches, it is always interesting to the public library worker to note the variety of books which are loaned for vacation periods. To most people the summer vacation is a time for relaxation, and there comes the desire to do something different, entirely and absolutely different, from the daily routine to which one has been accustomed during the year. But in spite of the fact that books and reading are very much a part of our everyday life, when the vacation time comes there is scarcely a person who will pack his trunk for a season of camping, a few weeks at a summer resort, or even an extended trip of sightseeing, without stowing away in his baggage a book or two. Perhaps the books may be placed in the very bottom of the trunk, to be read at some far distant rainy day, but, nevertheless, the desire for the companionship of books is so vital that scarcely a person will go on even a short holiday without taking at least one or two books along.

To many people this vacation period means an opportunity to "catch up" at least a little in the reading of numerous books which they have heard about or seen during the year just past, but have not found the time to read. To some people the lightest and most frivolous kind of fiction means relaxation and delight, while to many others who have had little time for serious reading during the winter months, the classics, history, travel, biography, literature or science, mean a real recreation and pleasure. The public library exists to serve not only these two types of vacationists, but all other readers as well.

Some libraries loan books at vacation time for a certain period of time, usually longer than the regular custom. The Schenectady Public Library loans books for vacation use for a period of four weeks, with the privilege of another four weeks' renewal. This is of distinct advantage to the people who are to be in camp, or on trips, for a number of weeks at a time and who could not easily have access to a library for their reading material. The public library does not in any way attempt to advise its patrons what to read, or to give courses in reading, as the library is in no sense a school, but the true librarian is always ready and willing to give helpful suggestions on any particular subject that a person desires. The books are on the shelves and each person may do his or her own choosing. The book lists which the

Schenectady Public Library has printed are of real assistance to the person choosing books for the summer vacation.

This library has, for several years past, made a practice of sending cases of books to the summer camps of the various organizations of its locality. Some of the camps to which books are sent are: Boy Scouts, Girl Scouts, Young Men's Christian Association, Young Women's Christian Association, Red Cross, Children's Home and the General Electric Women's Camp at Lake George. While a few of these organizations have sent suggested lists of the books they desired for their summer camps, it has generally been the practice of most of them to allow the library to select the books. It really seems the wisest plan to allow the library assistants to make the choice, with perhaps some suggestions from the leaders of the organizations who have the camp work in charge, for the librarian knows not only the resources of the library, but also the types of books which are best suited and will appeal most strongly to the different groups of young people who will be at these summer camps.

Approximately fifty books have been sent to each camp, with the privilege of keeping them for the entire summer season. If other books have been desired after the case has been sent, those books have also been sent on to the camp requesting them. As many of the camps are especially for young people, books are chosen which will be of the most benefit, instruction and interest to the youthful mind. Among some of the non-fiction books which have proved very popular at nearly all of the camps, are the books on wild flowers, trees, birds and any other natural history works which are not too technical. At the Scout camps the various scout books are always in demand, as well as any books on outdoor sports and games, such as hiking, swimming, tennis, canoeing, yachting, sportsmanship, etc. The aviation books, too, have been proving very popular in these camps. Of course no collection of books for summer reading would be complete without fiction, and in selecting this the widest possible choice is given to suit the many and varied tastes of the different readers.

The library has had strong wooden cases constructed especially for the purpose of sending books to the various summer camps. Each case holds approximately fifty books and is provided with a lock and key. A typewritten list

Here comes the Library! General Electric Women's Camp on Lake George

of the books sent is fastened to the inside cover of the case and a duplicate list is kept at the library. This secures a check on the books for both the camp director and the library. For the benefit of other libraries, it might be well to state that very few books have ever been lost and the books are nearly always returned in good condition.

Letters, as well as personal expressions of appreciation for the books loaned, have been received each year from the various camp directors and leaders of the organizations sponsoring the camps. When the practice was first instituted books were loaned to a very few camps, but each year new ones have sent in requests for books so that now there are eight or nine camps to which these so-called "traveling libraries" are sent. Last year, for the first time, the General Electric Women's Camp sent in a request for books, to be sent to their camp at French Point, Lake George. Thus, each year some new camp is added to the list of those who have already from year to year taken advantage of the resources of the library.

In sending books to various camps we feel

there is a real service. It not only brings the young people in touch with good books during the summer season, but often helps them in the forming of ideals and life habits, for the companionship of good books is much like the companionship of good friends. Then, too, it brings them in touch with the public library itself, through its books and this may open up to the minds of the young people as never before the value and use to be derived from the library and its vast store of intellectual resources. Of course these summer camps are usually situated too far from a town or city for the young people to go to a library for reading, and so why not have the books go directly from the library to them?

After all, it seems as if the real motto of a public library should be "Service to All," and what can be a better way of serving than to supply good, wholesome reading material, free of cost, to these young campers who will enjoy the companionship of good books not only on rainy days, but on the sunshiny days as well, and who knows how far-reaching the influence of a good book may be!

The Organization and Administration of Libraries in Practice Schools

By Elsie Howard Pine

Assistant Professor of Library Science, State Teachers College, Emporia, Kansas

IN *Books as Windows* May Lamberton Becker tells of a German professor who declared that if his countrymen should be confronted with two doors, one inscribed "This way to heaven" and the other "This way to a lecture about heaven," the crowd to a man would surge through the second entrance. She also tells of a boy who approached the reference librarian in search of books to be used in the preparation of his daily theme. This proved upon investigation to be, "What I Saw on My Way to School This Morning." Since last September I have been upon a more or less diligent search for information to be found in books and periodicals upon the subject of "The Organization and Administration of Libraries in Practice Schools." Not only have I spent much of my own time in the search, but have engaged the interest and enlisted the services of other members of the library staff and of the students in the library science classes. Perhaps Mrs. Becker's two stories "had perched in the rafters of my mind and flapped a warning at me," for when I began the actual writing of the paper it came to me with great forcefulness that my chief *raison d'être* in the Kansas State Teachers College of Emporia during the past eight years has been for the organization and administration of a library in a practice school, and I had been pursuing a course not unlike the boy who was searching in a book to find what he saw on his way to school. Emerson held that we feed our wits to entertain them. And so we hide behind the doubtful authority of quotations and the shibboleths of questionable statistics instead of telling honestly and faithfully what we have learned through experience. Like Kipling's poor man Tomlinson

"This I have read in a book," we say, "and that was told to me

And this I have thought that another man thought of a Prince in Muscovy."

Remembering the cruel fate of that gentleman, I am determined to forego the things I have heard and seen and thought, and to confine this paper to what we "ha' done."

Libraries in practice schools, like the teachers and pupils of those schools, are in most essentials the same as in any other schools. It is only in a few particulars that their function is peculiar and their services unique.

Elementary School Libraries

Since the high school library is my particular interest and my terminal facilities on that line weak, we shall consider the elementary school library first. Some interesting facts upon this type of library were obtained as incidental information from a questionnaire upon Student Help sent by Mr. C. P. Baber to representative State Teachers Colleges in all parts of the country. Of the thirty-one replies received only sixteen reported provision for book service to the practice schools which would even approximate the standards suggested in the A. L. A. pamphlet of 1925 on the planning of the school library. We shall check the conditions existing in these sixteen schools against the standards.

Location

"What should be the location of the school library?" "Near to or adjoining the study hall and in a part of the building that is quiet and easily accessible." Five of these schools, including our own, house the collection in the college library building. So far as one is able to interpret the statistics, all of the five make provision for study hall or classroom collections to be sent to the training school. The disadvantages of this plan of housing seem to many of us who have observed its operation over a period of years to outweigh its advantages. In the first place the atmosphere of a college library is not one friendly to children. Even before they enter the building they often meet a rebuff in a door so heavy that it will scarcely yield to little bodies, or a knob or latch so high and fast that it is hardly turned by chubby hands. If the library is to function as the heart of the school it must be in the body of the school. The librarian whose headquarters are half-way across the campus from the school cannot keep her finger upon its pulse. She will always be in some measure a stranger and an outsider both to teachers and pupils.

The advantages of the location of the school library in the main building are the increased number of hours which are afforded to supervising teachers and practice students for the use of the collection; the closer connection with the library as a department and the consequent improvement in technical processes; and the advantage to the school librarian in association with persons of her own kind. The director of

libraries appreciates the unity and solidarity which it gives to his staff. The location of the practice library in the college library building acquaints the student with a school library from the first day of his enrollment straight through the two or four years of his training as against the semester or year of his practice teaching when the library is situated in the training school. He has become so much accustomed to the school library that when he goes out to the towns and villages to teach he will look upon it as a necessity hard to forego.

Seven schools in the survey reported quarters for the elementary school library in the training school building. Detroit Teachers College furnishes an example of a complete separation of the school libraries from the main library. Quoting their answer, "Practice schools have their own libraries and librarians." Columbia Teachers College and the University of Chicago are other examples of this form of administration. From a somewhat limited knowledge of the functioning of the libraries in these schools one would conclude that the plan tends to magnify the value of the library as a teaching agency and to enhance its usefulness to the children of the practice schools.

Other methods of administration in vogue are the room deposits or classroom collections; a combination of the elementary school libraries with the junior and senior high school libraries; and a model library in the education building. It will be seen that the burden of practice, as well as the weight of authority, rests with the location of the elementary school library in the training school rather than in the college library.

Space, Shelving, and Equipment

No data are available as to actual situations upon these points. The standard specifications are well known to this group. As a matter of policy, if not of necessity, it is well to keep the equipment down to essentials in order that the student-teacher may see that the school library does not need to be an expensive luxury.

Hours

The hours of service per week in these libraries ranged from fifteen hours per week to seventy-seven and a half in winter and eighty-five and a half in summer. Libraries located in the main library building averaged more hours per week than those in practice schools. We have no way of interpreting these figures to show whether they indicate an increase in service or merely a loss in time.

Books

No ideal number of books is named in the standards. Teachers College at Greeley, Col.,

reports 5,500 volumes. Kansas State Teachers College of Emporia has 5,000. This represents six to eight times as many books as will be found in the school in which the student-teacher is preparing to teach. A course in Children's Literature, which will serve as a guide to the best in the collection, is of the greatest possible value. This is especially helpful for the student who comes from elementary and high schools which have not given him library opportunities.

The Librarian

At the present stage of school library development that which is possible is so foreign to that which is ideal or even desirable that it seems unnecessary to elaborate upon it. The Board of Education for Librarianship has said that if the entire output of the library schools were thrown into school libraries alone, it would supply only seven per cent of the need. The writer knows one State in which one would be hard-put to place seven trained librarians in school libraries in one year, to say nothing of seven per cent of the library school graduates. The *need* exists, it is true, but the *demand* is another story. Even libraries in practice schools which serve as examples of good library policy, are seldom fortunate enough to have a full-time librarian in charge, who has had training and experience in both teaching and librarianship. College presidents and directors of libraries, who of all people should know better, are prone to regard the school libraries as a part of the administration which can be attended to at odd moments by a staff member whose time is already crowded, much as a housewife disposes of her fancy-work. The school principal or superintendent who does not entertain that notion is as rare as the dodo. It is the privilege of the librarian in the practice school to change all that. The change will not come as speedily as persons upon central committees think that it should, but it will come. The supervising teachers, not slow to see the help which an efficient librarian and a well-organized library is to them, pass the idea on to the practice teachers, who in turn carry it into the towns and villages, and the time will come when the school librarian and the library will be considered as necessary a part of the school organization and equipment as the playground supervisor and the slippery slide.

Service

But, you are asking, what of the library and its relation to the pupils of the practice schools? I once heard Hendrik Van Loon refer to these children as the little "observed of all observers." Up to this point in the paper their library

seems to hold a similar position. It is now time to consider it from the standpoint of the children. To them all the things which we have written are unimportant, even unknown. The library is simply their first aid and last resort. It is not a problem, but a place to go to find out about anything which a boy or girl would know—"shoes, ships, sealing-wax, cabbages, and kings." The boys in the stamp club learn the history, identity and value of the stamps in their collections, the little girls in sewing discover that the thimble was originally worn on the thumb, and was called a thumb-bell; the book club find that the *Trumpeter of Krakow* is a thriller; the nature study group read of the "cat who walks in the wet woods waving his wild tail" and of all the other "strange tenants of plants and trees." The meaning of Armistice Day is discovered and the implications of the peace and good-will proclaimed by the Christmas carols become something real and concrete. In short, these daughters of Eve and sons of Adam find themselves at home in their world through books suited to their reading ability and upon the level of their interests—books which inspire and direct constructive thinking; bring to them both detailed study of sections, industries and interests of various kinds, and passing glimpses of them; and which acquaint them with life and labor in the various parts of the world. In other books they find close friends, some not unlike the ones they know in real life, others who have strange adventures, some who lived in other lands and other ages and others who never have existed at all except in the realms of the imagination.¹

Not many weeks ago it was my good fortune to hear Bertrand Russell and Will Durant debate the question, "Is modern education a failure?" Russell's brilliant arraignment of the modern system began with a definition and limitation of the terms *education* and *schools*. For the purposes of the debate education was defined as "that which is done to young people in schools" and the term *schools* was limited to elementary schools. Mr. Russell said that Aristotle's definition of a man who naturally loves knowledge was explained by the fact that Aristotle lived in the days before there was education, and asserted that not one per cent of young people leaving school today love knowledge for its own sake. As a reason for this situation he gave the method of teaching in the modern school which, he thinks, leaves the pupil with the impression that there are only two kinds of knowledge, that which the teacher wishes him to possess, which is always dull, and the kind which he wishes to possess, which is always wicked. The first sort is not

wanted because it is dull, and the other sort is not wanted because it seems to get you into trouble. One was in grave danger of being convinced that education is a failure by the sheer brilliance of Mr. Russell's dialectic. But as he spoke there came to my mind a familiar picture of a roomful of busy, happy, eager children, bent upon finding the very knowledge which they wished to possess without fear of getting into trouble and I thought that Mr. Russell might see in any going school library some of the means of the fostering of the intelligence, self-reliance and cooperation which he believes are the true objectives of education.

The High School Library

The twelve high school libraries reported in Mr. Baber's survey were all housed in the training schools. So far as I was able to interpret the data, all of them combined the collections for the junior and senior high schools.

Standards

Few of us have attained in practice, or conceived in imagination, a set of standards which surpasses the C. C. Certain Report. It contains everything that is essential, and is at the same time upon the level of reasonable accomplishment.

Book Selection

Much that I shall say under this head will be rejected as what a scientific friend of mine scorns as p.o. (personal opinion). In the first place, although I subscribe to a book-of-the-month plan of reading, contribute to, and even compile "basic" and "approved" lists of books, I do not believe in them. Though I submit to the number of calories I must eat at a meal, and to the proportion of vitamins *A*, *B*, *C* and *D* which that meal must contain; the temperature at which I must keep my house; and the number of inches my skirts must clear the floor; though I accept a standard for the height of my kitchen sink, the length of my sheets and the width of my bed, I keep at my bed's head, the books clad in black or red, which I choose. Experience leads me to believe that a librarian should have something of the same freedom in selecting the collection for the school library. She knows her clientèle and should know books, and it is her business to make the two agree. It is well enough to be guided by the *Standard Catalog for High School Libraries* or any other standard lists, but deadly to be driven by them! Do the children of University High in Chicago have the same needs as the children of the Dutch Mennonites in Hillsboro, Kansas? I doubt it. Authors must live, it is true, but there are many times when the book-lister rings the bell that "I will not stir,

¹ Green. *Reading for Fun*. Badger, c 1925.

though the meeting-house burn down." We do not need everything, even of that which is best. It is a negative blessing, perhaps, but the fact that I grew up with a limited number of books has enabled me to extract a vast amount of information from the dictionary and to find much beauty and wisdom which relates practically and directly to everyday affairs in Shakespeare and the King James version of the *Bible*.

Truth may be relative, but the quest for it is eternal. Just now it is the fashion to seek for it by means of the test-tube, the telescope, the microscope, the dissecting knife, the x-ray, the crucible, the stethoscope, the retort and blowpipe, the guinea-pig, the intelligence test and the questionnaire. We are learning not to speak of the mind as the seat of intelligence,

the soul as the center of the moral nature, and a state of consciousness as "one of the fundamental phenomena of at least animal life" because, forsooth, there is none such. Nevertheless, all undismayed, we garner the beauty, the wisdom, the rejoicing, the suffering, the achievements and the failures of the ages within the four walls of our library, and, strange to relate, "functioning organisms" conditioned to such an environment manifest reactions in their ductless glands and forms of behavior are built into the pattern of their nervous systems which result in "types of individuals" which are not unlike those whom we have ignorantly supposed were personalities whose consciousness was awakened, their minds inspired, their spirits freed, and their souls saved through the guidance of wise teachers and great books.

Taking Stock in the Library Business

By Arthur E. Bostwick

Librarian, St. Louis Public Library, Mo.

THE AMERICAN PUBLIC LIBRARY has now been offering the kind of service peculiar to it for about half a century. I believe that few of us realize how peculiar this service is, and how unusual it is for libraries to offer it. Every civilized country, of course, has its libraries. They resemble each other in owning and preserving collections of books, but in other respects they often differ widely. For the first time in history there is now an international library organization. It held its first meeting in Rome last summer and is to meet again in Stockholm next year. To these meetings all the world's national library associations send delegates. It was my privilege to serve as one of the American delegates to the first meeting. One difficult question that came up was, What organizations are competent to send delegates? That question does not arise with us, for although we have more than one national body of librarians, everyone agrees that the American Library Association is our generally representative body. But in some countries there are more than one such body. The older, and so-called, scholarly libraries may have one and the newer, more popular bodies, corresponding roughly with the popular sections of our public libraries, may have another. In most of the Latin countries, where the library as an agent of popular education is almost wholly unknown, the question does not arise, any more than it does here, for the only recognized li-

braries are the scholarly ones. It is in the Teutonic countries, including the British, that it comes up especially, and in those countries it has been answered by giving the right of representation to the older bodies. Even here, where the library is everywhere recognized as an instrument of popular education, only two of the fourteen official delegates were public librarians.

It so comes about that the international body representing the library profession has come to represent almost entirely the scholarly part of it, which practically means that part interested in gathering and preserving old books and manuscripts, especially those in the "humanities"—those subjects that interested scholars before the advent of the "modern" world; and in facilitating the study of these by students. Of course, the thousands of industrial and scientific subjects that interest the modern world have little place in such a library, and the same may be said of modern educational subjects, of simplifications for the inexperienced reader and of the whole body of juvenile literature.

I had the pleasure of a call, when in Rome, on one of the foremost medieval scholars in the Roman church—Cardinal Ehrle, who is engaged in studies for a comprehensive history of medieval philosophy. He told me that for his purposes the valuable part of a library consisted solely of its manuscripts. The work of the medieval philosophers was rarely printed, and then not the best of it. There are 100,000

manuscripts in the Bibliothèque Nationale at Paris, 70,000 in Vatican library and so on. The printed books might all be destroyed for any effect that they would have on his work. Not one of our thousands of libraries in the United States would be of the slightest use to him.

We need not depreciate the great value of studies such as this, nor the necessity of great collections of source material to support them. But when we realize that the great body of foreign librarians are of this type, that they have never heard of the kind of library work that we are doing in this country and having heard of it are not in the slightest degree interested in it, it is time, I think, to consider soberly whether, after all, what we are doing is important, and, if so, what we can do to secure its recognition throughout the world as important.

We have been busy in securing such recognition in our own country, and our success has been noteworthy. That it has not been universal is shown by vast stretches of country where the public library is feebly recognized or nowhere present. The furtherance of our work in our country, as well as its recognition and imitation abroad, both invite the kind of stock-taking that I have just suggested. In the first place, then, what have we been trying to do, and, in the second place, how far, if at all, have we succeeded?

The first question is complicated by the fact that we have not all been trying to do the same thing, owing to the other fact that we have been—and, to some extent, still are—in different stages of progress from the old to the new library idea. Stated somewhat baldly, the oldest idea was simply that of the preservation of valuable records. The newest is that of the cultivation and maintenance of a standard of popular intelligence—in other words, a purely educational goal, including in education what is usually termed recreation. The steps from the earliest to the latest of these ideas are many, but we may easily recognize certain well-marked stages. In general, there has been change from a stress laid on the mere preservation of material, to that laid on its use, both in quantity and quality.

Preservation was naturally stressed in the period where duplication was difficult and unusual, being effected wholly by hand work. It must still be stressed in the case of all such material as is unique, or nearly so—old, out-of-print books and original manuscripts. In the case of material intended for wide popular use, use, rather than preservation, must be the object. Such material we may compare to carbon in the form of coal, where use necessarily

implies destruction. The earlier, unique material, on the other hand, is like carbon in the form of the diamond where use implies preservation, and destruction is to be avoided at all hazards. A stock of this material is of the nature of permanent plant, while the other rather resembles annual supplies, such as fuel, stationery, illuminants, etc. These we expect to be destroyed and renewed, as an incident of their proper use.

In a large, modern library both kinds of material are to be found, of course. In a small one there is little of the former, although it is rarely absent.

The stages of recent library progress have all been movements toward making the second kind of material and its use more effective. To this end the arrangement of library buildings and methods of book-storage have been changed. Library service and its distributive units have been spread over the whole community; instead of being concentrated in one spot. There has been cooperation with other educative effort—especially with the schools. Special attention has been given to children. The books have been made accessible to all, involving radical changes in library construction and arrangement; and users have been allowed and encouraged to take them home for use there. In fact, these two last things—the open shelf and home use, may be termed the cornerstones of the American public library.

I think, however, that we can say broadly that the public libraries of America, loyally supported, and in many cases urged on by their constituencies, have been all working toward greater use of books by our people in general, and to this end have not only urged them to become readers, but have successfully presented the claims of the library to the financial support of the public. Under these circumstances it would seem unnecessary to inquire whether what the library has been doing is worthwhile. That proposition may be opposed just as we hear it sometimes asserted that education in general, or religion, or family life as we know it, is not worth while and should be superseded by something else. All these things are being slowly modified in the course of time, but few of us question the desirability of their continuance, and the public library has gone far toward establishing itself on the same plane.

Possibly we may enumerate as follows the principal things to be found in the American Public Library, introduced within the past half century and not generally found in libraries elsewhere:

1. The open shelf.
2. Home use of books.
3. Treatment of replaceable material as temporary.

4. Regarding the reader as well as the book as a library unit.
5. Keeping books in physical condition for hard usage.
6. Expansion of service, intensive and extensive.
7. Community use of branch buildings for various purposes.
8. Modernization of catalogs, lists and printed bulletins.
9. The cutting of red tape; increase of accessibility.
10. Service to groups.
11. Purchase of books with reference to community wants and needs, without undue delay.
12. Well-considered publicity.
13. Special aid to business and industry.
14. Special training for workers.
15. Their organization for mutual information and aid.
16. Adult education: the "Readers' Adviser."
17. Operation and support as a public body.

I am sure that this does not cover the ground by any means, but it may be enough for our present purposes.

If there is any one thing that runs through this list it is freedom—the absence of hampering restriction. It should be noted that there have been of late signs of a reaction against all kinds of freedom in this country. Freedom implies some degree of intelligence; it always involves waste. It cannot be granted before an age when reasonable choice is possible. And all through life there is always some one who feels that he is divinely appointed to instruct and restrain, and that progress with these limitations would go further and in a better direction than otherwise. Hence we have objectors to the elective subjects in colleges, because students choose wildly or for improper motives; hence, even when in the library there is foolish reading, it shows, say some, the necessity for restraint and guidance. While not denying a modicum of reason in such ideas, I believe that on the whole they are mistaken. Progress everywhere in nature is accompanied by waste—or what appears to our limited intelligence as waste. A fish produces millions of eggs; a plant hundreds of seeds, that a very few may come to maturity. Every great inventor could show a thousand impractical ideas to the one fruitful one that has benefited the world. Burbank selected what he wanted from a thousand variant plants, and then burned up the rest. You may call this waste, if you will; but it is nature's way of going ahead. Let us keep our freedom of variation, for it is only amid a thousand maladjustments and failures that the perfect specimen comes to light.

If we consider where we should stand at this moment without any of these seventeen things, all of which have been introduced in the past half-century, we must conclude, I think, that without them the library as we know it would be non-existent. This is pre-

cisely where the Latin countries of Europe and, to a lesser extent, many of the others stand today.

One class of countries deserves special attention. It is composed of those now living under dictatorships, actual or virtual—a curious product of a war supposed to "make the world safe for democracy." The chief countries in this class are Russia, a Slavic nation, and two Latin countries, Italy and Spain. Russia has gone wholesale into the library business, avowedly taking the United States as her model. Operating from a center with despotic power, she has been able to do what we have not yet accomplished—cover her territory with small public libraries—a sort of nation-wide "county library system." These libraries, however, though their technique is American, are as different as possible from ours in purpose, being propagandist pure and simple. The black-list issued as a guide to purchase contains everything that approves or even acknowledges the existence of a capitalistic system. The same thing, I understand, is done in the elementary schools, so that one may now grow to young manhood in Russia without knowing that there is any economic system in the world but Communism. In the universities there is more latitude, both in books and in instruction. Propaganda of this kind often defeats itself, of course, but one cannot recommend it for this reason.

The Latin dictatorships of Italy and Spain do not have to be so careful, of course, owing to the relative absence of popular libraries, but it is doubtful whether the distribution of anything calculated to throw doubt on the goodness or ability of the dictator would be tolerated, as is shown by the total suppression, for instance, of all the opposition press in Italy and, in fact, by the content of the small popular book-collections now springing up in that country.

In this country, despite our professions, our skirts are not altogether clean in this matter. There are certain subjects in which instruction in our schools and colleges is still one-sided. By this I do not mean that the other side is openly opposed; it is rather ignored—a plan at once more effective and more objectionable. Examples of such subjects are American history, certain parts of economics and some phases of religious controversy.

It is the boast of our libraries, justified, I believe, by the facts, that they are freer from one-sidedness than any other institution in the world. With almost no exceptions, one may go to a large public library and find books on any side of any controverted question. We are trying to furnish information; and information about the ideas and theories of men

is as important as any that we can give. We are properly leaving it to others to say whether or no these ideas are correct. In other words, the public library is not taking sides. Not that efforts have not been made, and are still being made, to prevail upon it or compel it to do so. Some States have made it illegal to give information in State-supported schools about what most scientific men believe regarding the development of life on the earth. Whether this information is excluded from publicly-supported libraries, I do not know. I think not; but this may be the next step; and it would definitely align the libraries of these States with those of Russia.

During the late war some well-meaning patriots attempted to have books in the German language removed from public libraries. My reply to a committee that made this request of me was that we had been twice at war with England, but that I knew of no attempt at either time to remove books in the English language from libraries. Violent partisans of one thing or another occasionally object to the inclusion of books that oppose their ideas. But despite such episodes as these, I believe we may still claim for the American public library that it is, on the whole, more nearly non-partisan than any other institution on the planet. In so being it is in accord with the Anglo-Saxon theory of justice, which gives both sides a chance to be heard and then decides. Our libraries thus place the reader in a judicial position.

The most remarkable thing about the public library movement in the United States has been the almost complete absence of allusion to it in contemporary literature. I often select from the truck-load of new books that come to my desk almost daily a dozen or two that I know ought to mention the public library and its work. They are practically unanimous in saying nothing about it, although in some cases this seems like a difficult feat. I often have difficulty in realizing that some ill-disposed censor has not blue-penciled all allusion to our work before the books have been put into print!

What can be the reason for this curious neglect? It certainly does not reflect popular feeling. The average American objects in no way to the incomes that we receive from the public funds. He expects to find a public library in any town that he visits, just as he expects to find a school and a church. He complains if it is not properly run or adequately supported. None of this feeling is reflected in our literature, although it is full of the church and the school. These institutions, however, did not obtain notice by asking for it, or by obtruding

themselves in any way; and we may be sure that the way for the public library to be recognized in our literature is not to ask or to labor for recognition, at least by any direct method.

I am familiar with one explanation that will be offered for this lack of recognition. It is that libraries do not advertise enough, or do not do it well enough. I would be the last to depreciate the value of publicity; but it is not a cure for all economic ailments. It is a curious thing that we are depending for our estimates of the efficacy of all sorts of things upon the advice of those whose business it is to purvey those things and whose interest is to prove how valuable they are. Thus we let the doctors tell us of the value of medical science; the lawyers assure us that without their aid we should suffer untold evils; the clergy insist that we depend on their expositions of the Gospel; and the bakers tell us that if we would only eat more bread we should all be healthier. They may all be right, of course. But ought we not to know how the consumers of all these products feel about it? Unfortunately they are all too modest, or lack sufficient organization, to make themselves heard. We should be a little skeptical, I think, about the claims of the ad-men. There is one thing that they never tell us—the fact that goods of the very highest class are never advertised at all—they do not need to be. They are necessarily few in number, and those who know them and can pay for them buy them all. Publicity would be superfluous. Publicity is for the mass-produced articles, the quantity of which is unlimited. It often, in fact, runs even beyond the demand, and intensive publicity is then necessary to take up the slack.

Now the mass-produced articles in the library are chiefly works of fiction. They come out in editions of hundreds of thousands where books, we will say, on quaternions, or quantum-theory, or the economic doctrines of Malthus sell only by hundreds. We can easily run up our fiction circulation—any of us—from the present 50 or 60 per cent up to 90, whereas we could not budge the others. We have no desire to do so. My point is that intensive publicity would be most effective where we do not care for the effect. I have great faith in publicity for certain things, and I try to use it intelligently. But I doubt whether it will help us much here. All that we can do is to go about our business, increasing the quantity and improving the quality of our service, trusting that ultimately it will so impress itself on the community that it will be recognized in what the community writes as well as in what it thinks and does.

Have we any right, however, to complain of lack of recognition abroad when we do not have it completely here at home? And is there any more reason why we should try to force such recognition from foreigners than from our own citizens?

I think we must conclude that there, as well as here, we must trust to the success of the work itself to compel recognition. We must lend our aid to introduce it where it is absent and to strengthen it where it has been begun. Especially in the new international organization, we should lend our influence to bring about the recognition of associations representing the newer and more popular kind of library work, and in sending delegates to represent our own libraries we should see to it that the public library should have adequate recognition.

I have said that no one has arisen to object to the large amounts of money spent on public libraries in our cities. It would, however, be interesting to know just how far this lack of opposition is due to ignorance. I find in my own city a very large amount of misinformation on the topic of the source of our income. Many think that the library is heavily endowed, Andrew Carnegie being generally given the credit. "Carnegie endowments" is a term widely used in connection with the Carnegie benefactions, which, of course, were not endowments at all, but outright gifts to be expended only for buildings and equipment. They were, it is true, given on condition that the recipient town should bind itself to support the library by an annual appropriation equal to a specified percentage of the gift, generally 10 per cent. Comparatively few towns have defaulted, and no attempt has been made, either by the Carnegie Corporation or the libraries concerned, to hold those to their agreement. It is very doubtful whether it could be legally enforced. But many persons still believe that Mr. Carnegie insisted on exercising some kind of control over the libraries, especially in the selection of books, and his offers were refused in several instances on this ground at a popular election, the most conspicuous instances being Albany, N. Y., and Richmond, Va.

It is interesting to note that the popular library movement has been most successful in America and Britain, which have been precisely the countries that have enjoyed the Carnegie gifts. Were the gifts a stimulant to the progress or merely an incident of it? I am inclined to think that there was a mutual influence. I should like to see what would happen in France or Italy if a Latin Carnegie should make a similar offer. The fact that none is made perhaps answers my question.

In this country, service rendered by libraries to Carnegie in his boyhood suggested his later course to him. There must be some initial service of this kind in France or Italy before similar gifts can be made there. And the stimulation must be even more powerful, because gifts of this kind are not usual in the Latin countries, so that the flow, even if stimulated, must take place, as it were, uphill instead of downhill, as in the United States.

Let me hark back to the International Conference of June last for a moment. The delegates were assembled in their final session in one of the magnificent halls in the Palace of the Doges, in Venice. An American librarian, long at the head of an international library in Rome, said to me: "Come, I will show you something that may interest you." He led me downstairs to a corner of the great interior court, one of the world's triumphs of architecture, and there, in a cloistered nook, was a complete children's library—books, children and all—in charge of an intelligent and devoted woman librarian. Here was the germ of a service that may be of more value to Italy than all the thousands of ancient tomes and manuscripts in her great libraries. The great scholarly conference above, however, knew it not; there was no recognition of it as library work of any kind. I should not have known that it was there had not my attention been called to it.

It is by encouraging such beginnings as this, and by aiding them with the knowledge that we have gained here in the past fifty years, that we shall ultimately force from the great librarians of Europe the acknowledgment that the achievement of popular education is a worthy aim for the library.

Let me close with a quotation from a noteworthy woman, Catherine the Great of Russia, which I take from Gamaliel Bradford's interesting article on that famous ruler in a recent *Yale Review*:

"In an affair so great as that we have been speaking of, you must be profoundly penetrated with your object; you must will it passionately; you must then communicate your passion to others and act accordingly, without hesitating when your decision is once made, and you must preserve supreme calm in the midst of all agitation, never appearing disturbed or anxious about anything that may occur."

I am quoting this because it seems remarkable that we who are engaged in such a popular movement as that for free libraries should be able to derive counsel and aid from such a source as Catherine the Great—the very impersonation of absolutism.

THE LIBRARY JOURNAL

April 15, 1930

Editorial Forum

BOOKS are the ideal medium by means of which children may break through the immediate restrictions of their environment, sweep over the confining boundaries of childhood itself, and participate in daring exploits of imaginary heroes. Because summer is the season when the majority of people travel, public libraries are trying to meet the natural instincts of children by providing an opportunity for vicarious adventure in traveling through books as will be seen from the variety of book tours, traveling around the world, and world cruises described in this number. These schemes for vacation reading, however, can be successful only when the imagination of the children is stirred and they are able to reach out into the limitless realms of the imagination and find a kinship with the children of the countries they read about.

IT is the youngsters, to be sure, who have real vacations of months, for the elders have often to be content at best with their fortnight or month. But in that time, which should be spent for the most part out of doors or in travel, there is still time for reading and many will be glad to fill some hours at least with interesting and profitable books. Such time can be well spent in purposeful as well as recreational reading. Librarians will do well to keep track of the vacations of their grown-up clientèle, learn as much as possible of the tastes and desires of each and then place before their readers that one of the A. L. A. series of books with a purpose which will most likely tempt them to develop an avocation alongside the routine of their vocation. Thus a vacation may be well filled and not merely counted as idle or lost time, as the careless use of such opportunities may mean.

COPYRIGHT is again at the fore, and it is gratifying to note that the obstacle to the endorsement of the pending copyright bill by

the A. L. A. has been removed through the acceptance by the publishers committee of the library point of view. In connection with the recent copyright hearing in Washington, Carl Cannon, as chairman of the A. L. A. committee, obtained from the representatives of the book publishers the concession of accepting the continuance of the present arrangement under which public libraries may import one copy in any one invoice of an English edition of a copyright book without formalities. There is to be a definition of public libraries as non-profit institutions, which will include college and reference libraries but exclude book clubs and other commercial institutions. The arrangement was made on both sides, subject to the approval of the respective associations, but it is to be hoped that the Executive Board will find no obstacle to the whole-hearted support of the pending copyright bill which the American Library Association has always desired to give but which had come to an impasse despite previous endeavors at satisfactory compromise.

SYMPATHY is universal and is naturally emphasized in our libraries for the unfortunate limitations of sight which prevent reading either with a purpose or just for relief from visual "shut-in" restriction. The blind are apt to make the best of it for, curiously, blindness seems to suggest cheerfulness in accepting the hard situation, while deafness has the opposite effect, though the deaf should be able to enjoy all the more the opportunities of reading even if they are not like Edison, thankful for the freedom from interruption by noise and surplus conversation. There have been iridescent dreams of mechanisms which would interpret the printed page to the blind, but most of the proposals give little basis for hope, and the raised letters, preferably in Braille, offer the one means of relief. Naturally, therefore, there is wide disposition to favor, despite present tendencies toward government economy, liberal appropriations by the Congress for books for the blind and it is expected that the bill fostered by Dr. Robert B. Irwin, executive director of the American Foundation for the Blind, will have a favorable report from the Committee on the Library and obtain favorable action from the Congress. Under the proposed bill as amended the Library of Congress will have added to its many functions that of providing for the printing and local distribution of such books to the extent of \$100,000 a year, and there will be little criticism of this useful exhibition of national generosity.

Librarian Authors

FREDERICK C. HICKS, Professor of Law and Law Librarian at Yale University Law School, New Haven, Conn., was born at Auburn, N. Y. He received his degree of Ph.B. from Colgate University in 1898, LL.B. from Georgetown in 1901, A.M. from Brown in 1907, Litt.D. from Colgate in 1922 and A.M. (hon.) from Yale in 1928. As an undergraduate at Colgate he was Editor of the college paper and won several essay prizes. From 1898 to 1904 he was in the Map Division of the Library of Congress, during which period he edited *Selected Official Documents of South African Republic and Great Britain* in 1900, wrote *The Biography of Thomas Hutchins* and reprints of his *Topographical Description of Virginia* (1778) in 1904, and newspaper articles, one of which, entitled "Thirty Years Ago," was reprinted in *Essays Offered to Herbert Putnam*. From 1905 to 1908 he was Librarian of the United States Naval War College and in 1908 wrote *The Equality of States and the Hague Conference*. From 1908 to 1909 he was Assistant Librarian in the Brooklyn Public Library and editorial writer for Elizabeth, N. J., *Daily Journal* from 1909-1910. During this time he also wrote feature stories for New York papers. In 1910 he became Superintendent of Reading Rooms at Columbia University; from 1911 to 1915 Assistant Librarian and from 1915 to 1928 Law Librarian. During his years at Columbia he was President of the New York Library Club and started the *New York Library Club Bulletin* in October, 1912, wrote *Bermuda in Poetry* in 1915, *New World Order* in 1920, *Men and Books Famous in the Law* in 1921, *Materials and Methods of Legal Research* in 1923, *Famous American Jury Speeches* in 1925, *Arguments and Addresses of Joseph Hodges Choates* in 1926, and *Human Jettison; a Sea Tale from the Law* in 1927. In 1928 he became Professor of Law and Law Librarian at Yale, a position he holds at the present time, and during the last year he has written *High Finance in the Sixties*, the story of the early financing of the Erie Railway in which well-known characters march through the pages in company with railroad men, stock brokers, and a mob of "rough, rude and dangerous men," and *Famous Speeches by Eminent Statesmen*, which covers the period from the events leading to the Civil War down to the present day.

Mrs. Hicks (formerly Mrs. Helen M. Richards) was a librarian before her marriage. She was secretary of the Vermont Library Commission and Librarian of the Shepard and

FREDERICK C. HICKS

Enoch Pratt Hospital Library at Townson, Md. Mr. Hicks has not only been president of the New York Library Club, 1912, but also secretary of Eastern College Librarians, 1914-1927, President of the American Association of Law Libraries, 1920, and Secretary of the Publication Committee, Public Affairs Information Service from 1917 to date. At the present time he belongs to the American Association of Law Libraries, American Library Association, American Law Institute, Authors Club, New York, and New York Flute Club. His recreations are travel, pencil and water-color sketching and music. He was a pupil of George Barrère on the flute and organizer of the "Ensemble Players," which made up of faculty members, gave chamber music concerts at Columbia University. In reply to the question of how he came to write, he replies, "Can't say how I came to write, except that gathering material, writing, editing, is a natural way for me to take interest in a subject."

Tentative Program of Los Angeles Conference

June 23-28

GENERAL SESSIONS

MONDAY, JUNE 23, 8:30 P. M. FIRST GENERAL SESSION.

Address of Welcome—Orra E. Monnette, President, Board of Library Commissioners, Los Angeles Public Library.

Address—Andrew Keogh, President, American Library Association.

Reception.

WEDNESDAY, JUNE 25, 10 A. M. SECOND GENERAL SESSION.

The Library Movement in California:

County Libraries.

Public Libraries.

College Libraries.

School Libraries.

The Huntington Library.

(Speakers to be announced later.)

FRIDAY, JUNE 27, 10 A. M. THIRD GENERAL SESSION.

Business.

Address.

Five or ten minute intermission.

"Two New Aspects of Adult Education—Alumni and Radio Education"—Levering Tyson, Field Representative, American Association for Adult Education.

SATURDAY, JUNE 28, 2:30 P. M. FOURTH GENERAL SESSION.

Joint session of American Library Association, Section for Library Work with Children and School Libraries Section.

Presentation of the Newbery Medal—Effie L. Power, Cleveland Public Library, Chairman, Section for Library Work with Children.

Response by the author of the book selected.

Library work with children—(speaker to be announced).

School library service—(speaker to be announced).

Report of Committee on Resolutions.

Report of Committee on Elections.

Presentation of Officers-Elect.

Adjournment of the Conference.

SECTIONS, AFFILIATED ORGANIZATIONS AND OTHER GROUPS

ADULT EDUCATION ROUND TABLE.—One session. Topic: Rural Adult Education.

AGRICULTURAL LIBRARIES SECTION.—One session. A one-day trip to the Riverside Citrus Experiment Station is planned.

ALUMNI EDUCATION

Charles H. Brown, Iowa State College librarian, is chairman of a special committee on alumni education, according to an announcement from American Library Association headquarters.

Twelve members comprise the committee which is to study the library implications of alumni education, with attention to the part to be played by college and public libraries, state library commissions, and the relation of these to each other. With no formal report on its program, this group plans to study the possibilities of alumni education in relation to the library, and to interest university, alumni and college library leaders in this project. Members of the committee will meet for discussion on June 27 at the Los Angeles conference of the A. L. A.

The present organized interest in alumni education is closely allied to four educational experiments now being promoted through grants from the Carnegie Corporation at Lafayette College, Easton, Pa.; Lawrence College, Appleton, Wis.; the University of Michigan, Ann Arbor, and Vassar College, Poughkeepsie, N. Y. Each institution is interested in working out a different project for its alumni, with the "alumni college," a reading service, discussion groups and week-end conferences as the major objectives. The growing ramifications of alumni education will be discussed at three future meetings of national significance: The meeting of the American Alumni Council at Amherst, May 1-3; the Chicago convention of the American Association of Adult Education, May 12-15, and the A. L. A. convention at Los Angeles, June 23-28.

ART REFERENCE ROUND TABLE.—One session. The Problem of the American Theater, Gilmor Brown, Director of the Pasadena Community Playhouse; discussion of some problems of art departments.

ASSOCIATION OF AMERICAN LIBRARY SCHOOLS.—One session. Topic: Teaching of Reference. Edith M. Coulter, University of California School of Librarianship, in charge.

BIBLIOGRAPHICAL SOCIETY OF AMERICA.—Two sessions. "Translation of the Scriptures," illustrated by rare Bibles, John Howell; "Bibliographical Guides for the Study of the English Language and Literature," Dr. A. G. Kennedy; "Expansion of Russia to America: Its Bibliographical Foundation," Prof. R. J. Kerner. Other papers to be announced.

BUSINESS LIBRARIES SECTION.—Two ses-

sions. Topic: The Public Library in the Field of Business.

CATALOG SECTION.—Three sessions. Topic: Research in Cataloging and Classification. General session: Papers by Grace O. Kelley, The John Crerar Library, Chicago, and William M. Randall, Graduate Library School, University of Chicago. Large Libraries Round Table: Papers by Philip S. Goulding, University of California; Alice Charlton, The John Crerar Library, Chicago, and Margaret B. Stillwell, Annmary Brown Memorial Library, Providence, R. I. Small Libraries Round Table: Paper by Aimee M. Peters, Public Library, Palo Alto, Cal. Regional Groups of Catalogers will have one session; time and place to be announced at Los Angeles.

COLLEGE AND REFERENCE SECTION.—Two sessions. Discussion of *College and Reference Library Yearbook*. Statement of progress and explanation of plans from the Committee on the Union List of Serials. Report of the Committee on the Study of Library Tools as a Required Course in the Curriculum. Paper on plans for providing undergraduate students with books necessary for collateral reading, followed by discussion. One paper will probably deal with methods of promoting reading for pleasure among undergraduates. About one-half the program will be devoted to matters of interest to the reference departments of public libraries.

COUNTY LIBRARIES SECTION.—One session.

HOSPITAL LIBRARIES ROUND TABLE.—One session. Topic: More Effective Service in the Hospital Library from the Viewpoint of the Doctor and the Nurse.

JUNIOR COLLEGE LIBRARIANS ROUND TABLE.—One session. General Topic: What Makes a Junior College Library? Sub-topics: The Budget, (a) Initial, (b) Annual; Personnel of the Staff; The Library Building: Seating Capacity and Number of Rooms. All junior college librarians attending the conference are asked to come prepared with definite facts and figures in order to set up tentative standards.

JUNIOR COLLEGE LIBRARY STANDARDS

Tentative standards for the junior college library will be discussed at the A. L. A. conference. The initial budget, the minimum annual appropriation, the personnel of the staff and physical equipment of the library are some of the topics announced for the program of the junior college librarians round table. This is the first time that there has been a meeting of junior college librarians during an A. L. A. conference.

LEAGUE OF LIBRARY COMMISSIONS.—Two sessions and a joint meeting with the National Association of State Libraries. First session:

Topic: Library Extension. "Recent Developments in Library Extension," C. B. Lester, secretary, Wisconsin Free Library Commission; other speakers to be announced. Second session (business meeting): "Report from Louisiana Demonstration," Milton J. Ferguson, California State Library; "Report from British Columbia," Helen G. Stewart, Public Library Commission, British Columbia; reports of officers and committees; election of officers. Joint session: Address of Welcome, Milton J. Ferguson; Response, Mrs. Lillian B. Griggs, secretary, North Carolina Library Commission; "State Encouragement of Adult Education," Matthew S. Dudgeon, Public Library, Milwaukee, Wis.; "Special Features of the Work of the California State Library," Mabel R. Gillis, California State Library.

LENDING SECTION.—One general session, breaking up at the end of an hour into three groups; one for large, one for medium-sized and one for small libraries.

LIBRARY BUILDINGS ROUND TABLE.—One session. "College and University Architecture," Frank K. Walter, University of Minnesota Library; "Central Buildings of Public Libraries," Joseph L. Wheeler, Enoch Pratt Free Library, Baltimore, Md.; "Branch Libraries," Clarence E. Sherman, Public Library, Providence, R. I.; "Furniture, Equipment and Mechanical Devices," Franklin H. Price, Philadelphia Free Library.

LIBRARY COOPERATION WITH THE HISPANIC PEOPLES.—One session.

NATIONAL ASSOCIATION OF STATE LIBRARIES JOINT MEETING WITH LEAGUE OF LIBRARY

COMMISSIONS. MONDAY, JUNE 23, 2 P. M. Address of welcome—Milton J. Ferguson, Sacramento, Cal.

State Encouragement of Adult Education—Matthew S. Dudgeon, Milwaukee, Wis.

Special Features of the Work of the California State Library—Mabel Gillis, Sacramento, Cal.

HISTORY OF PACIFIC COAST STATE LIBRARIES.

TUESDAY, JUNE 24, 10 A. M.

Our Obligation to Libraries in State Institutions—Mrs. Mary E. Frankhauser, Lansing, Mich.

Memorial address—Dr. Thomas Lynch Montgomery, Frederick A. Godcharles, Harrisburg, Pa.

Report of Secretary and Treasurer.

JOINT BANQUET WITH LAW LIBRARIANS (*tentative*). THURSDAY, JUNE 26, 10 A. M.

The Archives and the State Library—Margaret Norton, Springfield, Ill. (Com. chairman.)

A Clearing House of Public Documents—H. O. Brigham, Providence, R. I.

State Author Collections—R. H. McCurdy, Concord, N. H.

Business Session.

Reports of committees:

Uniform Organization—Milton J. Ferguson, California.

Legislative Reference Department — Mr. Redstone, Massachusetts.

Historical Societies—Georgia Osborne, Illinois.

State Document Exchanges—Mr. Conant, Vermont.

Membership Committee—Mrs. Ausherman, Wyoming.

A Handbook of State Libraries—Mr. Conant, Vermont.

Merger with League of Library Commissions—Mr. Godard et al.

New business.

Resolutions.

Nominations.

Election.

Adjournment.

ORDER AND BOOK SELECTION ROUND TABLE.—One session. Papers: "Western Books and Book Buying"; "Recent Western Books and Maps"; "Handicaps of the Western Buyers."

PERIODICALS SECTION.—Two sessions. First session: Library Cooperation in the Pacific Northwest as far as Periodicals are Concerned; Better Magazine Consciousness; discussion of recent indexes, such as *Education index*, art indexes, the new *Catholic index* and others; a few moments devoted to A Co-operative Clearing House for Duplicates. Second session: Directed by Florence Bradley, Metropolitan Life Insurance Company Library. Topic: Special Libraries Periodical Problems.

PROFESSIONAL TRAINING SECTION.—Two joint meetings with Training Class Section. (See that Section for program.)

PUBLIC DOCUMENTS ROUND TABLE.—One session.

PUBLICITY ROUND TABLE.—One session. Program: State-Wide Publicity.

RADIO BROADCASTING ROUND TABLE.—One session. Topic: Broadcasting and Books.

RELIGIOUS BOOKS ROUND TABLE.—Two or three sessions. "Review of Religious Books," Frank G. Lewis, Crozer Theological Seminary Library; "Religious Books in Demand in California Libraries," Frederic K. Howard, Chaplain, Seamen's Church Institute, San Francisco, Cal.

SCHOOL LIBRARIES SECTION.—Four sessions. Two meetings for papers and discussion, one business meeting, and a combined meeting with children's librarians in connection with Fourth General Session. First session: "The Abiding

Value of Great Literature," Mrs. Gudrun Thorne-Thomsen; other speaker to be announced; a tea following this meeting is planned for school librarians. The second meeting will consist of three round table conferences for (a) elementary, (b) junior and senior, and (c) teachers' college librarians. The meetings will be held simultaneously, with discussion of the same topics arranged in different order, so that a person going from one group to another may participate in the discussion of the same subject in two or three groups. General topics in each group will be problems connected with Reading, Administration and Training.

SECTION FOR LIBRARY WORK WITH CHILDREN.—Three sessions. Business meeting (closed): Reports of committees; election of officers. General session: Topic: Book Selection and Purchase. Group discussion of administrative problems involved in the selection and purchase of books for children's libraries. Some of the topics suggested for discussion are: The Library's Budget for Children's Books; Choice of Editions for Children's Classics and Other Books; The Place of Text Books and Subscription Books in a Children's Library; Selection of Current Books; Adjusting Library Standards to Public Demands. Joint session with School Libraries Section in connection with the Fourth General Session.

SMALL LIBRARIES ROUND TABLE.—One session. Discussion of Charging Systems, including the Dickman System and the Detroit System by which the borrower charges his book; Library Staff Meetings for Book Review; "What the Public Should Expect from the Library," Mrs. Zulema Kostomlatsky Rowell, Orange, Cal.

TRAINING CLASS SECTION.—Two joint sessions with Professional Training Section. First session: "A Proposed Outline of a Course in Book Evaluation for a Six Months' Training Class," presented for discussion by Edith Erskine, Pullman Branch, Public Library, Chicago. Second session: A Preliminary Report on Methods of Selecting Applicants for Training and Apprentice Classes, presented by Committee appointed in December.

TRUSTEES SECTION.—Two sessions. First session: "The Qualifications, Education and Experience Necessary for the Head Librarian," Joseph L. Wheeler, Enoch Pratt Free Library, Baltimore, Md.; "How to Find and Select Librarians," Josephine A. Rathbone, School of Library Science, Pratt Institute, Brooklyn, N. Y.; "Personal Qualifications and Educational Requisites of Assistant Librarians, and Methods of Promotion," James A. McMillen, Louisiana State University Library; "How to

Determine What Salaries Should Be Paid to Librarians," Charles H. Compton, Public Library, St. Louis, Mo.; discussion. Second session: "The Best Methods of Financing Municipal Public Libraries," William N. Jan-nenga, Trustee, Public Library, Cicero, Ill. "The Best Methods of Financing State and County Libraries," Louis J. Bailey, Indiana State Library; "Experiences of the Los Angeles Public Library in Efforts to Secure Adequate Financial Support," Mrs. Frances M. Harmon-Zahn, Trustee, Public Library, Los Angeles, Cal.; "The Development of California's State and County Libraries," Milton J. Ferguson, California State Library; discussion. A trustees' dinner is proposed at which two-minute toasts will be given to noteworthy library accomplishments in cities and states represented; Clarence C. Ogilvie, Trustee, Public Library, Memphis, Tenn., presiding.

VISUAL AIDS ROUND TABLE.—One session. "Children and the Movies," Gladys Case Miller, and a talk by Alice Ames Winter, Associate Director, Public Relations Department, Association of Motion Picture Producers. Meeting may be held at theater where preview may be shown. A portable talking-picture machine, suitable for use in schools and libraries, will be shown at the Visual Aids Round Table meeting by the Research Department of the Western Electric Company.

WORK WITH THE FOREIGN BORN.—One session. "The Mexican Immigration Problem," Dr. Emory Stephen Bogardus, Director of Social Welfare, University of California at Los Angeles. Talk on Americanization work by Ettie Lee, Assistant Supervisor of Americanization in the Los Angeles City Schools.

TENTATIVE SCHEDULE OF MEETINGS, A. L. A. CONFERENCE, LOS ANGELES

MONDAY, JUNE 23.

A. M.—Group meetings.

P. M.—Group meetings.

Eve.—First general session.

TUESDAY, JUNE 24.

A. M.—Council and group meetings.

P. M.—Free.

Eve.—Group meetings.

WEDNESDAY, JUNE 25.

A. M.—Second general session.

P. M.—Group meetings.

Eve.—Free: Conference banquet.

THURSDAY, JUNE 26.

A. M.—Group meetings.

P. M.—Free.

Eve.—Library school and other dinner meetings, group meetings.

FRIDAY, JUNE 27.

A. M.—Third general session.

P. M.—Group meetings.

Eve.—Group meetings.

The Open Round Table

New Mexico Invites You!

To the Editor of THE LIBRARY JOURNAL:

The New Mexico State Library Association through its publicity committee wishes to extend to all who will attend the A. L. A. Conference in Los Angeles a most cordial invitation to stop in New Mexico either going or returning. One special train in charge of Mr. F. W. Faxon is scheduled to make a stop of about thirty-six hours in Santa Fé, where arrangements have been made for the party to take one of the trips of the Harvey Indian Detour.

A local committee has been organized in Santa Fé representing the city Public Library, the State Law Library, the Library of the Museum of New Mexico, and the Library Extension Department of the State Federation of Women's Clubs. This committee will be assisted by librarians from other parts of the State, headed by the president of the State Library Association, Mrs. Corinne Whitney of Roswell, in entertaining the visiting members of the American Library Association. The New

Mexico librarians are looking forward with great pleasure to this opportunity of meeting and knowing the members of the profession from other parts of the country.

JULIA BROWN ASPLUND,
*Chairman Publicity Committee,
New Mexico State Library Association.*

Agent of Literary Guild Makes False Statements

WORD has come from various sources that agents of the Literary Guild are making statements to the effect that the Cleveland Public Library has subscribed for large numbers of books through that organization. No subscription has ever been placed with the Literary Guild, and the decision has been definitely made against subscribing. It seems proper to take this means of informing other librarians of the fact, as the statements have continued to be made since the matter was reported to an officer of the Guild.

LINDA A. EASTMAN,
Librarian, Cleveland Public Library.

Current Library Literature

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in Cannons' "Bibliography of Library Economy," to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

ADULT EDUCATION. *See* EDUCATION, ADULT.

AGRICULTURAL LIBRARIES. *See* U. S. DEPT. OF AGRICULTURE. LIBRARY.

BIBLIOGRAPHY

Hasse, A. R. Bibliography: today and tomorrow. *Special Libs.* 21:75-80. 1930.

"The procedure for servicing (cataloging, etc.) of books for the commercial agency (book publishers, etc., and the general public library) is developed, accepted, and fairly adequate, with reservations. The procedure for servicing (cataloging, indexing, etc.) of books for research institutes, reference libraries, and special libraries is undeveloped and inadequate, without reservations. . . . The transmission of data for the research worker is today, to a very large extent, circumstantial. There are, very likely, quantities of references, tabulations, and data which escape him and which will continue to do so until some, as yet undeveloped, process of reclamation and distribution is devised."

BOOKS AND READING

Quigley, M. C. Europe-minded reading. *Journal of the N. E. A.* 19:83. 1930.

Recommends the reading of novels, poetry, and plays rather than "background" books before making a trip to Europe.

EDUCATION, ADULT

Chancellor, John. The future of informal education in libraries. *Libraries.* 35:89-92; 141-143. 1930.

Two months of use of the Reading with a Purpose Series at the New Haven (Conn.) Public Library resulted in a six-fold increase in the circulation of worth-while non-fiction books.

HIGH SCHOOL LIBRARIES

Davenport, M. E. Place of the library in the pupil's daily program. *Libraries.* 35:121-123. 1930.

Access to the library is made as unrestricted as practicable at the Freeport (Ill.) High School Library.

See also DE WITT CLINTON HIGH SCHOOL LIBRARY.

LEAGUE OF NATIONS

Currier, T. F. The League of Nations publications; a simplified treatment. *LIB. JOUR.* 55:255-256. 1930.

The Harvard College Library binds League publications according to their sales number. A typical binder's title may read: "League of Nations. Publications, 1927. III. No. 27-70." Unnumbered publications are assigned a class number and bound at the end of the class.

LECTURES

Hyers, F. H. Letting books speak for themselves. *LIB. JOUR.* 55:259-261. 1930.

A record of 607 free lectures is reported by the Los Angeles Public Library for the year ending June 30, 1929, with an estimated attendance of 50,000. The subjects covered include literature, philosophy, child psychology, economics, popular science, art, music, and travel.

LIBRARIES

MEXICO

Books and libraries in Mexico. *Pan American Bull.* 64:134-147. 1930.

See also PUBLIC LIBRARIES; SMALL LIBRARIES.

LIBRARY BUDGET

Annable, Dorothy. The library budget. *N. H. Pub. Libs.* n.s. 26:49-52. 1930.

Suggestions for a businesslike budget for small libraries which will stand a better chance of not being voted down at town meeting.

LIBRARY CENSORSHIP

Bowerman, G. F. *Censorship and the public library. Libraries.* 35:127-135. 1930. To be continued.

"Such little censorship as the public library exercises comes about, in part at least, because of its desire not so greatly to offend as to alienate the weaker members of its constituency. But the librarian must also be on his guard not to make the library appear a weakling, so that the strong men and women of the community will lose respect for it and come to regard it as an institution intended primarily for morons."

LIBRARY EQUIPMENT

Lockart, G. E. *Modern college and university library equipment. illus. LIB. JOUR.* 204-207. 1930.

Gives especial attention to the new Snead automatic book distributor.

In addition to signed articles, the Equipment Number of the *LIBRARY JOURNAL* (March 1, 1930) contains brief but fully illustrated accounts of library chairs, bulletin boards, book shelving, book delivery systems and library signs.

LIBRARY FURNITURE

Horrocks, A. J. *The building of fine library furniture. LIB. JOUR.* 55:202-204. 1930.

The library demands and requires the old-time craftsman rather than furniture made under production methods. The standard wood for American libraries is quartered white oak.

LIBRARY OF CONGRESS

Howe, M. A. D. W. *Books and the Nation. Scribner's Magazine.* 87:266-273. 1930.

"Experiments by which the Library of Congress is extending its resources and influence, is providing experts to aid people engaged in research, and is creating a center of learning which makes it less and less necessary for the scholar to go to Europe for advanced study."

LIBRARY PENSIONS

Brigham, H. F., *comp.* *Pensions for librarians in the United States and Canada. A.L.A. Bull.* 24:78-85. 1930.

Presented by States alphabetically, showing under each State, first, the general situation with regard to (a) library pension legislation, (b) pensions for State employed librarians, and (c) State teachers' pensions that benefit school librarians; and, second, the particular situation with regard to individual public libraries in the State.

LIBRARY PLANNING

Hirshberg, H. S. *Elements of the Library Plan.* Based on the earlier ed. by W. R. Eastman. *A.L.A.*, 1930. pap. 16p. ("Manual of Lib. Econ.," x).

Considers briefly site, financing, size, architect, costs, style, materials, entrance, stairways, basement, assembly rooms, toilet rooms, staff rooms, main floor, seating, stack rooms, lighting, heating, etc. Bibliography.

LIBRARY SCHOOLS

Reece, E. J. *The Service Loads of Library School Faculties.* 32 mm. p.

A report made to the Association of American Library Schools by Ernest J. Reece, associate professor of library administration, School of Library Service, Columbia University. Based on replies to an inquiry to which 17 schools and 89 individual instructors responded. "The reports received from faculty members handling courses for the first year were too few to permit any definite estimates as to the time consumed in out-of-class work, but were sufficient to confirm the belief that there is a very great difference between the time requirements for the first offering and those for subsequent ones. Both the returns and independent observation suggest that the inexperienced teacher who without chance for advance preparation assumes a two-credit or three-credit course involving revision and the preparation of problems for a large class is likely to have to devote a very large part of his energies to it."

LIBRARY WORK WITH THE BLIND

Chamberlain, M. C. *Library Work with the Blind.* 2nd ed. rev. A. L. A., 1930. pap. 8p. ("Manual of Lib. Econ.," xxx).

Includes historical sketch and list of publishers and organizations which prepare books for the blind. Bibliography.

MEXICO. *See* LIBRARIES, SUBHEAD MEXICO.

NET PRICE SYSTEM

Net books. *Ln. and Book World.* 19:202-205. 1930.

"The big library suppliers giving stock selection services are penalized; the local bookseller is presented with an unearned bonus; the publisher loses profit; the public may receive inferior books or have to pay a higher price; the libraries have to find bigger premises. We cannot find in such a scheme any grounds on which we can recommend it to our readers."

NEW JERSEY. *See* COUNTY LIBRARIES, SUBHEAD NEW JERSEY.

OKLAHOMA, UNIVERSITY OF. LIBRARY.

University of Oklahoma Library. *illus. LIB. JOUR.* 55:254-255. 1930.

Architecturally a replica of Christ College, Oxford, the library has space for 300,000 volumes, including a Treasure Room for its valuable collection of old books and manuscripts.

PLAYGROUND WORK

Duncan, E. ff. *Digest of cooperation of libraries with recreational institutions. Libraries.* 35:149-151. 1930.

Supplement to report by Ruth Robi of the St. Louis Public Library made in 1926 (summarized in *LIB. JOUR.*). Summarizes reports from Buffalo, Kalamazoo, Pittsburgh, Providence, Rochester, and Saginaw.

PUBLIC LIBRARIES

A conspiracy. *Nation.* 130:287. 1930.

Public libraries seem to this writer to be part of an organized effort to discourage the buying of books.

RADIO AND LIBRARIES

Walton, Mary. A new stimulus to reading: the wireless discussion group. *Lib. World.* 32:179-182. 1930.

Cooperation of the Sheffield (England) Public Libraries and the B. B. C. in organizing groups for discussion of lectures delivered over the radio.

RANDOLPH-MACON WOMAN'S COLLEGE LIBRARY, LYNCHBURG, VA.

Randolph-Macon Woman's College Library. *illus. LIB. JOUR.* 55:311. 1930.

The building, Georgian in design, has shelving space for 100,000 volumes.

ROYAL EMPIRE SOCIETY, LONDON

Lewin, Evans, *comp.* *Subject Catalogue of the Library of the Royal Empire Society, Formerly Royal Colonial Institute.* Volume One: The British Empire Generally, and Africa. Northumberland Ave., London: The Institute, 1930. cl. 582; cxxiii p. £1 1/5 6d.

Compiled by the Librarian of the Institute and financed by the Carnegie United Kingdom Trust and the Carnegie Corporation of New York. The subsidy will be sufficient for only three volumes, but it is hoped that the catalog may be continued beyond that point.

SALARIES

Manchester, E. N., *comp.* *Salary statistics: university and college libraries. A.L.A. Bull.* 24:85-87. 1930.

Salaries now in effect, as of Dec. 1, 1929, in 27 university and college libraries.

SCHOOL LIBRARIES

Fargo, L. F. *The Library in the School. A.L.A.*, 1930. cl. 453p., *illus.*, tables. ("Library Curriculum Studies").

The Foreword (xvii-xxv) was published, by permission, in *LIB. JOUR.* 54: 57-59. 1929.

"This book was preceded by a study of school libraries and library systems as far apart as New York and California. Based on a survey, it is still not a survey. It is a textbook for those prospective school librarians and

teachers of school librarians who conceive the school librarian to be a specialist. . . . First, the activities of the school library are pictured in their educational setting, objectives are set up, and consideration is given to what the school expects from the library in service and personnel. In other words, functions are treated first. Afterward, the book discusses the equipment, organization, and techniques suited to carrying forward these functions." Preface.

Tilton, E. L. School libraries. plan. *LIB. JOUR.* 55:250-254. 1930.

An architect's suggestions for the location, lighting, areas, finishing, and shelving of a satisfactory school library.

The Department of School Libraries in *Libraries* for April, 1930 (35:163-174) has short signed articles on student assistants in a school library; publicity; reading guidance through clubs and contests; organization and equipment of a school library; book menus, and cooperation between public library and schools in Baltimore, Md.

See also HIGH SCHOOL LIBRARIES.

SHELF ARRANGEMENT

Rathbone, J. A. *Shelf Department*. ed. 3, rev. A.L.A., 1930. pap. 14p. ("Manual of Lib. Econ.," xx).

Based on the results of a questionnaire replied to by 130 libraries. Considers shelf-list, care of books on the shelves, book supports, labels, dummies, and the inventory. Bibliography.

SHERMAN, CLARENCE E.

The new administration. *Books for All.* 5:62-63. 1930.

William E. Foster, retiring librarian of the Providence (R. I.) Public Library, introduces Mr. Sherman, "who embodies in a most ideal manner just those qualities which for years he has hoped might be embodied in his successor."

SMALL LIBRARIES

Fogg, J. B. Some problems of small libraries. *LIB. JOUR.* 55:297-300. 1930.

Selection of current books; replacements; staff meetings and schedules; service to schools.

Greene, M. P. Statistics in a small library. *LIB. JOUR.* 55:305-306. 1930.

"Even in a small library we ought to be able to salvage the specialist by studying the individuality of each assistant, and giving her the type of work she is best fitted to do, with freedom to try out her own ideas and methods."

Mower, Anna. Increasing the usefulness of my public library. *LIB. JOUR.* 55:301-302. 1930.

The Morristown (Vt.) Centennial Library, a small library of 6300 volumes in a town of 3000 inhabitants, gives especial attention to school children.

Quigley, Margery. Books in Suburbia—the suburban library's book buying problems. *LIB. JOUR.* 55:302-305. 1930.

Service to the rich and the commuters in Montclair, N. J., has not yet been developed to the point desired by the town's librarian. The need for quick purchase of new books has led more and more suburban libraries to use the book sections of department stores, because of deliveries in less than 24 hours, at no cost for carriage, and with no letters to be written.

STUDENT ASSISTANTS

Koopman, H. L. The student assistant and library training. *Libraries.* 35:87-89. 1930.

The system has worked well at Brown University, particularly in the case of men assistants. Four years as a student assistant is a not entirely unsatisfactory substitute for the first years in a library school—certainly an excellent preparation for one.

Smith, J. J. Training of student assistants in small college libraries. *LIB. JOUR.* 55:306-309. 1930.

At Hiram College, Ohio, ten students are given a course of one class hour and two hours of supervised work per week for one school year, without credit and without pay. This selected group of ten compete for the positions on the paid staff.

TORONTO (ONT.) PUBLIC LIBRARY. DANFORTH BRANCH

Sanderson, C. R. A library in a shopping centre. illus. plans. *LIB. JOUR.* 55:257-259. 1930.

This 16th branch was designedly located at a popular street-car intersection, and is surrounded on all sides by store buildings. No pains were spared to make the interior attractive.

U. S. DEPT. OF AGRICULTURE. LIBRARY.

Barnett, C. R., comp. *The Library of the U. S. Dept. of Agriculture; a Brief Description of Its Resources, Organization and Work.* Washington, 1929. 28 mm. p.

The main library and the libraries in the various bureaus contain approximately 210,000 volumes, many thousands of unnumbered pamphlets, over 3600 current periodicals, and as many more current serials. For the fiscal year 1930 its appropriation is \$102,000, exclusive of separately appropriated funds for printing and binding.

UNIVERSITY LIBRARIES. See SALARIES.

WESTERN UNION TELEGRAPH COMPANY LIBRARY

The library of the Western Union Telegraph Company. *Special Libs.* 21:80-81. 1930.

The library has more than 10,000 books, and will answer questions referred to it.

BOOKS BY AND ABOUT LIBRARIANS

Code, Rev. Joseph B. *Great American Foundresses.* Macmillan, 1929. il. 512p. \$5.

The author has been since January, 1924, head librarian of St. Ambrose College, Davenport, Iowa. "The sixteen chapters of this book tell of sixteen valiant women of profound faith, ceaseless activity, heroic self-sacrifice and inspiring holiness." From the introduction by Henry P. Rohlfman, bishop of Davenport.

Pearson, Edmund, ed. *The Autobiography of a Criminal: Henry Tufts.* Duffield, 1930. cl. 357p. illus. facsimis. \$3.

The autobiography was first printed in 1807. Henry Tufts was a thief, impostor, Revolutionary soldier and deserter, and complete amoralist. The editor, formerly Editor of Publications at the New York Public Library, is the author of *Studies in Murder, Five Murders*, etc.

Plans for Statistical Index

THE COMMERCIAL-TECHNICAL Section of the Special Libraries Association has, as one of its projects, an index to statistical sources of information, with Miss Marian C. Manley, Branch Librarian of the Business Branch of the Newark Public Library as chairman of the committee. Through the cooperation of Mr. W. P. Cutter of the Baker Library of Harvard University, a rough outline of a chart for this purpose has been made available. The committee is now working on the project, and plans to have definite progress to report at the San Francisco convention, if not before. Anyone interested in such an index and with suggestions to offer is urged to get in touch with the chairman.

Gold Star List

THE TWELFTH edition of the Gold Star List prepared by the staff of the Syracuse, N. Y., Public Library, has recently been published. A list of thirteen realistic close-up stories about the World War without regard to the nationality of the author and thirty-five new titles have been added to this year's list.

Through the Looking Glass

*A Monthly Review of Children's Books
and Reading*

By Helen Martin

Library work with children, Western Reserve University School of Library Science

"THE play's the thing!"—thus does the poet express the universal delight of children in dramatic art. The modern child, in contrast to the child of yesterday enjoys the diversified rôles of spectator, actor and producer. As a result the library collection of plays has grown steadily in quantity and quality, and the output this year for both the "legitimate" and the puppet stage will prove a boon indeed to youthful actors and their sympathetic adult friends.

Even the most awkward pupil should suddenly find himself flying to scrap-bag, scissors, and needle after reading Edith Flack Ackley's instructive volume, *Marionettes*. In addition to the clear, detailed and ingenious directions as to their manipulation and production, even down to minute details as fashions in waistcoats, "drops," and furniture, there are five original plays, which could be used either in home, school or camp. Tucked neatly in a flap of the back cover are several paper patterns, which will bolster up materially the spirits of the timid amateur with the author's sanguine slogan, "Easy to make! Fun to use!" Marjorie Flack has touched the many drawings, showing the necessary scientific details, with a gay, whimsical humor—the quintessence of puppettering.

Dear to the heart of childhood is the beloved tale of that immortal marionette, *Pinocchio*, whose merry adventures have been dramatized, with appreciation and sympathy, in four acts, each complete in itself, called *Pinocchio for the Stage* by the well-known producer, Remo Bufano. Even if at times the version seems somewhat overloaded with detail, due to a zealous devotion to the original text, and the stage "business" rather difficult from a technical standpoint, still it must be remembered that the play has been performed successfully by the author both with marionettes and living actors.

Under the title *Nix-Naught-Nothing*, Naomi

Plays for the Amateur Stage

Mitchison, a rising young English playwright and understanding mother, has dramatized for her own children four tales from the favorite classic, *English Fairy Tales*; three are for indoor presentation, and the fourth, a bit difficult because of the broad dialect, "for a field or garden in Scotland or wherever there are Scots." The text, written in both prose and poetry, singularly reminiscent of Jacob's own rollicking style, is replete with good dialogue, humor and fanciful spirit. The plays call for considerable scene-shifting and a large number of actors, but this situation makes them especially adapted for use with large groups. The delicate sketches by Winifred Bromhall are decorative and suggestive, rather than realistic.

With these words Milne writes his apologia in the preface to *Toad of Toad Hall*: "I have, I hope, made some sort of entertainment with enough of Kenneth Grahame in it to appease his many admirers, and enough of me to justify my name upon the title page." The result is unexpectedly satisfying, and *Wind in the Willows* devotees will chuckle over the well-remembered dialogues of Rat, Badger, Mole and Toad. The unforgettable, evanescent scene, "The Piper at the Gates of Dawn," has been understandingly omitted, but the immortal picnic, the little field mice carolers, the adventures of braggart Toad in feudal hall and loathsome dungeon, are cleverly and charmingly presented. Certain additions, such as the bestowal of the appropriate name of "Albert" on the methodical, plodding horse of the yellow caravan, the inimitable jury scene, suggestive of a similar incident in "Alice," the clever bits of jingling verse, developed from original prose passages, add materially from the standpoint of critical dramatist and gentle reader.

Frederick A. Stokes & Co.

Cuts, at top of page, of the "White Knight sliding down the poker" are taken by permission from the Tenniel edition of *Through the Looking Glass* published by Macmillan Co.
For Bibliography of books reviewed see p. 374.

Library Organizations

Special Libraries Association

SPECIAL librarians from all parts of the United States will meet in San Francisco June 18 to 21 for the twenty-second annual convention of the National Special Libraries Association. This is the first time the meeting has been held on the Pacific coast. The delegates will be welcomed by Milton J. Ferguson, State Librarian. Headquarters are to be at the Clift Hotel.

The Special Libraries Association was founded in 1909. Membership includes librarians from all types of business and professional concerns. Newspapers, manufacturing firms, banks, insurance companies, museums, law firms, research organizations are represented. By pooling the experience and knowledge of methods and sources of its members the organization acts as a clearing house of information on all subjects. Educational work is carried on in connection with the establishment of libraries for business houses and helping them in selecting efficient systems of classification and filing. Approximately 1100 members and subscribers are scattered throughout the United States and twelve foreign countries. William Alcott, librarian of *The Boston Globe*, is president of the association. For centralization of knowledge concerning specific activities, six groups exist within the organization. These are: Civic-Social, Commercial-Technical, Financial, Insurance, Museum and Newspaper.

For the past two years the convention has been held in Washington, D. C. Angus Fletcher, British Library of Information, New York, is chairman of the national convention committee. Miss K. Dorothy Ferguson, librarian of the Bank of Italy, is chairman of the local committee.

Chicago Library Club

FOUR ROUND TABLE meetings were the feature of the February meeting of the Chicago Library Club. The staff of the John Crerar Library were hosts to the club on February 13, 1930. After a brief business session, during which fifteen new members were presented, the evening was devoted to group discussions. Mary Ayres presided at the round table of children's librarians; Mary Herr at the group meeting of school librarians; Cora Hendee at the lending section; Jerome K. Wilcox at the reference section.

The Chicago Library Club was fortunate in having for the speaker at the meeting on March 13, 1930, Miss Wetmore of the Chicago public

schools. Miss Wetmore discussed the work in adult education done by the schools of the city and answered many questions on the relation of this work to that done by public libraries. The Scholarship Committee reported their success in raising the sum of \$100 as a contribution to the scholarship for library school students awarded by the Chicago Woman's Club.

Special Libraries Council of Philadelphia and Vicinity

KEEN INTEREST in the discussion of special libraries problems has resulted in a number of small group conferences this year. Subjects for discussion were bibliography, classification and reference work. A follow-up discussion on the first bibliography conference took place two weeks later. One of the high spots of this conference was the recommendation for bibliographical notes which would enable the researcher to discriminate among many references. Notes giving features of editions, slant and opinion of the author were recommended. Miss Charlotte Noyes brought all her wide experience in this kind of work to the conference and made an unusual leader. Mrs. Faltermayer led another small group on January 22, which considered reference problems. This was a practical experience meeting in which a number of participants told of their methods in answering actual questions which had come to them. On March 21 an attempt was made to initiate an inexperienced group into the classification labyrinth. Miss Keller who led this discussion had for her subject classification vs. the classification of books. Miss Emilie Mueser, classifier, Engineering Societies Library, New York, and Gilbert D. Thomas, Pennsylvania State College, were guests and contributed to the discussion. It is hoped that another study class such as developed last year might grow out of this effort. The conference groups have had an average attendance of about twelve.

Bibliography

In The Library World

American Library in Spain

THE COLLECTION of books exhibited by the A. L. A. at the Seville exposition has been transferred to the Junta Para Ampliación de Estudios at Madrid, to form the nucleus of an American Library in Spain. A branch of the Junta, the Center for Historical Studies, has an important and much used library, and the American books will probably become a part of that collection. It is planned to keep the American library up-to-date, according to the Secretary of the Junta, Señor José Castillejo, if funds can be found for that purpose.

Library Spreads Its Wings

NOT ONLY in a physical sense has the Library of Hawaii "winged out" during the past year. Reports of the various departments for 1929 show statistics which are indicative of much internal activity as well. The book collection now numbers 97,859 volumes. Of these the main library has 44,739 adult books and 14,952 juvenile books and the stations department 38,168. During 1929, 10,474 volumes were added to the library collection; the library receives 282 periodicals and 34 newspapers. There were 22,107 registered borrowers at the main library at the end of 1929; of these, 14,016 were adults and 8,091 children. Two hundred and forty-six cards for temporary library privileges were issued to visitors. The circulation of books tallied 705,783, divided among adult, 234,226 and juvenile, 155,897 at the main library, and 315,660 in the stations department, which serves 120 stations on the island, including 75 schools. Ten thousand, five hundred and forty-five questions were answered by the reference department.

Attending to the multitudinous details implied in these statistics are 51 staff members, including trained personnel, clerical and part-time assistants.

Everyland Club

DURING the summer months the Everyland Club in the Robbins Library, Arlington, Mass., was organized. As the name indicates, the club took an interest in every country in the world, considering one country each week. The children read and discussed books about the countries. They talked of its history and its customs and played the games of the land. Some books were dramatized by the children themselves with real skill and perception of the salient points of the story. Others told the stories of some favorite book.

New Buildings

THE SOUTH Side Branch of the Oshkosh, Wis., Public Library was dedicated March 14, 1930.

ACCORDING to Donald B. Gilchrist, University Librarian, a tower nineteen stories high devoted to the storage of books for the library of the University of Rochester will be the highest building of its kind in the world. The tower is to be directly behind the main library building. A circular colonnade, illuminated by flood lights, will top the tower, and in it memorial chimes will be hung; the building will cost \$1,500,000. The problem of carrying books up and down in the tower, which will have a capacity of over 1,000,000 volumes, will be handled by means of automatic conveyors.

LEHIGH University, Bethlehem, Pa., will dedicate its new university library on April 25, 1930.

OPENING of the new Central Lending Library, Toronto, Canada, has been announced for April 21, Easter Monday, at 8:15 p. m.

CORNISH, Iowa, Public Library has received a gift of \$10,000 from Mrs. Laura Okey to be used for an addition to the library as a memorial to her father and mother.

MRS. MARY MCCREA, a former resident of Stuart, Iowa, who recently died, has bequeathed \$10,000 for a library building. As Stuart already has a Carnegie building, this will mean a much needed addition.

A Source of British Information

THE FIRST volume of the *Subject Catalog of the Library of the Royal Empire Society*, has recently been published. The volume, dealing with the British Empire as a whole and with Africa specifically, is the first of a series which, it is hoped, will become a bibliography of the British Empire. It is also hoped that, apart from its use within the British Empire itself, it may be of value to American librarians and students as indicating some of the chief sources of information regarding the Overseas British Empire. The volume is published by the society at £1/11/6.

Vacation Reading in Charlotte

JUST before the schools closed for the summer of 1929 in Charlotte, N. C., the Children's Librarian visited each of the seventeen city schools and explained the Vacation Reading Club plans. An attractive book was made and kept on the librarian's desk, where all children who wanted to join the club could register. Each afternoon found many children eager to join the club, until by July 1 two hundred and fifty names had been placed in the book.

Boys and girls from the fourth through the seventh grades were invited to join the club and lists of books to be read were made for each grade and posted on the bulletin board. From these lists twelve books were to be read and reviews written and handed in to the librarian at the close of the vacation period. A large poster was made and each child who had joined the club had his or her name on the poster. When eight books had been read a gold star was placed after the child's name and much interest was shown in the poster as each child found joy in pointing out the gold star after his or her name to other boys and girls.

When the course of reading had been completed and the reviews written and handed in, a diploma with a gold seal on it was given. By Sept. 1 two hundred and seventy-one children had joined the club. On Sept. 27, 1929, a story hour was held and special features were planned for the hour, one of which was the awarding of diplomas. Immediately following the story hour a picnic was held on the library lawn for those who received diplomas.

Early Hispanic Books

ORIGINALLY compiled as a check-list of books for the staff of the library of the Hispanic Society of New York, the *List of Books Printed Before 1601* in the library compiled by Clara Louisa Penney, was printed by order of the Trustees in 1929 (cl., 274 p.). The bibliography is a short-title list, arranged alphabetically, and its forms of entry follow in general those of the British Museum and the Library of Congress. The colophon has been strictly followed as to spelling and information, but the arrangement has been arbitrarily changed to the form: place, publisher, date. A bibliography of books describing the books in greater detail is included, as well as a list of place-names not easily recognizable in their modern forms—as Mantua Carpentanorum for Madrid, Lutetia for Paris, and Olysippone for Lisbon.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, Of the LIBRARY JOURNAL, published twice-a-month, at New York, N. Y., for April 1, 1930.

STATE OF NEW YORK, }
COUNTY OF NEW YORK, } ss.

Before me, a Notary Public in and for the State and County aforesaid, personally appeared Frederic G. Melcher, who, having been duly sworn according to law, deposes and says that he is Vice-President of the R. R. Bowker Co., publishers of the LIBRARY JOURNAL, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:

Publisher R. R. BOWKER CO.
62 West 45th St., New York
Editor R. R. BOWKER
62 West 45th St., New York
Managing Editor BERTINE E. WESTON
62 West 45th St., New York
Business Manager JOHN A. HOLDEN
62 West 45th St., New York

2. That the owners are:

R. R. BOWKER CO., 62 West 45th St., New York.
R. R. BOWKER, 62 West 45th St., New York.
MARIAN A. OSBORNE, Buffalo, N. Y.
J. A. HOLDEN, 62 West 45th St., New York.
F. G. MELCHER, 62 West 45th St., New York.
A. R. CRONE, 62 West 45th St., New York.
A. C. FRASCA, 62 West 45th St., New York.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages or other securities are:

NONE.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustees or in any other fiduciary relation, the name of the persons or corporation for whom such trustee is acting is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona-fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds or other securities than as so stated by him.

FREDERIC G. MELCHER, *Vice-President*.

Sworn to and subscribed before me

this 27th day of March, 1930.

ARMOND FRASCA,

Notary Public, New York Co., N. Y., No. 165,
Reg. No. IF105.

[Seal] (My commission expires March 30, 1931)

Books for Blind Hearing

THERE WAS a hearing on the Pratt bill in regard to books for the blind before the House Library Committee, March 27. The members of that committee are Representatives Luce of Massachusetts, Hooper of Michigan, Mrs. Pratt of New York, Ludlow of Indiana, and Warren of North Carolina. The Pratt bill is promoted by Robert B. Irwin, executive director, American Foundation for the Blind. It requests that an appropriation of \$75,000 annually be made for the purchase and publication of books for the blind, such books to be lent to blind residents of the United States. The Librarian of Congress, according to the bill, would administer the fund. He would arrange with local public libraries to serve as local or regional centers for circulation. Preferences would be given to the needs of blind persons who have been honorably discharged from the United States military or naval service. Only the Pratt bill had been referred to the House Library Committee. The Crail bill and the so-called Josephson bill, introduced by Congressman Hill of Alabama, had been referred to the Committee on Education. M. C. Migel, president of the American Foundation for the Blind, made a general statement supporting the Pratt bill. Dr. Irwin followed with a more detailed statement showing the need; also answering many questions put to him by Chairman Luce. Mr. Campbell, editor of the *Outlook For the Blind*, made an appeal rather than an argument. He said there were approximately five hundred blind ex-service men. Mr. Latimer, representing the Pennsylvania Association for the Blind, spoke for the blind. Carl H. Milam, secretary of the American Library Association, reported the vote of the Committee on Work with the Blind, the approval of the Pratt bill by the A. L. A. Executive Board and called attention to two proposed minor amendments. He said, also, that he believed the amount appropriated inadequate and that the bill should authorize the Librarian of Congress to use a portion of the funds for administrative expense. He concluded by saying that he was certain, without having had an opportunity to put it to a vote, that practically all of the 13,000 members of the A. L. A. would enthusiastically approve the purpose of the Crail bill "to provide books for the adult blind" and "to facilitate the prompt and economic circulation of such books." Helen Keller followed with a very impressive speech. Miss Hoyt, of the reading room for the blind in the Library of Congress, spoke briefly with some assistance (she is blind) from her associate in the reading room for the blind and from Martin A. Roberts, of the Library of

Congress. Representative Crail followed, calling attention to a statement which had been made to him that the Librarian of Congress had previously recommended that work with the blind be transferred to another institution.

Mr. Ralls made a fairly extended speech. His three specific suggestions for amendment were:

1. That the word "purchase" should be eliminated. He wants all the money to be used for production.

2. That one copy only be given to cooperating libraries. Duplicates and replacements to be partly at least at the expense of the cooperating library.

3. That the A. L. A. Committee on Library Work with the Blind assist in selecting books, and that some emphasis for a time be placed on educational work.

Dr. Irwin answered some of Mr. Ralls' statements, admitting that he was "obstinate in his faith that the Library of Congress would do a good job." Finally ex-Senator Gore made an impressive speech, speaking as president of the National Library for the Blind, a quasi public institution. It is controlled by a private board, but receives some funds from Congress. He quoted from the report of the Librarian of Congress in 1910 to prove, as he thought, that the Librarian of Congress did not think the work with the blind belonged in the Library of Congress, and stated that the department had actually been moved to the District of Columbia Library and had later been taken back. He argued for the transfer of all the work with the blind in the Library of Congress to the National Library for the Blind, which came to the rescue of blind readers "in the hour of their need—I will not say in the hour of their abandonment."

Word from Dr. Irwin indicates that the Pratt bill with minor amendments (including an increase to \$100,000) will be reported favorably by the Committee.

Government Depositories

TWO BILLS have been introduced in Congress providing for a more elastic scheme for government document depository libraries. Ralph Munn, director of the Carnegie Library, Pittsburgh, and James B. Childs, chairman of the Documents Committee, are working together on these measures.

Reading Lists Available

READING lists on international subjects, to be used in connection with radio programs of the Columbia Broadcasting System, may be secured from the World Peace Foundation, 40 Mount Vernon Street, Boston, Mass.

Gold Star Club

THE SELMA BRANCH of the Fresno County Free Library, California, has organized a Gold Star Club. A special privilege is given to the twenty gold star winners of the Summer Vacation Reading Club. The Club met and elected their own officers and called themselves the Gold Star Club of the Selma Library, so that they might carry on their work in the library. They are learning to use the card catalog and other indexes by questions prepared for them in the way of puzzles, besides learning to read shelves and shelving books. They are now assisting other children in working the puzzles so they may become members of the "Winter Honor Roll," as gold stars are given when the required number of puzzles is complete. At the close of Book Week the Club held a character costume party in home arts room of the high school. A gold star was offered to the member and guest who succeeded in guessing the most characters correctly. Eighteen new members were initiated into the Club as they had won their gold stars to become members of the "Winter Honor Roll" since school opened.

Alumnæ Publications at Smith College

THE COLLECTION of Alumnæ publications at Smith College does not belong to the College Library, but to the Alumnæ Association. It is kept in special locked cases in the College Library and has a separate catalog, and if the library owns any of the publications the cards for them are filed in the library catalog. Miss Nina E. Brown, Archivist of the college, states that the publications are arranged in alphabetical order under classes, and magazine articles or pamphlets are put in Gaylord binders and stand on the shelves as books. The catalog is the main point of difference. It contains cards not only for the publications which are in the collection, but also for those not yet acquired; cards are arranged by classes first and then in alphabetical order by the name the girl bore when in college. The card, therefore, bears the year of the class at the left of the card, followed by the surname; this is given simply for purpose of filing. The rest of the card is written as any card is written, including the form of the author's name as it appears on the title-page. White cards are used for books written by the graduates of the college, buff cards for those written by non-graduates. The buff cards have *Ex* written above the class year, but are filed in with the other cards; a guide bearing the year stands in front of the cards for each class. Before each name is a

blue card which carries an orange ticker, so that an alumna, by pulling forward these tickers can see at a glance the names of her class who have been credited with publications. If she is interested in knowing the work of any of her classmates, she can turn the individual white cards. On this card carrying the ticker it is intended to paste the record of each author as given in the *Quinquennial Catalog* of the college. In case a given publication is not in the Collection, but a copy is owned by the library, the library call-number is placed on the card. A feature of this collection, which seems to vary from that in other libraries, includes any matter which passes through the printing press, i.e., music, book-plates, posters, reproductions of sculpture, paintings, etchings or any other art form. Publications appearing in newspapers are mounted and placed in Gaylord binders in order to save shelf space.

Free Upon Request

THE ABINGTON High School Library, Abington, Pa., has the following copies of scientific magazines available for librarians. Apply direct to the librarian, Miriam L. Kutz.

Scientific American: Jan. 11, 1919; Jan. 25, 1919; Feb. 8, 1919; Feb. 15, 1919; Feb. 22, 1919; March 8, 1919; March 15, 1919; March 22, 1919; March 29, 1919; April 5, 1919; April 12, 1919; April 19, 1919; April 26, 1919; May 3, 1919; May 10, 1919; May 24, 1919; May 31, 1919; June 14, 1919; June 21, 1919 (two copies); July 5, 1919; July 12, 1919; July 26, 1919; Aug. 2, 1919; Aug. 9, 1919; Aug. 21, 1919; Sept. 6, 1919; Sept. 13, 1919; Sept. 20, 1919; Sept. 27, 1919; Oct. 4, 1919; Oct. 11, 1919; Oct. 18, 1919; Oct. 25, 1919; Nov. 1, 1919; Nov. 8, 1919; Nov. 15, 1919; Nov. 22, 1919; Nov. 29, 1919; Dec. 6, 1919; Dec. 13, 1919; Dec. 20, 1919; Dec. 27, 1919.

Popular Science: Nov., 1920; Dec., 1920 (two copies); Feb., 1920; March, 1920 (two copies); April, 1920; May, 1920; June, 1920; July, 1920 (two copies); Aug., 1920; Sept., 1920 (two copies); Jan., 1921; May, 1921; Sept., 1921; Oct., 1921; Feb., 1922; March, 1922; April, 1922.

Directory of Special Libraries

COPIES of the new 1930 Supplement to the Directory of Libraries of Philadelphia and Vicinity, compiled by the Special Libraries Council of Philadelphia and Vicinity are available through the secretary, Helen M. Rankin, The Free Library of Philadelphia, at 50 cents a copy. With the Supplement, the 1926 edition of the Directory is brought up-to-date, listing 238 libraries.

Among Librarians

Bulgarian Library Organizer Visits America

MISS MARGARET DEMCHEVSKY, library organizer in the Ministry of Education, Bulgaria, is visiting in the United States for four or five months in order to study American library administration and methods. Her trip has been made possible by a grant from the Carnegie Endowment for International Peace through the A. L. A. It is expected that she will attend the Los Angeles Conference in June. Miss Demchevsky was educated at Constantinople College, where for several years she was librarian before attending the School of Librarianship, University of London. She speaks English, as well as other languages, fluently and was an official delegate from Bulgaria to the World Library Congress at Rome last June.

During her visit to the Yale University in March Miss Demchevsky gave a talk on Bulgarian libraries. In commenting on her talk later, Doctor Keogh wrote: "Her English is remarkably good, and her delivery was excellent. I have no hesitation in recommending her for talks elsewhere."

D. C. Numbers on L. C. Cards

THE PLAN for putting Decimal Classification numbers on Library of Congress cards, discussed for over twenty-five years, is at last in operation, with David J. Haykin, formerly Chief of the Catalog Department of the Queens Borough Public Library, named as head. The Library of Congress is giving generous help to the project. The printing of the numbers, the space and equipment it is providing, and the assistance rendered by members of the Library of Congress staff, are its principal gifts to the work. The D. C. numbers will first appear on cards for books in English currently cataloged by the Library of Congress. Later, it is hoped that the number may be added to cards as they are reprinted, and eventually the work may be extended to include books in foreign languages. It is planned to give alternatives where a book may be classified more than one way, for example, in the case of a book on a special aspect of a subject or a volume of a set.

Charles H. Hastings of the Library of Congress and Eliza Lamb of the University of Wisconsin (formerly of the University of Chicago) Library had the difficult task of planning the work and, with the cooperation of the

A. L. A. office, of promoting it. In addition to help from them, the project is having the benefit of advice and help from Dorkas Fellows and her staff in the office of the Editor of the Decimal Classification. Mr. Haykin began his work April first. Before he came to Queens Borough Public Library as Chief of the Catalog Department and instructor in the Library School, he was Head Cataloger in the New York State Library and in the Library of the University of Nebraska in various capacities.

Miscellaneous

SERENA C. BAILEY, Atlanta '18, assumed the duties of her new position as librarian of the Lakeland, Fla., Public Library on Jan. 15.

ELIZABETH K. CLARK, Pratt '07, now known as Sister Veronica, O. S. A., has returned to library work with the permission of her Order and has accepted a temporary position in the Newberry Library in Chicago.

FANNIE COX, Wisconsin '14, was married on Dec. 17 to Gardner Hendrie of Philadelphia. Mrs. Hendrie continues her appointment as a member of the faculty of Drexel Institute Library School.

EMILY C. KELLEY, Simmons '29, has joined the staff of the Clark University Library, Worcester, Mass.

GENEVIEVE MCCROHAN, Simmons '29, has been appointed a cataloger at the Baker Library, Dartmouth College.

EDA M. PERRY, Pratt '03, was married on Jan. 28 to Rev. James Arthur Lytle.

CHARLES E. RUSH, librarian of Teachers' College, Columbia University, has been designated as A. L. A. representative and speaker at the meeting of the American Alumni Council in Amherst, May 2.

HELEN RUSS, Simmons '29, has accepted a temporary cataloging position at the Bates College Library, Brunswick, Me.

ELEANOR NIMMO WILSON, Riverside '28, former librarian of the Public Library, Pawhuska, Okla., will succeed Frances Strang, who died Jan. 18, as county librarian of the Riverside, Cal., Public Library.

HAROLD A. WOOSTER, Librarian of the Brockton Public Library, has been appointed librarian of the Scranton Public Library, Scranton, Pa., as the successor of the late Henry J. Carr, and will take up his new duties by June 1.

Opportunities

This column is open to librarians

Wanted—Librarian in Mid-Western town of 10,000. College and library school training required. D-19.

CROWELL'S LATE SPRING BOOKS

HEROES OF THE FARTHEST NORTH AND FARTHEST SOUTH

By J. Kennedy Maclean and Chelsea Fraser. With 32 illustrations and 34 maps. \$2.00

This popular book has been entirely recast, so that the reader is assured of a complete picture not only of the conquest of the North, but of the South as well.

THE RADIO AMATEUR'S HANDBOOK

By A. Frederick Collins. Revised and Reset, with 100 new illustrations. \$2.00

This standard book on Radio has been continuously reprinted. The sixth edition is in many essentials a new work.

AMERICAN CHARITIES AND SOCIAL WORK

By Amos G. Warner, Stuart A. Queen (University of Kansas) and Ernest B. Harper (Kalamazoo College). \$3.75

The "charities" of 1893 and the "social work" of 1929 display striking differences. Professor Queen has contributed an introductory section giving the reader a perspective of the whole field. Then comes the Warner material, which is followed by a survey of recent social work.

IN SEARCH OF AMERICA

By Lucy Lockwood Hazard, Associate Professor of English, Mills College, California. \$3.75

A systematic attempt to trace the main-springs of our national life through our literature. Full bibliographies are included.

THE EDITORIAL PAGE

By Robert W. Jones, Associate Professor of Journalism, University of Washington. \$2.00

A textbook for schools of journalism. While the book necessarily contains much of a technical nature, there isn't a line of it that cannot be read with both pleasure and profit by the general reader.

AN APPROACH TO POETRY

By Phosphor Mallam \$1.50

Is written to help lovers of verse to a clearer perception of the beauty of what they read, and to enable them to distinguish poetry from metrical prose.

THE SCIENCE OF BIOLOGY

By George G. Scott, Professor of Biology, College of the City of New York. Revised and Reset. Illustrated. \$3.75

New material has been added, and the illustrations also have been made over. Profiting as it has by actual class-room use during the past five years, the work can be used now as a text with still greater confidence.

FIFTY FAMOUS LETTERS OF HISTORY

By Curtis Gentry. \$2.50

These fifty letters run the widest gamut of human emotions—war, love, intrigue, hate, disappointment, bitterness, revenge—the passions that have moved men and women for all time.

PARLIAMENTARY LAW

By Edith Theall Chafee. A Book of Rules of Order. \$1.00

The Why as well as the How of each parliamentary move is explained, so that even the beginner gets a clear conception of what it's all about.

✿ This number devoted to Special Libraries has been arranged through the co-operation of Florence Bradley, Librarian of the Metropolitan Life Insurance Company, Rebecca Rankin, Librarian of the Municipal Reference Library, and Mary Louise Alexander, Manager of the Library Research Department of Batten, Barton, Durstine and Osborn. We are grateful for their help! Miss Manley's complete survey of Business Library Work in Large Cities proved too lengthy for JOURNAL pages so a summary is given in this number and the entire survey, printed by the Newark Public Library, will be supplied at fifty cents a copy upon application. Apply direct to Newark for copies.

✿ Besides the two previously announced articles on budget cuts scheduled for May first, the report of Library Legislation for 1928 and 1929 prepared by William F. Yust, Chairman of the A.L.A. Committee on Legislation, will be given.

✿ Are you finding what you want in THE LIBRARY JOURNAL? We welcome suggestions and comments. B. E. W.

*Snead Standard Bookstacks, Standard Statistics Company Library, New York City,
Miss Eleanor S. Cavanaugh, Librarian*

Small Bookstack Installations made by Snead Experts are as carefully planned as those for the largest libraries

Bookstack installations in smaller libraries require skillful planning if the room is to appear spacious and yet possess the necessary practicality. That these results are accomplished by Snead Bookstacks is attested by their extensive use in libraries of smaller dimensions.

Libraries and Business Men

A Symposium

THE RELATION between the business man, the public library, and the special library grows more and more interesting to our profession at large. In the beginning, the person in charge of a business library was not always a librarian from the standpoint of training or experience, but the application of library methods to business needs was found practicable and necessary, and these early experimenters pointed the way to one of the most important expressions of library service.

It is amazing to the special librarian who stops for a moment to reminisce about her early days in public library work that, although it has always been the business men who supported the libraries, it was never the business men's interests that were supported by the library's books. We expect to find in all public libraries special collections of books for children, even to the half of the building. We know how the school student, the teacher, the social worker and club woman must have an alcove or at least a reserved shelf of books. In sheer numbers, business men outrank any of these groups, yet how long was it before they received any portion of the book budget and how many public libraries even now have attempted to find out what the business man really wants? How many have purchased the comparatively few reference tools found in all business libraries, and, finally and most important, have installed people sufficiently familiar with this special source material and with our modern commercial life to give intelligent, quick service? So few public libraries have done these things that special libraries have been organized in great numbers to serve the needs of various industries and of individual firms. The convenience to a company of owning its own informational mate-

rial is, of course, a large factor in the establishment of special libraries, but far more important than owning books is the special knowledge their librarians have which enables them to apply printed information to particular business problems, to adapt library methods to special conditions, cut red tape, and speed up service.

Several forces have been at work in the development of books into business tools, and their use into a routine part of business organization. Not so very long ago good business books were scarce, while now there is a real literature on nearly every phase of industry. Ronald Press, McGraw-Hill, and many other publishers are building fine reservoirs of practical information contributed by the real leaders of our industrial world; and business men have learned that it is an economic waste not to profit by the experience and knowledge of these leaders. Another factor is the modern business man himself. We, as librarians, must remember that today the majority of the men and women in business come from the great universities, where the wealth of libraries is taken for granted and the book habit is acquired with their college education. While it may once have been a source of wonder that Andrew Carnegie, a great business man, should have become the patron saint of libraries, we now accept as natural the business man's reliance upon printed information and his faith in libraries.

There is a distinctly different technique required in the administration of a business library. Rules which must necessarily hamper the fullest use of public library material have no place in business; for instance, "whole" copies of magazines are never sacred, but pages may safely be ripped out; books can be purchased by messenger and issued to the waiting person within ten minutes, deferring the formality of a catalog record until the book is returned; when

This symposium arranged for and introduction written by Mary Louise Alexander, Manager of the Library Research Department, Batten, Barton, Durstine & Osborn, 383 Madison Ave., New York City.

information is not easily available in print, telephone calls or visits to other sources can be made. Ingenuity is the keynote of special library service. The librarian cannot give up simply because her catalog or files fail to supply the answer. Then, too, the business librarian must evaluate the information furnished because a business man cannot take time to compare reports, weigh the sources and decide which information he should trust; that is the librarian's job. Business librarians, because they concentrate on certain subjects, become authorities on this highly specialized source material, as few public librarians can ever hope to find time to be.

But there are certain broad business subjects that might be adequately covered by all public libraries, and special librarians would gladly share their knowledge of the most useful books, magazines and pamphlets in their fields if public librarians sought this help in building useful collections. In large cities the great numbers of business men in each field of endeavor justify the building of an adequate special collection on such subjects as banking, real estate, retailing, advertising and others. In smaller cities there are usually a few outstanding industries, as furniture in Grand Rapids, clocks in Waterbury, or insurance in Hartford, and the public library could well afford to spend time and money cultivating such groups. The splendid work being done by the Business Branches in Newark, Indianapolis, Los Angeles, Minneapolis and elsewhere show that it is not difficult to attract the business man when he once learns he can obtain help.

Some people entirely unacquainted with the work being done by business libraries seem to feel that special librarians are file clerks or stenographers who have been promoted to care for their company's records. Instead the majority of the members of the Special Libraries Association are trained librarians with many years' experience in public libraries. The fact that some have branched off has not in any way changed or lessened our interest in the library profession. We make constant use of our public libraries, and these larger collections will always supplement the business libraries, and the cooperation of public librarians always will be of the greatest possible help in our work. I believe it is true that a firm which maintains its own private library makes greater and far more intelligent use of the public library in its community than do firms which have no library. Since this use is always made through their own librarians, it is important that there should be the finest sort of understanding and friendliness between special and public librarians everywhere. The public li-

brary needs the financial support of large business corporations, and that support will be given much more willingly if a company feels that it has, or could, benefit in some degree. There is no overlapping of functions between the public and special libraries, no danger that one will usurp the place of the other. If there were a more intelligent dovetailing of these two important branches of library service, it would be for the good of libraries as well as of the business man.

In some fields special libraries are more firmly intrenched than in others, and they will increase in number as fast as resourceful, wide-awake librarians become available and are able to "sell" the library idea to more companies. The membership of the Special Libraries Association indicates nearly 1000 well-organized private libraries, and there are undoubtedly many more of which we have no record. We know, for instance, that more than 100 of the largest banks in the country have their own libraries. The National City Company of New York owns about 50,000 volumes and has a staff of seventeen people. Standard Statistics Company, another important financial library, employs sixty-five people and has a collection of 10,000 volumes. In most of the big newspapers of the country the term "morgue" has been discarded, and these data files have become truly fine libraries. The important insurance companies have long maintained their own libraries, that of the Metropolitan Life Insurance Company being larger in numbers and broader in scope than many a public library. A staff of thirty-three administers a combined service of circulation and reference work for the employees of the Metropolitan and gives the most expert research service on every phase of business and industry.

The following descriptions of some of the important groups in S. L. A. suggest the activities of a few typical business libraries and show the extent to which certain industries have accepted the library idea. There is much that the public libraries can do for business; there are golden opportunities for the establishment of special libraries. It is hoped that this article may encourage both branches of the library profession to further development of this stimulating, satisfying work.

Financial Libraries

By Eleanor Cavanaugh

Librarian, Standard Statistics Co.

A GREAT many people undoubtedly wonder just what a financial library is, what makes it different from other types of special libraries, and what place a library has in a money-making institution. A financial library may be one

maintained either in a bank, in an investment house, or in a financial publishing house whose business it is to supply banks, investment houses, manufacturers, brokers, and sometimes individuals with information services. Libraries are maintained in these institutions because the firms have felt a great need for some sort of centralized information within their organization—a need for some department, specially organized to supply their own employees and their clients with specialized up-to-the-minute data by which their business may be more efficiently and effectively conducted.

The firm housing a financial library is primarily interested in banking, finance, money, credit, prices, business conditions, conditions in basic industries such as automobile, petroleum, iron and steel—and vitally interested in the stock market. It is the librarian's job to collect and have available for instant use all data on gold movement, Federal and State regulations governing the different phases of business, production figures, foreign trade, interest rates, money in circulation, brokers' loans, balance of international trade, and a thousand and one similar subjects. At some time or other there is a keen interest in new industries, production, consumption and foreign trade in established industries, in bull or bear markets, panics, tariff, depressions, and at all times in the stock market which is more or less the pulse of financial libraries. The above subjects, and many others covering the whole range of our business and financial structure, make up the librarian's day. To function properly, the librarian of such a library must know her company's organization, its history, scope, its personnel, its new projects and future plans. She must learn the language of her trade and acquire as much background as possible to give the best service to the organization which she serves.

Early Libraries

The first financial library in New York City of which there is a record is probably the one started in 1879 in the firm of Fisk & Hatch. In 1885 this firm was known as Harvey Fisk & Sons, and the collection is now known as Pliny Fisk Collection and is owned by Princeton University. It is a collection of 6000 books and 25,000 pamphlets, and has an extensive file of corporation reports and clippings. Another early library was the "Investors Library," organized in 1885 and taken over in 1906 by Marvyn Scudder, who leased it to the National City Bank until 1919, when the collection was donated to Columbia University. This collection, which has about 500,000 volumes, is still housed in the Business Building at Columbia and is known as the Marvyn Scudder Business

Library. Among the investment houses in New York City which maintained libraries as long as twenty to twenty-five years ago are: Imbrie & Company, which later sold its collection to the Central Union Trust Company, now known as the Central Hanover Trust Company; Robinson & Company, who recently merged with Sutro & Company; J. P. Morgan & Company; Speyer & Company, and Kuhn, Loeb & Company. These were probably the first investment houses maintaining libraries of this kind.

However, the greatest impetus given this type of library was during the war. It was at this time that, among others, the libraries of the Bankers Trust, the Guaranty Trust Company, The American International Corporation, and the Standard Statistics Company were organized. Today there are well over 100 financial institutions maintaining libraries. The majority of these, incidentally, are in New York City. The National City Financial Library, which was organized in 1907 as part of the bond department of the bank, has grown until it now has 50,000 volumes, with seventeen people on the library staff. Most of the reference work done by this library is for its own company and its branches. Inasmuch as the National City Bank has branches all over the United States and foreign countries, the work of this library has an international aspect. The Guaranty Trust Company library was started in 1916 and now has a book stock of 32,000 volumes and a staff of sixteen. It is primarily a research library and a private one, but does serve customers and clients of the company. It has a corporation file on about 40,000 companies. A large part of the work of this library is collecting financial documents from foreign countries, municipalities, and provinces, in order that the financial status and history of these may be known before the bank undertakes to underwrite foreign issues.

The library of Standard Statistics Company was officially organized in 1917, although it had been part of their Statistical Department for ten years previous to that. It was established to serve the members of its editorial and statistical staffs, as well as to supply the clients of the company with pertinent information regarding banking, finance, business conditions, economic trends and the stock market. It now has a book collection of 10,000 volumes and a staff of sixty-five people. This library has what is probably the most expensive "Corporation Files" in any library of its kind, having complete financial histories of 50,000 companies in which there is an active investment interest or speculative interest, plus many more thousands which are less active. Supplementing these "Corporation Files" is a clipping file

which dates back to 1909 and contains complete data on hundreds of thousands of companies in business in the United States and foreign countries, but particularly in the United States. The work of this library is to keep its editors and statisticians and research department and other staff members supplied with the latest information regarding all phases of business and finance; to write special reports at times on industries or business, and to serve as a clearing house of information to the firm's thousands of subscribers. Last year this library answered over 150,000 inquiries, most of which required some type of special reference or research work. This library has an inter-office automatic telephone system which handles as high as 500 to 600 telephone calls per day. These are in addition to the personal visits to the library.

Some of the other banks and financial institutions maintaining financial libraries are: Bankers Trust Company, Irving Trust Company, J. P. Morgan & Company, Redmond & Company, H. L. Doherty & Company, American Bankers Association, Dillon Read Company, National Bank of Commerce, Moody's Investors Service, Wall Street Journal of New York City, Union Trust Company of Cleveland, Federal Reserve banks in all twelve districts, Bank of Italy in San Francisco, Halsey Stuart Company of Chicago, Old Colony Trust Company, and Kidder Peabody of Boston.

What These Libraries Do for Their Firms

By knowing the organization and its needs thoroughly, the special library can be the eyes and ears for its firm, and can keep ahead of all possible demands for information. It does this by systematic and intelligent collection of materials pertinent to the business of that particular organization; by knowing the sources of information and by being able to apply the information gathered to the needs of the firm. If the library is in a bank, then the librarian must know how a bank operates, be familiar with banking terms, be ready to supply the credit department with complete corporation files and services covering up-to-the-minute information on industries; the Trust Department also depends upon the same files; the Bond Department uses the library for the preparation of all its circulars on financial offerings as well as in many other ways; the Statistical Department is the one most closely allied with the library and uses it more than any other department; and the Publicity Department depends upon the library to supply data upon which to build its advertising campaigns.

If the library is in a brokerage or investment

house, then the librarian must concentrate on the stock market and on securities, particularly those in which the investment house specializes, as municipal or public utility or foreign issues. Other subjects of vital and constant interest are stock price indexes, changes in Blue Sky Laws, changes in the regulations of existing stock exchanges, new capital issues, information on bond maturities and defaults, and dividend payments.

If the librarian is in a financial publishing house, then she must concern herself with all of the above subjects plus a great many more. She must have an instinct for news and watch State and Federal legislation affecting banking, insurance, public utilities, etc. She must be sure that she always has the latest information regarding the activities of the Federal Trade Commission and all stock market operations. And the alert financial librarian will be ready to answer questions on any new developments at a moment's notice, as, for instance, the new Bank for International Settlement, gold movement of foreign countries, budgets, mergers and financial statistics of States and cities. Unlike the public library, this information is not always obtainable in books. In fact, books form the less important part of all financial libraries because the business man of today is not interested so much in what happened last year as in what happened yesterday, what is happening today and likely to happen tomorrow. The only way in which such information can be acquired is through current newspapers, trade journals, government documents and research publications of all sorts. The backbone of every financial library is its "corporation files," by which is meant the annual reports of railroads, public utilities and industrials, Interstate Commerce Commission dockets, circulars describing stock and bond issues, mortgages and indentures. Collecting and organizing this type of material is the first and most important function of a financial library.

The Future of Financial Libraries

Probably no class of business men have been so quick to recognize the library as an important asset and integral factor in the growth of their particular business, as have those in the financial field. The financial library is no longer an experiment. This is proved (if proof be necessary) by such facts as these:

Rarely has such a library, once established, been given up.

There are more financial libraries in existence than in any other single class of special libraries, and each year sees a steady growth in their numbers.

Hard-headed business men have seen fit to establish and maintain libraries within their own walls and house them in the most expensive office space in the

world, and also to provide adequate space for their future growth.

The work of these libraries has been recognized by such organizations as the American Bankers Association and the Investment Bankers Association, who have made a financial library exhibit an important part of their annual convention each year.

And still there are hundreds of banks and thousands of investment houses that have not yet organized their own library. The field is broad, seeds have been sown, and the future of financial libraries is a bright one indeed.

Industrial Libraries

By Elizabeth Wray

Librarian, United States Rubber Company

EVERY special library in the industrial field is born of the necessity of the industry it serves. This necessity, strange to say, is not the result of geographic placement, for industries operating in or administered from such rich library centers as Boston, Chicago, Cleveland, Detroit, New York, Philadelphia, and San Francisco feel the need as keenly as those in smaller towns. Though private collections maintained by commercial concerns are scattered through nearly every State from coast to coast, more are found in the eastern sections of the United States and Canada. New York, the largest manufacturing city in the country and certainly well endowed with public libraries, has also the largest number of special libraries. Indeed, in the metropolitan district of New York alone there may be seen a complete cross section of the entire special library field.

Large industries with many interests, such as the American Telephone & Telegraph Company, the E. I. du Pont de Nemours Company, Consolidated Gas, Standard Oil, Eastman Kodak Company, General Electric Company, A. D. Little Company, New Jersey Zinc Company, and the United States Rubber Company, to name a few, require not one but several special collections to cater to their varied needs. It is usual in these companies to find a general reference library serving as an information center for the officers and the staff, while separate and very special legal, patent, engineering or chemical research libraries are maintained in addition. Private commercial collections run the entire scale in size, from thousands of volumes found in the long established technical libraries serving some industries to the new and small working collections in the latest addition to the field. What is true of any library is particularly applicable to the business library; its worth cannot be measured by the number of accessions, but rather by the

resourcefulness of the librarian and her intensive knowledge of the contents of the collection and of outside sources both public and private. Any executive may have access to the same standard books and pamphlets in his public library, but as time is nearly always a factor in the reference work done for the business man, his special demands can be satisfied day after day only by his own private collection.

Business is becoming more and more competitive, and the progressive executive realizes that successful policies must be founded on the accurate and exhaustive collection and interpretation of facts, facts not only of his own industry or concern, but the daily developments in other industries, domestic and foreign data on broad economic changes that may have bearing on his operations either directly or indirectly. Therefore, many industries are equally interested in the same basic material at the same time, and it would be next to impossible for even the richest and largest public library to give each the amount of attention and service required. Some one has aptly said in this connection that, while the public library may serve all of the industries some of the time, it takes the special library to serve some of the industries all of the time.

Information flows through three main channels: by word of mouth, through the periodical press, and through books and encyclopedias. Business men cannot wait for information to crystallize in book form, and one field in which the special librarian excels, I think, is in her ability to ferret out the reliable sources of information in these successive stages of fact-flow and to give the proper value to each.

Data used in business must be definite. Special library questions are seldom answered by a book on the subject, but rather by some pointed paragraph in that volume that is found and marked by the librarian or by a digest of several volumes or articles. The data must be up to date, literally, the last word. With tariff changes boosting or depressing commodity prices overnight, yesterday's quotation without today's knowledge of the latest Federal action would be worthless. Again, daily information on patent decisions handed down in one section of the country may change the course of litigation in preparation in another. Where no general statistics on a subject appear in print, the resourceful librarian can and does appeal directly to some authority in the trade for a fairly representative estimate that will serve the immediate emergency of her firm.

Industries are willing to pay for useful information, but they want value and not waste. Formalities of purchase procedure and of cata-

logging never stand between the man and the material. Flexibility of service is the keynote, and all the resources of the collection are at the command of the user. Having few conflicting interests to serve, the special librarian can assemble quickly an immense amount of pertinent information on a problem, can arrange it to suit the case, mark the pithy passages and, if necessary, can as speedily discard it when it has served its purpose.

Sometimes, however, a problem is germane to the work of several departments in the company, as, for instance, the subject of pensions or bonus plans for employees. This may engage the attention of the legal department, the tax expert, the industrial relations chief, the factory and sales managers, the accounting department and the publicity department. Then only a discreet division of the available material and a hasty duplication by purchase and loan keeps each department happy and informed.

Much of the work done by the special librarian is confidential. To serve her firm thoroughly and quickly, she must have their complete confidence and a full understanding of the problem under consideration. These are facts which the executive could not or would not place before the public librarian. Knowledge of the work of the many divisions of the concern leads the alert librarian to the proper outside sources, so that no interest of the company is sacrificed. Information gathered for one division on some phase of a subject often has a bearing on the needs of another department already known to the librarian. Centralized information thus benefits the whole organization.

Where the librarian is in close contact and full accord with the development and research divisions, her knowledge of their inquiries and work helps her to sense in advance what should be added to the collection to fit future demands. A series of questions on a project as it progresses from an idea to a commercial product points the way to the assembling of further information on uses of the new product, advertising methods applicable, how handled or packaged, sales policies of competitive lines, price trend, what magazines cover the field, etc.

The special librarian, operating as she does in a neutral service department, is often approached by members of the staff with questions they would not ask of each other, and she can be the means of bringing together men who can help each other within the organization. Every department in an industrial concern can find help of some kind in the well-managed special library. There are facts about new developments affecting the use of the products for the technical advisor, statistics of little

known raw materials or details of new equipment for the purchasing department, up-to-the-minute financial information for the credit man, the affiliations of leaders of interrelated industries for the sales executives, the checking of the accuracy of statements for the advertising copywriter, the latest air transport time schedules for the traffic manager, methods of inventory control for the stores division, cost of living figures for the employment head, tracing the movements of debtors for the collection department, data on industrial hazards for the safety executive, changes in Workmen's Compensation laws for the insurance division, the incidence of certain diseases in industry for the company physician, and endless facts on places, products and customs for the export chiefs.

When one realizes that the people served by an industrial library often number thousands, scattered over this country and sometimes over the globe, that in many other instances these thousands are housed in the same building or plant with the library, it is easy to see that the opportunities for service are limited only by the librarian herself.

The work is fascinating and the field large, with only the surface scratched so far. There are hundreds of concerns that need and can afford a special library, and they are slowly discovering their need and reaching out for help. Every business branch of a public library is a selling point for a private special library. Learning to use the fine service of the special library within the public library is the first step toward wanting and establishing another private industrial collection.

Insurance Libraries

By Florence Bradley

Librarian, Metropolitan Life Insurance Company

ASK AN insurance man if he thinks his office needs a librarian and he will say "No. But if you are interested in things like that, possibly you happen to know where I can get some information on —?" That little word "happen" is very interesting to the business librarian because there has seemed to be a general impression on the part of business men that getting information on practical subjects is a matter of chance, like remembering quotations or opening the *Bible* for a text. Organized information, business analytics, magazine indexes, knowledge of source material—what have they to do with a library or an insurance office? Until the last five years—apparently nothing, but now it begins to look as though the librarian and the insurance man were going to meet and at least have a bowing acquaintance.

To begin with, every insurance company must collect its own State commission reports, and preferably those of three, four or more States. Bulky they are and merely of depository value after the current year. Therefore, picture sets of them in the president's office, in the law division, in the actuarial department, and in the statistical bureau, to say nothing of stray copies in supervisors' and secretaries' offices. They would stretch for miles and miles of shelves unless conserved in one place—a library. Next, there are the magazines, some seven or eight important ones without any index covering them from the insurance man's point of view. It takes hours to page six months of *The Eastern Underwriter* to find an article, even though it is clearly remembered that the headline was midway of the page and on the left. In spite of the claim of most insurance men, that their magazines are of no real importance, they do want to verify certain articles just as frequently as any other business man, and therefore need a catalog. As to books, insurance men claim they do not read except occasional things on psychology or management, or economics, or business correspondence or biography when they hear of a good one like Ludwig's *Napoleon*. Does that not suggest a book collection? Therefore, what kind of librarian does an insurance company need? None but the most competent, imaginative and experienced that can be found, with good library school training and experience in public library work, if possible.

If an insurance company carries educational work for its agents, the library frequently functions under that division, but the beginning point has also been within investment, welfare, statistical or personnel departments. Wherever the executive happens to belong who sponsors the library, there will the librarian be attached.

It is interesting to note that insurance companies that began their libraries many years ago have continued them for the most part. The older established company libraries are the Phoenix Mutual Insurance Company in Hartford and the Metropolitan Life Insurance Company in New York. More recent ones are the Connecticut General Life Insurance Company in Hartford, and the Maryland Casualty Company in Baltimore while the newest and one of the most interesting is the Massachusetts Mutual Life Insurance Company in Springfield. Throughout the country there are local insurance societies that have very excellent libraries, notably the ones in Boston and New York of which Daniel Handy and Mabel Swerig are the respective librarians.

We may say that insurance libraries not only

build up valuable files of insurance reports, magazines and books but also specialize on some other one phase of work that has a direct bearing on the company's interests. Sometimes it is educational work with the agents who want to specialize in up-to-date selling methods. Sometimes it is business economics in connection with industrial developments.

The insurance librarians for some years have found themselves in such a minority that when they tried to organize as an insurance group within the Special Libraries Association they found it possible to have only the most informal programs at their round tables. Now they are steadily increasing in numbers, and find it necessary to answer so many questions as to the value of having a library within an insurance company that they are working this year on the compilation of a booklet that will go into all the various phases of administration. This will be the first contribution of the insurance group to professional literature. Their work has just begun.

The Newspaper Library

By William Alcott

Librarian, The Boston Globe

THE NEWSPAPER library is a product of the nineteenth century, and its beginnings may be traced in the first half of that century, although its great development has come in the last fifty years. When Charles Dickens arrived in Boston in 1842, on his first visit to America, he found delight in the newspaper files of English newspapers in the office of his host, Nathan Hale, editor of *The Boston Daily Advertiser*. *The New York Herald* started a library in 1845, and *The New York Tribune* in 1846. With the passage of the years the newspaper library has become the newspaper's memory.

The number of newspaper libraries in the United States and Canada somewhat exceeds 300, it is estimated. Most of the large newspapers maintain a library or reference room, although there is little uniformity in the name of the department. Sometimes the department is known as the morgue, or the graveyard, or the reference room, or library, and the less conventional names are used without conscious inferiority. For instance, on the twenty-fourth floor of *The Chicago Tribune's* beautiful tower is the newspaper's reference library, with a good collection of books, pamphlets, magazines and clippings, while twenty stories below, adjoining the city editor and the news room, is the morgue with its million clippings, hundreds of thousands of photos and metal cuts. Newspaper libraries are not confined to the newspaper offices of the larger cities, nor only in the East. Seattle, Portland, San Francisco and

Los Angeles contain some excellent newspaper libraries. In Fresno, Cal., Fargo, N. D., Sheboygan, Wis., Ironwood, Mich., Decatur and Peoria, Ill., Akron and Dayton, Ohio, Harrisburg, Pa., Syracuse, N. Y., New Haven, Hartford and Waterbury, Conn., Springfield and Worcester, Mass., Manchester, N. H., and Portland, Me., are also to be found newspaper libraries.

The modern newspaper library contains a good collection of reference books, but the distinctive things of such a library are the vast and valuable collections of clippings, photographs, metal cuts, negatives and mats. *The Boston Globe* library contains about 5000 reference books, 2000 pamphlets, 1,500,000 clippings, 500,000 photos and 70,000 metal cuts. *The New York World* has a collection of 11,000,000 clippings, probably the largest collection of the kind in the world. Both *The Philadelphia Public Ledger* and *The New York Daily News* have photo collections numbering about a million and a half.

Some of the conspicuous newspaper libraries of the country were established as follows:

New York Herald...1845	Indianapolis News ..1904
New York Tribune...1846	St. Paul Dispatch...1906
Philadelphia Telegraph 1856	Kansas City Journal...1907
Boston Journal 1861	Christian Science Monitor 1908
New York Times...1867	Newark Eve'g News...1910
Boston Herald 1876	Philadelphia Public Ledger 1914
Boston Globe 1887	Milwaukee Journal...1915
New York World...1889	Cleveland Press....1916
Boston Transcript...1890	Buffalo Eve'g News...1920
Chicago Daily News...1895	Washington Evening Star 1921
New York American...1899	Cincinnati Times Star 1923
Chicago American...1900	Minneapolis Journal...1902
Cincinnati Enquirer...1902	Boston American ...1904

Newspapers, first of all, serve the public through their news columns, and many have, in addition, a department of questions and answers, sometimes on general information, and sometimes on a special subject, like *The Globe's* "People's Lawyer," which appears weekly. Some newspapers give a very extensive service through their libraries by mail and telephone. *The Baltimore Sun* welcomes the visits of school children in groups into the library in pursuance of their school work. Other newspapers keep the library door locked to all except staff employees.

The collections of clippings, properly classified, have a tremendous value, and in three respects they form the most complete sources of information among all libraries. These three superiorities are in biography of living persons, in the record of local news or local events, and in the history of local politics. In recent years there has been a large increase in the use of special libraries by newspaper libraries and in

the use of newspaper libraries by both public and special libraries.

In two other distinctive ways newspapers and their libraries or related departments have rendered valuable service to public and reference librarians, and that is in the preparation and publication of indexes and almanacs. Published indexes are now available for the last 140 years for English news, and for the last 95 years for American news. Published indexes are as follows:

1790-1920—Palmer's Index to The London Times.
1906 to date—The London Times Index.
1835-1918—New York Herald Index (four copies made).
1851-1913—New York Times Index (written).
1875-1906—New York Tribune Index (printed).
1913 to date—New York Times Index (printed).
1926-1927—Michigan News Index, by Adrian Daily Telegram (printed).

In addition, many newspapers have written indexes of their papers.

The newspaper almanacs are an almost invaluable contribution to library service. *The* (New York) *World Almanac* and the *Chicago Daily News Almanac* are quite indispensable in any reference library. Newspaper almanacs are available as follows:

1838-1914—New York Tribune Almanac and Political Register.
1857-1914—Texas Almanac (not published every year).
1872-1878—New York Herald Almanac.
1876-1915—Baltimore Sun Almanac.
1885 to date—Chicago Daily News Almanac.
1886 to date—(New York) World Almanac.
1886 to date—Brooklyn Daily Eagle Almanac.
1887 to date—Providence (R. I.) Journal Almanac.
1917 to date—Maryland Almanac (successor to Baltimore Sun Almanac).
1925 to date—Philadelphia Bulletin Almanac.
1925 to date—Texas Almanac, published by Dallas Journal.

One of the strange incidents of library history is that although the newspaper library antedates the formation of the first library association, its discovery as a source of vast information is of recent occurrence. Special Libraries Association was the first to enlist their interest in a library association movement, and the first conference of newspaper librarians ever held was in 1923 at the annual conference of Special Libraries Association.

By Mary Louise Alexander

Manager, Library Research Dept., Batten, Barton, Durstine and Osborn

ADVERTISING is everywhere in this modern civilization of ours. It fills (and its support makes possible) the fine magazines and newspapers we have in this country. Advertising lines our highways and lights Broadway at night. It fills the air, allowing lonely isolated

families, and city folk as well, to hear the finest music or newest jazz, via the sponsored programs on the radio. Advertising is a popular form of education which teaches people to want the good things of life—labor-saving appliances, healthful food, more attractive and comfortable homes. Good advertising is based on facts, and the advertising profession is a constant user of printed information. There are more than ten thousand firms whose products or services are advertised nationally in addition to the vast numbers of purely local advertisers, and it is estimated that fully a billion and one-half dollars are spent for advertising in a single year. The major part of this advertising is prepared and placed by advertising agencies, of which there are said to be some fifteen hundred in the United States. Of these, however, probably about 10 per cent are the leading and important agencies that handle at least three-quarters of all the national advertising done in this country. The greatest producing centers, or advertising agency headquarters, are New York City and Chicago, but many other large cities, such as Philadelphia, Boston, Detroit, St. Louis and San Francisco, are also the homes of a number of important agencies.

These organizations range in size from fifteen or twenty people to six or seven hundred, but each to a varying degree performs the same functions. A complete advertising campaign consists of these steps: An analysis of the product to be advertised; a survey of the market it reaches (and this often involves a house-to-house, or store-to-store canvass throughout the country to learn buying habits and the standing of competitors). Next the agency must study publications and choose those best suited to carry the message to the greatest number of consumers. Only then is the advertising agency ready to write copy, buy art work, have the advertisement set up in type, and forward it to the publisher. In addition to the standard departments of Marketing, Media, Copy, Art, etc., which perform the functions just mentioned, many advertising agencies also have Outdoor Bureaus which plan and produce posters and signs, and Radio Departments which plan music and entertainment, hire musicians and actors, rehearse them and handle the details in connection with radio advertising.

Every one of these departments needs the services of a trained librarian. The Marketing man must have full information on population, trading areas, buying power factors such as automobile owners, wired homes, incomes, rents, as well as data on all phases of distribution. Census volumes are only the merest beginning in this market data search. Experienced librarians make use of all of the statistics prepared

by the research departments of large publishers, the figures sponsored by leading trade associations, the publications of the many special bureaus in Washington, of schools of business and other research organizations. For the Art Department, the advertising library must be ready to supply every variety of picture—costume, period furniture, animals, brides, plumbers, foodstuffs or skyscrapers. It must supply the Radio Department with musical information, classic and modern, composer and composition. And the copywriter's needs lead the librarian to history, literature, biography, science and into every trade and industry. It can be seen from this that the term advertising library must never be understood to mean one covering only the subject of advertising—it is in reality a cross-section of all special libraries.

But in spite of all these informational needs, common to every advertising agency, comparatively few have yet organized their own libraries. In New York City we know of only twelve or fifteen companies that maintain their own advertising libraries, among whom are: J. Walter Thompson, H. K. McCann, Young & Rubicam, Erwin-Wasey and Batten, Barton, Durstine & Osborn. There are several advertising libraries in the Middle West, such as that of the D'Arcy Company in St. Louis and Campbell-Ewald in Detroit. These libraries vary from two people to a staff of twelve in one New York agency. The number of books in these libraries is not necessarily large because current magazines and data files are far more vital. In Batten, Barton, Durstine & Osborn, more than a thousand different magazines are received regularly and clipped and the data file maintained covers more than three thousand subjects, chiefly commodities, sales and advertising. There is a file of many thousands of pictures and complete territorial information. Material is loaned freely to the people in the company and to clients, but usually inquiries are presented to the department and the librarians study the subject and submit a written report. Librarians in this field easily earn the title of research workers, for the subjects they study range from welding through dietetics, cosmetics and aeronautics to the latest theory of electro-dynamics.

Here, then, is a fertile field for library development. All advertising agencies have a flood of valuable free material coming into their office regularly which should be salvaged and organized, and clever librarians with a knowledge of advertising and selling could and should persuade agencies to let them show how absolutely indispensable library service can become to them.

Boyce Thompson Institute for Plant Research

By Zeliaette Troy

Librarian

WILLIAM BOYCE THOMPSON was born in Virginia City, Mont., in 1869 and moved with his family to Butte in his early youth. It is likely that Colonel Thompson's interest in plant problems dated from those days when, as a boy, he attempted to grow vegetables for his mother's kitchen in defiance to the fumes from the local smelters. Twenty years later, in developing his beautiful grounds overlooking the Hudson at Yonkers, he was perplexed

by the multitude of unsolved problems which contact with plant life presented to his mind. His personal association with Doctor Duncan, the organizer and first director of the Mellon Institute, had awakened in him a profound enthusiasm for scientific research, for Colonel Thompson's is essentially a mind which seeks out facts. It was, therefore, a natural and logical expression of his individuality to determine to found and endow an institution for plant research.

In June, 1919, The Farm and Research Corporation was incorporated for the combined purpose of research and distribution of the knowledge gained by research to individual growers and producers. In order to assure himself that the institution should be planned, organized and built in a way that would be most serviceable, in 1920 Colonel Thompson sent Doctor Fred J. Pope, a chemist long in his employ, to visit various agricultural institutions and to learn what was most needed to increase plant production. Almost without exception the authorities declared what was most needed was fundamental research; an institution free from the duties of teaching, regulatory activities (inspection of food products, fertilizers, etc.) and control of insect pests and plant diseases which takes so much of the time of the Federal and State controlled institutions.

Such a privately endowed organization could devote its entire time to development of new principles and new methods. Colonel Thompson appreciated and accepted this viewpoint, revised his original plans and in November, 1920,

the institution was given the more appropriate name of The Thompson Institute for Plant Research, Inc. Three years later the name was changed to Boyce Thompson Institute for Plant Research, Inc., indicating

The Boyce Thompson Institute for Plant Research, Yonkers, N. Y. View from the East

that it was a memorial to his mother and father.

Among the scientists from whom Colonel Thompson sought technical advice were Dr. John M. Coulter, professor of botany at the University of Chicago, and Dr. Raymond F. Bacon, director of the Mellon Institute. This conference resulted in the reorganization of the board of trustees into two groups, one to advise on the scientific problems of the Institute and the other to handle the practical administration. Dr. William Crocker, associate professor of plant physiology at the University of Chicago, was elected Director and started his work in February, 1921, by first devoting three months to a survey of American biological and chemical laboratories and then spending four months in an observational investigation of like facilities in Europe. It was on this European trip that the nucleus of the library was formed. At this time, many private libraries were on the market, and Doctor Crocker was able to obtain many complete sets of valuable journals which otherwise are very hard to secure.

As the result of these investigations as well as of his own experiences in the use of laboratories the director drew up detailed plans for laboratories, greenhouses and equipment which give the workers every possible aid for accurate and efficient solutions of problems in plant science. Usability was the primary considera-

Much of the historical material for the early part of this article was taken from *The Yonkers Statesman*.

First Floor Plan. Includes two tiers of similar capacity

tion, architectural effects entirely secondary. The original L-shaped unit furnishes room and equipment for about thirty-five scientific workers, together with their technical and non-technical helpers. This original southeast quar-

ter of the planned-for quadrangle was quickly outgrown and construction on the second unit is now under way. About twenty-five acres of good farm land nearby offer adequate space for outdoor experiments.

In the selection of the scientific staff two main aims were kept in view: the avoidance of undue duplication in phases of the field already strongly developed in the vicinity of New York and the selection of a staff which would work well together, representing all necessary phases of technique and knowledge in their cooperative attacks on the problems to be solved. Thus

largely carried by insects, an entomologist comes into action. The fact that some of these diseases such as "aster yellows" are carried from diseased to healthy plants by only one species of leaf hoppers, although a variety of insects feed freely and promiscuously on diseased and healthy plants, is suggestive of certain human and animal diseases which have specific insect

Showing the effect of the application of chemical vapors to individual buds

systematic botany, which is adequately handled at the New York and the Brooklyn Botanic Gardens and genetics covered by Princeton, Yale, Columbia and Cornell have not been emphasized. But the organization of the staff has been left flexible in order that changes can be made when new problems or new phases of the present problems are undertaken. A system of advanced research fellowships was organized for the purpose of giving promising young scientists an opportunity to further develop their research ability under the guidance of an able staff and with the use of a most excellent equipment. It was thought that the constant flow of temporary and younger workers through the Institute would avoid the stagnation and fossilization which so often occurs among a permanent staff. The day of the individual inventor and of accidental and haphazard discoveries is fast waning. The day of consolidations and cooperation is here just as truly in scientific research as in big business.

A good example of the workings of this scheme of cooperation is illustrated by the attack which the Institute is making upon the puzzling and destructive group of plant diseases known as the virus diseases. Virus diseases are as fashionable among the plants as among animals, it seems. As the diseases are

carriers: sleeping sickness, yellow fever virus and malaria are produced by protozoans which pass a necessary stage in the specific insect carriers, which suggested that protozoans may be the causative agent in certain mosaic and yellow diseases of plants. A protozoologist was therefore called upon in this problem. Some of the mosaic and kindred diseases are produced by filterable viruses, and the problem of filtering or segregating the active substance from the great mass of material derived from the diseased plants is in the hands of a biological chemist who by various methods of precipitation has already been able to separate crystals which when injected into healthy plants will produce the disease. In many ways the active residue acts like an enzyme and has many characteristics in common with other chemicals. The micro-chemist is called upon to examine small quantities of the diseased materials, and by the use of various stains to identify as either an organism or a chemical the guilty agent. The chemist who has specialized in the effect of light and other radiant energy upon biological material contributed somewhat to the general problem when he learned what length of exposure to ultra violet light would kill the virus and in this way showed its similarity to other chemicals and organisms. The physical

Second Floor Plan. There is a mezzanine above the reading room level stack space with same capacity

chemist, who is called upon on all mathematical questions involved, has been able to decide whether certain methods of sampling will give material characteristic enough of the virus to show its true constituency. And of course the library is called upon to bring forth the records

of previously worked-upon insect or protozoa born diseases; the methods of filtration and crystallization methods used by workers on other problems; the staining methods, etc., used by micro-chemists in all fields and descriptions of the best ultra violet light-producing equipment as well as the reports on its effects on various organisms and substances already worked upon.

Gantry crane over the greenhouse

It would appear that there would be little room or energy left in the organization for any problems other than that of virus diseases, but this is not at all true. Doctor Crocker's personal laboratory working under his own individual direction is constantly studying all kinds of seeds, showing in exactly what condition of heat, moisture and physical environment each different species of seed germinates best; what chemical changes take place inside of them at different stages of their development. Much of the material published by this department is of great commercial value. Then there is the study conducted on the dormant period of buds in plants. It has been found what concentrations of different chemicals will overcome this dormancy and stimulate into growth and productivity various plants before they are normally ready to grow. This work also has a tremendous commercial application as one can see when one realizes that ordinarily a potato takes a rest for two or three months, but when the seed pieces cut from potatoes are soaked in ethylene chlorhydrin the day they are harvested and planted immediately they produce sprouts in just one month's time. A much prettier though not quite so practical example of this study is the work with lilacs. By the application of different gases, lilacs can be induced to bloom for Christmas time. A very striking result is obtained by the application of chemical vapors to a single bud upon a twig inducing

it to grow, while untreated buds less than one-half inch distant on the same twig remained dormant.

The work on the effects of different lengths of exposure of plants to light also shows very striking results. The clover which normally requires months and in the field may take two years to flower, when given twenty-four hours of light per day will flower in thirty-five days. An electrically driven gantry crane bearing many high-powered lamps is run over an ordinary greenhouse at sunset when this sort of an experiment is under way, thus giving perpetual light to the plants under observation. This gantry crane always attracts the attention of visitors, but it is only one example of the ingenious equipment which the staff has at its command.

The research on insecticides and the way in which these penetrate the destructive insect and kill him is another most interesting problem; the idiosyncrasies of various plants in their choice of conditions under which they will take root are rather astonishing, but when studied seem to follow some laws.

While all of these problems have been undertaken with the view of finding out facts, many extremely practical applications of the results are found at once. The reports by the Institute workers are made first in the better-known scientific journals, such as *The American Journal of Botany*, *The Botanical Gazette* and *Phytopathology*, reprints from which are then issued under the two titles of Boyce Thompson Institute for Plant Research, "Contributions" and "Professional Papers."

A 300-acre arboretum is now being developed about two miles from the Institute which will not only give the general public a beautiful park but will exhibit as complete a collection as possible of trees and shrubs growing in their natural surroundings. This arboretum will also be available for experimental projects undertaken by the staff.

The library has been developed in exactly the way that the Institute as a whole has developed. With quite a few complete sets of the classical periodicals in agriculture, chemistry, physiology and botany, together with the late Doctor Woll's collection of agricultural experiment station material, the start was made in 1921. Since that time many more complete sets of periodicals have been added and doctoral theses from abroad have increased the pamphlet collection considerably. At present there are about 11,000 bound volumes and 4,000 fully cataloged pamphlets. Of the 11,000 bound volumes 2,500 are separate texts classified according to the Library of Congress classification. Printed Library of Congress cards

have been used in the catalog wherever possible. Over 450 publications which fall within the *Union List's* definition of "periodicals" are received currently, and current "documents" more than double this number. Since elementary reference work is unnecessary, much of the time of the library staff can be devoted to the reviewing of current literature and to the building of bibliographies in collaboration with the specialist in charge. The bibliography on seed germination made under the direction of Doctor Crocker will be unique in its comprehensiveness when it is completed, and this is only the first of a hoped-for series of bibliographies.

The present library is housed in space planned for eventual occupation of laboratories. The rapid expansion of the library soon proved the need of larger and permanent quarters. Construction of the second unit of the quadrangle plan is now under way; this building will double the present floor space which the entire Institute now has. The library will occupy the

entire first and second floors of the wing in the new building giving a capacity of about 90,000 volumes as well as furnishing a delightfully lighted and adequate general reading room. The first floor will be completely filled with two tiers of book stacks; the second floor will be given over to the reading room, offices and a small stack room with mezzanine. Two rather unusual features in the design are the provision of a continuous table along the north wall of all stack spaces, which will give the staff members working room close to the shelves where the volumes they are interested in are shelved, and the installation of a range of vertical files along the entire east wall of each stack space. These extensive files will give room for expansion of the pamphlet and other special collections in proportion to the growth of the book collection. Simplicity and usability have been the two considerations paramount in the design of the new layout. Edward L. Tilton was the consultant architect for the library.

An Ideal Library for Research Purposes

(With Particular Reference to Business Research)

By W. C. Schluter

University of Pennsylvania

GENERAL libraries are at present confronted with a twofold problem: on the one hand, the production of publications has been and is increasing at a rapid rate both in volume and in diversification of materials; on the other hand, the number and variety of users of libraries has also increased and their wishes and needs have correspondingly become more complex. From the standpoint of acquisition of materials, few libraries can meet the problem of selecting from the currently issued mass of printed materials that which is most useful. Selection is necessary, since no library is able to buy everything which is issued. The researcher in the special fields of the social sciences, such as business, economics, etc., often finds general libraries totally inadequate in serving his purposes because he must of necessity have access to the exceedingly specialized source materials covering the frontiers of fact and information in his research field, a need not specially met by general libraries. Most libraries cater to at least four types of users: (1) The general reader, (2) the specific fact or knowledge seeker, (3) the *re-search* student who is usually interested only in garbling or rehashing what has already been written or interpreted (he is exemplified by the ordinary theme writer) and

(4) the *re-search* student who systematically and cautiously seeks to solve problems of an original nature on the basis of objective raw facts or information. The latter finds library facilities often more annoying than useful, because the general library has not recognized his needs fully.

The trend toward an intensification of research activities in the fields of business and social sciences by academic and non-academic individuals and agencies seems to suggest the need of an alteration in the conception of the service of a library. A scientific inquirer requires specialized facilities. It is in this connection that a library can become most useful. Instead of conceiving its task to be the collection of this, that and everything as it appears and seeking to be merely a repository of such reading materials as the general readers demand, it should in addition conceive of its service to include those specialized facilities required by a researcher and thereby become an active partner in research activities and in the creation of new knowledge, rather than merely exist as a storage house for the old.

Obviously, the larger number or majority of library users, who are undoubtedly general readers, dominate the policies of general libra-

ries. With the rapid increase in publications and the greater diversification of them, including also, as it will more and more in the future, research source materials, a departmentalization of general libraries according to specialized fields of knowledge appears to be only a matter of time. This seems to be necessary if the researcher is to be adequately accommodated.

The Lippincott Library, University of Pennsylvania, has a collection of approximately 10,546 volumes

In this connection, however, the so-called special — or what are known in academic circles as departmental libraries, seem to possess great opportunities. They are the true forerunners as real service stations for the research student. They can employ librarians who should acquire a thorough and complete knowledge of publications and research source materials in the fields they represent. They can, on the basis of this specialization, better judge what materials are necessary to be acquired. They are in the position to ignore the general reader and the promiscuous fact or knowledge seeker. They are able to devote themselves more exclusively to the task of aiding those who are constructive users of specialized knowledge. They can render a distinct service to the scientific student who earnestly and devotedly seeks to develop new knowledge or to solve problems. They can unclasp the *mort-main* of old and confusing classification system which instead of aiding the research student to find sources

and data make the task too laborious with its attendant waste of time and energy. They can create efficient facilitating systems of references, adapted especially to the nature of the materials in the special library. They can provide quick and ready aid for the researcher on account of the specialized training of the librarian. They can permit that ready accessibility

to research source materials so necessary to the investigation without undue risk of losing the materials or having them misplaced.

An ideal library for research purposes should be organized and administered according to the following:

FIRST—It would specialize in the collection and organization of materials in a distinct field, such as business and economics, or even in the further direction of the fields within business, as for example finance, marketing, etc., should the library specialize in the business field and it could therefore be departmentalized accordingly.

SECOND—It would have a special classification system of the materials in the library which would not be burdened with the older classification systems devised to embrace the entire field of human knowledge.

This library is distinctly a reference library with no circulation

THIRD—It would concentrate all guides to references or sources in one place, that is, it would have the card catalog, periodical indexes, newspaper indexes, indexes to governmental publications, book catalogs, handbooks, guides to references, directories, bibliographies, etc., logically arranged together in a single section in the library.

FOURTH—It would permit the physical accessibility of all materials in the library to the user. Research

data or source materials are hidden in a variety of ways if considered in relation to a specific research problem upon which a researcher is working and it is, therefore, not only desirable but basically necessary that a wide latitude as well as opportunity be given to the investigator.

FIFTH—It would have a well-trained and alert staff for the acquisition of materials for the library so that the library would be abreast with all issued source material.

These aims, if worked out, would greatly

facilitate the work of research. They appear to be practically attainable, especially, in the case of special libraries. General libraries, also, should aim to follow the line of specialization under their roofs. This is suggested not with the idea of asking them to forsake the interests and needs of the general reader or user, but to provide the necessary facilities for the creators of new scientific knowledge.

Paying Dividends

By Rebecca B. Rankin

Librarian, Municipal Reference Library, New York City

ALMOST simultaneously with its inception, the New York Special Libraries Association recognized that mutual benefit would accrue to firms and companies desiring librarians, and to the special librarians themselves in the local organization through an employment agency of some kind. Various methods for this purpose have been tried.

It seems that the officers of New York Special Libraries Association from the very beginning in 1914 were met with this problem of helping the special librarian to find his niche. In those early years the officers arranged a place for registration; any individual could fill out a blank giving information about his training and experience which was filed at a place of registration; it was also understood by all members of the Association that any employer or librarian was privileged to go to this place of registration and consult the file of possible applicants. This, of course, was in embryo an employment bureau. Even that simple arrangement served a good purpose.

On account of this first experiment, the idea of help in securing employment always followed the presidency of the local association. Each succeeding president has had his or her share of consultations with librarians seeking opportunities to get into the special library field. It would be impossible to measure the amount of assistance rendered in this way by the local officers.

In the year 1920 an active member of the New York Special Libraries Association became the head of an Employment Bureau for the Young Women's Christian Association of the city. She kindly offered to assume responsibility for special library work in this bureau which charged no fees—a free service. Gladly the local association relinquished this employment work to her, and it was carried satisfactorily for some years by that agency. Later,

the Y. W. C. A. found it too expensive to carry without fees—and when that change took place the New York Special Libraries Association decided to withdraw its cooperation, as we did not wish the employment assistance given by the Association to be put on a commercial basis.

In October, 1925, the New York Special Libraries Association appointed an Employment Committee to consider the best methods of helping special librarians to suitable positions and of aiding employers to secure the best possible candidates for positions in their libraries. It was decided that there must be one central place for registration, and one person in charge to whom employers and applicants may apply for assistance. That person is the Chairman of the Employment Committee.

The Employment Committee in making plans and establishing a policy has only *one purpose* and that is a purely professional one. It is the desire of the committee to help raise the standards of special library work. This is not a business proposition, as there are no fees of any kind, and all the work is done by the volunteer service of members of the New York Special Libraries Association. The committee does not require membership in the Association as necessary to registration, and no mention is made of the Association.

The standards of special library work are kept in view constantly. A librarian is not suggested for a certain position unless her preparation and experience qualify her for it. It is our aim to find the *best* qualified person as well—not merely one that will do. We wish the employer to be satisfied with the library candidate suggested. The committee feels as much pride in placing capable librarians in suitable positions, as a library school would in placing its best graduate in a splendid library position.

If a candidate who was thought to be capable was helped by the Employment Committee to secure a position, and that individual failed to fulfill the requirements, he or she might be helped again to another position; but continued inability convinced the committee that it was time to stop because our cause of raising professional standards was injured by placing the inefficient.

In the almost five years that the Employment Committee of New York Special Libraries Association has been functioning there has been a marked advance in the requirements laid down by employers for special librarians. We are convinced that this is due in no small part to the efforts of the Employment Committee backed up by the ideas and conceptions of special librarians in their work and in their requirements for special librarians when consulting with their employers. It is rare to receive a request for candidates for a special librarian which does not stipulate a college degree and library school training. This was not the case five years ago. On account of the efficient librarians who have been placed in new special library positions, and because the number of experienced special librarians is growing year by year, each year finds the requests from employers containing a specification, "experienced in a bank library, or in patents, or in accountancy, or with a real knowledge of chemistry."

The Employment Committee's set rule is—we do *not recommend*. We do not feel ourselves competent to do this, as in many cases we cannot know the abilities of the applicant, but get it second-hand through recommendations. Based on all the facts about training, experience and opinions of others of the candidate, we *suggest* to the employer those candidates who seem best fitted for the position in question. The employer, at least, has the advantage of having had some selection done for him. In two or three equally good candidates, it is probably some personal qualification which decides the choice. The committee is the intermediary or the connecting link between the special librarian desiring a position, whether a first one or a better one, and the employer who has a vacancy in his staff.

The work of the Employment Committee is done quite informally; it is practically a one-man job, and the advantages which have accrued to the Association, to the individuals helped and to the satisfied employers are due in great part to the interest and continual contact with special libraries of the chairman. The registration has been systematized; the information is filed and is easily referred to, and the actual work is done with a minimum of effort. However, it means constant contact with

both librarians and employers, and necessitates a great many conferences and a great deal of correspondence.

The results of the Employment Committee are decidedly appreciated. This is the testimony of many a member of the New York Special Libraries Association. Even more generous in their praise are the employers or firms whom the Association has led to a capable librarian.

In this same five years there has been a general increase in the standards of salaries paid to special librarians. In 1925 the salary range as seen from the viewpoint of employment in New York City was approximately from \$1,200 to \$4,500; the first salary was paid to a special librarian in a small firm where she was the entire staff and had the standing only of any clerk in the business—the latter represented a librarian in a special library with a large staff and a position carrying much responsibility. The year 1930 shows a salary range for special librarians to be somewhat higher—from \$1,800 to \$8,000 for similar positions.

The average salary for all kinds of library positions filled by the Employment Committee in 1925 was approximately \$1,600. In 1930 the average is near \$2,200.

Of course, the library schools have their appointive bureaus to which their graduates turn for assistance in securing positions. Likewise, every large public library has a superior officer in charge of employment which serves practically as an employment agency for that institution. A special library, however, is a small unit which cannot maintain such an agency and therefore one maintained by the New York Special Libraries Association for all of the three to four hundred special libraries in the city has its place. The Employment Committee cooperates with the library schools and with the public libraries' appointive officers and tries not to trespass into their provinces. A demand exists for all.

The duty of a person to his professional associate cannot be overlooked. We as librarians have a responsibility to other librarians. An unwritten code of ethics demands that we help our fellow librarian when he needs it. Employment work as carried on by an association is the logical outcome of such an ethical code. If such work is not done by the Association and recognized as its responsibility, some individuals are sure to be called upon to do it. It is one of these responsibilities which cannot be avoided. But it is work which pays dividends; tangible results can be seen and measured. Individuals are helped to a livelihood, employers secure capable librarians, professional standards are raised, and a live, useful special library association is the result.

Librarian Authors

"THE POPPY SEED CAKES," by Margery Clark, pseud., is said to be thoroughly disliked in the cataloging class of library schools. It represents the quintessence of difficulties in the making of cross-reference cards; for Margery Clark is the pseudonym of two persons working together instead of that of a single author, and cards are therefore needed for authors, joint authors, pseud., *ad infinitum*.

The component parts of Margery Clark, pseud., are Margery Closey Quigley and Mary Elizabeth Clark. For forty hours a week they are respectively librarian and publicity assistant in the Montclair, N. J., Free Public Library. Out of hours they are also the joint authors of *Etiquette, Jr.*, *The Cook's Surprise*, of countless pot-boilers and of a reader for second graders soon to be published by Ginn.

Soon after the Armistice, Margery Quigley and Mary Clark united forces to increase the use of a combined library and community house in a small factory town in New York State. Margery Quigley came to the work after nine years in the St. Louis Public Library system. Mary Clark had bookshop experience and the Brooklyn Public Library behind her. "As I look back on those seven years in Endicott," said Margery Quigley, "they seem to have been made up of trying to acquire a few words in each of the seventeen languages represented in the little town, of purchasing endless Zane Greys, of inspiration and refreshment again and again from the New York State Library folk and of May Massee's letter accepting *The Poppy Seed Cakes*—the first manuscript, by the way, which she received after becoming Doubleday Page's junior book editor."

Margery Quigley (left) and Mary E. Clark (right) attending a library conference

in auto repair in the garage of the community house and of classes in etiquette in the former ballroom of the library building. *Etiquette, Jr.*, is based on the inquiries for simple advice about good manners which Mary Clark gathered in at that time. Its present wide popularity in city high schools among the children of foreign born is probably due to the fact that every situation covered in the book is based on the actual bewilderment of an average boy and girl in social contacts.

The story recently accepted by Ginn contrasts the life of a little boy in Southern Europe with his days in his new home in a small American city.

Margery Quigley compiled the *Kindergarten Index* (American Library Association, O. P.), still listed in the new Mudge; also a new edition of Walter Skeat's jolly animal tales of Java rice fields, under the title, *The Tiger's Mistake* (Macmillan, 1929).

The partnership formed in Endicott has survived two more terms of library employment in libraries where modern library service had to be made popular in disaffected or indifferent communities. It has also survived three trips together to Europe, including one through Russia.

From "*The Poppy Seed Cakes*," published in 1924 by Doubleday, Doran & Company

Among Mary Clark's tasks in Endicott were running a book wagon, writing up the library's statistics and news items in palatable form for the town paper, and the organizing of classes

THE LIBRARY JOURNAL

May 1, 1930

Editorial Forum

WE ECHO cordially the sound and comprehensive counsel given by Miss Mary Louise Alexander regarding business libraries in connection with the interesting symposium which she has arranged for this issue of *THE LIBRARY JOURNAL*, devoted largely to special libraries. It has not before been sufficiently emphasized that business men constitute or should constitute a large proportion of the clientèle of any public library, and their needs should be considered not merely in providing general reading for them but by furnishing books suited to their business needs, as children's books are supplied for the children's room, now a feature of almost every library, although it is scarcely more than a generation since children were welcomed to our public libraries by Mrs. Sanders and Miss Hewins. The most modest library should have at least a shelf full of business books, including books on business in general and on particular kinds of business as well as on specific trades. As business men control the appropriations for libraries, there can be no wiser course for a librarian seeking to expand the usefulness of the local library than to impress them in this manner with the real value of the library to every class in the community. Special libraries, as separate from public libraries, have become so important a feature of the general library organization as to justify to the full the Special Libraries Association, organized twenty-one years ago, and the publication as its organ of *Special Libraries*, which can give more adequate attention to special needs than can a general periodical like *THE LIBRARY JOURNAL*. The survey of business libraries within public libraries by Miss Manley will be of special interest to the Business Libraries Section of the A. L. A. as well as to the Special Libraries Association.

THE LOT of the Editor of an inclusive periodical is indeed not altogether a happy one. There are so many topics which demand consideration and so many papers offered for publication that selection with reference to the needs and desires of all classes of readers is imperative, and this means that there must be disappointment in more than one quarter of a clientèle because of lack of the space which many important topics deserve. This thought has come to the fore in connection with Miss Mudge's annual review of reference books, which we have most regretfully omitted from this year's program for reasons previously stated. The protests against its omission, which we have candidly reprinted to show ourselves "as others see us," are the highest possible compliment to Miss Mudge and her work, and they do not overemphasize its value to the profession nor overstate our own regret at the necessary decision. Whether Miss Mudge's calculation or our previous estimates hold—the truth is possibly between—scarcely needs discussion, but Miss Mudge's enthusiastic students, in going so far as to suggest that an entire issue of *THE LIBRARY JOURNAL* might well be devoted to this paper, however long, illustrate the dilemma in which a general editor is placed, while the thoughtful letter of our Canadian correspondent, emphasizing the view that only material of permanent value should be included in a general periodical, overlooks the fact that the material of the day is quite as necessary as the material of the years. As to "commercialism," we trust that this will never be a dominating element in the history of *THE LIBRARY JOURNAL*, which for half a century has been a labor of love on the part of editor and publishers, and does not even now, with its slowly increasing support as the library field widens, make good the expenditure in those early years, which were not of "red-letter days" but of "red figures" on the year's balance sheet.

WITH TWO June conventions in California, the S. L. A. in San Francisco and the A. L. A. in Los Angeles, the Pacific Coast will indeed be the librarians' goal this year. For the fourth time California will be the charming hostess to A. L. A. members; the first time being at San Francisco in 1891, the second at

Pasadena in 1911 and the third at Berkeley in 1915. Each of the previous visits was delightful and fruitful, with many exchanges of personal experiences, and there is no reason to expect less this year with California and the other Pacific states making such great library progress and having so many things to show and tell about. The tentative program of the Los Angeles conference promises practically all afternoons free in which to exchange ideas with old colleagues and to see the realities of a county system long heralded as the leader.

FOR FORTY YEARS Atlantic City has been a mecca for eastern librarians for the bi-state meeting, originally a tri-state meeting before New York State had a "library week" of its own, and has more and more attracted librarians from many states. Of recent years, in especial, the meeting which the American Library Institute has been accustomed to hold there has brought many leading librarians together to present papers and to hold converse under conditions not so overwhelming as the annual conferences of the American Library Association. This has been a good thing for the younger librarians who make the Atlantic City meeting a holiday and thus get in closer touch with their elders than at the larger conferences. This year the attendance of over four hundred, with a dinner gathering almost reaching that number, made a phenomenal celebration of this fortieth anniversary, and there was general gratification over the pleasure and profit of the week-end which brought so many together without serious interference with their every-day and every-week and every-month work in library routine.

OUT OF ninety-two persons who filed applications with the Carnegie Corporation for grants to pursue graduate study in library problems, the Advisory Group had the difficult task of selecting ten. Candidates were chosen on the recommendations of those competent to judge the applicants' ability from their own professional experience, and grants were made to persons who have already had experience in library work and who have shown a capacity to contribute to the advancement of the library profession. Out of the ten selected to receive scholarship grants, three are students, two librarians (one of a suburban library, the

other of a small college); one a Branch Supervisor; one an assistant in a foreign Branch, one an instructor in a library school, one a catalog reviser and the other a reference librarian. This indication of professional experience suggests how very varied the library profession has become in this country and the results which each of the grantees will bring from the year of study will indeed be interesting and valuable. The list also suggests how varied has become the work of the Carnegie Corporation, since it gave up grants for library buildings as its special field and began to study library needs in the general field.

SINCE the library profession became so largely feminine, as it was not in the earliest days even in our own country, the ladies have proved remarkable pioneers, especially in international relations. Years ago one found in Bergen, Norway, a little lady who had acquainted herself with American methods and was running her library on modern principles, and when that remarkable young Swede, Selma Palmgren, came to America to study and report to the Swedish government on the American library system, her results proved a great inspiration for all the Scandinavian countries as well as for the country in which she studied. In Russia, Mme. Haffkin Hamburger is reaping the reward of her work of more than a quarter century in the great number of students who throughout the Soviet Union are making public libraries an important feature of modern Russian education, while in China Mary Elizabeth Wood has the satisfaction of celebrating the thirtieth anniversary of the beginning of her efforts for that country, the twentieth of Boone University Library and the tenth of her library school. And now comes to America from one of the southernmost, instead of northernmost, of European countries a representative of the Bulgarian government, Miss Margaret Demchevsky, library organizer of that country, who is welcomed not less cordially than the other ladies who have honored the American library system by coming hither to study and report upon it. Miss Demchevsky has especially been welcomed by the libraries and library schools which she has addressed, and we may hope that she will accomplish for Bulgaria, and ultimately for the other Balkan countries, what Miss Palmgren accomplished for Sweden and her Scandinavian sister nations. What the staff and students of the Paris Library School have done in pioneering modern library administration throughout Europe cannot have too high praise in this same field of women in international library relations.

Report on the Survey of Public Business Library Work in Large Cities

By Marian C. Manley

Branch Librarian, Newark Business Branch, N. J.

RECENTLY indications have appeared of a more acute interest in the work that public libraries can do for business men. To find out the present state of development along these lines, we made, from the Business Branch of the Newark Public Library, a survey of this work in cities in the United States with a population of 70,000 and over, according to the 1920 census.

While libraries serve business men in many different ways, the particular work under consideration was in connection with such collections as are commonly used in the everyday life of business men and less frequently by other members of the library's clientèle. Such material includes directory collections, sources of investment information, books, magazines and pamphlets on phases of business management.

The questionnaire was planned to bring out these points and was intended to discover the development not only of business branches but of special business collections and work with material of the type specified. It was sent to the 118 cities with a population of 60,000 or more. The points covered by the survey fell naturally into two divisions: those on general policies and those on collections.

Under Part I, "General Policies," were listed:

1. Libraries with definite departments or branches for business service.
2. Libraries with business work combined with special department.
3. Libraries working toward special business department.
4. Libraries where business requests are handled only as part of general reference work.
5. Libraries with separate appropriation for business work and amount.
6. Libraries with assistants specially scheduled for business work and number.
7. Methods of advertising business library work.
8. Libraries giving business service beyond the city.
9. Unsolved problems connected with business library work.
10. Other business library work comment.

For copy of complete report, price 50 cents, apply to the Business Branch of the Newark Public Library, 34 Commerce Street, Newark, New Jersey.

Under Part II, "Collections":

1. Libraries with investment collections with annual cost.
2. Libraries with city directory collections with annual cost.
3. Libraries with other directory collections with annual cost.
4. Libraries with map collections for business purposes. Basis and annual cost.
5. Scope of business book collection.
6. Scope of business magazine collection.
7. Scope of business pamphlet and clipping collection.
8. Scope of market survey collection.
9. Scope of state document collection for business use.
10. Other information on business library work.

From this survey it was found that more than 50 libraries have investment collections consisting of certain manuals and services. For some the cost of this material is segregated. Chicago, for example, spending annually about \$750; Detroit, \$750; Hartford, \$611; Minneapolis, \$500; Newark, \$1,400; Pittsburgh, \$650, and Seattle, \$400, etc.

Interesting facts about city directory collections came to the fore. Some libraries, such as those of Des Moines, Gary, St. Joseph, and Tulsa, are, through the cooperation of directory publishers, depositories. In other cities, inquirers are referred from the libraries to the collections at the Chambers of Commerce. Some libraries build up their collections mainly through exchange; others spend, to keep this material to date, sums varying from \$600 in Chicago to \$200 in Fort Wayne; \$800 in Hartford; \$1,240 in Newark; \$900 in Pittsburgh; \$727 in Seattle, etc.

Some of the latest developments in concentrated business library work are the Kirstein Business Branch in Boston, to be opened shortly, the recently organized Business Information Bureau in Cleveland, the proposed Business Library Division of the Central Library in Jamaica, the Business Room in Peoria, and the Business and Technology Department of San Diego, recently established in the annex of the San Diego Library.

Funds for these departments are not in all cases segregated. Certain libraries, however, reported as follows under the heading, "Libra-

ries with Separate Appropriation for Business Work and Amount."

Albany—About \$1,000 for collections.

Boston—Book fund, 1929, for the new branch, \$10,000. Branch not yet opened.

Bridgeport—Business and technical work. Collection, \$7,500. Salaries, \$7,000.

Chicago—Annual appropriation for business books, directories, financial services, etc., \$3,000.

Detroit—Business and Commerce Division. Book fund, \$1,500; other three departments' book funds not so separated.

Fort Wayne—\$7,427.61 budget for 1928 includes everything but heat, light and janitor service.

Hartford—\$8,000.

Indianapolis—Approximately \$8,700, including salaries.

Minneapolis—1928 expenditures, \$12,177.17.

New Haven—\$2,830, including technical work; omitting magazines.

New York—About \$40,000 for books and salaries for Economics Division.

Newark—\$27,000 for 1928.

Peoria—\$2,500, estimated.

Pittsburgh—Salaries, \$6,720. Books, \$2,500.

Providence—\$5,500 for Business Library.

San Diego—Not specified. Book fund, \$1,000.

Savannah—\$2,615 for Downtown Branch.

South Bend—\$3,500.

Washington—\$1,200 for books, \$433 for periodicals for division.

Waterbury—\$300-\$400 for books.

Complete answers from cooperating librarians will be found in the pamphlet on this survey now being published by the Newark Public Library.

In preparing the material for publication, it was found necessary to make some changes in the arrangement of the material. The final form was returned for approval to all the contributing libraries.

The replies to the questionnaire show that there is already a good geographical distribution of this special work for business men. They show that more librarians wish to establish this work and that the problems are the same pertaining to other branches of library activities—adequate publicity, sufficient appropriations, and getting the collections used.

An understanding of how easily the work can be put under way by concentrating the material of use in this line in an accessible spot and cooperating with other interested institutions and organizations would be helpful and a new outline of a basic collection such as that printed in *The Wilson Bulletin* for May, 1927,

would be of use, as would more information on the costs of material and how such costs could be reduced by cooperation. Definite recommendations along this line are under consideration, and cooperation in preparing them as well as in the development of the work is needed.

Training for the Rank and File

LIBRARY TRAINING, like other forms of professional education, must find its way to reflect the general shift at all levels of education from the curriculum to the individual as the center of attention, states Frederick P. Keppel, president of the Carnegie Corporation of New York, in his annual report for the year ended Sept. 30, 1929. It is far less important that any system of requirements should be rigidly followed in the interest of high standards than that the way should be made easy for able men of scholarly tastes and training in letters to shift from the overcrowded field of English teaching, or preparation therefor, to librarianship, where their intellectual qualifications and their sex combine to offer a bright professional future. Librarians should not, by too great concentration upon strictly professional preparation, lose sight of the importance of providing proper training for the sub-professional side of their calling. "Nursing, and, to a less degree, dentistry are today suffering from a lack of suitably trained workers to perform routine duties which do not require professional preparation, and upon which professionally trained men and women should not be permitted to waste their time." In the United States and Canada there are today twenty-five library schools of good standing, with 1400 students, and those not organized in the first case in degree-granting institutions have, in most instances, sought a more or less close university affiliation.

In the year under review the Corporation made a grant of \$100,000 to the University of Carolina payable over a term of years, to enable that institution to establish a library school in the South, where additional facilities have been greatly needed. Fifty-four thousand dollars was paid for the development of dental school libraries; \$38,500 for support of library projects in South Africa; \$84,000 for development of college and university libraries; \$11,500 to McGill University Library School and \$25,000 to other library schools, from funds previously appropriated; and \$100,000 to the British Columbia Public Library Commission, \$15,000 in library fellowships, and \$2,500 for a study of library salaries in New York City.

The May Forecast

A check list of books of general interest whose publication dates fall during the coming month

(Exact date of issue is given when known)

- History, Travel, Literature and Biography*
- Adam, George. *The Tiger: Georges Clemenceau*. Harcourt, Brace (May 1). \$3.50.
- Burlingame, Anne Elizabeth. *Condorcet, the Torch Bearer of the French Revolution*. Stratford. \$2.50.
- Burnstein, A. *Unpastoral Lyrics*. Bloch. \$1.50.
- Chaucer, Geoffrey. (Frank Ernest Hill, trans.) *The Canterbury Tales*. Longmans, Green. \$3.50.
- Crockett, William D., and Gates, Sarah. *A Satchel Guide to Spain and Portugal*. Houghton. \$4.
- Damon, S. Foster. *Thomas Holley Chivers, Friend of Poe*. Harper. \$5.
- Edib, Mme. Halidé. *Turkey Faces West*. Yale Univ. Press (May 29). \$3.
- Escholier, Raymond. *Paris* (tr. by Jessica Ware). Dial (May 15). \$4.
- Fitzpatrick, Benedict. *Donjon of Demons*. Holt. \$3.
Story of Father Brebeuf's work among the Indians.
- Gabory, Emile. *Alias Bluebeard: the Life and Death of Gilleo De Raiz*. Brewer & Warren (May 5). \$3.
Life of one of Joan of Arc's generals.
- Hardy, Florence Emily. *The Later Years of Thomas Hardy*. Macmillan. \$5.
- Jones, Clarence J. *South America*. Holt. \$5.
- Jones, Rufus M. *George Fox; Seeker and Friend*. Harper (May 1). \$2.
Fox was the founder of the Quakers.
- Krupp. Dial (May 10). \$5.
The life of the world's greatest ironmaster and the growth of his business seen through his letters.
- Lowell, Amy. *Poetry and Poets*. Houghton (April 30). \$2.25.
- Michaud, Regis. *Emerson, the Enraptured Yankee*. Harper. \$4.
- Morgan, James. *The Birth of the American People*. Macmillan. \$2.50.
Full and authentic account of the thirteen colonies.
- Norman, Charles. *The Bright World and Other Poems*. Morrow (May 22). \$2.
- Powel, Harford, Jr. *The Invincible Jew*. Bobbs-Merrill (May 1). \$2.50.
A modern biography of Paul of Tarsus.
- Prevost, Abbé. *The Adventures of a Man of Quality*. (Tr. by Maysie Robertson.) Dial (May 15). \$4.
England in 1700.
- Sage, Don Lee. *The Last Rustler*. Little, Brown (May 3). \$3.
Autobiography.
- Waugh, Alec. *Hot Countries*. Farrar & Rinehart (May 2). \$3.50.
- Wister, Owen. *My Friendship with Roosevelt*. Macmillan. \$5.
- Wright, F. A. *Love Poems of Joannes Secundus*. Dutton (April 30). \$5.
- Religion and Psychology*
- Charters, Jessie A. *The College Student Thinking It Through*. Abingdon. \$1.50.
Author assembles and groups genuine problems as brought to her by students.
- Enslin, Morton Scott. *The Ethics of Paul*. Harper (May 1). \$4.
- Josephus, Flavius, and Eisler, Robert. *The Messiah Jesus*. Dial (May 15). \$5.
- Laski, Harold J. *The Dangers of Obedience*. Harper (May 1). \$3.
Expounds the American political system, the fallacy of democracy, education, and the inconsistencies that impede the progress of civilization.
- Powys, Llewelyn. *Christianity*. Lippincott (May 16). \$1.
- Spencer, W. Wylie. *Our Knowledge of Other Minds*. Yale Univ. Press (May 29). \$2.50.
- Miscellaneous Non-Fiction*
- Ashton-Wolfe, H. *The Forgotten Clue*. Houghton (April 30). \$3.
The truth about detectives and their methods.
- Bellinger, Alfred R. *Catalogue of the Coins Found at Corinth*. Yale Univ. Press (May 29). \$2.
- Douglas, Paul H. *Real Wages in the U. S., 1890-1926*. Houghton (April 30). \$7.50.
- Grattan, C. Hartley, ed. *The Critique of Humanism: a Symposium*. Brewer & Warren (May 26). \$3.50.
A criticism of Humanism and America.
- Hultz, F. S. *Range Beef Production*. Wiley (May 1).
- Innis, Harold A. *The Fur Trade in Canada*. Yale Univ. Press (May 23). \$5.
- Johnson, Charles S. *The Negro in American Civilization*. Holt. \$4.50.
- Kneen, Orville H. *Everyman's Book of Flying*. Stokes. \$3.50.
- Notch, Frank K. *King Mob*. Harcourt, Brace. (May 8). \$2.
A protest against the organized power of modern advertising, catchwords, and high-pressure salesmanship.

Williams, Frank J. *If You Must Speculate, Learn the Rules*. Knopf (May 9). \$1.

The rules of Wall Street; a veritable encyclopedia of stock trading.

Wister, John C. *Bulbs for American Gardens*. Stratford. \$6.50.

Has over 70 illustrations.

Juvenile

Davis, Mary Montague. *Betty Bradford—Engineer*. Macmillan. \$2.

A tale of the West.

Hader, Berta and Elmer. *Under the Pig-Nut Tree*. Knopf (May 9). \$1.25.

Nature stories for very little children.

McNamara, John. *Playing Airplanes*. Macmillan. \$2.

Poe, Edgar Allan. *The Gold Bug and Other Stories and Poems*. Macmillan. \$1.75.

Selection made by Elva Smith.

Sewell, Helen. *A B C for Every Day*. Macmillan. \$2.

Fiction

Austin, Anne. *Murder Backstairs*. Macmillan. \$2.

Bachelor, Irving. *A Candle in the Wilderness*. Bobbs-Merrill (May 7). \$2.

Historical romance.

Benoit, Pierre. *Axelle*. (Tr. by Rita Wellman.) Dial (May 15). \$2.50.

A psychological novel describing the conflict between a woman's love for a man and her loyalty to her country.

Byrne, Donn. *A Party of Baccarat*. Century (May 9). \$1.25.

Short novel published several years ago as a magazine serial.

Cocteau, Jean. *Les Enfants Terribles*. Brewer & Warren (June 2). \$2.50.

A novel that amazingly penetrates the child mind.

Hope, Fielding. *The Mystery of the House of Commons*. Dial (May 1). \$2.

English mystery.

Hosken, Clifford. *The Shadow Syndicate*. Dial (May 1). \$2.

Mystery.

Hughes, Rupert. *Ladies' Man*. Harper. \$2.

Mystery.

Ibañez, Vicente Blasco. *The Knight of the Virgin*. Dutton (May 1). \$2.50.

Novelized biography of Alonso de Odjeda, one of the most dashing conquerors of Central America.

Lea, Fanny Heaslip. *Happy Landings*. Dodd, Mead (May 2). \$2.

Story of a Broadway star and Hollywood success.

Leroux, Gaston. *The Man of a Hundred Faces*. Macaulay (May 2). \$2.

Mystery.

Lieferant, Henry and Sylvia. *Doctor's Wife*. Little, Brown (May 3). \$2.50.

A first novel which deals with the lives of doctors.

Loder, Vernon. *The Shop Window Murders*. Morrow (May 22). \$2.

Mann, Heinrich. *The Royal Woman*. Macaulay (May 8). \$2.

A translation from the German.

Móra, Ferenc. *The Song of the Wheatfields*. Brewer & Warren (May 12). \$2.50.

Pictures the changes the war has brought about in Hungary.

Oppenheim, E. Phillips. *What Happened to Forester*. Little, Brown (May 3). \$2.

Pétain, Henri Philippe. *Verdun*. (Tr. by Margaret MacVeagh.) Dial (May 15). \$4.

War novel by a marshal of France and member of the French Academy.

Smith, Helen Zenna. *Step-Daughters of War*. Dutton. \$2.50.

Record of a girl ambulance driver in France.

Snell, Edmund. *The White Owl*. Lippincott (May 9). \$2.

Mystery.

Stanford, Alfred. *Flag in the Wind*. Morrow (May 22). \$2.50.

Andrew escaped from his dull job in New York and found love and adventure in a cove on Cape Cod.

Tupper, Tristram. *A Storm at the Crossroads*. Lippincott (May 16). \$2.50.

Six novelettes giving the portraits of six unforgettable men.

Hawaii Holds Annual Meeting

AT THE annual meeting of the Hawaii Library Association in March, papers were presented by Miss Caroline Green on "Hawaiiana, Its Growth and Use," and by Dr. Porteus on "Psychology, Life and Literature." In the evening Dr. Katsunuma spoke on the manners and customs of the Japanese. The following officers were elected for the coming year: President, Mrs. Laura R. Sutherland; vice-presidents, Mrs. Isabel Welch, Mrs. Juliet Davis, and Miss Helen Kearney; treasurer, Miss Catherine Delamere; secretary, Miss Stella M. Jones. Mrs. Sutherland was appointed delegate of the association to attend the A. L. A. Conference in Los Angeles.

Adult Education Meeting

THE ANNUAL meeting of the American Association for Adult Education will again be conducted according to the conference method that was found so satisfactory last year; this method employs small group meetings for the discussion of specific phases of adult education, and meetings of the conference as a whole for the consideration of general topics. The coming meeting, which will be the Fifth Annual Meeting of the Association, will be held in Chicago, Ill., May 12-15, 1930. The main themes of the program will be three: Rural Adult Education, Radio and Adult Education, and Alumni Education.

Book News

Book Club Selections

(for May)

BOOK-OF-THE-MONTH CLUB

The Week-End Library. Doubleday-Doran.

The fourth series of *The Week-End Library* volumes is a 1400-page anthology of recreation, containing a judicious reprinting of favorite items from recent literature in every mood.

BOOK LEAGUE OF AMERICA

Grim Youth, by John Held, Jr. Vanguard Press.

Sophisticated short stories of modern youth.

BUSINESS BOOK CLUB

America Looks Abroad, by Paul M. Mazur. Viking Press.

A book of economic prophecy for the next ten years.

CATHOLIC BOOK CLUB

Tramping to Lourdes, by John Gibbons. P. J. Kenedy. Essays.

CRIME CLUB

Case of the Marsden Rubies, by L. R. Gribble. Doubleday-Doran.

JUNIOR LITERARY GUILD

Men Who Found Out (boys and girls 8-12), by Amabel Williams-Ellis. Coward McCann.

Watching Europe Grow (girls 12-16), by Cornelia Stratton Parker. Liveright.

The Last Continent to Adventure (boys 12-16), by W. B. Hayward. Dodd, Mead.

LITERARY GUILD

Hot Countries, by Alec Waugh. Farrar & Rinehart.

A series of delightful pictures of such hot countries as Tahiti, Siam, Haiti, Martinique, and other places where foliage is thick and air is languorous.

Highest American Horticultural Award Made

MISS GERTRUDE JEKYLL, a distinguished English amateur gardener and author, has been awarded by the Massachusetts Horticultural Society the highest honor in its gift—the George Robert White Medal of Honor. The medal is bestowed once a year. It is the highest horticultural award in America, and is given "to the man or woman, commercial firm or institution, in the United States or other countries, that has done the most to advance interest in horticulture in its broadest sense."

Throughout her long life Miss Jekyll has been a gardener. She has contributed on the one hand a new understanding of the color values of plants and flowers in creating gardens of beauty and harmony, and on the other, through a marked literary gift, a procession of enjoyable, authoritative books. Probably the most faithfully read of her books is *Colour in the Flower Garden* (later reissued as *Colour Schemes for the Flower Garden*). Other characteristic titles are *Home and Garden: notes and thoughts, practical and critical, of a worker in both*; *Lilies for English Gardens*; *Annuals and Biennials*, the best annual and biennial plants and their uses in the garden, with cultural notes by E. H. Jenkins, and *Gardens for Small Country Houses*, written in collaboration with Sir Lawrence Weaver.

Of the twenty individuals or institutions who have received the George Robert White Medal, only one other, Mrs. Francis King, has been a woman. Two others have received the award either partly or wholly for their literary work. They are Prof. Liberty Hyde Bailey of Cornell, and William Robinson, an English contemporary of Miss Jekyll.

The Best Biographies

GAMALIEL BRADFORD, one of the editors of The Book League of America, considers the following ten biographies the best that have appeared in recent years:

Albert J. Beveridge, *Abraham Lincoln*.

Giles Lytton Strachey, *Elizabeth and Essex*.

Mrs. A. Williams-Ellis, *Exquisite Tragedy*.

Morris R. Werner, *Bryan*.

Edward C. Wagenknecht, *Man Charles Dickens*.

Harold E. Speight, *Life and Writings of John Bunyan*.

Gilbert Chinard, *Jefferson*.

Gerald W. Johnson, *Randolph of Roanoke*.

De Wolfe Howe, *James Ford Rhodes*.

Herbert S. Gorman, *Incredible Marquis, Alexandre Dumas*.

Detective Story Club Sold to Crime Club

THE CRIME CLUB, division of Garden City Publishing Co., announces that it has purchased the Detective Story Club, Inc. Eventually the two clubs will be combined. Detective Story Club subscriptions will now be handled under the book club plan instead of direct by mail, as in the past.

School Library News

A. L. A. School Libraries Section Constitution

AMENDED according to suggestions of the members of the Committee on the Revision of the Constitution of the section. To be voted on by the section at the annual meeting.

Name

The name of this organization shall be the School Libraries Section of the American Library Association.

Purpose

The purpose of this section shall be to promote school library interests and to establish and maintain a high standard for our profession.

Membership

Active—Any member of the American Library Association holding a certificate or degree representing at least one year's work in an accredited library school, or any person devoting full time to school library work, may become an active member of the section on payment of the dues provided for in the by-laws.

Associate—Any person or institution holding membership in the American Library Association may become an associate member of the section on payment of dues provided for in the by-laws.

Officers

The governing body of this section shall consist of a board of five directors, all elected for five-year terms, one member retiring each year; a secretary and a treasurer, each elected for a term of three years. This body shall be known as the Executive Board. The director who is serving his last year shall become chairman of the section, and the director next to retire shall become vice-chairman. The chairman shall appoint a nominating committee of three members annually. The officers shall be elected by ballot of active members at the annual meeting. A majority of all votes cast shall constitute an election. The members of the board shall assume their duties, and if possible meet at the close of the annual meeting.

Duties of Officers

The chairman shall preside at all meetings of the section, and shall be member ex-officio of all committees.

The vice-chairman shall, in the absence of the chairman, perform the duties of the office.

The secretary shall keep the minutes of all meetings of the section, shall notify officers and committees of their election, within two weeks, and shall carry on necessary correspondence.

The treasurer shall collect all money due the section and shall pay such bills as are approved and signed by the chairman. She shall keep the accounts and at the annual meeting shall make a detailed report for the year.

Duties of the Executive Board

The Executive Board shall formulate plans for the development of the work, discuss matters to be presented to the association, cooperate with the A. L. A. Committee on Education, the Children's Librarians' Section of the A. L. A., the Training Section of the A. L. A., and the National Education Association. The Executive Board shall be empowered to execute

any plans for the section at any time which shall make the School Libraries Section a vital factor in the development of school library work in all its departments.

Meetings

The annual meeting of the section shall be held during the annual conference of the American Library Association.

The chairman may arrange a meeting during the mid-winter session of the American Library Association, or at the time of the meeting of the Department of Superintendence of the National Education Association.

Amendments

The constitution may be amended at any regular meeting of the section, provided notice of the amendment has been presented at least one month before action is taken. A two-thirds vote of the membership present shall be necessary for adoption.

The by-laws may be amended at any regular meeting of the section, provided notice of the amendment has been presented at least one month before action is taken. A two-thirds vote of the membership present shall be necessary for adoption.

The by-laws may be suspended at any meeting by a two-thirds vote of the membership present.

By-Laws

1. The order of business for meetings shall be as follows:

- (a) Call to order.
- (b) Report of the secretary.
- (c) Report of the treasurer.
- (d) Reports of standing committees.
- (e) Report of the A. L. A. Committee on Education.
- (f) Miscellaneous business.
- (g) Election of officers.
- (h) Adjournment.

2. There shall be such standing or special committees as the Executive Board from time to time find necessary. The A. L. A. Education Committee shall report at the annual meeting.

3. A quorum shall consist of twenty active members.

4. Annual dues for the section shall be fifty cents.

5. Vacancies in office may be filled at any meeting of the section in the manner provided for in the annual election of officers.

Vacancies occurring between meetings shall be filled by the chairman.

6. The deliberations of the section shall be governed by Fox's *Parliamentary Usage for Women's Clubs*.

ELIZABETH SCRIPTURE, *Chairman*.

Library Round Table

THE LIBRARY Round Table of the Central High School, at La Crosse, Wis., has been organized to allow the members to become better acquainted with library work, and to assist the librarian. Meetings are held the first and third Thursdays of each month, when either books and authors are discussed or some type of library work studied. At present there are fifteen girls in the club under the direction of the school librarian.

Tentative Program of Special Libraries Association

Clift Hotel, San Francisco, California, June 18-21, 1930

WEDNESDAY, JUNE 18, 10 A. M.—12 A. M.
FIRST GENERAL SESSION.

Addresses of Welcome—Almer J. Newhall, President, San Francisco Chamber of Commerce; Milton J. Ferguson, State Librarian, Sacramento (five minutes each).

Response.

Addresses—"The Industrial West," F. T. Letchfield, Wells-Fargo Bank.

"Part Library Is Playing In Development of Industrial West," Thomas Cowles, President, Special Libraries Association of San Francisco, introducing Mrs. Amy Caya, State Chamber of Commerce, San Francisco; Miss A. Windele, Financial Libraries (five minutes each).

Guy E. Marion, Research Department, Los Angeles Chamber of Commerce, introducing B. E. Edwards, El Segundo Standard Oil Company; Miss H. G. Percy, Paramount-Famous-Lasky Corporation, Hollywood; Mrs. Creveling, San Diego Consolidated Gas & Electric Company (five minutes each).

President's address.

WEDNESDAY, 2-4 P. M. GROUP SESSIONS.

Financial Group, in Stock Exchange Auditorium.

Museum Group.

WEDNESDAY, 6:30 P. M. BANQUET.

Western Women's Club Ballroom.

Milton J. Ferguson, toastmaster.

Addresses—Robert Newton Lynch, "Pacific Relations."

Judge J. F. Davis, "California."

Gerald Campbell, British Consul, "The Far East."

THURSDAY, JUNE 19, 8:30 A. M. BREAKFAST CONFERENCES. Civic Social Group.

THURSDAY, 10-12 A. M. SECOND GENERAL SESSION.

Subject—"Public Libraries for Business Use."

"The Municipal Reference Library and Its Service to Business," Miss Josephine B. Hollingsworth, Municipal Reference Library, Los Angeles (fifteen minutes).

"How the Private Business Librarian Helps and Is Helped by the Public Business Librarian," Miss Florence Bradley, Metropolitan Life Insurance Co. Library, New York City (fifteen minutes).

"What the Public Business Librarian Offers the Special Librarian, and vice versa," Miss Rose Vormelker, Business Research Library, Cleveland Public Library (fifteen minutes).

"Summary of National Survey of Public Business Libraries and Suggestions for Cooperation Between Them and Special Libraries," Miss Marian Manley, Business Branch Librarian, Newark, N. J. (fifteen minutes).

Discussion (forty minutes allotted).

"Library Service to Business in San Francisco":

(a) By the Public Library, Robert Rea, Librarian, San Francisco Public Library (five minutes).

(b) By the Mechanics Library, Miss Mary O. Carmody, Assistant Librarian, Mechanics Institute, San Francisco.

(c) By Special Libraries of San Francisco (ten minutes).

THURSDAY, 2-4 P. M. GROUP SESSIONS.

Commercial-Technical Group.

Newspaper Group.

THURSDAY, 4-6 P. M. TRIP AROUND THE CITY.

The San Francisco Chamber of Commerce has arranged a tour to all places of interest.

THURSDAY, 6 P. M. DINNER IN CHINATOWN.

After dinner there will be a trip through Chinatown, including Chinese Theater, Society of Six, Pekin Exchange, Chinese Native Sons Hall, and to other interesting places, with plain-clothes escort.

FRIDAY, JUNE 20, 8:30 A. M. BREAKFAST CONFERENCES.

FRIDAY, 10-12 A. M. THIRD GENERAL SESSION.

Group Reports.

Local Association Reports.

Committee Reports.

Report of Nominating Committee.

Election of Officers.

Plans for 1930-1931.

FRIDAY, 2-4 P. M. GROUP MEETINGS.

Insurance Group.

Civic-Social Group.

FRIDAY, 4 P. M.

Trip to Palo Alto via Skyline Boulevard, and visit to Hoover War Memorial Library, Stanford Library, Stanford Chapel.

FRIDAY, 6 P. M.

Dinner at Woodside Country Club, on return from Palo Alto. Return to San Francisco through San Mateo and Burlingame.

SATURDAY, JUNE 21, 10-12 A. M. GROUP SESSIONS.

Commercial-Technical Group.

Book Selection on World Affairs, VIII Far East

The World Peace Foundation Mobilizes the Opinions of Experts Throughout the United States

- Treat, Payson J. *The Far East*. (13 votes) Harper. 1928. \$5.
 "... Primarily a text-book, but an excellent one. Clear, impartial, condensed..."
 Recommended as Advanced by Hicks, Latourette, MacNair, Thomas; as Intermediate by Blakeslee, Eshelman, Strakhovsky; as Elementary by Baker, Lattimore, Quigley, Treat.
- Vinacke, Harold M. *History of the Far East in Modern Times*. (13 votes) Knopf. 1928. \$7.50.
 "Probably the best recent history of the Far East."
 Recommended as Advanced by Hicks, Latourette, MacNair, Smith, Textor, Thomas; as Intermediate by Baker, Blakeslee, Eshelman, Godshall, Lattimore, Quigley, Treat.
- Dennett, Tyler. *Americans in Eastern Asia*. (12 votes) Macmillan. 1922. \$5.
 "The best survey of America's relations with the Far East to 1901."
 Recommended as Advanced by Blakeslee, Hung, Latourette, Lattimore, MacNair, Quigley, Smith, Thomas, Treat; as Intermediate by Godshall, Remer.
- Willoughby, Westel W. *Foreign Rights and Interests in China*. 2 v. (11 votes) Johns Hopkins. 1927. \$12.
 "First in its field."
 Recommended as Advanced by Blakeslee, Duncan, Godshall, Hicks, Lattimore, MacNair, Quigley, Smith, Textor, Thomas.
- Morse, Hosea B. *International Relations of the Chinese Empire*. 3 v. (9 votes) Longmans. 1910-18. \$9 each.
 "The standard authority in English."
 Recommended as Advanced by Blakeslee, Duncan, Lattimore, MacNair, Quigley, Textor, Thomas, Treat.
- Cooperating Professors: D. C. Baker, University of California; George H. Blakeslee, Clark University; Kenneth Duncan, Pomona College; L. Wendell Eshelman, Oregon State College; W. Leon Godshall, Union College; Charles Roger Hicks, University of Nevada; William Hung, Harvard University; Kenneth Scott Latourette, Yale University; David Lattimore, Dartmouth College; K. C. Leebick, Syracuse University; Harley Farnsworth MacNair, University of Chicago; Barnette Miller, Wellesley College; Harold S. Quigley, University of Minnesota; Charles F. Remer, University of Michigan; Sherman M. Smith, Colgate University; Leonid Strakhovsky, Georgetown University; Lucy E. Textor, Vassar College; Elbert D. Thomas, University of Utah; Payson J. Treat, Stanford University; Harold M. Vinacke, University of Cincinnati.
- In presenting this selected list of books on Far East, the World Peace Foundation aims to offer a guide to the best available material as recommended by composite expert opinion. To the end that these titles be indeed the most worth while the Foundation asked a large number of college professors teaching in the various fields relating to international affairs to recommend the best available books—elementary, intermediate and advanced—in the realm of their particular interest. All of the titles included here were recommended by three or more different professors and are arranged in the order of votes received. It is hoped that not only libraries, but study groups and individuals as well will find this list useful.
- Williams, Edward T. *Short History of China*. (8 votes) Harpers. 1928. \$5.
 "By all odds the best brief general history of China . . . accurate, interesting, fair."
 Recommended as Advanced by Eshelman, Hicks; as Intermediate by Baker, Latourette, MacNair, Quigley; as Elementary by Lattimore.
- Bau, Mingchien J. *Foreign Relations of China*. (7 votes) Revell. 1921. \$4.
 "The Chinese viewpoint by a leading Chinese scholar."
 Recommended as Advanced by Blakeslee, Duncan, Godshall, Quigley, Smith, Strakhovsky, Treat.
- Gowen, Herbert H., and Hall, Josef W. *Outline History of China*. (7 votes) Appleton. 1926. \$4.
 "An excellent history of China in modern times."
 Recommended as Advanced by Duncan, Latourette; as Intermediate by Blakeslee, MacNair, Thomas, Treat; as Elementary by Godshall.
- Latourette, Kenneth Scott. *Development of Japan*. (7 votes) Macmillan. 1926. \$2.
 "Compact, well written, authoritative."
 Recommended as Advanced by Eshelman, Hicks; as Intermediate by Latourette; as Elementary by Blakeslee, Quigley, Smith, Treat.
- Monroe, Paul. *China: A Nation in Evolution*. (7 votes) Macmillan. 1928. \$3.50.
 "An excellent general survey particularly for social background."
 Recommended as Intermediate by Smith; as Elementary by Blakeslee, Duncan, Latourette, MacNair, Textor.
- Gowen, Herbert H. *Outline History of Japan*. (6 votes) Appleton. 1927. \$4.
 "The best of the recent histories of Japan."
 Recommended as Advanced by Hicks, Latourette; as Intermediate by Blakeslee, Thomas, Treat.
- Latourette, Kenneth Scott. *Development of China*. (6 votes) Houghton. 1929. \$2.50.
 "Clear, non-technical and suggestive."
 Recommended as Intermediate by Hicks, Hung, Latourette; as Elementary by Godshall, Smith, Treat.
- Murdoch, James. *History of Japan*. 3 v. (5 votes) Greenberg. 1926. \$14 each.
 "Most detailed and comprehensive history of Japan in English . . ."
 Recommended as Advanced by Baker, Lattimore, MacNair, Quigley, Treat.
- Condliffe, John B., editor. *Problems of the Pacific*. (4 votes) University of Chicago Press. 1928. \$3.
 "Opinions of experts on some of the contending issues."
 Recommended as Advanced by Eshelman, Hung; as Elementary by Remer.

Hornbeck, Stanley K. *China Today; Political*. (4 votes) World Peace Foundation. 1927. \$1.25.

"A brief account of the Chinese situation in 1927 by a recognized authority."

Recommended as Advanced by Blakeslee, Godshall, Latourette.

Steiger, G. N., Beyer, H. O., and Benitez, Conrado. *History of the Orient*. (4 votes) Ginn. 1926. \$1.96.

"The best elementary book . . . which gives a rather complete survey of the whole Orient."

Recommended as Intermediate by Hicks, Lattimore; as Elementary by Baker, Thomas.

Williams, Edward T. *China Yesterday and Today*. (4 votes) Crowell. 1927. \$4.50.

"Especially good for cultural aspects."

Recommended as Advanced by Godshall, Smith; as Intermediate by Thomas.

Dutcher, George M. *Political Awakening of the East*. (3 votes) Abingdon Press. 1925. \$2.

"Deals with the Near and Far East in a comparative manner."

Recommended as Intermediate by MacNair; as Elementary by Godshall.

Harris, Norman D. *Europe and the East*. (3 votes) Houghton. 1926. \$4.

"Well fitted for a general approach to the Near and Far East."

Recommended as Advanced by Godshall; as Intermediate by MacNair, Smith.

Hornbeck, Stanley K. *Contemporary Politics in the Far East*. (3 votes) Appleton. 1919. \$3.50.

"A useful combination of recent foreign relations and internal political progress."

Recommended as Advanced by Smith; as Intermediate by Quigley; as Elementary by Remer.

Latourette, Kenneth Scott. *A History of Christian Missions*. (3 votes) Macmillan. 1929. \$5.

"Liberal, complete and up-to-date."

Recommended as Advanced by Hung, Latourette.

MacNair, Harley F., and Morse, Hosea B. *Far Eastern International Relations*. 2 v. (3 votes) Commercial Press. 1928.

"A very valuable treatise."

Recommended as Advanced by Godshall, Treat; as Intermediate by Hung.

McLaren, Walter W. *Political History of Japan in the Meji Era, 1867-1912*. (3 votes) Scribners. 1916. \$3.75.

"Standard for the period covered."

Recommended as Advanced by Baker, Blakeslee, Quigley.

Norton, Henry K. *China and the Powers*. (3 votes) Day. 1927. \$4.

"A good survey of the international relations of China in recent years."

Recommended as Advanced by Duncan, Godshall, Treat.

Treat, Payson J. *Japan and the United States*. (3 votes) Stanford University Press. 1928. \$3.50.

"Scholarly, standard, sympathetic to Japanese."

Recommended as Advanced by Hicks, Smith; as Intermediate by Blakeslee.

Williams, Samuel W. *The Middle Kingdom*. (3 votes) Scribners. 1883.

"A mine of accurate information."

Recommended as Advanced by Lattimore, Quigley, Textor.

The Open Round Table

World Peace List Corrected

To the Editor of THE LIBRARY JOURNAL:

Through some unfortunate ambiguity in correspondence an unintentional and unwitting injustice has been done to Dr. Hagbert Wright, of the London Library, regarding his list of books which appeared in the JOURNAL of Dec. 15, 1929, under the standing head "Book Selection on Foreign Countries—What Other Nations Regard as the Best Books in English About Their Countries." Doctor Wright was not sufficiently informed of the details of this bibliographical project and selected English books useful in promoting interracial understanding, which is the purpose but not the title or subject of the series.

WORLD PEACE FOUNDATION,
40 Mt. Vernon Street, Boston, Mass.

Educational Libraries Information

To the Editor of THE LIBRARY JOURNAL:

We are particularly interested in knowing what is being done, or has been done, in the way of collecting information on educational libraries. By an educational library we refer to one in which the preponderance of material is that dealing with such fields as school administration, educational psychology, teacher training, history of education, etc., and administered by a full or part-time librarian. Such information would include board of education libraries, special education libraries of schools of education, State Department of Education libraries, and libraries of educational organizations and associations.

JOHN K. NORTON,
Director, Research Division, U. S. National
Education Association, Washington, D. C.

As Others See Us!

Miss Mudge

MAY I call attention to an error in the editorial in *THE LIBRARY JOURNAL* of April 1 concerning my annual survey of reference books? The statement is there made that the article has been given up this year because the manuscript submitted would extend "to an estimated forty-eight pages." There is an error in this estimate made by *THE LIBRARY JOURNAL*. Last year's article ran to twenty-seven pages. This year, by actual count, the descriptive text of the new article is 2,832 words longer than that of last year, and there are thirty-three items more in the lists of books appended to the various sections. On the basis of the number of words per printed page in last year's article, this increase would amount in print to a little over four *LIBRARY JOURNAL* pages, making the new article approximately thirty-one pages in length as against twenty-seven pages last year. The added four pages are the normal increase in a year particularly rich in reference books.

ISADORE G. MUDGE,

Reference Librarian, Columbia University.

Editorial Note:

THE LIBRARY JOURNAL estimates were rather carefully made by two persons, the doubtful element being the large additional MS. footnotes giving the increased number of titles. The actual fact may lie between the two estimates, but in either case the paper proved too long for periodical publication, and the Editors confess to dereliction in failing to suggest to Miss Mudge in advance the necessity of condensation.

A Class at Columbia

AS MEMBERS of the class working for the Master's degree in the School of Library Service, Columbia University, we wish to protest against the editorial policy adopted in excluding from *THE LIBRARY JOURNAL* the annual survey of reference books by Miss Isadore Gilbert Mudge. We believe that this article has been written with such authoritativeness that it has always been of inestimable value to librarians.

In our opinion an entire issue devoted to such a scholarly piece of work would not be amiss, and we do not feel that the matter of length is sufficient reason for the policy adopted.

SIGNED BY THIRTY-ONE STUDENTS.

A Student at Columbia

AS A reader of *THE LIBRARY JOURNAL* I wish to protest against your refusal to print Miss Isadore G. Mudge's latest compilation of new reference books.

The value of Miss Mudge's authoritative lists is beyond estimate. Their appeal is wider than that of small library problems, or library furniture.

Your refusal to print the 1930 list makes me wonder just how much your commercial policy controls the professional tone of *THE LIBRARY JOURNAL*.

M. RUTH MACDONALD.

A Canadian

IT IS a pity that you cannot see your way to include Miss Isadore G. Mudge's bibliography of reference books in your contents for 1930. The printing of such features does more toward making *THE LIBRARY JOURNAL* the organ of our scholarly profession in America than fifty articles whose subject matter is ephemeral, for such bibliographies are the very breath of the reference library (and what library worthy the name is not a reference library?). I subscribe for *THE LIBRARY JOURNAL*, *Libraries* and lesser American library journals, and I must confess that I find much less material of permanent value in them than in less pretentious periodicals like *The (British) Library Association Record*, and *The Library Review*. I have attended international conferences and have seen some great American libraries and I appreciate the fine example of service the United States has given the world, but I am afraid we in America (I include Canada) are too fond of measuring what we are doing by buildings constructed, dollars spent, number of staff employed and number of books put into the hands of people.

I should like the editors of our professional publications to exclude a great deal of the fugitive material which now finds its way into print and include more contributions that would be consulted at least a month after publication.

Let's hear less of what is being done and more of what is not being done. An "intellectual renaissance is beginning to show signs of awakening power." Let us "do our utmost to make the unproductive and desert places blossom" until America "is known throughout the world as a Kingdom of Books."

ARTHUR SLYFIELD.

Librarian, Collegiate and Vocational Institute, Oshawa, Canada.

In The Library World

Chrome vs. Vegetable-Tanned Leathers for Bookbinding

THE Industrial-Farm Products Division of the Bureau of Chemistry and Soils, United States Department of Agriculture, has under way an interesting and valuable actual-service test on leather bindings, in connection with researches that it has been carrying on for many years on the serviceability and preservation of leather and leather goods, states F. P. Veitch, Principal Chemist, in charge.

Nearly all leather binding of books is done with vegetable-tanned leathers. In recent years, however, there has been in the industry a decided trend toward a more restricted production of vegetable-tanned bookbinding leather of proper tannage and finish, especially at competitive prices. One of the reasons for this is the advent of chrome tanning and its subsequent highly successful development; another is the relative costliness of the proper tanning materials, and the more or less special attention necessary for the making of the most durable bookbinding leathers. Successful commercial tanning today depends largely on mass production. The making of durable vegetable-tanned bookbinding leather has become a specialty, and at present the volume of this business, so far as most tanners are concerned, is so small compared to the whole as not to offer them sufficient inducement to warrant special processing. Though small by comparison, the yearly business in bookbinding leathers involves a substantial sum of money, and there are possibilities of expanding this business. It would seem that an opportunity to profitably specialize in the production of bookbinding leathers of the best and most durable type is being overlooked.

In anticipation of a continuation of the above-mentioned trends of the industry and because no one seems to have given any serious consideration to the possibilities of using chrome-tanned leathers for bookbinding, the following experiments were started.

Sixty volumes of Chemical Abstracts, one of the most frequently used sets of all scientific publications, have been bound in ten calfskin leathers comprising five different chrome tannages and five different vegetable tannages. The bindings were distributed throughout the set in such a way as to give direct comparisons of the serviceability of the different tannages. Each book is permanently identified by an experiment number stamped in gold on the back.

These experiments also include practical tests on the comparative efficacy of four dressings for preserving leather bindings. Certain of the bindings have been treated with these dressings, and others have been left untreated for controls.

The books have been placed in service in the Library of the Bureau of Chemistry and Soils. They will be periodically inspected and treated. As each binding shows signs of failure, it will be submitted to physical tests and chemical analysis. The data thus obtained will be studied and compared with similar data on the leather when new, for determination of the causes of deterioration and development of means to prevent it.

Seattle and Montclair Surveys

TWO PUBLIC libraries on opposing seaboards have recently set themselves the task of making a careful survey of the future and what it may bring forth in the way of increased service to their respective communities. As William Elder Marcus says in his foreword as president of the board of trustees of the Montclair (N. J.) Free Public Library in its *Annual Report for 1929 and Program for Next Five Years*, "There must be a consciousness of what the goal is if there is to be any hope of reaching it with wise leadership. . . . Consistent and intelligent growth cannot be expected unless a definite goal be in sight. All of human effort and ambition are directed and activated by this basic idea of reaching a goal. Successful businesses inject into the conduct of their activities sales quotas and objects to be attained. Do libraries?"

Not one general comprehensive program for five or ten years in advance could be found for any library in the United States when a careful search was made last summer, according to Mr. Marcus. The gap has since been filled by a survey then in progress in Seattle, Wash., which, however, was not published in its entirety until January, 1930. In October, 1928, the Board of Trustees of the Seattle Public Library decided to conduct a survey of the library and to work out a ten-year program for its development. The plan adopted for this study called for (1) the selection of those features of library service that seemed to deserve careful study and consideration, and (2) the assignment of each of these topics to a separate committee of three composed of one member of the Library Board, one member of the library staff, and the librarian.

Nine committees were appointed, and their reports, adopted with some slight amendments by the Library Board, have been published in order that they may be easily available for future reference by members of the Library Board, members of the library staff, members of the City Council, and others who may be interested. (*A Ten-Year Program for the Seattle Public Library*, bds., 88p., illus.)

If the proposed program can be carried out, the Seattle Public Library will find itself, in the year 1940, housed in a completed library building, financed by a municipal library bond issue in the amount of \$1,200,000, with several additional branch libraries serving outlying districts (no permanent branch building has been built since 1921), and with its service extended to all parts of King County. The library came near the A. L. A. minimum standard of library support in 1929, when the appropriation of \$408,842 represented a per capita expenditure of 98 cents, but it envisages an eventual appropriation of \$1.22 per capita (\$769,000 from an estimated population of 630,000 in 1940, the present population being approximately 430,000). The employees of the Public Library, now the only group of city employees not protected by a pension plan, should by that time or earlier be sharing in the benefits of the Seattle Civil Service Employees' Retirement System. The municipal reference service, operating under limitations from the central library since 1913, should be housed as a separate branch in quarters in the County-City building now under construction, with a staff of two and a budget after the first year of \$5,000. As to school libraries, the library is inclined to encourage the school authorities to continue their policy of providing a separate fund for books for school libraries; the public library will still cooperate, but the major portion of the funds must of necessity come from the school budget. The survey does, however, recommend that the schools collection at the public library be enlarged so that it will be possible to supplement the elementary school libraries by temporary loans and to give adequate service to the Parental schools, Ruth School, Children's Orthopedic Hospital, and other places where the collections are small and need frequent changing. As soon as possible book wagon service should be provided during the school year for children in small schools now dependent upon classroom libraries and, during the summer months, for children living far from library centers. A book wagon is also part of the scheme for enlarged service to King County, which now has partial service. An appropriation of at least \$30,000 will be necessary to enlarge county

service. The Seattle Library has thus far had no special book funds. The first organized attempt to present the library as a possible object of civic beneficence was made in January, 1926, when letters were sent to about seventy persons of means, to about two hundred lawyers, and to several banks and trust companies, calling their attention to the library and its needs and suggesting consideration of these needs when wills are being drawn or when gifts or bequests are contemplated. It is hoped that endowment funds will be forthcoming not only for developing special book collections, but for extending and improving service to the sick and the blind.

The five-year goal of the Montclair Free Public Library also includes plans for an enlarged building. The present building lacks storage place for books and magazines, book stacks, reading rooms, work rooms, study rooms, a reference room, and a desirable children's room. The appropriation for books and binding should be \$15,000 in 1930 and \$20,900 in 1934. If the present library budget of \$66,000 has increased to \$100,336 in 1934, that will cost a taxpayer who has \$10,000 of assessed property value only \$1.89 more than if the library budget were to remain stationary during these five years, or an average of 38 cents per year to the taxpayer.

Triple Anniversary Celebration

A GROUP of older Boone Library students, China, are planning to celebrate on May 16 three events connected with the Boone Library: the thirtieth anniversary of Miss M. E. Wood's service, the twentieth anniversary of the Boone Library, and the tenth anniversary of the Boone Library School. As Miss Wood has often expressed the desire to see on the land adjacent to the Boone Library a building that could house specimens of China's fine arts and natural history, this group of students are planning this as a fitting memorial which can be named for her in the institution where she has labored so diligently for the past three decades.

History of Pullman Free

THE PULLMAN Company has just issued a unique folder, "Pullman Progress: 1859-1929," presenting in attractive color pictures and text the evolution and history of the sleeping car, with valuable historical data on the country's transportation development. Many educational authorities have declared it very useful for classroom work. Librarians, educators and others interested will be supplied with copies on application to The Pullman Company, 79 East Adams Street, Chicago, Ill.

Scholarship Grants for Graduate Library Study, 1930-31

THE NAMES of ten librarians recommended for scholarship grants to be given by the Carnegie Corporation of New York for the year 1930-31 are announced by the Corporation. These scholarship grants are made to enable persons who have already had experience in library work and who have shown a capacity to contribute to the advancement of the library profession, to pursue graduate study in library problems. The stipend is \$1,500 but the practice of the Corporation in the future may vary to meet the requirements of individual students.

Ninety-two persons filed applications for grants this year. Candidates were selected by an Advisory Group on Library Scholarships which included Rudolph H. Gjelsness of the New York Public Library; Carl H. Milam, Secretary of the American Library Association; William S. Learned, author of *The American Public Library and the Diffusion of Knowledge*; Florence Overton of the New York Public Library, Adam Strohm of the Detroit Public Library and Malcolm G. Wyer, Librarian of the Denver, Colo., Public Library. Candidates were chosen on the recommendations of those competent to judge the applicants' ability from their own professional experience, and on the plan and purpose set forth by the candidates themselves.

Those recommended for scholarship grants are:

LEON CARNOVSKY, student, Graduate Library School, University of Chicago; B. A., University of Missouri, 1927; St. Louis Library School, 1927-28; to continue library studies in adult education at the Graduate Library School, University of Chicago.

MARGRETHE D. BRANDT, student, Graduate Library School, University of Chicago; B. A., University of Minnesota, 1924; to continue studies at the Graduate Library School, University of Chicago.

MARGARET HUTCHINS, Supervisor, Branch Reference, Queens Borough Public Library; B. A., Smith College, 1906; B. L. S., University of Illinois, 1908; to pursue graduate study in the School of Library Service, Columbia University.

MARGERIE QUIGLEY, Librarian, Montclair, N. J., Free Public Library; A. B., Vassar, 1908; library training in St. Louis Public Library and New York State Library School; to study the suburban library, looking toward wider cooperative marketing of library service, under the direction of the School of Library Service and the Business School, Columbia University.

LEONILDA I. SANSONE, Foreign Branch Librarian, in charge of Italian work, New York Public Library; B. A., Brown University, 1921; B. S. in Library Science, Columbia University, 1928; to study Italian literature and book production at the University of Florence and the University of Rome, Italy.

DOROTHY W. CURTISS, in charge of revision of catalog of Westerly, R. I., Public Library; B. A., University of Rochester, 1918; B. L. S., New York State Library School, 1924; to pursue graduate study in the School of Library Service, Columbia University,

specializing in the teaching of cataloging and classification.

F. E. FITZGERALD, Librarian, St. Thomas College; A. B., Creighton University, 1924; School of Library Service, Columbia University; to study in the School of Library Service, Columbia University.

MRS. CATHARINE PIERCE, Instructor in Library Science, North Carolina College for Women; A. B., North Carolina College for Women, 1924; B. S., School of Library Service, Columbia University, 1927; to pursue studies in the School of Library Service, Columbia University.

LOUIS M. NOURSE, Reference Librarian, Kern County Free Library; A. B., University of Rochester, 1926; B. S. in Library Science, University of California School of Librarianship, 1928; to study at School of Library Service, Columbia University.

IRENE M. DOYLE, student, University of Illinois Library School; A. M., University of Illinois, 1924; B. S. in Library Science, University of Illinois Library School, 1930; to continue graduate work in the University of Illinois Library School, in preparation for teaching library science.

Dana College

AS THE outgrowth of the Pre-Legal Department of the New Jersey Law School, of which Mr. Richard D. Currier is president, and which has been providing the two years of necessary college work required for entrance to the Law School, a college to give the entire four years of college academic training is being started in Newark under the name of Dana College. The new institution is named in honor of the late Librarian of Newark, John Cotton Dana. It is hoped to have the college, which has been running now three years as the Pre-Legal Department of the Law School, with 600 students, formally opened next October as Dana College.

Memorial Library Planned

PLANS for a library at the Bread Loaf Summer School of English, Middlebury College, Vermont, as a memorial to the late Dean Wilfred E. Davison have been accepted and the building will be ready for use by the opening of the school on July 1. The building will be a restoration of one of the original buildings of the Bread Loaf Inn. The interior will be of Colonial design with a huge fireplace built of local field stone flanked with book cases.

Vancouver Public Library

OVER 78,000 volumes are available in the various departments of the public library for free use by the people of Vancouver, B. C., and 815,051 volumes went into Vancouver homes during the year. Library service in Vancouver cost approximately 45 cents per capita for the last twelve months. The year saw 171,268 volumes go into the hands of boys and girls, some few of which were circulated through the schools and playgrounds.

Library Organizations

New Jersey and Pennsylvania Meeting

THE NEW JERSEY Library Association celebrated its fortieth anniversary at the Thirty-fourth Annual Meeting of the New Jersey Library Association and the Pennsylvania Library Club held at the Hotel Chelsea, Atlantic City, April 4-5, 1930. The business meeting of the New Jersey Library Association opened the first session.

An announcement was made that Miss Lena D. Appleton desires to make a contribution to the library profession of the State and would establish a scholarship in memory of Miss Louise Graham Hinsdale, formerly Librarian at the East Orange Public Library. The scholarship will approximate \$125 annually, and is to be awarded, first, to a member of the East Orange library staff, selected by the librarian of that library, and if no applicant is available from that library then the scholarship is to go to someone in the State of New Jersey. The scholarship is to be given for work at the Summer School of the New Jersey Public Library Commission at Ocean City, N. J. A motion was unanimously carried that the association accept this offer with sincere thanks, and that the gratitude of the Association be sent to Miss Appleton.

Following the business meeting a round table for the discussion of current books was led by Miss Alice G. Higgins, Associate Professor of Library Service, New Jersey College for Women. Brief discussions of some outstanding books on various subjects were reported on by several members of the association.

Earl Reed Silvers, author of books for boys and girls and Associate Professor of English at Rutgers University, was the first speaker at the Saturday morning session. In his address on "Ideals in the Authorship of Children's Books" he stressed the necessity of authors having high ideals in the writing of books, and that it is the privilege of librarians to recommend to children books of wholesome quality and books they will enjoy. He stated that his contact with children has been international, and naturally his influence as an author has reached the same scope. The second speaker of the morning was E. Cockburn Kyte, Librarian, Queen's University. His subject was "Monastic Libraries." Frederick W. Faxon, Chairman of the Travel Committee of the American Library Association, announced the traveling arrangements for the American Li-

brary Association meeting to be held at Los Angeles, Cal., in June.

Saturday evening was given over entirely to the Fortieth Anniversary Dinner and program of the New Jersey Library Association. Members of the Pennsylvania Library Club and the American Library Institute and their friends were invited to join in the evening's festivities. Following the dinner, which was held at 7 p. m., four of the past presidents of the association give brief reminiscences of the decade they represented in the association's history. Dr. Frank P. Hill, Librarian, Free Public Library, Brooklyn, represented the decade 1890-1900; Mr. Adam Strohm, Librarian, Detroit Free Public Library, represented the decade 1900-1910; Miss Sarah B. Askew, Librarian, New Jersey Public Library Commission, the decade 1920-1930.

The session on Friday evening, April 4, at 8:30, was under the direction of the Pennsylvania Library Club. The president of the club, A. Edward Newton, presided. His paper was on "The Most Distinguished Woman in English Literature." Mr. Newton chose as the subject of this talk Mary Wollstonecraft (afterward Mrs. William Godwin), born in London in 1759, died there in 1797. Mr. Newton briefly mentioned Mary's early education and unhappy childhood, and gave an account of her life and love affairs, portraying her impulsiveness, enthusiasm and charm of personality and manner.

The Pennsylvania Library Club speaker at the joint session of the two associations held at the Hotel Chelsea, Saturday, April 5, at 10:30 a. m., was Capt. E. Cockburn Kyte, Librarian of Queen's University, Kingston, Ontario. Captain Kyte's paper was on "Monastic Libraries." He gave a most interesting and scholarly account of the early monastic libraries in Ireland and England. "At a time when the remainder of Europe was barbarous," said Captain Kyte, "the lamp of learning was burning brightly in Ireland. Men came from all parts of the continent to be taught Greek in the Irish monasteries, almost the sole repositories, in the Sixth Century, of the literary treasures of the Greeks and Romans. The Irish monks not only studied and taught, made books and illuminated them, but they were missionaries of learning also." Their influence extended to England and Scotland, the speaker said, and the monasteries throughout Great Britain, with their collections of books, became the most important seats of learning in the world at that time.

From The Library Schools

Iowa

THE STATE University of Iowa offers this year, for the twenty-ninth time, a brief course in Librarianship. The following seven courses are to be given: Library Administration, Reference, Cataloging, Classification, Book Selection, Library Work with Children, and School Library Service. The course in Library Administration is planned to meet the needs of students interested in public or college library work, while the last course, School Library Service, is for those who intend to be school librarians. Instruction begins June 9 and continues through July 17. The annual Conference for Library Workers, held under the joint auspices of the University Extension Department and the Library School, will occur on July 3.

McGill

MCGILL University Library School announces a six weeks' summer Library Course at the University of British Columbia in Vancouver simultaneously with the one given annually at McGill from July 2 to August 9. The six weeks' course which is to be given meets the same requirements as the McGill University Summer Library Course which has been accredited by the A. L. A. Board of Education for Librarianship. It aims to meet the needs of those already engaged in library work who have had no training and to prepare high school graduates as assistants in medium-sized libraries or to take charge of small libraries. At the present time McGill is the only university in Canada giving a summer library course.

Pittsburgh

THE CARNEGIE Library School was transferred from Carnegie Institute to Carnegie Institute of Technology on April 1. The school retains its quarters in the central building of the Carnegie Library of Pittsburgh, and its close unofficial connection with that library will not be affected, but the transfer opens the way for a higher rating for the school and the granting of degrees.

Beginning in September, 1930, the following classes of students will be eligible for admission: to the courses in work with children and general library work, seniors from Carnegie Institute of Technology and the University of Pittsburgh and graduates of all approved colleges; to the course in school library work, college graduates only. The library school faculty will be given regular faculty rating. The school thus secures the advantage of being an

integral part of a teaching institution and also of having close affiliations with a large public library.

Syracuse

THE SYRACUSE School of Library Science offers three optional programs in its six weeks' summer session, extending from June 30 to Aug. 6, 1930. Courses in the first program carry credit for the degree of Bachelor of Science in Library Science. The full year of work as presented in the regular session can be completed in four successive summers. The second program is arranged for the student who desires to qualify for the position of teacher-librarian. This program is to be completed in two summers to fit the requirements of the State of New York for its limited certificate, but the course can be rearranged to comply with the requirements of other States. The third program is arranged for the librarian of the small public library and is especially designed to fit her particular needs.

University of Minnesota

COURSES in Cataloging, Classification, Current Library Problems, Elementary Reference, and Library Work with Children will be offered in the Summer Session of the University of Minnesota beginning June 19 and ending July 26. Miss Lura C. Hutchinson, Miss Lillian M. Busian, Miss Alma M. Penrose, and Miss Harriet A. Wood are the instructors. Credit will be limited as usual to students having at least two years of approved college work. Others are admitted only by special permission of the Director of the Division of Library Instruction or the State Department of Education, St. Paul, Minn.

Information may be obtained from the Director of the Summer Session, University of Minnesota, Minneapolis, Minn.

University of Mississippi

THIS WILL be the second summer that the University of Mississippi has offered training for high school librarians. Summer school will open June 2 and continue nine weeks. Courses in Administration, Book Selection, Reference, Cataloging, and Classification will be offered, with Miss Grace Winton, librarian of the Northwestern High School of Detroit, giving the same courses she gave last summer. Junior standing is required of all students, and two semester hours of credit for each course is allowed in the College of Liberal Arts toward the bachelor's degree.

Among Librarians

Oregon State Librarian Dies

MRS. VIRGINIA CLEAVER BACON, Oregon State Librarian, died on April 12 following an illness of several weeks. Mrs. Bacon was a graduate of the University of Oregon and the Riverside School of Library Service with a wide and varied experience in library work.

MRS. VIRGINIA C. BACON

Before she came to the position of State Librarian of Oregon, in March, 1929, she had been cataloger in the Riverside County Free Library; Librarian of the Humboldt State Teachers' College, Arcata, Cal.; Librarian and Service Secretary in the Junior Division, United States Employment Service, Washington, D. C.; Librarian in Park College, Parkville, Mo., and Library Adviser in Adult Education in the Library Association of Portland, Ore. She was also the author and joint editor of the bulletin *Vocational Guidance and Junior Placement*, and author of *Good English*, one of the A. L. A. Reading with a Purpose series. She represented in an unusual sense the constructive, educational aspirations of the modern librarian's profession.

Public Libraries

PRISCILLA BANCROFT, Simmons '18, has resigned as librarian in Proctor Free Library to accept a position in Florida.

EMILY G. DAVIS, formerly librarian of the Johns-Manville Corporation, is now with the New York Public Library.

LENALA MARTIN, California '14, the county librarian of Lassen County, California, for the past twelve years, and her assistant, Elisabeth Haines, who has been there the same length of time, have secured a three months' leave of absence in order to have a complete change from library work, and left Feb. 1 for a trip through the southern and eastern parts of the United States.

Special Libraries

MRS. ELIZABETH R. CREGLOW has returned to hospital library work after an interval of some months in New York. She is now with the U. S. Veterans' Hospital, Oteen, N. C.

MIRIAM CUMMINGS, formerly in the Research Division of the American Child Health Association, New York, has recently taken a position with the Children's Fund of Michigan in Detroit.

AINA EBBESEN, formerly first assistant in the W. T. Grant Company library, has resigned to take a position in the library of Batten, Barton, Durstine & Osborn.

MARGARET FLEMING has taken the position of circulation assistant in the U. S. Rubber Company library.

ANNA HADDOW, Drexel '28, has been appointed librarian of the National Education Association at Washington.

EDITH E. KELLY, St. Louis, '24, has joined the staff of the Wisconsin Historical Society Library, Madison, Wis.

MARGARET MAGEE is now librarian of the Child Study Association of America, succeeding Mrs. Huntley, who is with the Cleanliness Institute.

PHOEBE STODDARD has become librarian of the law firm of Murray, Aldrich & Webb, 15 Broad Street, New York, N. Y.

KATHERINE UHELIN, Columbia '29, who was already on the library staff of the W. T. Grant Company library, has recently been appointed first assistant.

DOROTHY VARIAN, Drexel '28, has received the appointment as county librarian, a position just established by the Chester County Recreation Board at West Chester, Pa.

Opportunities

This column is open to librarians

Wanted—A classifier with good background and several years' experience with the D. C. in a university or large public library; also one with experience but with training and an aptitude for classification.
E-12.

Wanted—Substitute librarian for summer school, six weeks, from June 23 to Aug. 1. State experience and salary expected. Apply direct to C. E. Graves, librarian, Humboldt State Teachers College, Arcata, Cal.

Wanted—Head of Children's Department in a Western city July 1. Apply giving experience and educational qualifications.
E-10.

Junior high school librarian desires position for July and August. College graduate with library school training and teaching experience.
E-11.

College graduate, completing library course in June, desires position as children's librarian. Has had considerable experience. Minimum salary, \$1,500.
Z-21.

School librarian desires position for the summer. Periodical work preferred. Experience in school and public libraries.
D-18.

Librarian with thirteen years' experience in public, medical and business libraries desires position.
D-16.

University and library school graduate with poise, initiative, executive ability, and seven years' experience wishes responsible position in California. College library preferred.
D-17.

University and library school graduate, possessing poise, tact, initiative, executive ability and successful record, desires position in or near New York City.
D-23.

Librarian with training and twelve years' general experience wishes position in West beginning August or September. Prefers reference, administration or cataloging. Extensive knowledge of public documents.
D-21.

Young woman, college and library school graduate, with eight years' experience in public and college libraries, desires temporary position for summer.
D-20.

Librarian with B.S. degree and two years' experience in public library desires change in fall after summer course in library science.
D-22.

Elusive Quotations

A column designed to assist in the location of quotations and poems which cannot be found through the usual channels of anthologies and books of reference. Send replies to THE LIBRARY JOURNAL.

M. I.—Requests help in locating the following quotation, which has been puzzling her for some time:

Patience and perseverance
Made a bishop of his Reverence.

Free

PRINCETON University Library will send to any library, transportation charges collect, *National Monetary Commission Report*, set lacking Volume 19, Part 2, Volumes 23 and 24.

THE UNIVERSITY of Witwatersrand, Milner Park, Johannesburg, South Africa, has for distribution a few numbers of a booklet entitled *Johannesburg: A Sunshine City Built on Gold*, 1929, also a few separates of contributions to geology by the late Dr. Percy A. Wagner. Apply direct.

The Calendar

May 10—New England School Library Association, annual meeting at New Haven, Conn.

May 12-15—American Association for Adult Education, fifth annual meeting at Edgewater Beach Hotel, Chicago, Ill.

May 16-17—New England College Librarians, annual meeting at Dartmouth College, Hanover, N. H.

May 23-24—Idaho Library Association, annual meeting at Boise, Idaho.

June 13-18—Northeastern Library Convention will be held at Swampscott, Mass.

June 13-18—Vermont Library Association, annual meeting at Swampscott, Mass.

June 13-18—Rhode Island Library Association, annual meeting held in conjunction with Massachusetts meeting at Swampscott, Mass.

June 14—Utah Library Association, annual meeting at American Fork, Utah.

June 18-21—Special Libraries Association, annual convention at Clift Hotel, San Francisco, Cal.

June 18—New Hampshire Library Association, annual meeting at Swampscott, Mass.

June 23 or 24—California School Library Association will meet at Los Angeles, Cal.

June 23-28—American Library Association, annual meeting at Biltmore Hotel, Los Angeles, Cal.

June 30-July 18—A rural library extension institute at the College of Agriculture, University of Wisconsin.

Oct. 8-11—Regional meeting of Iowa, Minnesota, North and South Dakota, Wisconsin, and possibly Nebraska, to be held in St. Paul.

Oct. 13-18—New York Library Association, annual meeting at Albany, N. Y., in connection with Convocation of the University of the State of New York.

Oct. 15-18—Illinois Library Association, annual meeting at Moline, Ill.

Oct. 15-17—Ohio and Indiana Library Associations, annual meeting (joint session) at Dayton, Ohio.

Oct. 20-22—Montana Library Association, annual meeting in Billings.

Nov. 10—Arizona State Library Association, annual meeting at Phoenix, Ariz.

Nov. 21—Illinois High School Library Association meets as Section of High School conference at Urbana, Ill.

Nov. 6-7—New Mexico Library Association, annual meeting at Albuquerque, N. M.

Cleveland Makes Survey

THE CLEVELAND PUBLIC LIBRARY has recently made a survey of the general trend of reading during the past year, as shown by the records of the various library departments. In non-fiction there has been a continued interest in the popular type of modern biography, and a strong interest in aviation and aeronautics, in all departments, juvenile and adult. The Main Library reports a steady and strong interest through the year in books on investments and financial matters. This, of course, increased greatly during the fall. Plays and popular scientific books are also in demand. In fiction the Main Library reports a trend toward the better novel in happier vein, in contrast to the more morbid and introspective types. War stories of the narrative type are more popular than ever. Translations are popular, and social studies have increased in popularity.

The branches report a continuing interest in western, adventure and mystery stories, with a trend somewhat from the western story to the mystery or detective. A number of branches mentioned the simple love story and romance as gaining in popularity, but there were others that reported the same interest they had noted in previous years, in the more sophisticated type of novel. These differences are accounted for partly by a difference in clientèle. From colored branches is the report of a definitely increasing interest in negro literature. Foreign translations are popular in the branches, and there is a general interest in non-fiction of the more popular type. Several mention poetry, and a number report the continued popularity of plays in book form.

County reports indicate an apparently increasing desire for all best sellers, and an increasing tendency on the part of readers to keep watch of printed advertisements and reviews.

In juvenile reading the subjects most in demand, in the order of their popularity, are: Fiction, fairy tales, nature study and general science, including aviation, history and biography and poetry.

The Stevenson Room for Young People reports that books of adventure and romance are in greatest demand, western and mystery stories follow, and historical fiction is used least, unless it has considerable adventure.

Current Books on Business

COMMON STOCKS AND THE AVERAGE MAN

By J. George Frederick, well-known analyst and research man

About 400 pages, illustrated, including copies of new "Measuring Stick" for judging worth of common stocks. The book is an analysis of the lessons of the stock panic; a valuation of common stocks as they stand today, for the long pull; an analysis of each industry separately, a plan for a complete data system for the average investor's use; sound rules for common stock buying by the average man or woman; valuable statistics of employee stock ownership, etc. Book was selected as "best business book of the month" by board of judges composed of Prof. Ripley of Harvard, John Moody, Henry Bruere, Albert Haase, Harlow Person, Frederick M. Feiker. \$4.00 postpaid. Business Bourse, 80 W. 40th Street, New York.

SELLING MRS. CONSUMER

By Mrs. Christine Frederick, famous home economics authority

A large, handsomely illustrated book of 400 pages, giving for the first time the woman consumer's point of view and advice to sellers of family goods. A remarkable compendium of important practical data on everything pertaining to selling goods to women; including original and valuable statistics of per capita and per family consumption of several hundred items, and a separation of the country into ten income groups, with important new detail. \$5.00 postpaid. Business Bourse, 80 W. 40th Street, New York.

SELLING BY TELEPHONE

By J. George Frederick, well-known research man and sales counsellor

The one authoritative, full volume of 400 pages, illustrated, on the new and profitable art and technique of the telephone in salesmanship. Details given of the successful methods used by retailers and wholesalers, department stores, national manufacturers, and all types of business, in handling sales more economically and effectively by telephone methods. Careful instructions in voice and telephone personality technique; and large telephone sales zone map included. \$4.00 postpaid. Business Bourse, 80 W. 40th Street, New York.

THE ART OF BUSINESS THINKING

By H. G. Schnackel

Few persons actually use more than a small percentage of their total thinking capacity. "If the executive," says the author, "can produce satisfactory results by working at only 75 per cent of his mental capacity, what can he not do if he works his mental plant to full capacity?" The question is, How can he obtain maximum efficiency in his mental activities? This book answers the question. Price, \$2.50. John Wiley & Sons, Inc., 440 Fourth Avenue, New York.

A LIBRARIAN'S COMMENT ON THE NEW BRITANNICA

By Delia A. Hadsell

Librarian, Summit, N. J., High School

From February 27 to March 27 the librarian and teachers of the Summit, New Jersey, Junior and Senior High Schools conducted an experiment with a view to determining the adaptability of the new Encyclopaedia Britannica, particularly to Junior High School work.

On the basis of this test a report has been submitted, from which we quote the following excerpt:

"WHEN we first considered placing the Britannica in the library, the general opinion among the Junior High School teachers was that it would be very valuable for the High School, but too advanced for the Junior High School student. This practical test of its value has surprised all of us, and we agree that if we could have just one encyclopaedia, it would be the Britannica.

"The physical make-up of the books is excellent for Junior High School students. They like the large type, the wide columns, and the arrangement of material. They are delighted with the pictures—as all of us are.

"It gives the students authoritative, up-to-date material in a not-too-technical manner, and does away with too great a dependence on the juvenile encyclopaedia. While the average student does not realize the value of an encyclopaedia that is written by authorities and specialists, he does know that it is interesting, readable, and attractive. I believe that the student who begins to use the Britannica when he is in Junior High School will continue to depend on it as an authoritative source of information.

"The Britannica deserves to be called 'The finest encyclopaedia in English.'"

Signed: Delia A. Hadsell.

(The full text of this report will be gladly mailed on request.)

THIS new Britannica represents the greatest encyclopaedia value you could buy. It contains fully half again as much material as any other encyclopaedia or general reference work published today.

Up-to-date, accurate, written by 3,500 acknowledged authorities, with 500 maps and 15,000 illustrations it is, to quote the New York Sun, "the finest Encyclopaedia in English." Yet the price is the lowest in the major encyclopaedia field.

The new Britannica belongs high in the list of library indispensables. Order your set today. *Special Form for Library Use.*

Forthcoming Issues of THE LIBRARY JOURNAL

✿ Articles scheduled for the June first number include an interesting, practical paper on "The Care of Maps and Atlases in the Library," by Willard P. Lewis, Librarian of Wesleyan University; an article by L. F. Schmeckebier from the Institute for Government Research, Washington, entitled, "The Government and the Libraries"; "The Popularity of American Magazines," by Alfred D. Keator, Librarian of the Reading Public Library, Pennsylvania; and a reprint of "Thirty Books for Young People," by Jean Roos, Head of the Stevenson Room, Cleveland.

✿ The June fifteenth issue will be a special number on library work in California, Oregon, Washington, and British Columbia. This number will be distributed at the A.L.A. Conference in Los Angeles.

✿ The single issues in July and August will be devoted to reports of the Conference: the August issue covering all reports from Sections, Round Tables, and Affiliated Organizations. All reports to be included in this number will need to be delivered not later than two weeks after the Conference. B. E. W.

Smart...Distinctive... Beautiful...

The New Linen-1 Pattern of du Pont Library Fabrikoid

A TEXTURE lovely and rich as an old hand woven material . . . smart . . . distinctive. Such is the beautiful 1930 Linen-1 pattern of du Pont Library Fabrikoid. A delightful new covering for library books, obtainable in a wide variety of charming colors and shades.

Like all Library Fabrikoid, it is washable and waterproof. It contains no filler to fall out. Changing climatic conditions do not affect it. It is vermin and insect-proof.

Write for This Sample Book

Ask your binder to supply your requirements in this new, attractive Linen-1 pattern of Library Fabrikoid. Send in the coupon below for sample book containing swatches in eight different beautiful shades.

Handling a Serious Cut in a Library Budget

The First Consideration, in Meeting a Budget Cut, Should Be to Keep the Organization Together for It Requires Years to Build Up an Efficient Staff in an Institution Like the Library

By Samuel H. Ranck

Librarian, Grand Rapids Public Library, Michigan.

LIBRARY LITERATURE contains many references to discussions of library budgets, the amount, sources, and distribution of revenues, etc.; but there has been relatively little public discussion of handling the problems relating to a sudden shrinkage of library income. From time to time, however, libraries, along with other municipal institutions, have been obliged to stand serious cuts in their budgets, and this has been especially true in the last year or two in connection with the slowing up of industry. Cities whose business and industry have been hard hit as a result of the recent panic in Wall Street are likely to be up against this very thing in 1930. It seems appropriate, therefore, to discuss the problem of how a library should handle a serious curtailment of its income which makes it impossible to expand with growing use or even to maintain its well established service.

From library annual reports one could produce a long list of institutions that have suffered a large decrease in income at one time or another; and one would find that there are various ways that such situations have been met. One of the early ways was to cut the salaries of the employees or lay off a number of the employees, sometimes with a curtailment of the hours of service and sometimes without, thus putting additional burdens on those who remained. Pittsburgh, I believe,

some years ago was obliged to dispense with the services of a considerable number of its staff. Newark, N. J., when there was no additional income provided with the depreciation of the dollar during the war and immediately thereafter, closed nearly all of its branches, thus greatly curtailing its public service. The following paragraphs from Mr. Dana's annual reports tell what was done and what happened at Newark. From the report for 1918 I quote the following:

"A year ago it was found that rise in salaries and in cost of materials and growth in demand for books and service from the library made it impossible to keep up branches with the mandatory increase—the product of a levy of a third of a mill on the city's valuation. The trustees asked the City Commissioners to increase their income by \$30,000 to keep open branches and hold the library up to standard in books and service proper to our city. The City Commission found it impossible to grant the request, and all branches were closed, except that for business in the center of the city and two quite inexpensive ones in two schools, Lafayette and Cleveland.

"The rent had to be paid during the year for several of the closed branch libraries, this making a total of about \$3,000.

"No members of the staff were dismissed when branches were closed; as the main library was short of assistants, work at the main library increased and war conditions caused many resignations.

"From the branches were brought to the main library about 50,000 volumes, 125 book-cases of an average length of three feet, 75 desks, stands and tables, 200 chairs and stools, also much other material. It was not easy to receive and properly store all this in a building which was already quite crowded.

Paper read at Conference of Librarians of Large Public Libraries, Chicago A. L. A. Midwinter Meeting.

"The number of books taken for home use decreased by 37 per cent (433,751), which is just about the number lent from the closed branches in the previous year. The use of the main building for reading and study greatly increased; but not enough, of course, to make up for the curtailment of the use of books in the city by the closing of branches. This closing aroused very little public comment."

The following paragraph is from the Newark report for 1919:

"In 1915, '16 and '17, the Library lent for home use nearly 1,200,000 books per year. In 1918 all branch libraries save one were closed for lack of funds, and the home use dropped to about 740,000—a loss of over 30 per cent. Last year, 1919, home use dropped again to about 700,000. This decline is no doubt in a slight degree due to the movies and to the distractions of an astonishing period of prosperity; but it is chiefly due to the closing of six branch libraries."

The 1920 report contains the following:

BOOKS LENT FOR HOME USE	
1915	1,194,817
1916	1,123,926
1917	1,170,034
1918	736,283
1919	696,376
1920	643,272 ⁴

From the 1924 report of Newark:

BOOKS LENT FOR HOME USE	
1921	801,116
1922	884,517
1923	1,014,713
1924	1,159,398

During the present library year Grand Rapids has had its first experience since moving into its new library building 25 years ago of a serious cut in its budget; and it may be worth while to describe with some detail how that situation was and is being met. To begin with, it did not arise out of any hostility toward the Library, but from a serious impairment of the City's Sinking and Contingent Funds, so that out of a total budget of \$3,920,125.97 (exclusive of schools) \$1,365,405 had to be provided for these two items, as compared with \$584,610 in the previous year,—an increase of nearly \$800,000. This resulted in a cut or stationary budget of nearly every City Department, so as to keep the city tax rate within the legal limits. For example, the Public Museum was cut from \$36,000 to \$20,000. Part of its cut, however, was made up by the Board of Education. The Library budget request from taxation was \$187,012.67, as compared with \$180,000, which was granted last year. This was in addition to the revenue derived from the penal fines, received under the state Constitution, and book fines, etc., making a total of \$217,945 requested for this year. This is exclusive of the income from trust funds, etc.—some \$2,000. The ex-

penditures in the library year 1928-29, exclusive of trust funds, were \$218,851.04. It will thus be seen that there was very little difference in the total budgets for the two years. When the budget was finally adopted by the City Commission early in May, however, the money allowed the Library, on which it was expected to operate during the current year, was \$22,012.67 less than was asked for. Immediately the President of the Library Board requested the Committee on Finance to submit at the regular May meeting (the last Friday in the month) a detailed report on how this cut should be distributed.

The Librarian and the Chiefs of the Departments went over the situation very carefully and suggested a number of things which might be eliminated or suspended, and on this basis the matter was taken up with the Committee on Finance. The following are the salient points of the report of the Committee as finally adopted by the Board, except that explanatory matter is added in brackets:

"The amount allowed the Library from the tax budget for the ensuing year is \$165,000, which is \$22,012.67 less than was asked for—the most drastic cut ever received since the Library has been under the present form of organization. In meeting this cut, your committee believes, with the librarian, that the first consideration should be to keep the organization together. It requires years to build up an efficient staff in an institution like the Library, and in making the cut we should ever keep that fact in mind. There are instances in the library world where an organization has been disrupted by cuts in the city budget, and it has required ten or fifteen years for the library to recover.

"The second consideration which the committee has in mind is that the cut should be arranged so as to deny library privileges to children as little as possible; in other words, that adults should suffer from lack of service caused by this cut rather than children. With children the denial of the opportunity to use books at this stage of their lives is something which frequently can never be regained. With these two principles in mind, we recommend the following, the figures opposite indicating the estimated saving:

"A. Reduce the service from the time of closing the schools, the latter part of June until the opening of the schools in September, in all of the school branch libraries to one or two days a week (with two exceptions).

"By doing this there would be no need of employing summer substitutes, and the saving on the basis of last year would be at least \$900. [All libraries in school buildings went back to their regular schedule in September on the opening of school.]

"B. Cut out the item of automatic stokers, saving \$2,300. [This was put in on the earnest recommendation of the city's smoke inspector.]

"C. Cut out the Library lectures, except those under the trust funds or those given by other organizations where the Library would contribute only the room, saving \$1,500.

"D. Defer the opening of libraries in the Eastern Avenue and Aberdeen schools as branch libraries, but purchase the usual number of children's books, and transfer to these schools the children's books from the Michigan School and the Pine School (schools which are to be abandoned by the Board of Educa-

⁴Books for children under the sixth grade were dropped and work with children limited to those in the sixth grade and above because of lack of space and facilities for the work, due largely to the closing of branches.

tion) and operate the libraries in these two new schools as school deposit libraries, which are not open to the public and the community generally. Saving in books \$1,500.

"E. Order no duplicates for holidays, such as Thanksgiving, Christmas, Washington's Birthday, etc., although these are very much needed, saving \$1,000. [Several months before on the recommendation of the book committee, the board had ordered placing in the budget an item of \$1,000 for such much needed duplicate material.]

"F. Order no more replacements for the balance of the year, saving approximately \$5,000. However, we believe that the repair and binding of books should be kept up, so that the books in the Library may be kept in service as much as possible. [It was necessary to curtail the binding also the last four months of the library year.]

"G. Order no school reference books, saving \$700.

"H. Order no new books for the Sunshine Sanatorium and the general hospital, saving \$125. We recommend, however, that the purchase of current periodicals through the postoffice, for the use of the patients, should be continued as usual and that they be charged to the Library's periodical fund. It may be added that a small amount of money will be available from the Whitworth Fund and other gifts for the purchase of books for the hospitals.

"I. Operate the West Side Branch Library on a schedule of three days a week: namely Monday, Wednesday and Saturday, and close on Sunday. By doing this we would need only one janitor at this point. The West Side Branch is the most expensive branch which the Library operates. [Since October this branch is open four days a week—Monday, Wednesday, Friday and Saturday. This branch with its equipment represents an investment of \$225,000.]

"J. Reduce the amount allowed for special purchases, foreign languages, etc., from \$2,400 to \$900, thus saving \$1,500.

"K. Make no new appointments on account of the recent and forthcoming resignations. This would result, if carried through for the balance of the year, in a saving of approximately \$4,047.67 in the payroll. [In March the Library took on seven people from the training class to be ready for planned extension of the service.]

"L. Order no new books for the branch libraries for a period of four months, and no books for the traveling library service, saving \$2,240.

"M. Eliminate all Sunday work to the public by closing the Ryerson Library Building and the West Side Branch all Sundays and holidays, beginning as early in June as practicable, saving \$1,200.

"The saving on the basis of the foregoing totals \$22,012.67. [\$12,065 from book fund and \$9,947.67 from expense fund.]

"These cuts will work considerable hardship both on the Library staff and on the public generally, but there seems nothing else to do. The Library should not spend money which it does not have.

"It may be added that closing the branches as indicated will eliminate 30 days service a week on the part of one person at the school branch libraries and 12 or 15 days service at the West Side Branch. It may also be added that, judging from the experience of other libraries that have had to curtail their work in this way, many persons finding it inconvenient or unsatisfactory to use the Library get out of the habit, and it requires several years for the Library to get back to normal, making a considerable increase in the overhead, for most of the overhead goes on just the same.

"We recommend further that the librarian be instructed in notifying the public of the curtailment

of the service, that the statement be made expressing the regret of the board for the necessity of making this cut, which is due entirely to the cut in the Library's budget for this year."

Except as noted above all other activities of the Library should carry on as usual—printing, binding, exhibitions, etc. The cut as distributed by the Board was with the idea that it was an emergency measure for one year only.

The Board changed the recommendation of the Finance Committee on two important items, as the report was originally submitted. One was closing all library service on Sundays and the other was to print the *Annual Report* as usual instead of deferring it for a year as recommended in the report of the Committee. It was the thought of the Board that under no circumstance should the series of annual reports be broken, which have appeared regularly for 58 years.

What has been the result in the use of the Library on curtailing the service as outlined above? First of all there has been relatively little public complaint, although individuals have written letters to the Library and have complained to the staff at various points, especially about closing the reading rooms Sundays and the elimination of the lectures. There have been several editorials in the newspapers criticising the cut in the Library's budget, all without having been suggested by the Library; in other words, the editorials were spontaneous from the newspapers. The very serious curtailing of the service at the branch libraries during the summer months made some complications with reference to fines.

The Library started off its new year in April with the largest increase in its history over any corresponding month of the previous year, so that if this increase had kept up during the year the home use increase alone would have amounted to more than one per capita of the population and would have raised the per capita circulation to $7\frac{1}{2}$, and the total increase in our records of service (readers in reading rooms, attendance at lectures, home use, etc.) considerably over 400,000. There has been a good deal of fluctuation in the home use of the Library ever since, some months showing considerable decrease and others an increase in spite of the curtailed service, but on the whole we are considerably ahead thus far; and if we break even, or even have some decreases the balance of the year, which closes March 31, we shall still be ahead of last year.

However, I am convinced that it will take several years for the Library fully to recover some of its losses. The stopping of the purchase of replacements, that is, books worn out in the service, will continue to be felt in the use of the Library more and more as time goes

on, and the curtailment of book purchases will probably be felt more next year than this.

When the Library Board adopted its method of handling this matter full announcement was given to the newspapers, one of which played it up as front page news. The curtailing of book purchases at the branches will also be felt for some years, since we have had to continue the cut in books for more than four months. The branch orders, exclusive of continuations and replacements, will be only half of normal for the year.

The staff suggestion to the Finance Committee was that there also be a curtailment of purchasing new books for the Ryerson building (the main library), but the position taken by that committee was that this should not be done, as the Library is apt to lose out in getting certain important books. This was what occurred when the Library's Book Fund was cut some 30 or 40 years ago under the Board of Education, with the result that every once in a while, after all these years, we discover that important works that were published at that time are not in the Library, and furthermore that we are not able to purchase them. I recall several important books of this kind that we have been trying to get for twenty years or more, but without success. There, of course, has been a marked increase in the use of the Ryerson Library Building, where the only curtailment has been the cutting out of the lectures, replacements and the purchase of books in foreign languages, etc.

Neither the Library nor the Library Board has in any wise criticised the City Commission for cutting the budget. We have assumed that we would have to take our medicine along with other city departments and that we ought to be good sports about it. Notices were placed on the entrance doors of all libraries, reading something like the following, which explains the reason for the curtailment of the service and closing:

NOTICE TO THE PUBLIC

Owing to the cut in the Library's budget for the year 1929-1930, which the Library has received along with other City departments, it is with regret that the Board of Library Commissioners finds it necessary seriously to curtail the service of the Library to the people. Until further notice, therefore, the Ryerson Library Building will be closed all Sundays and holidays, beginning Sunday, June 9, 1929.

By Order of the Board of Library Commissioners.

(Signed) SAMUEL H. RANCK,
Librarian.

A few persons have objected to these notices as advertising the city's financial situation daily to thousands of people, but we believe that the public is entitled to know the reason why the customary service is not being given.

In conclusion, I should like to suggest that the outstanding features in handling a budget cut, as I see it, are first, the importance of keeping the organization together. Only one person was laid off as a result of our cut and he was a branch janitor. All the regular salary increases for the staff have gone along as usual. The Board has taken the position that while they were under no legal obligation to vote these increases they were under a moral obligation to see that persons who performed good service should receive their increases in the regular way. This, it seems to me, is of the utmost importance and one that it has often been difficult to make library boards and tax levying bodies understand.

The results, as they have appeared so far in Grand Rapids, are as follows:

The first eight months of the Library year—April-November, inclusive, show a home use of 649,835 as compared with 633,106 for the same 8 months last year, an increase of 16,728. The number of readers in the reading rooms, so far as we count, the first eight months of this year were 614,162 as compared with 610,600 last year, an increase of 3562. November of this year, however, showed a loss of nearly 8000 as compared with the reading room attendance of November, 1928. The total of all our records of service for these eight months is 1,315,663 in 1928 and 1,340,410 in 1929, or 24,747 ahead of last year. There has been a slowing up of registration. The total number of registered card holders is less than 1000 ahead of a year ago, the normal annual increase for many years being nearly 2000. All our annual reference additions, continuations, periodicals, etc., have been maintained. And the daily reading room use is as high or higher than last year with a few exceptions, considering the number of hours open.

As for the internal work the fewer number of books added has enabled the catalog department to catch up with a lot of miscellaneous hangovers, such as the cataloging of gift material; especially for historical reference purposes. All persons requesting extra leaves of absence had their requests granted, no appointments have been made on account of resignations, and all in all the staff has splendidly cooperated in meeting a difficult situation, which required some readjustment of schedules.

The savings we planned are not developing quite in the way we expected, partly due to hangovers, book orders outstanding, and emergencies requiring immediate repairs, etc., but we fully expect to end the library year, March 31, without an overdraft of our funds.

It has been an interesting experience and

we believe we are learning some things that will be of permanent value to the Library.

The foregoing was written last December. The Library year closed March 31, 1930. It may be interesting, therefore, to add a few words based on the full year's experience. There was an increase of 43,442 in the number of books, practically the same increase as 1929 over 1928, issued for home use; an increase of 58,830 in

all the records of service, less than half the increase of the year before. With the slowing up of industry the last few months of the Library year there was a considerable increase in use in spite of curtailment of book purchases, the hours of service, etc. Financially we came through with a balance of 86 cents instead of an overdraft in our budget funds, made possible by large receipts from our rental collection.

Disadvantages and Advantages of a Budget Cut

*In This Budget Cut Circulation and Reference Work Fell Off,
but the Community Became Library Minded and
Became Interested in Library Problems*

By Cornelia D. Plaister

Librarian, San Diego Public Library, California.

THE NOLAN PLAN for the development of San Diego, California, calls for a combined city and county civic center located on the shores of San Diego Bay. As a step toward the fulfillment of the plan, consolidation of various city and county offices had long been contemplated. The most logical place to begin seemed to be in the tax and assessment offices so these were combined as one department on July 1, 1928.

As is generally the case, the San Diego County's evaluation of city property was much less than that of the city, and in consummating the consolidation no one foresaw that for future tax purposes the County evaluation would have to be used. Consequently, those city departments which had budget limitations set by the City Charter were faced with a serious shortage of funds. The city evaluation was well over two hundred million dollars while that of the county was only eighty-four hundred thousand which meant that the Public Library with its maximum possible levy of one mill might have received two hundred thousand under the previous arrangement, but now could not receive more than eighty-four thousand dollars under the consolidation. The library budget for the previous year had been one hundred and twenty thousand dollars so it faced a cut of thirty-six thousand dollars. To add to the difficulty a new branch library had just been opened that year which meant increased expense, and the library had also agreed to rent two floors of a building under construction for their exclusive use directly across the street from the Main Library, this measure being necessary to relieve crowded conditions in the Main Building. For this move alone the library was faced with the additional expense

of \$400 per month rent as well as the cost of equipping and moving into the new quarters.

The plight of the public library was no worse than that of other special departments of the city; the playground budget was cut in half, and the park department suffered a large cut. The regular departments such as the police and fire were cut but not so seriously as their maximum rate was higher.

For the months of July and August the library was neither afoot nor a horseback. A report would come from the city auditor's office that additional monies were to be supplied the departments from the general fund so it would be possible to run on the original budget. Then this order would be countermanded and a slightly different one issued. Finally a lawsuit was brought against the city by a small faction of disgruntled citizens which suit claimed it was illegal to use the general fund for such purposes, and the suit was won. The last week in August definite word was received that eighty-four thousand dollars was the library budget for the year.

Then began the game of ways and means. The auditor's office announced that there would be no attempt to budget control as there had been other years; that they would honor requisitions for all legitimate expense up to the limit of the budget. This helped matters greatly, for to have been held down to budget items that lean year would have been the last straw. But the city auditor also said that one-twelfth of the budget only might be used in any one month.

It was very evident that drastic reductions would have to be made and the unpleasant job of pruning began. After many conferences and much cogitation the Library Board came

to one or two definite conclusions. Whatever reductions necessary to be made would be made throughout the entire system, and divided as equally as possible; no salaries would be cut nor would longer hours of service be demanded of the staff; every available dollar would be put into books. Repairs, painting, etc., could wait.

The San Diego Public Library has six full time branches and eight part time branches, as well as many smaller deposit stations. In considering the reduction of hours of service no change was made in the deposit stations as their hours were so much shorter than the branches. Two of the part time branches were so very crowded for room anyway that it was decided not to shorten their hours. It had been advertised that these two branches would be opened full time under the new fiscal year and this was countermanded letting their regular Monday, Wednesday, and Friday schedule stand. The other six part time branches were reduced from a three-day-a-week schedule to one-day-a-week. The six branch librarians worked in two teams of three—all three going to Brooklyn on Monday, Altadena on Wednesday, and Imperial on Friday. In this way it was possible to do away with all clerical help at six branches, and yet handle large daily circulation of books at each. There was also a saving of janitor service, heat and light. The full time branches closed three evenings at five o'clock instead of remaining open every evening until 8 P. M.

The decision to curtail the hours of the Main Library was the hardest to reach, but it finally resolved itself into a question of closing entirely some of the branches if the Main Library did not close and this was considered unfair to certain localities. The Main Library was therefore open from 11 A. M. to 7.30 P. M. each day and entirely closed on Sundays and all holidays. This effected a material saving in heat, light, and janitor service, and the staff was lessened, principally among the page and clerical help. The clerical work was all done before the library opened at eleven, which plan released every available staff member for desk and floor duty during the rest of the day. Twenty-two names were dropped from the payroll but since many of them were part time pages this number would represent the full time work of about fifteen staff members. No seniors nor principal assistants were released, but the places of three of them who resigned shortly after the cut were not filled throughout the year.

Highest praise is given to the staff of the San Diego Public Library who served so faithfully that year. Three hours after the definite word came of the necessity for retrenchment

a note was delivered to the librarian which read:

"Your staff wishes to assure you of their willingness to cooperate with you in the present emergency, and to assist you in carrying out the plans you deem best. They also wish to express their appreciation of your efforts to make a fair adjustment of the present difficulty."

This in the face of possible salary adjustments and dismissals was an exhibition of loyalty which brightened many a dark hour for the librarian and the Library Board. And through the entire year the staff served cheerfully and well in spite of broken schedules, long desk hours, and often a complaining and questioning public. One of the principal assistants heaved a sigh of relief on the morning the full schedule was resumed.

"Thank fortune, I'll not have to explain ever again why the library isn't open until eleven o'clock." Within an hour she was back with this tale of woe: "A woman has just been berating me in the lobby for not letting her know we were open full time. I told her that we had published the good news in every newspaper and had inch-high letters on the front door, but she still felt hurt."

Each month after the regular running expenses were paid the meager balance was distributed to book purchase and binding. Fortunately there were a great many outstanding book orders when the blow fell so it was almost six months before the lack of new books was felt. It was necessary to cancel thousands of dollars' worth of book orders not already paid for and tribute should be paid to the book trade who so uncomplainingly aided the library in making these hectic adjustments. In considering book purchases the endeavor was made to buy the most usable books and the most substantial rather than those most called for. The rent collections were strengthened by duplicating generously the latest fiction and non-fiction. This relieved the demand in the other departments without being a financial drain.

When the new schedule of hours went into effect of course there was protest from all sides. There were those who were going to recall all of the City Council, others were for demanding that the library be open full time, and many offered to give their services free so that the former schedule might be resumed. The following editorial appeared in the *San Diego Union*:

"When a financial emergency arises in government finances, whether Federal, State or local, the first activities to suffer are those which deal most directly with human welfare or culture. In San Diego a temporary emergency is felt the most keenly by such institutions as the Public Library, the San Diego Museum, the group of tremendously valuable cultural agencies which center in Balboa Park. The

Park itself is threatened. These we say are not absolutely 'necessary.' Yet when the city curtails its service to the people who read books, it diminishes an opportunity which has been the source of more genuine greatness than all of the streets, sewers and abandoned dam sites that any city in the world ever possessed. Economy is a virtue, but so is the sense of proportion. And the latter virtue is much the rarer."

But by careful explaining through the newspapers, the Council, and the librarian's office, people soon became convinced that there was little that could be done until the next year when, through a re-evaluation of city property which had been promised, the funds could be increased. In the opinion of two city attorneys no additional funds could be granted the library from the special fund except for an emergency which jeopardized peace, health or safety. Some additional money was secured later in the year for branch repairs under the danger to health clause of this ruling.

Writing now more than a year after our hard times, it is interesting to sum up the disadvantages—yes, and the advantages, of

our cut. Our book circulation fell off from 1,321,000 to 1,291,000; 24,000 at the Main Library and the balance at the branches. In studying the figures and in weighing after-results we are sure that the majority of this loss may be attributed to the lack of books rather than the shorter hours. But, of course, our reference work fell off too, due directly to the shortened service. The community became library minded as they had never been before. There was a great deal of publicity given us and, because of their interest in our problems, people informed themselves as to the expenditure of our money, and our needs. And so in joy and tribulation our year rolled itself around and budget time came again. Through re-evaluation our maximum had been increased to approximately \$145,000 and that amount was requested of the City Council by the Library Board. There was a consensus of opinion that the library must resume its former hours of service, and the library budget was granted with but one reduction of \$2,000.

In Aid of College Libraries

By William Warner Bishop

*Librarian, General Library, University of Michigan,
Ann Arbor*

THE NAME of Andrew Carnegie is firmly and securely joined in the public mind with libraries. That of the Carnegie Corporation of New York, established in 1911, is perhaps no less closely associated with libraries and librarians, despite manifold activities in other lines. Mr. Carnegie's practice of giving library buildings was for a while continued by the corporation after his death, and not a few colleges and communities owe their library structures to the generosity of one or the other. Of late years the library benefactions—may one call them investments?—of the Carnegie Corporation have been devoted to the improvement of professional training for librarianship, to aiding in the work of the extension and improvement of libraries throughout the country; in general, the aim seems to have been to raise standards of library work and professional morale, rather than to bestow grants on individual libraries either for buildings or books. But it has not escaped the notice of librarians that many grants made by the corporation included a generous provision of books; witness the collections of books on the Fine Arts, given to scores of colleges during the past five years.

In 1928 the president of the corporation recommended to his trustees that they embark on a policy of helping colleges with gifts of suitable books for their libraries. To Doctor Keppel this meant, one may assume, something more than merely voting certain sums of money. Rather, he saw in the prospect of these grants a means of checking the status of many college libraries of furnishing at least some minimum standards for judging them, and of stimulating all colleges to think carefully and profitably about their library service. To that end he organized an "Advisory Group" on College Libraries, which has now had several meetings.

This Advisory Group consists of two elements, college executives and librarians, i.e., four college presidents, Aydelotte of Swarthmore, Glass of Sweet Briar, Lewis of Lafayette and Wilkins of Oberlin; Dean Gildersleeve of Barnard, and Doctor Kelly, Permanent Secretary of the Association of American Colleges. The librarians are Keogh of Yale, Bishop of Michigan, and Milam, Secretary of the A. L. A. Mr. R. M. Lester, Assistant to the President of the Carnegie Corporation, is Secretary of the Group, and Mr. Bishop is Chairman. Professor Amy Reed of Vassar and Dean Hawkes of Columbia were originally members of the

This paper also printed in the May issue of the *Bulletin of the Association of American Colleges*.

group, but have felt obliged to retire because of other calls upon their time.

At the outset the Advisory Group was told that it should address itself solely to the problems presented by libraries of liberal arts colleges having a four-year course. This at once excluded university libraries and junior college libraries as well as those of professional schools of law, medicine, theology, education, and specialized schools. This definite limitation has great advantages. It not only confines the field of study to a certain type of institution of higher education, but, more, it furnishes a group clearly defined, reasonably homogeneous, offering points of similarity which admit not only comparisons on an equitable basis, but some fairly positive and reasonable statements of underlying principles which apply to the group as a whole. In other words, selection on a fair basis, applicable to practically all this group of colleges, is possible, while one may postulate certain minimum standards of college library service without doing substantial injustice to any considerable number of American colleges.

The first work of the Advisory Group was to determine what information was needed in order to act on a request for a grant in aid of a college library. The group drew up a tentative schedule of points on which it would require data. These preliminary studies were submitted to some colleges whose requests for aid were already on file, and a few others were asked to fill out the questionnaire. From the replies it at once became evident that the questions must be made more definite and that some must be added. The completed form is printed at the end of this article. Over 150 colleges have now submitted answers to these questions, and these answers are being condensed, tabulated, and reduced to common terms so far as possible. The Advisory Group is in process of gathering a very considerable mass of statistics about college libraries, statistics which have never before been available. The American Library Association Committee on Library Revenues, for example, has sought just this information for some years.

The group is anxious, however, to go behind the returns, and to discover the real attitude of the colleges toward their libraries as evidenced by the way in which they are supported with funds, administered by their officers, and used by faculty and students. To this end personal visits either by a member of the group or by someone representing it have been arranged for and will be carried out so far as possible. This visitor will (in most cases) already have made a study of the replies to the questionnaire. He will seek to discover

not alone facts about the physical plant, the book stock, and so on, but much more eagerly will he search for evidence of a carefully matured library policy on the part of trustees and administrative officers, of adequate support of the library's budget, of professional ability on the part of the library staff, of careful book selection, as shown by the collections, and of intelligent cooperation between library, faculty, and students.

How can one be sure that a college library is well chosen and actually owns the books it should have? This question seemed of such prime importance to the Advisory Group that a subcommittee consisting of President Wilkins and Mr. Milam was charged last year with the task of overseeing the preparation of a basic list of books for a college library. This work was placed by them in the hands of Mr. C. B. Shaw, librarian of Swarthmore College, who with the help of the Swarthmore faculty and a large number of volunteer advisers (both college professors and librarians) has now brought this list nearly to the point of publication in its preliminary form. It is expected that it will be issued in May, 1930, in proof. The colleges applying for aid will be asked to check their holdings against this list. Not alone will the character of their book collections be thus revealed; weaknesses in the list will also appear. In revised form the list should be ready for publication in the fall. It will serve as a buying list as well as a checking list. For general distribution it will probably be sold through the A. L. A. Headquarters office in Chicago, and thus all libraries may perhaps profit by the work carried on by the group for a particular and more limited purpose.

In fact, the Advisory Group hopes to secure, as a result of its work, the publication of several studies of college libraries and their problems. The incidental professional benefit arising from such studies should be fully as important to the colleges as the actual grants of money. A book on college library buildings, for example, is already under preparation by Librarian James T. Gerould, of Princeton, under the sponsorship of the Association of American Colleges.

The form in which grants should be made, the amounts of individual grants, the methods of selection, all have yet to be determined. If possible, a program of cooperative buying will be inaugurated in order to make the money go farther and yield more books. It has already been decided to furnish with the books thus supplied printed catalog cards in a sufficient number of copies for complete dictionary cataloging and for shelf-listing, thus relieving

the college libraries of a very considerable burden in the cataloging process and hastening the availability of the books.

Two matters should be made very clear to colleges seeking grants. First: while the Advisory Group believes its "basic list" of books will prove an excellent guide to purchase, no college is under any obligation (if it receives a grant) to buy any titles on the list. There is no intention to limit complete freedom of choice in any particular. Second: all applications for grants should be sent to the offices of the Carnegie Corporation in New York; they should not be addressed to the Advisory Group or any of its members. Applications, however, are not necessary, as the group is already giving consideration to suggestions initiated by the corporation itself and from other sources. The selections of applications to be passed on by the Advisory Group, which has only advisory functions, are made by the officers of the Carnegie Corporation. And a last word—the limitation to the four-year liberal arts college—is complete and final, so far as the present Advisory Group is concerned. Junior colleges, technical schools, liberal arts colleges in universities (unless maintaining separate libraries), teachers' colleges, and other institutions of higher instruction do not (as yet) come within the scope of this work.

ADVISORY GROUP ON COLLEGE LIBRARIES

REQUEST FOR INFORMATION

College
 Address
 President
 Please use figures for the same year throughout. Specify year.

1. Total expenditure
 (a) for college instruction.....\$
 (b) for college administration.....
 (c) of current funds for departmental use (laboratories, etc.) exclusive of funds for purchase of books.
 (d) for library purposes, including all funds for books and library administration (*Record details under Section 14*).....

2. Number of full time instructors of each rank on teaching staff.....

 Total

3. Number of full time undergraduate students enrolled in the academic year, as of Nov. 1, 1929.....

4. (a) Are there reading courses for honors?
 (b) How many students are enrolled in these courses?.....
 (c) Are there other reading courses as distinguished from lectures and text-book instruction?
 (d) How many students are enrolled in these courses?.....

5. What special efforts are made to encourage general reading apart from courses of instruction?
 6. What special demands, if any, are made upon the library by (a) instructors, (b) students, (c) others?
 7. a) Is there a good bookstore readily accessible to students?
 (b) Does the college maintain a bookstore?
 (c) Does the college bookstore sell books of general interest?
 8. Library building:
 (a) Date of erection.....
 (b) Is it fireproof?
 (c) Number of square feet for library purposes
 (d) Total linear feet of shelving....
 (e) Per cent of building used for other than library purposes.....
 (f) How many books can be added without an addition to present building?
 9. (a) Total seating capacity of reading rooms, including departmental reading rooms
 (b) How many more seats can be added without an addition to present building?
 10. Number of
 (a) volumes in the library.....
 (b) pamphlets in the library.....
 (c) volumes added each year during past five years.....
 Year

(Include departmental collections)

11. The character of the collection, as ascertained by checking standards lists, e. g., Mudge List of Reference Books. (*Information under this section will be called for as soon as check lists are prepared.*)
 12. Number of journals currently received
 (a) in English
 (b) in other languages
 (c) number regularly bound.....
 (d) number regularly kept and not bound
 13. System of classification employed.
 14. Annual expenditures for the library, including departmental reading rooms:
 (a) Salaries
 (b) Books, periodicals, and binding. If (c) and (d) below are not separately recorded, do not answer
 (c) Current expense, excluding maintenance and operation of building
 (d) Maintenance and operation.....
 15. Library Staff:
 (a) Number of members.....
 (b) Education of each member.....
 (c) Professional training of each member.
 (d) Experience of each member.
 (e) Name of librarian.
 16. Library hours:
 (a) General reading rooms.
 (b) Stack service.
 (c) Departmental reading rooms.
 17. (a) Are the library stacks readily accessible (open access) to the entire student body?
 (b) What restrictions are there, if any?

18. Annual statistics of library books used outside of the library and of other use by both faculty and students, with any comments possible on the character of the circulation:
19. (a) What departmental libraries are there?
(b) Are departmental library books duplicated in the main library?
20. What other library facilities are readily accessible to students?
21. What policies have been adopted as to the purchase of duplicates?
22. Is there any systematic instruction for college students in the use of the library? Please describe briefly.
23. What policy has been adopted looking toward segregating obsolescent material; i. e., what effort is made to give students access to a collection of live books only?
24. What plans have been formulated or proposed by the librarian for promoting reading and developing the library?
25. Please report any figures available as to the amount of time which students spend in the library?
26. Please send:

The Organization of a Periodical Department

By Gertrude Wulfekoetter

Assistant Librarian, Van Wormer Library, University of Cincinnati, Ohio

DURING the last few years there has certainly been a growing sense of importance of periodicals in library work. The appearance of the *Union List of Serials*, without which none of us could now exist, has brought this fact to our attention more vividly. The larger part played by them in research work has been frequently stressed and no doubt will continue to be stressed even more. The increasing importance has necessitated a much more serious consideration of periodical problems than was formerly thought essential. Many periodical divisions, like Topsy, just grew, and suddenly have waked up to find themselves unable to cope with the questions of the present day. Then, too, the *Union List of Serials* has made us realize more than ever before the great prevalence of broken or incomplete sets in almost every library. As long as periodicals played the relatively unimportant part which they did in the past, this fact made little difference, but this is no longer the case. Sometimes these broken sets were the result of carelessness on the part of the library in calling to the attention of the faculty the importance of continuing a hitherto complete set; sometimes it was due to the inability of the library to control funds, or lack of sufficient binding funds or carelessness in follow-up work. Of course we all have partially complete sets which were given to us by some interested donor who gave all he had. Naturally the ideal thing for all of us would be to be able to complete all incomplete sets, a task at once a joy and a terror to any order librarian, but even in this we are beginning to realize the advantages of cooperation, and regional buying is one of the

plans being proposed to help us make our continually evaporating funds last longer.

A few years ago the fact that our files of 6 x 11 cards were outgrowing their quarters, and additional files of cards of that size would be too unwieldy, brought up the question of revision of our whole periodical routine. The added fact that some time in the next decade we hoped to get more commodious quarters made the problem more complicated. At that time we consulted a number of university and reference libraries to find out what practices they had found most satisfactory, frankly hoping to profit by their experience. The results were most enlightening, if not always helpful. In fact, we wondered, and have wondered since, how some of them could avoid successfully the pitfalls most of us encounter in working with periodicals. Mrs. Pearl H. Clark, formerly secretary to Dean Works of the University of Chicago Graduate Library School, and now his secretary at Connecticut State Agricultural College, has studied some various phases of these problems through questionnaires and visits to different libraries. Her paper will be published in a later issue of THE LIBRARY JOURNAL, and since she has treated the question of completeness of sets in great detail, I am omitting reference to it. In her study of organization she has covered the procedure of five libraries in some detail. (The names of the libraries are not given, though we may be able to guess their identities.) I am sure that some of them have omitted important details in their report, because otherwise I cannot see how they can function successfully. For instance, in one of them, mail is sorted in the order department, periodicals are checked in the periodical department, docu-

Paper presented at Chicago Midwinter Meeting of University and Reference Librarians.

ments are checked in the reference department, bills are paid in the order department, while correspondence and orders for back numbers are cared for in the library office; how and where subscriptions for the current volumes are placed is not mentioned. In the majority of cases there seems to be no cooperation between the periodical and binding departments. It seemed best for me to tell you of our own solutions of some of the various points in question. Of course, in our case, as in every other one, the solutions made were necessitated partly by existing conditions beyond our control, so that what we may have found successful might not have proved successful for others. Nevertheless, although details are still being adjusted continually, we have been working under the system for about three years.

In the first place, it seemed to us best to continue both periodical and binding work under the acquisitions department, since naturally both of them are a means of acquiring material for the library. The organization of each is independent, but in close cooperation not only with each other but with the order work as well, since perforce the division between periodicals, handled by the periodical division, and continuations, handled by the order division, must be an arbitrary one. As far as the periodical work is concerned, the department as organized is ready to take charge of work in the new building into which we shall move this next summer, and is already responsible for the majority of the duties that it will have in our new quarters. At this point it might be helpful to say that in the new building the periodical room is on the entrance floor (or fourth floor, as we say), while the binding room is directly beneath it and the acquisitions department directly above it. A service elevator connects the three rooms. There are two distinct phases of periodical work, that connected with the ordering and receiving of periodicals, and that of doing reference work with both bound and unbound periodicals. Since familiarity with the vagaries and idiosyncrasies of periodicals due to the technical handling of them aids in the later reference work, it is advisable, in our eyes, to have one person responsible for both. It is on this basis that our periodical routine is worked out.

To begin at the beginning, once a year, about three months prior to the annual date of expirations, lists of the periodicals ordered against the funds allotted to each department of the university for the ensuing year are prepared by the periodical division, and sent to the heads of the departments for additions and approval. Since we have not yet been able to obtain a

separate periodical fund against which periodicals bought on department funds a certain number of years may be charged, thereby lessening the possibility of discontinuance of subscriptions due to changing personnel within various departments, such annual approval is necessary. Additions may be made at this time, but it is not a closed list for the year, since other additions may be made from time to time as new periodicals in various fields appear. In fact, the periodical assistant is constantly on the watch for such first appearances, and obtains sample copies for the perusal of the departments interested as soon as announcements of them are made. The orders based on these lists are sent out by the periodical division. The lists are then filed by department in the periodical room for reference. Order records are in separate files, kept on 3 x 5 cards, with full bibliographical details. These are not on the checking cards, so that more than one person may use checking and order files at one time, since we expect to have the bulk of the routine checking in of numbers received done by assistants, while the person in charge of the division will be responsible for the handling of invoices and their approval for payment.

The checking is done on 4 x 6 cards, especially printed for us. This size was decided upon as large enough to allow room for all necessary information, and not large enough to make the files too cumbersome. They are somewhat similar to those used by Minnesota, Princeton, University of Washington, and a few more libraries. The top of the card has space for title, call number, notation of volumes bound, at bindery, and awaiting completion for binding, fund, source (or agent), and destination for current numbers. These numbers are checked by exact volume and number in month spaces, large enough to give room for the date stamp used in checking in all publications arriving once a month or less frequently. This date stamping for receipt is done at the top of the space allotted, a date stamped at the bottom of the space denoting the date of claiming a certain number. Two small columns to the right for checking in title pages and indexes and a further wide one reserved for notation of correspondence, changes of frequency, etc., with room at the bottom of the column for notation of how and when the title page and index is to be expected, complete the front of the card. There is space for three years' checking on the front, while the back, omitting all information at the top except title and call number, carries five years' receipt space. Cards for dailies, having more minute checking spaces, can care for only three years, on both sides. All cards are on white stock, alike regardless

of frequency and source, for we all know the propensity of periodicals to change frequency, even the staid *Living Age* and the *Century* magazine have done it, and then, too, periodicals once received as gifts suddenly may have to be purchased. Our only distinction is that gift receipt cards have a blue star affixed so that they may be distinguished easily. We have considered, and are still considering, the advisability of a visible index, but we feel that the additional expense is too great to balance the amount of time saved.

At the time of entering the periodicals the call number is copied on each number at once, since they are to be arranged by call number in our new periodical room, thereby throwing them all into alphabetical arrangement within large classes. If the periodical received is the first number on a new subscription it is sent to the catalog department for classification and temporary cataloging, permanent cataloging to be done only when the first bound volume is received. Since the checking is done in the periodical room itself, periodicals can be distributed at once in this room. Deliveries to departmental reading rooms in the building can be made twice daily, but to outside department libraries they are made only once a day. If a current number received is a duplicate, not an added copy, notation is made to notify the agent at once. About once a month a check is made of numbers not received, and claims are made to the agent. This correspondence is all done in the periodical division, subject to the approval and signature of the acquisitions librarian.

When the second number of the current volume is entered on the checking card, a slip bearing the title, call number, and previous volume number, is made by the periodical assistant and sent to the binding room, where a file of periodicals to be bound is kept for both the periodical room and the department libraries. The binding division, in response to the information given by the periodical division, clears the files of volumes ready for binding once a month, by sending to the periodical room and department libraries a list of their volumes complete for binding. If all the volumes cannot be spared at once, those which can be spared are sent to the binding room at once, whether complete or incomplete, and the lists filed for later attention and completion. Volumes received by the binding division, if complete, are sent to the bindery; all others, that is those not complete, are arranged alphabetically on the binding room shelves. A complete shelf record of these volumes is kept on cards with charging cards attached, so that any number may be available for use until actually at the bindery, but is at all times under the con-

trol and responsibility of the binding division. Shortage orders to complete these volumes are made by the binding assistant and placed by the order division of the acquisitions department. Shortages received are checked and paid for by the order division, and turned over to the binding division. Binding shipments are sent out twice a month regularly, and duplicates of the binder's lists, after being checked against the binding files, are sent to the periodical room for addition of the binding information to the periodical checking cards, so that at any time the periodical assistant can tell what volumes are not available for use.

Upon return of shipments of bound volumes from the bindery, volumes received are checked with the lists and binding files, and accession numbers, funds and destinations are entered in the volumes by the binding division. The volumes then are turned over to the catalog department, for additions to all records except the periodical cards, where additions are made by the periodical assistant from the lists sent on by the binding department. The new routine which we are now putting into effect varies but slightly from the old, and that mainly from the catalogers' point of view, for call numbers are to be added to the binding slips by the binding assistant, and the volumes with these binding slips in them are to be sent to the serial shelf list for addition, and then to the shelves, while the lists from the binding room go to the periodical room for changes on the checking card and addition to the catalog in the periodical room. This catalog is an alphabetical list by title and subject of all bound periodical holdings of the main library and the department libraries as well. This is the only complete record of such holdings in the library with the exception of the complete serial shelf list in the catalog room, which will contain continuations as well as periodicals.

The other side of periodical work must be in close cooperation with the reference department, but since all cards in the public catalog refer their users to the periodical room for full information, and the periodical room is one of the first rooms one sees on entering the building, we do not anticipate much trouble in this respect. A full set of all periodical indexes is in the periodical room, for general consultation at any time. A duplicate set, as far as we can secure it, is at the public catalog.

Of course we do not claim to have an exceptional system, but I have given it as one which has worked quite well in our case, and since we are all working for the same end, we have felt that it might be of interest to tell you of our solutions of problems common to us all.

The New Library Building for the University of California at Los Angeles

By John E. Goodwin

Librarian.

ON MARCH 27 and 28, 1930, the new campus and buildings of the University of California at Los Angeles were formally dedicated. This institution as a coordinate part of the University of California had its inception in 1919

foothills of the Santa Monica Mountains, in West Los Angeles. It includes 384 acres and was given to the regents, free from incumbrance, by the cities of Los Angeles, Beverly Hills, Santa Monica, and Venice. On this beautiful tract five major buildings have already been erected, and at the close of the Summer Session, in August, 1929, the University of California at Los Angeles moved its equipment ten miles across the city from the old campus to the new, and in September the 1929-30 session opened in the new buildings.

Provision for an adequate library building was included in the program for the new campus. The immediate requirements involved accommodations for 6000 students, a faculty of 300, and book stacks for 200,000 volumes. Ground for the library building was broken Sept. 22, 1927, and in large measure the units for initial construction were designed to anticipate

The new Library of the University of California at Los Angeles

when the Los Angeles State Normal School turned over its North Vermont Avenue plant to the regents of the university. The new institution, first known as the University of California Southern Branch, includes Teachers College, which assumed the functions vacated by the Los Angeles State Normal School, and the College of Letters and Science, for which an admirable faculty has been assembled and a four-year curriculum evolved. It soon became apparent that a larger site for the institution was imperative. The fall registrations steadily increased to over 6000, while the site and buildings were planned to accommodate one-third of that number. In 1924 a citizens' committee was appointed, various locations in Los Angeles and vicinity were considered, and ways and means for financing an adequate site were canvassed. The location finally selected is in the

The main reading room faces to the north and extends along entire front of building

future growth. The east wing and part of the stack wing are left for future construction, and for the more distant future ground space is reserved on which a south

façade may be erected. The building thus completed would be oblong and inclose two large courts. The transfer of the library involved furniture and approximately 145,000 volumes of books. A tag was attached to each item of furniture, indicating its proposed location in the new building. Every shelf of books in the old building was numbered and its destined shelf in the new building was numbered to correspond. The transfer of furniture and books was accomplished in three days and with less confusion than was anticipated. Most of the books were packed in boxes especially constructed for the purpose. The architect is George W. Kelham of San Francisco, the supervising architect employed by the regents of the University of California.

The building has a frontage of 221 ft. 6 in. and a depth of 244 ft.; it is three stories high, above an excellent basement, which offers in practical utility an additional story. The style of architecture is Romanesque; there is the general influence of northern Italy, with specific contributions from Lombardy. The building is of reinforced concrete with facing of texture brick, terra-cotta, and decorative tile. There is a charming combination of color and mass comprising the exterior, and a delightful combination of detail and warm tones throughout the interior. Decorative tile has been generously used in the main lobby, on the stairways, and in the delivery hall. The main reading room, on the second floor, faces to the north and extends along the entire front of the building; it is 210 ft. long and 56 ft. wide and has a central dome which is 63 ft. from the floor. The woodwork, including wall cases for books, is of Philippine mahogany. The movable furniture is of English walnut and includes 33 large tables and 462 armchairs. There is a generous inclosure for desks, files, and special equipment of the reference department. The room has shelving capacity for

12,000 volumes. The ceiling is heavily beamed, and in its decoration, colors are blended and softened as if by the alchemy of time. These decorations are the work of Julian E. Garnsey of Los Angeles. Into the rotunda are woven symbolical designs, together with printers' marks of pre-sixteenth century publishers. The delivery room is octagonal in shape and surmounted by a dome 45 ft. in height from the floor. The walls are of edge brick, terra-cotta, and decorative tile. There is a special atmosphere of warmth in this room blended into color harmony that is satisfying under varying light conditions throughout the day. Adjoining the delivery room, on the east, with the line of separation marked by columns, is space assigned to a browsing room; and balancing this area, on the west, are the public card catalog and the circulation department offices. The circulation desk and the reference desk are large, specially planned units facing each other, but separated by the width of the delivery hall, the lobby, and the main reading room. The reserve book room, accommodating 450 readers, occupies the first floor in the west wing; the second floor provides work space for orders and accessions, serials, binding, cataloging, and for the librarian's offices, while the third floor is devoted to seminars. The front of the building on the ground floor and in the basement is temporarily occupied by the general administrative offices of the university.

The main stack well, in which no steel stacks have yet been erected, will accommodate four levels, and occupies the area below the delivery, card catalog, and browsing rooms. The first unit of the stack wing at the center rear of the building includes seven levels and is sufficient for immediate requirements. The units of the stack room, now inclosed, have operating capacity for at least 600,000 volumes. Thirty cubicles are available in the stack unit.

Library Legislation in 1928 and 1929

By William F. Yust

Chairman, A. L. A. Committee on Legislation

THIS REPORT covers two years. The year is given with every 1928 law mentioned. There are very few of that year. Where no year is given, it is a 1929 law. These make up most of the report.

Library support, county libraries, State libraries, and State library commissions are the subjects which occur most frequently. Several States provided more liberal support for their libraries. In others this step was prevented by

the fear of increased taxation. County libraries received the largest amount of consideration. Seventeen States presented bills on this subject. Many of them failed, but new laws for their establishment were passed in Arizona, Colorado and Oklahoma, and improvements were made in a number of others. New State agencies were created in Colorado, Montana, New Mexico, South Carolina, and West Virginia.

Establishment and Management

In Illinois, villages, cities, and townships may contract with one another for maintaining a common library or for library service from any established library.

A Minnesota amendment authorizes a school board in a place of less than 2000 population to maintain a public library and levy a library tax of not over three mills when a library building has been erected with donated funds. The library board is to consist of the six members of the school board and, in addition, three others appointed by them.

This amended law was passed to meet a particular case. It is regarded as "somewhat revolutionary in that it allows the school district to levy taxes for public libraries, though it is limited to districts where a library building has been erected by gift."

Tennessee passed an act which modifies the law regarding the establishment of public libraries by cities and towns in a number of respects: (1) the permissible tax levy for library purposes is six mills (formerly five); (2) library board is to consist of seven directors (formerly nine, of whom not more than six were to be of the same political party); of the seven members not more than five shall be of the same sex; (3) municipality may issue bonds of realty and erection of building not in excess of \$2000 for each 1000 population; (4) libraries may contract with a county library board for extension of library privileges; (5) directors may make and enforce rules providing penalties for loss of or injury to library property (formerly this power was to be exercised through ordinances passed by the mayor and city council).

Library Trustees

Michigan passed a bill reducing the number of trustees in municipally controlled libraries from nine to five. It was vetoed by the governor "on the ground that if nine people were not interested in libraries, it would be difficult to have a board of five people interested." Those responsible for the bill "did not get the proper information to the governor."

New Jersey in 1928 amended a law of 1905 providing that at least four of five library trustees appointed (formerly all five) shall be residents of the municipality served. By mistake, a phrase in the original law relating to ex-officio representation of the public schools on the library board was omitted, so it had to be reenacted with correction in 1929.

In New York State a considerable bequest of money to a public library was held up pending decision as to the legality of its board.

There was doubt whether the trustees at the time of their appointment had filed the required oath of office in accordance with the public officers law. As this doubt applied in other places, it seemed possible that many library boards throughout the State were illegal. Inasmuch as school district officers are not required to file an oath, the easiest way out of the difficulty was to exempt public library officers likewise. An amendment to the education law was therefore secured in 1928, which says, "No officer of a school district nor trustee of a public library shall be required to take the constitutional oath of office."

Library Support, Taxes and Bonds

A Connecticut act provides that State grants of money to local libraries for books may equal the amount locally raised up to \$100 (formerly not to exceed the amount locally raised in towns whose grand list exceeds \$1,250,000; in other towns, not to exceed \$200).

Delaware substituted a new law for an old one relating to the borrowing of money by a school district for public library purposes, outlining more clearly the method of procedure in voting bonds, increasing the permissible amount, and permitting a contract with another organization to share in the expense and use of a building.

Illinois increased the permissive tax rate for city, village and township libraries from nine-tenths of a mill to one and two-tenths of a mill. In cities over 100,000 it shall not exceed one-half mill for maintenance and one-tenth mill for buildings and equipment. The law was secured through the cooperation of libraries and trustees in all sections of the State. A similar bill with higher rates was passed in 1927, but vetoed by the governor. The new law is a step in advance, though it does not provide the full measure of relief hoped for by the libraries of the State. The State Library Association will make further efforts, including a redrafting and clarifying of the entire library law. (*Illinois Libraries* 10:103-07; 11:58, 63-64, 72-76.)

Indiana amended and clarified the city and town library law relating to the issue and sale of bonds for purposes of building and equipment. (*Library Occurrent* 9:47.)

A Mississippi act of 1928 permits municipalities to issue bonds for municipal buildings, the purchase of such buildings or land therefor, and the improvement or equipment thereof. It is reported that the initiative in this was taken by the town of Hattiesburg for the purpose of securing a new library building. "They voted \$75,000 and have just recently voted \$25,000 more to enable them to get a better lot."

Missouri repealed a law of 1921 which had

been declared unconstitutional by the State Supreme Court. That law related to the amount of the tax levy and was taken into court by the city of St. Louis. The court decision, which was a notable one, is outlined in the report on "Library Legislation in 1927" (*THE LIBRARY JOURNAL* 53:756-57).

The Missouri Library Association is advocating a constitutional amendment providing that the tax for a public library be made a separate tax, as the tax for schools is at present; such amendment, if acted upon favorably by the Legislature, to be submitted to the people for a referendum vote at the next regular or at a special election. Under the present law a tax as collected by the city is first placed in "General Revenue Fund" and then credited to the "Library Fund." The amendment will provide for placing a tax for libraries when collected immediately in the library fund. This will safeguard the fund and prevent inroads upon it by other city departments whose funds may be low.

In Nebraska a bill raising the permissible levy for public libraries from one to two mills failed, due to fear of higher taxes and not long enough period of publicity. But school libraries fared better. An amendment provides that the board of every school district shall (formerly may at its discretion) set aside and invest annually \$5 per teacher (formerly 10 cents per pupil) for books other than textbooks for the district school library unless a sum equal or greater is raised by entertainment or otherwise. The surplus so raised may be applied to required expenditures of succeeding years.

In New York State a special bill was passed in 1913 providing for the incorporation of the Weller Library Commission in the village of Mohawk and the transference to the commission of the duties and responsibilities of the Weller bequest. The bequest included the Weller home and grounds, the Weller block in the business portion of the village, and some \$60,000 in bonds, together with a private library of several thousand volumes, all of which were to be devoted to the purposes of a public library and public park. The gift was one of the largest ever received by a village in the State for such purposes (*New York Libraries* 3:333). The bill required the trust fund to be invested in United States Government bonds.

A 1928 act amends the original law and permits the trust funds to be invested in securities in which savings banks of the State are authorized to invest. This will provide a substantial increase in annual income for the library.

A 1927 law authorized an increase in the minimum tax levy for the two public libraries

of Buffalo, N. Y., from 3/100 of 1 per cent to 5/100, which was the former maximum. No maximum is stated in the new law. Of this levy the Buffalo Public Library was to receive four-fifths and the Grosvenor Library one-fifth, which had been the apportionment for thirty years.

A 1928 amendment provides that of the above specified levy, one-fifth of 3/100 of 1 per cent shall be paid to the Grosvenor Library and four-fifths to the Buffalo Public Library in accordance with its contract with the city. The remaining 2/100 of 1 per cent shall be paid to the two libraries in such amounts as the city council shall from time to time determine.

Oklahoma repealed a law which provided for a library tax levy by a city and an additional levy by a county for the same library. Two new laws were enacted, one providing for a library maintenance fund of not exceeding two mills annually in any city or town, and another law authorizing a county library fund.

A Pennsylvania amendment to the public school law authorizes school directors in districts of second class to levy annual tax not exceeding one mill to assist according to agreement in support of a public, non-sectarian library which is being maintained in the school district.

Certification

In Minnesota the law requiring the certification of school librarians was repealed in the enactment of the new teacher's certificate law which, on account of a technicality, does not provide for certification of librarians. A parallel bill making such provision "failed to pass owing to a lack of understanding." The certification of school librarians is therefore discontinued, but there is hope that it will be re-established by the next legislature. Meanwhile it is believed that school authorities will generally adhere to standards set up during the past four years.

Retirement

A California law rewords the provisions in regard to the employment of school librarians and makes it possible for elementary school librarians as well as high school librarians to share in the benefits of the teachers' retirement plan.

In New Jersey a librarian who has served continuously for twenty-five years in a city of the first class and attains the age of seventy may be retired at such sum as the board which appoints his successor may determine, but not less than one-half the salary being received at the time of retirement. Provision for pension

shall be made in the appropriation tax levy for the department from which such person retires.

County Libraries

Arizona. Supervisors may establish county library for part of county outside of municipalities maintaining public libraries, but including cities which elect to become part of county system; may contract with existing library for service to county. Counties may contract with one another. A board of three library examiners consisting of librarians of the State library, of the State university, and of the Phoenix Public Library, shall pass on the qualifications of candidates for county librarian. County supervisors shall have general supervision of library, appoint librarian certified by board of library examiners and levy necessary tax. Bonds may be issued for land and buildings.

Provision is made for grading county library employees and for examination by county librarian for admission to the service. Minimum salaries of county librarians are established on the basis of assessed valuation:

ASSESSED VALUATION	MINIMUM SALARY
\$100,000,000	\$2,400
50,000,000	2,000
25,000,000	1,800
Others	1,500

California. Five county library salaries are raised as follows: \$500 to \$1,800; \$2,700 to \$3,000; \$1,800 to \$2,100; \$1,500 to \$2,400; \$1,000 to \$1,800. (*News Notes of California Libraries* 24:211.)

Colorado. County commissioners may establish county library after submitting question to vote. They shall submit it on petition of 10 per cent of the taxpayers. Library board to consist of five directors, the county superintendent of schools and four others appointed by county commissioners for four-year term. Board shall annually certify the library levy needed and the county commissioners shall levy the tax within the maximum provided (one mill on the dollar). Such levy shall omit cities and towns having a tax-supported library unless such municipalities give notice that they desire to be included.

County library board to have full control of library and supervision of its operations, including "appointing a qualified librarian and assistants." It may contract for existing city libraries to give library service to the county or for the county library to give service to existing city libraries or to counties or to school districts.

Delaware. Authorizes the Wilmington Insti-

tute to furnish library service to New Castle County outside the city of Wilmington under contract in amounts not to exceed \$10,000 in any one year.

Georgia and Idaho. Bills providing for county libraries failed in both of these States.

Indiana. A county library board may issue bonds up to \$20,000 for purchase or construction of library building and improvement of grounds.

Iowa. Failed in an attempt to amend the county library law to include towns in a contract, authorize establishment of an independent library by board of supervisors and make it compulsory for supervisors to levy a tax when petitioned.

Maryland. Also failed with a bill which provided that a person to be eligible as county librarian must have had a year's training in a library school approved by the Public Library Advisory Commission of the State. It was intended to prevent political appointments to the office of county librarian, but failed in "the jam of the last day."

Michigan. A problem is that of double taxation, which is now permitted. Double taxation has, in a number of counties, prevented county library promotion. On the other hand, any change in the law may be injurious to libraries already established. The attorney-general has been asked to draft an amendment that will solve the problem.

Law libraries in counties of fifty to five hundred thousand population are entitled to forfeiture funds up to but not exceeding \$1,500; in smaller counties \$1,000 is the limit.

Nebraska. Failed in an effort to amend the free public library law to provide that a county board shall submit question of establishing and levying tax for county library to vote on petition of 10 per cent of taxpayers. At present the initiative is optional with the county board. The petition feature is new. It also elaborated the contract feature and outlined conditions and procedure under which a county board may contract with an established library to assume the functions of a county library.

New York State. A general county library law to supersede the one now in force failed. It will be redrafted for presentation to the next session of the Legislature.

A special act of interest relates to the Cornell Library Association. In 1864 an act was passed to enable Ezra Cornell to found a public library in Ithaca, which should be free to the residents of Tompkins County. It provided for the organization of a library association and for his conveyance of a lot and residence building to the association.

Under this act the Cornell Library Associa-

tion was organized in 1866, which established there one of the earliest free libraries in the State. "In its constitution and articles of incorporation is found much of the same liberal and catholic spirit which characterized the constitution of Cornell University, providing that it was to be forever free not only to the people of Ithaca but to all persons living in Tompkins County. Its facilities, however, have never been equal to this large program, and, lacking necessary branches, it has been a county library in little more than name," until 1928, when, after a thorough and successful campaign a county library was established. The county library co-operates closely with the Cornell Library Association, which furnishes space for county library headquarters, several thousand volumes and a considerable annual appropriation.

The building conveyed by Mr. Cornell has long been inadequate and especially now for its enlarged service to the county. For this reason a 1928 amendment to the enabling act provides that, if in the opinion of the trustees said premises shall become unfit or undesirable for library purposes, they may sell the premises, with the consent of the Supreme Court, and in that case shall devote the proceeds of such sale together with any other funds that they may have available or which may be donated to said association, either to establish an endowment for the purpose of this act or to the purchasing of a new site and the erection thereon of a suitable library building and to such premises all the restrictions, provisions and conditions hereof shall apply with like effect as if said premises were the premises herein mentioned and described.

North Dakota. Introduced an amendment to the general public library law to include the establishment and operation of county libraries. It was not pushed on account of unfavorable action on other bills involving additional taxes. "Information in regard to needed county library legislation is being developed through talks at fairs and state meetings, radio talks and through existing organizations, particularly the Master Farm Women, who are interested in this movement." (THE LIBRARY JOURNAL 54:320.)

Ohio. An amendment provides that law libraries shall share in fines from municipal and police courts (formerly police), to be paid monthly; this provision applies also to fines for violation of prohibition laws.

Oklahoma. County commissioners are authorized to levy tax of not over one-half mill to establish and operate county library; may cooperate with a public library in the county.

Oregon. Repealed an obsolete section relating to county library tax, which by mistake

had been included in the State code. Mention is made of this repeal because, as it stands in the laws of the year (Chapter 248), its purpose is not clear.

Tennessee. A new law replaces the one passed in 1921, whose constitutionality had been questioned. A number of changes were made: (1) County library board of seven (formerly five, of which county superintendent of schools was member ex-officio) to be appointed by county court (formerly by board of supervisors); (2) county court may issue bonds for grounds, building and equipment up to \$1,000 per 1000 population; (3) county library funds shall be held by county treasurer (formerly county trustees) and paid out on vouchers authenticated by two officers of the county library board (formerly the county librarian); (4) one county may contract with another for library services; (5) annual audit to be made of county library expenditures. The State Library Association regards this law as very important, especially the contract feature, which will enable several of the poorer counties to combine into one group (THE LIBRARY JOURNAL 54:675).

Washington. The Legislature, by a more than two to one vote, passed a model county library bill, originated by librarians within the State and approved by the Pacific Northwest Library Association, but the governor vetoed it on the ground of increased taxation. Under the constitution of Washington the bill is not definitely killed, but the Secretary of State must present it to the next session of the Legislature for reconsideration (THE LIBRARY JOURNAL 54:443).

State Library Commissions

Colorado. Created a commission of five members, to be appointed by governor for term of five years. First appointees to be two from the "Board of Library Commissioners" and three from the "Traveling Library Commission." These two commissions, which were established in 1904 and 1899 respectively, are abolished and their property and duties transferred to the new commission. These duties include the usual functions of furthering library development throughout the State, aiding in establishing and administering libraries through advice and assistance and through the operation of traveling libraries.

Quarters for the commission are to be provided in the capitol building. An appropriation of \$9,000 is made for two and a half years.

Georgia. A bill failed changing the annual appropriation of the Georgia Library Commission from \$10,000 to \$17,500.

Mississippi. In Mississippi a separate act ap-

appropriates \$5,000 for each of the years 1928 and 1929 for the State Library Commission. The commission was created by a law of 1926, which includes a provision that only persons "experienced in modern methods of library work" shall be elected as secretary. No funds, however, were provided at the time. As a result of the appropriation now made, Miss Elizabeth Robinson was elected Secretary and headquarters were opened Sept. 5, 1928.

Montana. Created the State Library Extension Commission consisting of the librarian of the State university, the State superintendent of public instruction and one other member to be appointed for three years by the governor from a list of five selected by the State Library Association. The commission has the usual powers and duties. It also is the State board of library examiners, from which a county librarian must have a certificate. Unfortunately, the appropriation clause was eliminated from the bill and no funds were secured to carry on the work of the commission.

New Mexico. Created a State library extension service. Regents of the State museum shall appoint a director of the service, "who shall have professional training and experience." The purposes of this "Service" are like those of other State agencies of the kind. An appropriation of \$2000 for each of two years was made and the service has been opened. The State Federation of Women's Clubs and the State Library Association were principally responsible for the law and the appropriation.

South Carolina. Created the State Public Library Association of five directors appointed by governor on recommendation of superintendent of education for five-year terms. "The basis, conditions, classifications and qualifications for membership in said association shall be fixed by the above board." Duties are "to create public sentiment in favor of establishing public libraries over the entire State" and devise methods for extending them to rural districts. "Secretary, if possible, shall be an experienced librarian of administrative ability, and shall be chosen either from within or without the board." The board is empowered to receive and use funds. No appropriation.

West Virginia. Created the West Virginia Library Commission of five members, term five years, two shall be women. It has the usual duties, including traveling libraries and courses in library instruction.

Washington. By executive request abolished the State Library Committee and transferred its powers and duties to the superintendent of public instruction. This act completes the subordination of the State library to the department of public instruction. One of the charges

of the committee was the system of traveling libraries, which the governor aimed to abolish. When these were retained by the Legislature, he vetoed their appropriation and tied up 50,000 volumes in idleness for the next two years. This action caused much indignation throughout the State (*THE LIBRARY JOURNAL* 54:443).

State Libraries

Arizona. Passed a law increasing the salary of the State librarian from \$3,000 to \$3,600.

California. An echo from "the throes of reorganization" in California is the law repealing certain sections relating to the State librarian's salary, his bond, his duties and his term of office. He now holds office at the pleasure of the governor (formerly four years).

Delaware. The law governing the State library has been generally rearranged, with minor modifications, most important of which are (1) transferring from the librarian to someone else the general charge of the State house and the selling and accounting for certain publications; (2) report to governor (formerly assembly); (3) slight change in hours of opening; (4) reduction in librarian's salary and provision for paying it monthly (formerly quarterly); (5) omission of an assistant. The section of the code which provides that the State librarian shall act as secretary of the State Library Commission was repealed. But a section of the commission law making the same provision was not repealed. So the State librarian continues as secretary of the commission.

Indiana. Created a State library building commission of nine members, to be appointed by governor, four from the library and historical board; one senator, one representative and three citizens at large; director of State library is secretary. Commission to select and acquire site, employ architectural adviser, hold a competition for selecting a proper design and competent architects and to erect building. Tax for this purpose to be one-half cent in 1930 and '31 and one cent in '32, expected to provide about one million dollars (*Library Occurrent* 9:46).

Massachusetts. State librarian to receive such salary as may be fixed by trustees with approval of governor and council (formerly \$5,000).

Ohio. Two bills failed, one to transfer the functions of the State library to the State university, the other to establish a State reference library. These were to carry out the former governor's purpose to abandon the State library when he vetoed its appropriation and crippled its service for eighteen months. The new gov-

ernor, however, had different ideas. In accordance with his recommendation proper appropriations were made and the service of the State library restored.

Pennsylvania. In passing the "Administrative code of 1929," Pennsylvania re-enacted the provisions of 1923 relating to the State library and museum under the department of public instruction and added that in exercising its powers and performing its duties regarding public records "the department shall consult and cooperate with the Pennsylvania Historical Commission."

Rhode Island. General assembly shall annually appropriate such sum as may be deemed necessary for books, binding and clerical assistance in the State Law Library (formerly \$5,500 may be annually expended).

South Carolina. State librarian's term of office lengthened from two years to four years.

Vermont. The president of the State Historical Society is to be one of the ten (formerly nine) trustees of the State library, six appointed and four (formerly three) ex-officio.

Washington. The State library is subordinated to the Department of Public Instruction by the abolition of the State Library Committee as noted under "State Library Commissions."

Public Documents

California provided for a wider distribution of the State blue book to libraries.

Delaware authorized the State librarian to deliver full set of laws of Delaware to the library of the University of Delaware; also legislative proceedings of both houses, present and future. Any publications so delivered are to be returned to the State library on request of supreme court judges.

An Indiana amendment to the public printing bill provides that the State library rebinding shall be done in such manner as the library board shall order and direct.

Another amendment provides for printing a limited number of copies of Indiana laws, journals, court reports and other official State publications on rag paper for permanent preservation (*Library Occurrent* 9:47; *THE LIBRARY JOURNAL* 54:443).

According to a Rhode Island act the State library is to receive 100 copies of reports made by State officers, boards and commissions.

A South Carolina resolution authorizes the State librarian to deliver acts and resolutions of the assembly to circuit judges.

Censorship

Censorship received consideration both years

in the Legislatures of two States but to no effect. Massachusetts in 1928 introduced three bills, one sponsored by the librarians and another by the booksellers, all three aiming to ease the stringent law now in force, under which prosecution and conviction are possible on the basis of a single passage rather than on a book as a whole. In New York State the agitation is in the opposite direction of greater stringency. There the "Clean Books" bill made its usual appearance, which aims to clarify the existing statute against indecent literature, to exclude expert testimony and to make an indictment possible against a book as a whole or against any part of it (*THE LIBRARY JOURNAL* 53:356, 364; 54:69, 219, *Publishers Weekly* 115:172, 323, 411, 655, 761). Meanwhile, judges in both States have rendered court decisions on the subject which contradict one another but which are consistent each with the law in their own State (*THE LIBRARY JOURNAL* 54:395, 537).

Miscellaneous

In California school boards may direct employees to attend conventions and pay their expenses. This includes school librarians.

California also passed a resolution proposing to the electors an amendment to the constitution relating to the Henry E. Huntington Library and Art Gallery. The proposed amendment approves the creation of the trust, specifies the powers and duties of the trustees and exempts the property from taxation. The latter is the chief object. This seems a strange section to put into the constitution, but similar action has been taken in past years with regard to a number of educational institutions, notably Leland Stanford Junior University.

Connecticut incorporated the Mark Twain Library, Museum and Memorial in the city of Hartford as a testimonial to the literary achievements of Samuel L. Clemens. It is authorized to acquire the Mark Twain homestead and other property, raise funds, carry on educational programs and competitions among school children, etc.

The City Library Association of Springfield, Mass., is authorized to hold real and personal estate not exceeding six (formerly three) million dollars.

Proposal to Combine School and Branch Libraries

A New York bill, which was killed in committee, aimed to amend the education law in relation to school libraries. It provided that a city board of education may combine school and branch libraries and abandon school libraries if the city has an adequate library sys-

tem and can make satisfactory arrangements "whereby the city libraries may be used for school reading courses." On the approval of the State Commissioner of Education, State aid for the purchase of school library books might be paid to the public library, and school library books and equipment were to be transferred to the public library subject to the condition that they might be used for school purposes.

The bill resulted from the Legislature's joint committee on taxation and retrenchment. It was opposed by both the public libraries and the public schools of the State. Critical and constructive comment came from Dr. Frank L. Tolman, Director of the Library Extension Division. He said: "The bill strikes at the heart of the high school library in New York State. Since 1890, when Commissioner Draper insisted, as a matter of sound educational policy, that school libraries belong to the schools and should be administered by school officials, and that public libraries belong to the public and should be administered by public officials, it has been the established policy of the State to insist on such control of school libraries by school officials. The law relates only to high school libraries and requires that such high school libraries be situated in the school building and be part of the school equipment. It provides for the maximum cooperation between the school and public library by providing that the public librarian, if qualified, may act as school librarian, by providing for the use of the school library by the public where public library facilities do not exist. Public libraries have been and are encouraged to cooperate in school library service in all elementary schools and to supplement high school library service in every way.

"There is no economy in the proposed change if adequate service is given. High school library service involves the provision of an adequate library room centrally located as to classrooms, a specially trained school librarian, a specialized school library book collection, including a school reference library, instruction in the use of books in libraries by the librarian and the administration of a school library by school officials. The estimated cost of such service is approximately 50 cents per capita of the total population, which is nearly as much as the total income of most public libraries of the State of New York. The books would cost as much if bought by a public library, a specially trained librarian would need as large a salary and the cost of administration would be probably higher, as a public library would not have so much voluntary help from teachers and student library clubs. The bill, however, proposes no

adequate service. A shelf of books in a distant public library or a box of books sent occasionally to the school building is a mere travesty of library requirements."

Synopsis of Legal Cases

A synopsis of cases at law in which public libraries have been parties, either as plaintiffs or defendants, has been compiled under the direction of Charles F. Woods by three students of the Riverside, Cal., Library Service School, Bertha E. Fyock, Muriel V. Russell and Eleanor N. Wilson. It covers thirty-nine cases in twenty-two States, grouped under six headings: Charities, charters, municipal corporations, schools and school districts, states and taxation. More specifically, they relate to gifts, bequests, endowments, trust funds, the interpretation of wills, disagreements between city officials over appointments of trustees, control of funds and buildings, issue of bonds, validity of contracts, municipal civil service, tax levies and tax exemption. In each case the cause of action is briefly stated, and the decision of the court indicated, together with references to the official report of the case. The synopsis is in mimeograph form.

Legal Decisions of Library Interest

Another compilation of great value in legal problems of libraries is "Legal Decisions of Library Interest," by Thomas S. Dabagh, member of the California bar, published in *THE LIBRARY JOURNAL*, April 1, 1929, 54:299-307. This is a table of over 275 cases involving libraries. These are arranged under the broad groups: Establishment and disestablishment, property, finance, personnel, municipal responsibility, service. There are over 90 sub-topics, under which the one relating to "gifts" is treated with special fullness. The table is taken from a thesis which the author hopes ultimately to develop into a book on the law relating to libraries.

Subcommittee

At the suggestion of Secretary Milam, a subcommittee has been appointed to study and make constructive suggestions with regard to live problems in library legislation. One suggestion received is that efforts be made to encourage uniformity in library legislation where conditions warrant. To this end, standard laws on distinctive library problems might be submitted. State grants and county libraries are mentioned for early consideration.

A. L. A. Committee on Legislation: William F. Yust, Chairman, Lucius H. Cannon, Lillian E. Cook, William J. Hamilton, Frank L. Tolman, Charles F. Woods.

Jewish Book Week

By Fanny Goldstein

Librarian, West End Branch, Boston Public Library.

JEWISH BOOK WEEK has now become an annual event in the United States. It was first suggested in 1927 by Rabbi S. Felix Mendelsohn of Chicago, and covers the week in which Lag B'Omar occurs, this year from May 11 to May 17. Through its celebration attention is focused by pulpit and press on the outstanding books which have been written during the year which should be in the hands of every Jew. A concentrated effort is being made for an appropriate observation of this week in libraries, synagogues, religious schools, book stores, and study groups, and an appeal is being made to the Anglo - Jewish press everywhere in America to lay special stress at this period on the Gospel of the Jewish Book. With this idea in mind, the Boston Public Library last year made a special effort to observe Jewish Book Week in an appropriate manner, and between May 20 and June 2 arranged a special exhibition in the Central Library as well as in several branches.

About a hundred rare books (*Bibles*, prayer-books, grammars and textbooks, and works of famous Jewish writers) were placed on view in the Exhibition Room of the Central Library; two magillahs, both several hundred years old, were of particular interest. The four polyglot *Bibles*—the Complutensian, Plantin, Jay, and Walton editions—with their carefully arranged parallel texts in a number of languages made an appeal to student and layman alike. Among the works of Hebrew scholars, those of Moses Maimonides are well represented in the Ticknor Collection of the library. The grammar and textbooks of the *Lingua Sacra*, in which the Prince Collection is especially rich, show by their wear and tear that they have actually been much in use. The New England editions

of such textbooks are also numerous. Various editions of the *Talmud* and *Mishna*, and works of prominent modern Jewish writers, composers, and painters, completed the exhibit. Sixteen large color plates, illustrating scenes from the Ghetto by Isidore Kauffman, the

late Viennese painter, attracted much attention.

Special exhibits of suitable books, photographs, clippings, periodicals, and ceremonial objects were also held at all the nine branches that serve Jewish communities. Books in Hebrew, Yiddish, English, and other languages for young and old were displayed. The library found it expedient to em-

phasize a single phase of Jewish life, art, or culture at each branch rather than to duplicate the exhibit at all.

The West End Branch exhibit was especially striking, artistic, and educational. The display of books and periodicals was concentrated in the center of the Main Reading Room around a case containing the Scroll, or Holy Law. This arrangement gave the impression of the "Ark" of "Holy of Holies" in the synagogue when it is open for devout worship. With it were grouped appropriately labeled ceremonial objects, both obsolete and still in use, for home and synagogue. Photographs of Jewish life and mounted clippings on famous books or writers were hung on the walls to carry out the idea. The Scroll and other ceremonial objects were lent for the occasion by Temple Israel and individuals in the community.

A list of one hundred books of Jewish interest in the Boston Public Library and its branches was available for free distribution. The exhibit was prolonged into June at the request of the public.

Jewish Book Week exhibit at West End Branch

Librarian Authors

BERTHA L. GUNTERMAN, at the present time head of the Longmans, Green Children's Book Department, succeeded George T. Settle, the present librarian, as head of the Order and Accessions Department in the Louisville (Ky.) Public Library in 1913. She remained here until 1919, when she left for a taste of life in New York City. The flu epidemic that year sent her West, to California, where a delightful sixteen months restored her fully to health. Then came the opportunity to go to Longmans, Green & Co., in charge of the library department, an opportunity eagerly grasped because the end of a long vision, a chance at their children's books, which at that time were receiving scant attention, seemed at hand. The Children's Book Department, as a definitely organized department, is now four years old and is one of the five editorial departments of the Longmans, Green & Co., the Adult Trade, the Children's Book Department, the College, the Educational Department, and the Play Department. In relating some of the work of this department, Miss Gunterman says: "It is quite difficult to explain just the preparation necessary for entering the publishing field, but I can safely say, however, that you will find a use for everything you have picked up. First, the manuscripts. They come in a steady stream direct from authors and from literary agencies. Meticulous care is given to their recording and disposition to safeguard them as far as possible. The receipt of each manuscript is acknowledged and a card record made for our files; the manuscript itself is placed in a fireproof file awaiting its first reading. Each manuscript is carefully read by members of the department who have had library and bookselling experience; the first reading is mainly for the story itself. Then it is read for its literary quality, although this too, but in less degree, has been kept in mind by the first reader. Then all reports are assembled and carefully considered by the head of the department, who reads all manuscripts that pass the first reading. The head of the department then reports to the general conference, which is made up of the heads of the various editorial departments, the advertising and sales departments. If the conference approves acceptance of the manuscript, an agreement for the publication of the book is drawn up after conference with the author, signed and sent to the author for his signature. On return of the signed agreement from the author we are ready to prepare the manuscript

BERTHA L. GUNTERMAN

for the printer. The selection of the artist is an important part of book making, and it requires more than a knowledge of which sketch will reproduce well and which will not—one hopes to be able to determine which artist will be capable of putting into his drawing the spirit embodied in the manuscript. The choice of the type and the paper and the binding cloth are all considered when the manuscript is first sent to the printer."

The work in a children's book department in a publishing house sometimes includes a trip to Europe in search of books, and last autumn Miss Gunterman began her trip in Holland and went from there to Stockholm, Berlin, Vienna and other cities. In 1928 Miss Gunterman edited *Tartan Tales* from Andrew Lang, which, she explains, was done "because of the sheer love of the Scotch of it, being brought up in a Scotch community and Scotch by adoption," edited *Edwy the Fair*, undertaken because of the fullness of description of a Saxon homestead and the story of the fall of Glastonbury Abbey, and wrote *Castles in Spain and Other Enchantments*, "Well, who wouldn't try a castle in Spain?"

THE LIBRARY JOURNAL

May 15, 1930

Editorial Forum

A LIVE library in a live town must spend more money each year, both for books and service, to meet the needs of the growing community. Yet the library items are too often the first to catch the eye of the budget authorities when retrenchment is in order. This should not be, for the library should at the worst share the paring process with other institutions when economy is unavoidable. When unemployment is rife the library is often called upon to do more rather than less work since reading is a solace of the more intelligent of the unemployed during enforced leisure. When library funds are decreased, then as both writers on the subject in the current issue point out, the first care should be to preserve the staff organization by avoiding discharge or by letting the less important and cheaper employees go. The closing of less important branches or the shortening of hours throughout the system is expedient because it brings the public face to face with the situation and invites public opinion to provide the remedy. Book buying should be decreased, if at all, by refraining from purchasing duplicates or the more fleeting issues of the press. Above all the public should be kept thoroughly informed as to why and how the library is forced to curtail its service.

SINCE 1921 William F. Yust, as chairman of the A. L. A. Committee on Legislation, has prepared a report of library laws passed during the previous year and the library profession owes him a deep debt of gratitude for this detailed and important yearly work. This year the report covers two years, 1928 and 1929, and county libraries receive the largest amount of consideration with seventeen States presenting bills on this subject; many of them failed but new laws were passed in Arizona, Colorado, and Oklahoma for county library establish-

ment and improvements were made in a number of others. New State agencies were created in Colorado, Montana, New Mexico, South Carolina, and West Virginia. In the complete report library support, county libraries, State libraries, and State library commissions are the subjects which occur most frequently showing the trend of library affairs during the past two years.

BROOKLYN's librarianship contest has happily resulted in a worthy triumph for the library profession. The trustees were closely divided, counting the ex-officio members on the political side, between a professional librarian of high standing and wide experience from outside and a local candidate who had held several political offices and was acknowledged to be of executive ability and excellent personality the best candidate possible under restriction of locality. The issue was thus clean cut and Mr. Ferguson's election is therefore the more gratifying. The death of David A. Boody, an enthusiastic member of the A. L. A., devoted to library interests, made the presidency vacant and Roscoe C. Brown, Professor of Journalism in Columbia University, who had occupied the chair at every meeting during Mr. Boody's long illness with distinctive ability and to the general satisfaction of the trustees, was the natural successor. He insistently declined the honor in favor of ex-Judge Edwin L. Garvin, a distinguished lawyer, and accepted the vice-presidency in pledge of his cordial support. Judge Garvin's election was practically unanimous and his choice proved admirable. His address of thanks relieved the tension within the board, and in addressing the staff within the week he won golden opinions from all. The future of Brooklyn's Public Library seems thus doubly well assured.

WE HAVE never upheld the doctrine that the library calling should be a closed profession, with no room for recruits from outside library schools. This would be unfortunate on every side. But a great library, like the Library of Congress or one of the great municipal libraries, is a most complicated organization, covering wide fields of knowledge and experience. For any executive to become the chief of such a library is to necessitate learning a difficult profession from the top instead of from the bottom. It would be a long while indeed before the most capable executive could find out what library work in its many divisions and details really means. It is therefore fortu-

nate that Brooklyn remains in the roster of cities, from which there are but one or two notable exceptions, which have fully trained librarians as chiefs. For that Brooklynites have reason to be thankful.

INCIDENTAL to the opposition to a trained librarian not of local relationship some curious arguments were put forward by the opposition. One was that a librarian who had been "subsidized" by the Carnegie Corporation for report upon library conditions in the South African Union, made desirable by Mr. Carnegie's special bequest for the British Dominions, and library reorganization in Louisiana would be under the baneful influence of the Carnegie authorities—oblivious of the fact that to Mr. Carnegie himself Brooklyn owes much of the great system of branches which has been its main feature during the denial to it of an adequate central building. Another was the allegation that a professional librarian is an "itinerant carpet-bagger"—to which class, it may be observed, Dr. Putnam, Dr. Hill and the late Mr. Dana in their remarkable library progress belong—ignorant of the traditions, citizenry and even the streets connected with the new job. It was further alleged that librarianship was not to be regarded as a profession and that a capable executive could learn or control the details connected with the management of any library even of the size and complexity of our own great municipal libraries. Thus the issue turned ultimately on the question whether library work is really to be counted a profession, and it is worth while to record thus in detail the situation out of which the election of Mr. Ferguson has come as a triumph of the professional idea.

LIBRARIAN FERGUSON, than whom no librarian in the nation has had wider training and experience, will have ample opportunity to use all his ability, experience and tact in meeting the problems which will confront his administration, and it is indeed a great opportunity which opens before him. The library, next to New York and Chicago, that of greatest circulation in the world, with 7,006,641 volumes to its credit in the year past, receives from the city a budget of \$946,223 for the year current, an income from the endowments turned over by the old Brooklyn Library of approximately \$30,000, and from the so-called Directors' Fund constituted of fines, etc., received from

patrons and used chiefly for book purchases and otherwise for contingent expenses \$90,000, in all over a million dollars. But in the absence of a central library building its work has been chiefly through its 34 branches of which 21 are Carnegie buildings, and it has been handicapped in fulfilling the larger purposes in relation with the public welfare which will be possible when the magnificent new building planned is added to the edifice of the New York Public Library and the new central library in Queens Borough. The new librarian must be no "stormy petrel," as one opponent suggested he might be, nor be in any wise at odds with the municipal authorities or borough leaders, while by assuring all citizens of fair play in appointments and promotions under the excellent merit system which has grown up within the library he will play a fair game with and win the respect of "the powers that be," naturally prone to press for favors in the interest of constituents. Such aims and practices should win for him the support of even those who have been his opponents and put and keep Brooklyn on the library map as its population and prominence deserve.

ON HIS seventy-eighth birthday and after thirty-three years of great public service Thorvald Solberg retires under age limitation from the office of Register of Copyrights, the only occupant of the position created in 1897. In this official and also in his personal relations Mr. Solberg has come into close touch with libraries and librarians and the general hope of the library profession will be that hereafter the Copyright Office will be maintained at the high standard which Register Solberg inaugurated and which will be better fulfilled when the annex building of the Library of Congress shall be completed and the office relieved therein from the congestion which of late years has hampered its development. Mr. Solberg's chief desire had been that complete international copyright should be achieved during his official career and he will now hope during his lifetime, and he has been one of the most vigorous and effective proponents of that purpose. There have been stout differences of opinion in our progress in this direction, not least within that remarkable trio of men of vigorous and even bristling personality, including the late George Haven Putnam, Register Solberg, and Chairman Raney of the A. L. A. Bookbuying Committee. But the present outlook is for the early passage of the Vestal bill for general revision under compromises which will be reasonably satisfactory to the several competing and conflicting interests involved.

Book Reviews

A Symposium

Mann, Margaret. *Introduction to Cataloging and the Classification of Books*. Chicago, American Library Association, 1930. 434p. \$3. (Library curriculum studies.)

A University Library

A CLEAR, concise textbook "for students beginning the study of Library Science" (cf. Preface), logically progressing from a general survey of the field of cataloging and classification to a concrete example of rules and methods in action. The book is not intended as a substitute for the library school courses in these subjects, and must be supplemented by lectures and practical demonstration in the classroom. A sustained effort is made to present the cataloging and classification of books as instruments for bridging the gap between the library collection and the library patron. Miss Mann has succeeded generally in avoiding the inevitable pitfalls confronting an author of a book on these subjects, those of overemphasis of detail at the expense of an even development of the whole subject and dogmatic outlining of methods.

THELMA L. EDWARDS,

Head Cataloger, University of Washington Library.

A Library School

MISS MANN says: "Belief in cataloging and classification seems to the author the fundamental trait" to be cultivated in the future cataloger. The first chapter of Miss Mann's book arouses interest in cataloging and classification; the next nine chapters provide a basis for sympathetic understanding of purposes and principles—all combining to build a firm foundation for sincere belief in cataloging. The last third of the text deals mainly with administrative problems. Two noteworthy improvements in the new edition—there are many—are the addition of definite references to the A. L. A. rules and Fellows' Cataloging rules; and the rearrangement of the material into a more natural progression for students. The chapters on the Library of Congress classification system, and subject and form entries, contain material which cannot be found conveniently stated elsewhere. To students, the book introduces as vital, interesting, human, and yet dignified, the often misunderstood subjects of cataloging and classification.

JULIA C. PRESSEY,

Instructor, Atlanta Library School, Georgia.

A Public Library

THE TEXTBOOK as a whole is an exceptionally fine piece of work. The introduction presents cataloging and classification in a most attractive way, and the first study, "How to Read a Book Technically," gives an excellent bird's-eye view of what cataloging is all about. The discussions of classification and cataloging schemes are well done. Processes are explained in a satisfactory way, not stated dogmatically. Chapters thirteen to eighteen furnish information to be found nowhere in cataloging literature except scattered through numerous books and periodicals. These chapters are a veritable mine of information and suggestions. To those just organizing or reorganizing the work of catalog departments where the latest and best methods may be introduced all at one time, these suggestions will be invaluable. Departments already organized and in operation for many years will also find a wealth of useful material.

RUTH WALLACE,

Chief, Catalog Department, Indianapolis Public Library, Indiana.

A Graduate Library School

MISS MANN is to be congratulated on the creditable completion of what must have been a task of exceptional difficulty. Aside from early textbooks in library science, usually restricted to cataloging, the present is the first really exhaustive study dealing exclusively with this topic. The author has shown commendable independence in the face of instructions in regard to methods to be followed in preparation of textbooks, printed on pages ix and x. Cataloging is not a subject that can be treated satisfactorily according to standards laid down to cover preparation of books in other fields. For instance, the literature that counts most in the preparation of a book on cataloging is that which deals with rules, systems, bibliographic technique and routine, history, description, and comparison of bibliographic records. "Literature bearing upon the methods of performance of duties, principles underlying the methods, points of view, and objectives of the field" also enters in, but is of subsidiary importance. The author has apparently recognized this and has proceeded on somewhat independent lines.

J. C. M. HANSON,

Professor, Graduate Library School, University of Chicago.

Through the Looking Glass

*A Monthly Review of Children's Books
and Reading*

By Helen Martin

Library work with children, Western Reserve University School of Library Science

SPRING in all its freshness and beauty is here. Spring Arrivals on the Bookshelves legend, that it is difficult to separate fact from

In garden and forest daffodils and trilliums are harbingers of this ever-welcome season, and in the children's room gay, attractive volumes are slowly arriving to brighten the somber shelves of winter.

A colorful work of the picture book type is *How the Derrick Works*, by Wilfred Jones. Old and young alike, especially the sixth grade boy with a mechanical bent, will be attracted immediately by the effective woodcuts in black, white and blue, while the authoritative text, supplemented by diagrams, will answer many technical questions concerning this marvel of the modern industrial age.

It is a real pleasure to add to the all too meagre collection on South America the worthwhile book by Elizabeth Coatsworth, *The Boy with the Parrot*. The land of Guatemala with its distant mountains, burning tropical sun and white wattled cottages serves as a background for the lively tale of Sebastian. This lad wanders through the countryside selling to peasants and gypsies with the aid of the green parrot, Lora, the medley collection from his peddler's pack. In addition to its school use, the story, full of adventure, humor and legend, will fascinate children of the fourth grade.

Under the magic touch of Erick Berry, Africa has become a land of romance and adventure. This year her husband, Herbert Best, for many years a member of the English Civil Service among the African hill tribes, has written a book for older boys, called *Garram the Hunter*. Garram, the quick-witted son of a noble chief, has many a thrilling adventure with his intelligent, devoted hound, Kon, on hill and plain in an effort to save his father and the tribe from a would-be usurper and his crafty son. There is woven into the ingenious plot the constant menace of the country, the wily leopard, the superstitions of the natives, and the mystery of the East. As usual, the brush sketches of Erick Berry contribute materially to the atmosphere of the tale.

The name of John Chapman, later called Johnny Appleseed, has been so surrounded by

fancy. This youth, who left Massachusetts in the late seventeen hundreds, pushed ever toward the western horizon and heard the call to make "the wilderness blossom like the rose." By planting apple seeds and saplings in out of the way places, he finally, as an old man, achieved his dream, to which today from Pennsylvania to Indiana many an apple orchard brings its flowery tribute. His portrait has been historically and sympathetically drawn by Henry Chapin in a volume, called *Adventures of Johnny Appleseed*. By stressing the outdoor life of this pioneer horticulturist, his delight in the furry creatures of field and meadow, his understanding of the Indians, his knowledge of woodcraft, the author has created a character which will have a real appeal to the boy of junior high school age. The illustrations by Daugherty seem peculiarly fitted for visualizing this strange, erratic aging wanderer in ragged homespun.

Baron Munchausen, Lemuel Gulliver and Paul Bunyan are familiar to children, but that the ancient Greeks had a writer, Lucian, who could put the tales of even these gentlemen to shame, is practically unknown. Agnes Carr Vaughan, a professor of the classics, has taken his amusing satire, *Vera Historia*, and adapted it for young people under the title, *Lucian Goes A-Voyaging*. The perfectly incredible experiences of the hero and his crew, their trip to the moon, the famous battle there, the escape from the mouth of the gargantuan whale are delightful extravaganzas which will appeal to a child's sense of humor. The drawings, imitations of Greek vase paintings, the appropriate red cloth binding, present an unusually striking make-up. In the rendition of this traveler's tale Miss Vaughan has provided a welcome variation in the usual literary fare, and, best of all, has opened the gates to an enjoyment of classical literature.

Cuts, at top of page, of the "White Knight sliding down the poker" are taken by permission from the Tenniel edition of *Through the Looking Glass* published by Macmillan Co.

For Bibliography of books reviewed see p. 471.

The Open Round Table

Leisure and Librarianship

To the Editor of THE LIBRARY JOURNAL:

The two communications of Miss Louise Davies, one in *THE LIBRARY JOURNAL* for March 15, and the other in the April *Wilson Bulletin*, interested me immensely.

I certainly agree with Miss Davies in her feeling that service to the library's public is rendered too much at the expense of the staff. This seems to me one great reason why the library profession either does not attract the best talent or discourages it when it gets it.

As now organized, the library profession finds itself in the anomalous position of asking for high intelligence and superior educational background, and at the same time providing long hours, low salaries and high-pressure work, frequently of an uninteresting nature. It asks for the type of person who is developed only by scholarly interests and a certain mental leisure and then makes the continued development of such a person almost impossible.

My criticism may be vague, and sophomoric professionally, but I have one definite suggestion—leisure is a matter, of course, for that class of library workers for whom training and education are declared so essential. Two afternoons, certainly one, in addition to the one usually given, might be provided as a matter of course, as leisure time in which to continue study or to know something of the books which are being passed on to an unsuspecting public. It seems to me that a profession should blush to have one of its members, himself the head of a circulation department, say that he has no time to know about the new books which he arranges so carefully on a special shelf. Why should such a state of things be accepted as part of an inevitable situation in one profession when in another it would be tantamount to admitting incompetence, individual or professional? My criticism is not so much that there is no time but that seasoned veterans, in the hot pursuit of bigger and better statistics, have acquiesced in such an arrangement of things.

The idea of definite leisure time for library workers is usually received with indulgent smiles at this utopian suggestion of a young upstart, but why? No head of an academic department would ask his teachers to work continuously from 9 to 5 or longer at assigned tasks and then do any original thinking, or any at all, in the evening. He would not be interested in the type of person who is willing to sacrifice what mental ability he possesses to more than a recognized minimum of routine work.

The criticism will be probably raised that such a scheme as I suggest is impracticable—that it is not businesslike, and that some people would be sure to take advantage of such freedom. A reply to the first is that it does work in professions which really want initiative of mind and action, to the second that it is more unbusinesslike for taxpayers to pay for service and advice that is often more or less meaningless, since the library workers have either little desire, or else no chance, to know what they are talking about, and to the third that such people ought to be weeded out in the beginning.

It is no doubt true that the situation I speak of exists in most professions, at least for long years of apprenticeship, but it does not seem any more desirable for that reason. Nor is there less danger than in the long run there will be less genuine accomplishment. The mere fact that a book is handed over the desk to a reader is not proof that he is being served.

In conclusion, may I say that I cheerfully concede that everything I say may be discounted by my professional youth, yet one's decision to remain in a profession must be made before one has gained the philosophy and perspective of years of experience, and one may therefore be forgiven for attempting any judgment. My chief pleasure in library work has been the meeting of a few rare spirits, the chief disappointment that they seemed unique. Their disappointment will be that my remarks, listened to so patiently, have found their way into print, should you be so kind as to spare them the wastebasket. But I still believe that as things are now, Martha would be a happier librarian than Mary.

MARIAN SATTERTHWAITE SCANDRETT,
Librarian, Atlanta University Library, Ga.

Library Activities in India

To the Editor of THE LIBRARY JOURNAL:

A NEW phase has arrived in the progress of the Library Movement in India, and the workers of the different provinces are trying to stimulate the growth of the movement by organizing conferences and exhibitions. Mr. Asaddullah, the new librarian of the Imperial Library, Calcutta, and Kumar Muniudra Del Rai Mohasi, M. L. C., of Bansberia Raj, the pioneer of the movement in Bengal, are trying to make the next session of the Bengal Library Conference successful. Mr. N. M. Dutt, the curator of the State Library Department, Baroda, has been elected president of the conference, which will discuss many im-

portant subjects, Library Legislation, Cataloging of Vernacular Books, Proposal for a Library Commission, Training of Library Workers, etc.

The authorities of the American Library Association are to be thanked for their sympathy toward the library workers in India. It is desirable that the Americans would evince more interest in future toward the promotion of the movement in this country, which has received very little sympathy from them so far.

The undersigned will be glad to receive reports, bulletins and other library literature from the authorities of all the State Library Commissions and other principal libraries which will be exhibited at the time of the conferences, and would subsequently be used for the reference of the library workers. Presentation of publicity posters, photos of buildings, and journals on library movement will be welcomed with thanks.

T. C. DUTTA,

Joint Secretary, All Bengal Library Association.

Cooperative Trip to Europe

To the Editor of THE LIBRARY JOURNAL:

I believe that many librarians might be glad to know of a non-commercial *Cooperative* trip to Europe being organized under the leadership of Prof. Tredwell Smith of Teachers' College. For \$375 one can have a four weeks' tour in England, Belgium, Germany and Austria, with ocean passage both ways included. For \$175 more, one can add a three weeks' tour of Russia, all under expert guidance. Or, one may plan one's own tour in any other direction. If there is any balance left, it will be refunded pro rata.

This is surely an unusual opportunity. Inquiries should be addressed to Professor Smith at 229 West Forty-eighth Street, New York. The party will leave New York on June 28.

FREDERICK A. BLOSSOM,

Librarian of the Explorers' Club.

A New Periodical

A NEW national educational periodical, *The Junior College Journal*, will begin publication in October, 1930. It will be published monthly by Stanford University Press and will be under the joint editorial control of the American Association of Junior Colleges and the School of Education of Stanford University. Dr. Walter C. Eells, of the Stanford University School of Education, will be editor-in-chief of the new periodical.

Essay on Librarianship

To the Editor of THE LIBRARY JOURNAL:

For the edification of library school students and others of us who should fully realize the vocational implications of our profession, the following excerpt from a local high school student's theme on librarianship ought to prove interesting: "The circulation librarian who has the ability to bring people and books together and discuss them. This is a hard task, and showing the gathered peoples' traits and characters," and "The reference librarian is the one who we go to for information and is doing his part of the world's work. His knowledge is great, and can tell the 'how, where, when and who' of all books. The reference librarian is very rare. While he is broadening our minds, he is also broadening his own."

A. D. KEATOR,

Librarian, Reading (Pa.) Public Library.

List of Summer Courses

INFORMATION about summer courses in library science to be offered in 1930 has been prepared by the Board of Education for Librarianship, American Library Association. Their list includes courses which offer professional training to librarians in schools in thirty-five States and two Canadian Provinces. The material is conveniently outlined, giving dates of the courses, brief descriptive notes on the work to be covered, and the name of the director. Courses accredited toward bachelor's or master's degrees are indicated. Copies of the list may be obtained from the board of Education for Librarianship, American Library Association, 520 N. Michigan Ave., Chicago.

Bibliography Available

"SAND MOVEMENT, Beaches and Kindred Subjects" is the title of a bibliography recently compiled by the Engineer School Library of the Army War College, District of Columbia. Additional copies may be had free of charge upon application, or, if addresses are furnished, will be mailed to persons interested.

Burglary or Theft Insurance

IN RESPONSE to inquiries sent out by the American Library Association, Fred S. James & Company, 175 West Jackson Boulevard, Chicago, insurance agents, have offered to make libraries a proposition covering burglary or theft, when there is direct evidence of theft from library premises; if they will give the maximum value of the books at any one location; the approximate average value at each location, and the maximum amount of insurance required on each location. The company cannot cover mysterious disappearance or unexplained shortages in stock when inventory is taken.

From The Library Schools

Atlanta

ANNOUNCEMENT has just been made that the control and administration of the Library School, Carnegie Library of Atlanta, will be transferred from the Carnegie Library of Atlanta to Emory University, beginning with the coming academic year. Since 1925 the school has been affiliated with Emory University, but the control remained with the Carnegie Library of Atlanta. This change marks the complete integration of the school with the university.

This step in the school's history takes place at the end of twenty-five years of growth. The school, which is a charter member of the Association of American Library Schools, was established in 1905 as the Southern Library School, sponsored by the Carnegie Library of Atlanta and made possible by a gift from Mr. Andrew Carnegie. The demand for training for librarianship and the trend of library standards, especially in the South, have now made necessary this further expansion of the school's equipment and service.

The location of the school will be moved from the Carnegie Library of Atlanta to the Library of Emory University, where quarters adequate to the increasing enrollment will be available. The new location will enable the school to accommodate fifty students, and the enrollment will be limited to that number. The new quarters in the University Library will afford separate rooms for study, for class work and seminars, and for faculty offices.

Beginning with the class of 1926, the school has admitted only qualified college graduates, in accordance with the standards for graduate work in the university and the requirements of the Board of Education for Librarianship for graduate library schools. Since 1928 the degree of Bachelor of Arts in Library Science has been conferred on the students who satisfactorily complete the course.

The twenty-five years of honorable history of the Atlanta Library School, under the direction of Miss Anne Wallace, Miss Julia Rankin, Miss Katherine Wooten, Mrs. Percival Sneed, and of Miss Tommie Dora Barker have assured the continuing school a recognized foundation. Two hundred and eighty-four students have been graduated from the school up to the present time, the classes numbering from five to eighteen members up to the class of 1929, when thirty-two students were graduated. Graduates are at present holding positions in twenty-two States and in one foreign country.

Emory University's high academic standards,

its cordial attitude toward progressive educational methods, and its belief in the library's place in education will enable the school to continue to hold its prominent place in the training of librarians.

Miss Clara E. Howard, at present Director of the Library School, New Jersey College for Women, and chairman of the American Library Association Education Committee, has been appointed Dean of the school and will assume her new duties in the fall. Miss Howard's contributions to the library profession, her authority in questions concerning the library and the schools, and her administrative ability assures continued progress and leadership in training for librarianship in the South; and the school congratulates itself upon Miss Howard's acceptance of the appointment. The expansion of the school has been made possible by a gift of \$100,000 from the Carnegie Corporation and the Rosenwald Fund, to be distributed over a period of five years. The faculty will be increased as commensurate with the increasing enrollment. The offices of the school will be moved to the University Library on Sept. 1, 1930, after which time the address will be Emory University, Georgia.

McGill

MCGILL UNIVERSITY Library School, which was established three years ago according to Junior Undergraduate Library School standards, and has been accredited as such by the Board of Education for Librarianship of the American Library Association, has had the distinction of offering the first one-year Library Course in Canada. It has now raised its standards. A Bachelor's degree has become the minimum requirement for admission, and a Bachelor of Library of Science degree will be conferred upon those who successfully complete the course, which will be offered for the first time on its graduate basis during the coming session, 1930-31. McGill is the first Canadian university to offer a course of this type which meets the higher requirements now generally accepted by the profession on both sides of the Atlantic. The purpose behind this step is to meet the Canadian need for more highly trained librarians of general ability. The experience of the past three years shows that the entrance requirement of one year of college work, coupled with the one year Library Course, is insufficient preparation for the type of position which is frequently open in Canada. Until now advanced Canadian students wishing a degree have been obliged to secure it in the United States or Europe.

School Library News

An Open Letter to School Librarians

AN ACTIVE campaign with a three-fold purpose is being conducted by the School Libraries Section of the A. L. A. under the energetic leadership of Miss Lois Shortess, chairman of the Membership Committee. The objectives are to compile a directory of active school librarians in each State; to urge those who are not members of the A. L. A. to join, and to call the matter of section membership to the attention of as many as possible.

State representatives are working to bring up-to-date the directories compiled in 1926-27, and invitations to join the A. L. A. have been sent to the names listed there. A brief notice of the work of the section and an invitation to membership were sent from A. L. A. Headquarters to all school librarians listed in the third *School Library Yearbook*. Those who received two notices and those who had already paid section dues will see from this plan how duplication occurred in some instances. Due to unavoidable delays for which the chairman was not responsible, the notices were late in being sent out, so that it was impossible to complete the campaign by the date set. However, the names of all school librarians who are members of the A. L. A. will appear in the fourth *School Library Yearbook*, as in previous years.

Miss Shortess, Miss Harris, the secretary-treasurer, and I are very grateful to the State and district representatives who have given so generously of their time in this work. We wish it were possible for all of you to enjoy, as we have enjoyed, the many enthusiastic and cordial letters which have come in with the dues. As a result of the committee's efforts, we now have 1895 school librarians to list in the *Yearbook* and enough money to jingle in the treasury pocket.

Other committees have been active. The Book Committee prepared the list of "Thirty Books for Young People of High School Age" which appeared in the April *Booklist*. The constitution of the School Libraries Section has been revised and awaits your approval. The Exhibit Committee is assembling material from various parts of the country for a most interesting exhibit. The Hospitality Committee, with Miss Laura Grover Smith as local chairman, is planning a royal welcome to all school librarians.

This year we are trying the experiment of having a contract chairman. Mrs. Elizabeth Riddell White, Department of Libraries, Long Beach City Schools, 716 Locust Avenue, Long

Beach, Cal., is going to help you find the people you want to meet. Any of you school librarians who have baffling problems on which you want help are asked to write her concerning them. She will arrange, if possible, to have you meet some one who is especially well qualified to give help on your problem.

The Program Committee hopes you will like its plans and urges every school librarian to come and help to make the sessions of the School Libraries Section a success.

ANNIE S. CUTTER,

Chairman, School Libraries Section.

Libraries in School Buildings

A FEW reprints of extracts from hearings before the Subcommittee of House Committee on Appropriations regarding Branch Libraries in School Buildings have been made by the Public Library of the District of Columbia and will be sent to librarians upon application to the Librarian, George F. Bowerman. Mr. Bowerman states in a letter, received along with a copy of the reprint, that first and last the question of having branch libraries in school buildings has been stirred up many times. He was more or less committed to such a program in Washington but extended study of the question has brought the conclusion that it is not ordinarily desirable and is desirable only in rather exceptional circumstances. Next year some experimental branch libraries will be established in school buildings in order to give the matter such trial as has not yet been given it in Washington.

Speaking of the Use of Book Jackets

THE FREE Public Library, Bridgeton, N. J., has made a splendid connection with the grade schools by sending out jackets of books which they believe the children will wish to read. They have two copies, at least, of each book from which jackets are sent for the teachers to place on the bulletin boards. When children from the schools where these book jackets are displayed ask for books that are not in they are reserved free of charge so that they will not be discouraged from asking for particular books.

Mother's Day List

MOTHERS IN BOOKS is the title of a booklist which is being issued by the Enoch Pratt Free Library, Baltimore, in connection with Mother's Day.

In The Library World

Queens Borough Public Library Book Bus

THE PIONEER, the Queens Borough Public Library Book Bus, was christened on April 11 by Mayor Walker. It is built on a Brockway bus chassis by the Huber Wagon Works of Long Island City and is really a complete small library on wheels, measuring 15 ft. behind

the driver's seat and with an inside height and width of 7 ft. The body is Imperial maroon in color with gold lettered quotations and inscriptions and a gold band encircling the top, with superimposed pictures and legends indicating the nature of the contents: Romance, Poetry, Fairy Tales, Adventure, Science, Recreation, Civics, Music, Art, Biography, History, Informa-

tion. The inside is fitted with open shelves, rubber-tiled floor, chromium-plated fittings, eight dome lights in the ceiling, leather cushions of harmonizing tones which cover the side benches, where children may sit, and two comfortable seats in the rear for the librarians as they travel from stop to stop. Of special professional interest are the Dickman charging machine and the charging desk, which, though in miniature, conforms to the very latest library practice. Every available space in the interior is utilized by cleverly fitting cupboards for reserve stock. A heater attached to the engine will provide ample warmth, but most unique of all is the radio attachment, which will link the WNYC Broadcasting Station, at the Municipal Building, New York City, with Book Bus readers in all parts of Queens. By means of this radio a story hour broadcasted from WNYC will be heard by children on the street corners in remote parts of Queens Borough. Other interesting features are the specially designed magazine rack with its individual light, the

wall pockets holding fresh flowers, and the bulletin board placed above the magazine rack.

In accordance with the county library service movement throughout the United States, Queens Borough has been reaching out to extend to readers in remote regions the same privileges enjoyed by those who live near the Central Library. The Book Bus will be an immediate, effective, and economical fulfillment

of the literary needs of alert communities which are without library facilities. The bus will carry 2000 volumes weekly to twenty suburbs or more in remote parts; half an hour or forty-minute stops will be made to allow time for book selecting. Two trained librarians, one especially skilled in children's work, and a chauffeur attendant will form the crew.

A collection of

10,000 volumes will be reserved for the Book Bus in the Central Library, which will enable the quota of 2000 books to be constantly maintained on The Pioneer. Miss Pauline Lang will be the librarian in charge of The Pioneer, and Mrs. J. C. Diffenderfer will broadcast stories over WNYC to listeners near the Book Bus on the streets. The approximate cost of The Pioneer was \$6,000, of which \$2,300 was spent for the chassis.

Queens Borough's new \$6,000 Book Bus

Children's Exhibit to Loan

AN EXHIBIT showing library work with children and consisting of three posters, 22 x 28, illustrating Children's Book Week, library service to children through schools and other organizations, service to youth individually and in groups, and six scrapbooks, has been prepared at A. L. A. Headquarters from material contributed by the children's departments of twenty-six public libraries. It is now available for loan to libraries and library schools, or for exhibit at meetings of library organizations.

New Buildings

A BOND issue for \$65,000 has been successfully carried in Pine Bluff, Ark., for a new city library, according to Christine Sanders, librarian of the Arkansas Free Library Service Bureau. The building will be started immediately.

THE WEST TOLEDO Branch of the Toledo Public Library was formally opened on March 28-30. The building is of English style, with walls of hammer-dressed limestone and Old Tavern brick. Large bay windows with leaded panes of glass let in light generously, and the gables and garage wing break the mass of the building into interesting units. As it now stands, including landscaping yet to be done, with all furniture and fixtures (books only excepted), the building has cost approximately \$122,000.

THE NEW "Temple of Law," the \$1,200,000 headquarters of the New York County Lawyers' Association at 12-16 Vesey Street, near St. Paul's Church, New York City, will be opened on May 27. The third floor will be given over to the library and reading room. The latter also fronts on the open space of St. Paul's Churchyard and is paneled in dark wood. Huge fireplaces occupy the end walls, and around the sides are etchings of historic interest. The library has shelves for 25,000 books, and double that number will be kept in the basement for use as called for. The plan for the building first developed in 1923, when William Nelson Cromwell, president and founder of the association, made an initial foundation gift of \$125,000. He has since contributed nearly \$500,000 to the cost.

THE CITY of Hartford, Conn., has recently raised by popular subscription a sum sufficient to purchase and restore the old home of Mark Twain. Three of the finest rooms, including his old library, were opened April 30, 1930, as a branch of the Hartford Public Library.

THE NEW WING of the Morristown Library, Morristown, N. J., was opened on April 28. The architecture of the interior is Jacobean in style with carved oak doors and panels. Shelving and furniture have been made to harmonize with the architecture; two illuminated display cases and two large bulletin boards provide for exhibitions of various kinds. The wing provides for an Order Department, Catalog Room, Staff Room, office for children's librarian, room for school duplicate collection, and book stacks for 50,000 volumes.

Jewish Books for Congress Library

JULIUS ROSENWALD of Chicago has offered to give \$50,000 for the establishment of a fund to be devoted to Hebraica and Judaica in the Jewish Division of the Library of Congress, on condition that a similar amount be raised. The \$100,000 fund would be turned over to the Library of Congress Trust Fund Board for the use of the Semitic Division of the library. The fund is required because it is said that the collection presented by the late Jacob H. Schiff to the Library of Congress was not being sufficiently augmented by annual accessions owing to limited governmental appropriations, while the demands for Semitic material were constantly increasing from Congress, government departments, embassies, the press and other agencies. Dr. Putnam suggested that the \$100,000 fund be used in two ways during a period of ten years: \$50,000 to be applied to direct purchases and \$50,000 to constitute an endowment, the income from which should be applicable to expert service, as is being done with other divisions of the library.

National Library of Scotland

THE REPORT of the National Library of Scotland for the year 1929 shows a total attendance of 7074 readers for the year. The number of readers who made use of the library was approximately the same as in 1928, which is satisfactory evidence that the increased use of the library by the public, referred to in previous annual reports, was not transitory. The National Library is the successor to the Advocates Library, and while it is still in its infancy it has an extraordinarily interesting and valuable nucleus. A new building, about to be erected near the present site, has been made possible by the generosity of Sir Alexander Grant, a close personal friend of Mr. Ramsay MacDonald.

Copies of Paper Available

SO MANY requests have been made for copies of the paper, "The Foreign Dealer," which Mr. Russell of the University of Minnesota read at the midwinter meeting of the University and Reference Section, that a mimeographed copy has been prepared for distribution. This will be sent to anyone applying to H. G. Russell, Order Department, University of Minnesota Library, Minneapolis.

Current Library Literature

Intended to index with brief annotation, or excerpts when desirable, articles in library periodicals, books on libraries and library economy and other material of interest to the profession. The subject headings follow those in Cannons' "Bibliography of Library Economy," to which this department makes a continuing supplement. Readers are requested to note and supply omissions and make suggestions as to the development of this department.

BOOK-BUYING—RECORDS AND PROCESSES

Baber, C. P. *Manual of Order Department Routine for the College and University Library*. New York: G. E. Stechert, 1929. bds. 71 mm. p. facsim. \$1.50.

"Its aim is to show minutely, by description and illustration, how the organized processes of a specifically created order department routine designed to apply exclusively to the college and university library are actually carried out in clerical technique. The routine . . . is the outgrowth of methods the author learned and made use of while he was on the staff of the order department of the University of Illinois Library, together with principles he worked out in organizing and operating the order department of the University of Oklahoma." Preface.

Russell, Harold. *The Foreign Dealer: A Study of the Booktrade*. 15 mm. p. Free on request.

By the head of the Order Department, University of Minnesota Library. Practical advice and information, with names and addresses of 100 dealers, on the purchasing of books from Australia and New Zealand, Latin America, Asia, Baltic States, Eastern Europe, Russia, Scandinavia, Ireland, the Netherlands, Belgium, Switzerland, Spain, Italy, Austria and Hungary.

CHILDREN'S READING

Willton, G. V. What children read. *Lib. World*. 32:227-229. 1930.

Result of a ballot taken at the Croydon (England) Thornton Heath Junior Library. "The thing that impressed me most when going through the voting papers for the first time was the fact that boys have a much more catholic taste in literature than girls. The average girl begins by reading fairy stories, goes straight from these to school stories, and unfortunately seems to stop there."

COLLEGE LIBRARIES. See NORMAL COLLEGE LIBRARIES; SALARIES; UNIVERSITY LIBRARY FINANCE.

COUNTY LIBRARIES

Hartwick, M. H. To be alone and not to feel alone. *Jour. of Adult Education*. 2:128-134. 1930.

Letters written from a remote section of the Montana mountains to Elizabeth B. Powell, librarian of the Missoula (Mont.) County Free Library, describing the book life of an isolated family over a period of more than ten years.

Kumlien, W. F. Equalizing library opportunities in town and country. *Iowa Lib. Quar.* 11:67-69. 1930.

The county library is recommended as the best medium to accomplish this equalization.

FINANCE. See UNIVERSITY LIBRARY FINANCE.

HALIFAX (ENGLAND) PUBLIC LIBRARY

Dealing with outlying districts. III.—Halifax. *Ln. and Book World*. 19:244. 1930.

Opened in 1882, the library now has three branches, twelve sub-branches, 46 libraries in the schools, and an annual circulation of over 600,000.

HAMPTON INSTITUTE. COLLIS P. HUNTINGTON MEMORIAL LIBRARY

Kimball, F. B. The library at Hampton Institute. *illns. Hampton, Va. Southern Workman*. 59:161-166. 1930.

The two-story addition to the original building, completed in 1904, was opened in December, 1929. The Library School, which has had quarters in Virginia Hall, occupies the east side of the second floor. In the past year 36,910 books were loaned for outside use.

HAWAII. See RURAL SCHOOL LIBRARIES, SUBHEAD HAWAII.

LEGISLATIVE REFERENCE LIBRARIES. See WISCONSIN LEGISLATIVE REFERENCE LIBRARY.

LIBRARY ASSOCIATION

Savage, E. A. A programme for the Library Association. *Lib. Assn. Record*, n. s. 8:1-13. 1930.

By the honorary secretary of the (British) Library Association. Recommends more local conferences, more attention to the small library, more endowment funds, more members, more frequent publication of the *Subject Index to Periodicals*, the issue of a monthly *Record*, a Headquarters building, the conduct of special investigations, and the strengthening of library schools.

MEDICAL LIBRARIES

Walter, F. K. The practitioner and the medical society library. Minneapolis, Minn. *Bull. of the Hennepin County Medical Society*. 1:47-49. 1930.

A small but empirically selected medical society library is often of greater direct value in practice than the larger medical school or great metropolitan society library which is used also for purposes of research. The medical periodicals which the medical society library takes and keeps should be chiefly those which stress the applications of medical theory or biological research.

MICHIGAN STATE NORMAL COLLEGE LIBRARY.

McKenny, Charles. The contribution of the library to the Michigan State Normal College. *Mich. Lib. Bull.* Special number, March, 1930.

The new library building, erected at a cost of \$250,000, was formally opened Jan. 7. It has a book capacity of 150,000 volumes, the present collection numbering about 70,000 volumes. The staff comprises Miss Genevieve M. Walton, librarian since 1892, eleven regular assistants and 58 student assistants. Fourteen pages of this special number are devoted to appreciations of Miss Walton's personality and service to the college and state.

NEGRO LIBRARIES. See HAMPTON INSTITUTE.

NORMAL COLLEGE LIBRARIES. See MICHIGAN STATE NORMAL COLLEGE LIBRARY.

ORDER DEPARTMENT. See BOOK-BUYING—RECORDS AND PROCESSES.

PENSIONS, LIBRARIANS'

Brigham, H. F., comp. Pensions for librarians in the United States and Canada. *A. L. A. Bull.* 24:106-109. 1930.

Continued from March, 1930, *Bulletin*.

PUBLIC LIBRARIES

Bostwick, A. E. Taking stock in the library business. *LIB. JOUR.* 55:359-363. 1930.

The service of the American public library, offered for the past half-century, is peculiar to it. The great body of foreign librarians are those connected with scholarly libraries. The chief characteristic of the American public library is its absence of hampering restriction and its consequently wide diffusion of service. There is a remarkable lack of allusion to the public library movement in contemporary literature, although the average American expects to find a well-conducted public library in any town he visits, just as he expects to find a school or a church. The average citizen is under the misapprehension that the library is heavily endowed by Carnegie benefactions. The belief that Mr. Carnegie insisted on exercising some kind of control over the libraries, especially in the selection of books, led to a refusal of his offers at a popular election in Albany, N. Y., Richmond, Va., and elsewhere.

MINNESOTA

Statistics of public libraries, 1929. Minn. Dept. of Ed. *Lib. Notes and News*. 9:174-175. 1930.

WISCONSIN

The American Legion community survey. *Wis. Lib. Bull.* 26:71-79. 1930.

Questionnaire worked out by a library committee of which Clarence B. Lester, secretary of the Free Library Commission, is chairman. "This survey is in no sense a competitive scoring contest between libraries. The competitive element in the survey is within the Legion, for completeness and thoroughness of the survey work and not for a comparative standing of communities. . . . We are informed that already more than half the number of posts which might be expected to be able to undertake the work are definitely enrolled, representing all sections of the State."

RURAL SCHOOL LIBRARIES

HAWAII

Lawrence, M. S. Library fits and misfits in rural schools of Hawaii. illus. *School Life*. 15:152-154. 1930.

Each county has a school librarian who visits the schools and gives them as much personal service as possible. The stations department of the Library of Hawaii handles the county work for the city and county of Honolulu, serving all rural schools and also sending collections to city schools in Honolulu.

SALARIES

A. L. A. Committee on Salaries, Insurance and Annuities, comp. Salary statistics: small college libraries. *A. L. A. Bull.* 24:109-111. 1930.

Thirty of the 53 replies report the librarian as having full professional rank while the 53 libraries maintain a salary average for the librarian of \$2,028, a lower average than shown in the 40 replies of last year.

SCHOOL LIBRARIES

Hunt, Nell. *Library Books for the Elementary Schools*. Oklahoma City: Oklahoma State Dept. of Ed., 1930. pap. 40p. (Bull. no. 31-A).

Divided into three groups, primary, intermediate and advanced.

Pine, E. H. The organization and administration of libraries in practice schools. *LIB. JOUR.* 55:356-359. 1930.

Checks the conditions in 16 practice school libraries against the A. L. A. standards for the planning of a school library.

The January-March, 1930, issue of the *Library-Occurrent*, issued by the Library Division of the Indiana Library and Historical Dept., has short signed articles on school libraries, and reports from county libraries which furnish service to schools, as well as from individual school libraries. (9:172-204. 1930).

SEATTLE (WASH.) PUBLIC LIBRARY

A Ten-Year Program for the Seattle Public Library. Seattle, Wash.: The Library, 1930. bds. 88p. illus.

Summarized in *LIB. JOUR.* 55:422-423. The program contemplates an enlarged central building, more branches, increased income, a pension system, a municipal reference branch, more service to school libraries and increased endowment funds.

SURVEYS, LIBRARY. See PUBLIC LIBRARIES, SUBHEAD WISCONSIN; SEATTLE (WASH.) PUBLIC LIBRARY.

UNIVERSITY LIBRARY FINANCE

Flack, G. E. University library finance. graphs. tables. *Lib. Assn. Record*. n. s. 8:14-28. 1930.

By the sub-librarian of the University of Birmingham. He regards an annual expenditure of 3.5 per cent of the total University expenditure as the absolute minimum necessary for the maintenance of an efficient university library. As one way of subdividing the 55.5 per cent of library expenditure allocated for books he suggests the expenditure of 30 per cent for Arts (covering law, music, commerce, theology and education in addition to the usual subjects); 30 per cent for Science (including technology) and 28 per cent for medicine.

VACATION READING

Davendorf, G. N. Special collections for summer camps. illus. *LIB. JOUR.* 55:354-355. 1930.

The Schenectady (N. Y.) Public Library has sent books to the following summer camps: Boy Scouts, Girl Scouts, Y. M. C. A., Y. W. C. A., Red Cross, Children's Home and the General Electric Women's Camp at Lake George.

Lambright, B. V. Tours through books. *LIB. JOUR.* 55:347-348. 1930.

Describes a round-the-world reading course undertaken by the children of the Little Rock (Ark.) public schools.

Leslie, Eva. Traveling by way of books. illus. *LIB. JOUR.* 55:350-352. 1930.

At the Los Angeles (Cal.) Public Library, the reading of lists of books printed on library passports led to the organization of an International Relations Club which still meets at regular intervals in the children's room of a branch library.

Oliphant, A. F. A world cruise. map. *LIB. JOUR.* 55:349. 1930.

At the Rice Branch, Cleveland (Ohio) Public Library, lists of travel books were printed on passports of various colors for three school grades of children.

Pillsbury, A. M. The Millicent Library book tour. illus. *LIB. JOUR.* 55:343-347. 1930.

The Millicent Library at Fairhaven, Mass., conducted an elaborate reading contest during the summer of 1929. Travel books read were punched on the child's ticket, and colored pins placed on a chart after his name when a review of the book had been written.

WALTON, GENEVIEVE M. See MICHIGAN STATE NORMAL COLLEGE LIBRARY.

WISCONSIN LEGISLATIVE REFERENCE LIBRARY

Witte, E. E. A law making laboratory. illus. por. Denver, Colo. *State Government*. 3:3-10. 1930.

The Library, in continuous existence since 1901, is a division of the Free Library Commission. It has a collection of 75,000 cataloged pieces of material, a staff of eleven, and a two-year appropriation of \$44,250. In the 1929 session every member of each house made use of its bill-drafting service.

Ohio Valley Regional Group of Catalogers

THE OHIO Valley Regional Group of Catalogers held a luncheon meeting at the Propylæum, Indianapolis, April 12, 1930, at which fifty-seven librarians attended. Following the luncheon, Miss Helen Guhman of Cincinnati talked on "Catalog Helps and Tools," in which she mentioned bibliographic aids to use with cataloging modern publications from the United States and foreign countries. Miss Ruth Wallace, Indianapolis Public Library, talked on "Cataloging Costs and Ways They May Be Reduced," suggesting that as much work as possible be given to typists and pages, and mentioning the L. C. Smith channel platen and the electric eraser. Miss Jane Errett of Dayton Public Library told her "Recollections of the Washington Conference." The group then divided into two parts, Miss Ruth Line, Indianapolis Public Library, leading the discussion with the catalogers from large public libraries, and Miss Edna Wells, Indiana University Library, the group from college and university libraries. The following officers were elected for the year: President, Mrs. Verna Pate, Indianapolis Public Library; Secretary-Treasurer, Miss Jane Errett, Dayton Public Library.

Library Organizations

Proposed Librarians' Country Club at Lake Placid

THE JOINT meetings of the American Library Institute, New Jersey Library Association, and the Pennsylvania Library Club at Atlantic City, May 4, were attended by nineteen members of the Institute. President Koopman opened the Institute meeting with a description and translation of a poem addressed by Milton to John Rouse, Librarian of the Bodleian Library (the original is the last of Milton's *Sylvarum Liber*).

Dr. Hill's "The Librarian's Retirement Problem" (a continuation of his paper at the Stockbridge meeting) quoted extracts from correspondence which he had received on the subject. He gave the full text of a description by Dr. Dewey of the advantages which the Lake Placid Club hopes to make available for librarians and teachers—a Librarians' and Teachers' Country Club, renovated farmhouses to be let at maintenance cost, and with opportunities for gardening and free access to the general privileges and facilities of the Lake Placid Club. The prospects as suggested in Dr. Dewey's letter were so alluring that it was resolved to appoint a committee, with Mr. Brigham as chairman, to devote special study to the plan. (The committee as later constituted consists of Messrs. Brigham, Hill and Wheeler.)

Dr. Wallace's discussion of "University Publications and Library Exchanges" summed up the comparative gain and cost to the university (and the library), both financial and intellectual. His inclination to favor the issue and exchange of university publications was based, not on the doubtful gain to the library from exchanges, but on the benefits to the scholarly activity and prestige of the university from research publications.

Mr. Brigham's paper, "Librarianship as a Stepping Stone," presented a number of interesting instances of the attraction of librarians into larger administrative positions. Several of the earlier examples were college librarians who became college presidents, but the movement at the present time is chiefly among business and special librarians who are promoted to higher positions in their respective companies.

Mr. Keogh, at the president's request, described some of the activity of early college librarians as depicted on panels in the Stirling Library.

Dr. Van Hoesen's "Defense of Book-Begging" attempted to show, by history and sta-

tistics, that libraries in general, and university libraries in particular, owed their foundation, present maintenance and future growth very largely to private beneficence. "Some one has to give us our books," and the community of objective, between libraries and bookmen, in the increase of the use of books, makes the publisher "fair game" for the library—that is, in case of a very specific need and insufficient funds. Mr. Melcher, who was to have discussed "Book-Begging" from the publisher's point of view, was unable to attend the meeting.

Mr. Belden's place on the program was taken by Mr. Johnston, who read some "Resolutions on Inter-Library Cooperation" which had been submitted to the Association of Transportation Libraries. The plan advocates "five general and all embracing collections"; further, in addition, a definition of fields of interest of collection by sectional or specialized libraries, the revision of the *Catalogue of Books on Railway Economics* (1912), liberal inter-library loan policies, piece-for-piece exchange of duplicates through the Bureau of Railway Economics as clearing-house, etc.

Dr. Adams's paper (read by the secretary in the author's absence) gave examples of the loss and mutilation of books which have remained indispensable but have become irreplaceable. Dr. Adams advocated, however, not the ejection of the reader but a scrutiny of his need of such books and his fitness to be trusted with them. In the following discussion Dr. Koopman described the practice at Brown University of keeping early books in a special chronological series and of safeguarding the completeness of fine "sets" of standard authors. Mr. Fitzgerald mentioned the desirability of keeping periodical sets complete and of preserving duplicate volumes for replacement stock.

Library Section of N.C.E.A. Meets

THE FIRST Eastern Regional Conference of the Library Section of the National Catholic Educational Association met at the Fordham University Library on April 22. Among the speakers were Francis E. Fitzgerald, Librarian of St. Thomas College, Scranton, Pa., who discussed *The Catholic Periodical Index*; Rev. Walter J. Coleman, Librarian, Maryknoll Seminary, who gave a paper on "Seminary Libraries"; Emma V. Baldwin, Baker & Taylor, New York City, who talked on "Buying Books for Libraries"; and Ernest J. Reece, School of Library Science, Columbia University, whose address was "Education for Librarianship."

Among Librarians

School Supervisor and Librarian Emeritus Die

MARION LOVIS, Supervisor of the Detroit public school library system, died April 21 of heart disease. She was a graduate of Simmons College and went to Detroit in 1922 as a librarian in the Hutchins Intermediate School, where she remained until 1924, when she was transferred to the Supervisor Department of the Detroit Board of Education as Supervisor of School Libraries. She has taught two summer sessions at Columbia and one at Drexel Library School. She was interested not only in the Detroit school libraries and their progress but in the advancement of school libraries throughout the United States.

CHARLES S. GREEN, Librarian of the Oakland Free Library, California, from 1899 through 1926, and Librarian Emeritus since then, died on May 7. A complete biography of Mr. Green will be found in *THE LIBRARY JOURNAL* of May 1, 1930.

Public Libraries

WILLIAM H. KETLER has completed his twenty-fifth year of service as Librarian of the Camden, N. J., Free Public Library. A testimonial dinner was given for him on April 22.

HAZEL F. KING, Drexel '27, has received the appointment of library assistant in the Passaic Public Library, Pennsylvania.

WALTHER KOENIG recently retired as Assistant Chief of the Catalog Division at the Library of Congress after thirty years of service.

ANNA McLAUGHLIN has recently accepted the position of librarian in the Proctor Free Library, Vermont.

MISS DES MARAIS, formerly librarian in the Rutland Free Library, Vermont, has now been appointed librarian in the West Rutland Public Library, Vermont.

College and University Libraries

MARY LOUISE DINWIDDIE, Assistant Librarian at the University of Virginia, has received from Governor Pollard appointment as a delegate to represent the Commonwealth of Virginia at the Los Angeles Conference in June.

DELLA FORREST, Michigan '28, formerly cataloger in the Oberlin College Library, is now supervisor in the Catalog Department of the University of Michigan Library.

LORENA GARLOCH, Michigan '28, has resigned her position as cataloger at Oberlin College Library to become head of the Order Department in the University of Pittsburgh.

KATHARINE HARRIS, Michigan '27, has resigned as reference librarian of the Michigan State College to accept the position of assistant librarian in the Pontiac Public Library, Michigan.

ANNE JENSEN, assistant librarian, Eureka College Library, Illinois, has been appointed assistant librarian of the American University Library, Washington, D. C.

Miscellaneous

CLARA E. HOWARD, Director of the Library School, New Jersey College for Women, has been appointed Dean of the Atlanta Library School and will assume her new duties in the fall.

JOHN F. LYONS, Librarian of the Presbyterian Theological Seminary at Chicago, has recently been given the rank of full professor with the title of Professor of Bibliography.

LOIS TULLIS, St. Louis '26, has become assistant librarian in the Principia School Library, St. Louis, Mo.

MR. VAGO, architect of the League of Nations Library, from Hungary, is visiting libraries in the United States.

RUTH WALL, formerly in the library of the Wisconsin Telephone Company of Milwaukee, is now in the library of Business Week, McGraw-Hill Publishing Company.

Sixty Educational Books of 1929

A LIST of "Sixty Educational Books of 1929," prepared by Joseph L. Wheeler, Librarian of the Enoch Pratt Free Library in Baltimore, with the assistance of Grace A. Kramer of the Bureau of Research of the Baltimore public schools, and associate editor of *The Baltimore Bulletin of Education*, is given in the April issue of *The Journal of the National Education Association*.

Brooklyn Public Library Election

THE BROOKLYN PUBLIC LIBRARY problem was resolved April 29 at a special session of the Library Board by a close victory, 11 to 9, in favor of a trained librarian as against a local candidate, resulting in the election of State Librarian Ferguson of California to succeed Dr. Hill on October 1. The Library Board consists of twenty-two trustees with the addition ex-officio of the Mayor, Comptroller and Borough President, rarely present or represented at board meetings. The special session brought together 22 out of the 25, the largest meeting on record. It was attended by the new Borough President Mr. Hesterberg, Deputy Comptroller Philbin and the new member, Edward W. McMahon, appointed by the Mayor to succeed as trustee the late David A. Boody and sworn in that morning in time for the meeting. The local candidate, not originally suggested by "the organization" but adopted and vigorously pressed by its leader, was ex-Sheriff and Park Commissioner John Harmon, now connected with the *Brooklyn Times*, thoroughly well spoken of by the many members of the board who knew him as of executive ability and agreeable personality. The issue was thus clearly made between trained librarianship and local political relationship and the victory was an important advantage for and prevented a serious blow at the library profession. The chair was occupied by Hon. Edwin L. Garvin, a graduate of New York University, for eight years a Federal Judge by appointment of President Wilson, elected previous to the vote on the librarianship to succeed as President the late President Boody. He held an even and just balance in the chair and at the close of the meeting declared himself, though in close relation with the leader of "the organization," in favor of a trained librarian and felt himself justified in saying that the librarian-elect would have the friendly support of the municipal authorities and not least that of the new Borough President, in whose hands is the completion of the central library building. His address appealed for and produced harmony throughout the membership of the board and opened the way for a successful epoch of progress in the library's development in succession to Dr. Hill's successful administration of nearly thirty years.

President Garvin attended the staff meeting on Thursday morning and met with a cordial reception. He gave assurance that he would do his utmost to promote the welfare of the library and particularly the provision of the Central Library building. It is especially hoped

that he will impress the municipal authorities. He needs especially to impress the borough authorities with the necessity, while the rest of the great structure is under way, of completing the west wing in which an investment of nearly a million dollars has remained unused and therefore wasted for years to house the great reference library developed from that of the old Brooklyn Library and begin the wider extension of library features which its central library makes possible.

MILTON J. FERGUSON, chosen to succeed Frank P. Hill as Chief Librarian of the Brooklyn Public Library, has been State Librarian of California since 1917, Assistant Librarian of the California State Library for ten years prior and was Librarian of the Oklahoma State University for five years. He was born in Hubbardstown, W. Va., and graduated in 1901 from the University of Oklahoma, receiving the degree of A. M. in 1906, and a certificate from the New York Library School at Albany in 1902. In 1912 he was admitted to the California bar and during the World War was the California representative of Library War Service. In 1923, while President of the League of Library Commissions, he made a survey of Louisiana and it was chosen as the three-year test state for the development of library work under a grant from the Carnegie Corporation. In 1928 he was chosen by the Carnegie Corporation to spend a year studying library conditions in South Africa, along with S. A. Pitt of Glasgow, the results of which survey were published in the *LIBRARY JOURNAL* for Sept 1, 1929. The county library plan in California was established in 1911 with the passing of the county library legislation, but it has been developed by Mr. Ferguson, through State Library cooperation and employment of organizers to further county library organization, until now fifty-eight counties have library service. Mr. Ferguson has held the offices of President of the California Library Association, President of the National Association of State Libraries, Chairman of the State Board of Library Examiners, President of the League of Library Commissions, and member of the A. L. A. Executive Board. He is one of the country's eminent and distinguished librarians and the library profession expect from him a most successful administration.

Opportunities

This column is open to librarians

Wanted—Trained and experienced children's librarian for normal school on Pacific Coast. E-22.

Wanted—College and library school graduate with good knowledge of books by Middle West library for reference work and desk supervision. E-19.

Wanted—Senior cataloger for eastern university law school library July 1. College graduate, library school or equivalent training. State full details of education, including languages, positions held, salary required. E-14.

Wanted—Assistant with college and library school training. Must be good cataloger and work well with others. Age under 35. Apply direct to Dorothy Manks, Massachusetts Horticultural Society, Boston.

Young woman, college and library school graduate, with six years' experience in college libraries, liberal arts and teachers' college, desires position for the summer. Available June 1. X-22.

Summer position wanted by a college graduate with two years' teaching experience, two years' library training in high school and two years as assistant librarian in a college library. E-21.

Woman with university degree, one year of library school and some experience would like librarianship or organizing work in the Southeast. E-13.

Library school graduate with several years' experience in college library work desires position in East beginning Sept. 1. Prefers cataloging, organizing or reference work. E-15.

College and library school graduate, with two years' experience as college librarian and several years' experience teaching in high schools, desires position as librarian of a college or large high school library in the East. E-16.

College and library school graduate with five years' experience in college library desires change. Available after Sept. 1. E-17.

College librarian with wide experience in college and public libraries desires position with professional and financial future in or near eastern city. College and library school graduate. E-18.

Technical librarian, college man with excellent experience, desires position as librarian of a mechanical and agricultural college or as head of industrial department of a large city library. E-20.

High school librarian with three years' special library experience available after June 22. E-23.

Young woman, college graduate and summer library course, with four years' experience, desires position as library assistant. E-25.

Junior high school librarian desires position for July and August. College graduate with library school training and teaching experience. E-11.

Subscription Books Bulletin

Quarterly—\$1.00 per year

Unbiased reviews of books and sets sold to libraries, homes, and schools by publishers' personal representatives.

Judges each work for accuracy, reliability, arrangement, availability of material elsewhere, general usefulness, clearness of presentation, illustrations, indexes, etc., giving strong and weak points and comparing sets with others of similar content or subject matter.

A reliable source of information which makes it possible to select the best from the many offerings of canvassing agents—bulky volumes and sets which cannot be evaluated hastily. About 25 such works have been reviewed in the first two issues.

A worthwhile investment at \$1 per year.

American Library Association
520 N. Michigan Avenue
Chicago, Illinois

A Few Comments

I am so delighted with the *Subscription Books Bulletin* that I must send at once a note, both of congratulation and thanks.

—State Librarian.

The very day *Subscription Books Bulletin* was received it began its service. A call for information about a one volume reference work could not have been answered without it.

—High School Librarian.

A small library, with not much money needs just such information.

—Public Librarian.

We are more than pleased with *Subscription Books Bulletin* and are not satisfied with a single copy. Kindly enter three additional subscriptions.

—Public Librarian.

I have gone over the *Subscription Books Bulletin* and am more than pleased with the first number. . . . My congratulations to the A. L. A. for this splendid work.

—Public Librarian.

I have never met with a small publication which promises more of real needed service to such workers as I. I am certainly very anxious not to miss a single issue.

—A. & M. College Librarian.

The A. L. A. should be congratulated on the publication of *Subscription Books Bulletin*. It is a fine thing to get a line on these subscription works which is impartial.

—College Librarian.

The *Subscription Books Bulletin* commends itself to us as of such value that we wish to enter three more subscriptions.

—Public Librarian.

The Picture Map of the Holy Land

Designed by Harold Haven Brown

The caravan trails of ancient and modern times, the modern railroads, the route of the Israelites from Egypt to Canaan, the regions occupied by the Phoenicians, Philistines, Moabites and other neighbors of the Israelites, the principal cities are all represented in unique methods. Notes concerning significant events are given close to the places where these events occurred.

Four insets are added, Jerusalem and its environments, Jerusalem alone, a relief map of Palestine, and a profile map of Palestine.

Size about 22 x 32 inches. Eight colors. Price \$2.50

Colson Book Trucks

Model
6113

Being extremely quiet running, strong, and economical, Colson Book Trucks are ideally adapted to library conditions. They are of exactly the right height for checking and delivery desks, and for quick loading and unloading at shelves.

Model 6113, illustrated, is built of steel, finished in sage green, and blends well with library interiors. The ball-bearing, rubber-tired casters are characteristically quiet. This truck pushes very easily and affords a surprising amount of storage space.

Write for full information on the complete Colson line of trucks and casters.

Forthcoming Issues of THE LIBRARY JOURNAL

✿ The June fifteenth issue—a special Coast Number—has scheduled six most interesting articles on different phases of library work in California, Portland, Oregon, and British Columbia; a page of pictures of coast librarians; and information about eating places in Los Angeles and trips and bus service out of Los Angeles. Eight hundred copies of this issue will be distributed at the Conference.

✿ There is only one issue of the JOURNAL in July, but this will cover as much material on the Conference as possible. Doctor Keogh's presidential address will be printed in full, reports of the general sessions and a picture of the new A.L.A. president will be given. The reports of the round tables and sections will be left over for the August number.

✿ The Fall holds the promise of special numbers on Publicity, County Libraries, Children's Book Week, and many forthcoming general articles of interest.

We design book-storage systems that are practical and workable . . . Every detail is taken into consideration by our Plan Department.

A Snead Bookstack installation is more than steel bookshelving. A Snead Bookstack installation means that the heating and ventilating of the stack room has been studied, so that the temperature and humidity which are best for preserving the books, may be maintained. Present and future needs of the library are studied. Elevators, book-lifts, book conveyors, study compartments, lighting arrangements and fixtures, special provision for rare volumes are all necessary in large library installations, while in smaller private libraries only one or two free standing bookstacks, together with card files, are necessary. We can aid you in planning for all these.

The Government and the Libraries

By L. F. Schmeckebier

Institute for Government Research, Washington, D. C.

IT is not necessary to describe in detail the relations of the government to the libraries, but I shall briefly call attention to existing conditions before discussing any modifications. There are two distinct problems involved in the relation of the government to the libraries, namely, the assistance that the government may extend as an aid to the libraries in their work, and the distribution of books to libraries without waste.

We shall first consider what the government may do to help the libraries. *The Weekly List* gives prompt notice of all new publications of importance. *The Monthly Catalog* covers all publications, and is issued as early as can be expected. An index to each monthly issue would be of assistance, but its preparation and printing would delay the publication of the catalog, and there is doubt whether the added usefulness would justify the delay. The annual index to *The Monthly Catalog* is well done, but it is to be hoped that it can be issued earlier. The government is doing about all that can be reasonably expected in the field of current information on printed publications.

There is, however, one field in which additional current assistance may be afforded—the listing of mimeograph material. I believe that nobody knows how much mimeograph material is being issued, as its production and distribution are not centralized. Owing to an erroneous belief in high quarters that there is too much printing, Congress has been loath to vote appropriations for printing, although it has

granted large sums for investigations whose results can be adequately made known only by means of printed reports. The consequence is that there is a veritable flood of mimeographed material ranging from a single page press release to stitched pamphlets of several hundred pages. There is no listing of this material except by the Department of Agriculture. The librarian is in blissful ignorance of its existence until a reader requests it. Then the description is generally so indefinite that the poor librarian does not know where to apply for it. The obvious remedy for this condition is to print more and mimeograph less, but until that is attained, the next best thing is to have the Superintendent of Documents list in *The Monthly Catalog* all material that is not of an ephemeral character. The recommendation is easily made, but its accomplishment is another matter. Even if the Superintendent of Documents can see his way clear to list the material, he must first have it in his possession. To accomplish this would require concerted action by the heads of the several departments and independent establishments or an executive order by the President.

Other things that might be done include the publication of an index to the old check list, a supplement bringing it to date, and additional supplements at regular intervals. Time and money might well be spent on topical catalogs and indexes. All these projects are largely academic until the *Biennial Document Catalog* is brought to date. They should be borne in mind, however, and should be urged in any plan for the activities of the Documents Office.

Paper presented at the Public Documents Round Table, A. L. A., Washington, D. C.

In the matter of the biennial catalog, the situation is indeed deplorable. That compilation is now almost ten years in arrears. I do not know of anything better that can be done by members of the American Library Association than to write to the members of Congress, and particularly to members of the committees on appropriations, urging increased appropriations for the Office of the Superintendent of Documents in order to bring this work to date. At present the Superintendent of Documents has no office space for additional personnel if he had the money to employ them. However, by the time another appropriation bill is passed, the addition to the Government Printing Office will probably be completed, and additional space will be available. In the matter of publications that should be made available, there should be added the hearings before committees of Congress and the reports of the Supreme Court of the United States.

There are two mechanical means by which the government may aid the libraries without adding to the burden of the Superintendent of Documents. One is to place substantial paper covers of good quality on all unbound publications of more than eight pages. This will preserve the publications as well as facilitate their shelving. Another feature that would be of particular value to the small library is that catalog cards be sent with the publication. This will enable the librarian to catalog the book immediately. It is understood that the Library of Congress catalog cards are not available for some weeks after the publication is printed.

It has been suggested that a special library service be organized. An additional unit outside the Office of the Superintendent of Documents is entirely unnecessary, and would result in duplication and confusion. It hardly seems necessary to create by law a separate unit in the Documents Office. The desired end will be attained if personnel is provided and the Superintendent of Documents is allowed to arrange his administrative units to fit conditions.

The Documents Office appears to be giving all necessary service to librarians. Publications are mailed promptly as issued, and when requested information is given regarding the many confusing points that arise regarding classification and other matters. Existing lists are adequate and are published promptly. Any librarian of intelligence and with a reasonable knowledge of government publications should be able to select the issues desired. In fact, the selection of government publications from lists is far easier than the selection of commercial publications. Whatever defects there may be in the publications of the departments,

it can generally be assumed that they are authoritative and represent a definite contribution to knowledge within the field indicated by the title. In the case of commercially printed books, the person reading a list is always in doubt whether a particular book contains new material or is simply a rehash of earlier, and sometimes better, works.

The success of certain of the war organizations in interesting libraries in their literature is occasionally cited as an argument for a special library service. But it should be borne in mind that in regard to publications each war organization dealt largely with propaganda within its own limited field. It was a comparatively simple matter to point out the significance of each publication. Moreover, many of the publications of the war boards were printed elsewhere than at the Government Printing Office, were not available to the Documents Office for listing in *The Monthly Catalog*, and were not distributed to depository libraries, owing to the confusion incident to the war and the ignorance of the general printing laws on the part of the officers of the boards. The war boards undertook a task that would have been unnecessary had their publication work gone through the regular channels.

The field of government publications is not such a simple one that it can be turned over to an untrained assistant. However, existing lists and manuals supply the sign posts which enable an assistant of intelligence and training to find the way. A library with an adequate subject, author, and title catalog will have little difficulty. If, however, the classification of government publications is by issuing offices, it is necessary for the librarian to have some knowledge of government organization. An untrained clerk could hardly be expected to know that publications on health should be sought among the issues of the Treasury and Labor Departments, that sailing directions for domestic waters are issued by the Department of Commerce, and similar publications for foreign waters are published by the Navy. But a careful and intelligent perusal of *The Monthly Catalog* would disclose these facts, as the several publications are listed under the names of the publishing offices.

It is not within the province of the Superintendent of Documents to outline the duties of the several departments and bureaus. That information is available elsewhere for those who need it. The sole function of the Office of the Superintendent should be to distribute publications, to issue finding lists, and to assist librarians and individuals in locating the material desired. It appears to be doing this work

satisfactorily; the matter that requires attention is to see that the personnel is adequate to continue to handle expeditiously the increasing volume of work.

We now come to the question of the distribution of books; you are familiar with the general methods employed. I shall not take time to rehearse the details, but there are some features that deserve attention. There is at present a library distribution by the Superintendent of Documents and by the several departments or bureaus to depository libraries. The depository distribution is rigidly controlled by law, while the departmental sendings are largely within the discretion of the publishing offices. With the exception of the State libraries and the land grant colleges, the depository libraries are designated by Senators and Representatives, therefore the depository distribution is essentially on a population basis.

It is evident that population affords no true base for library distribution, as library development is the result of all the social and economic forces at work in the community. The number of persons per library of 1000 volumes or more ranges from 2331 in New Hampshire to 48,678 in Louisiana, there being 192 libraries in New Hampshire for a population of 447,592, compared with 38 libraries in Louisiana for a population of 1,849,746. Thus, outside of the State libraries and land grant colleges, New Hampshire is entitled to four depositories and Louisiana to ten. In New Hampshire one library in 48 may be a depository, but in Louisiana one in four may have this privilege. The fact that 531 depositories may be designated by Senators and Representatives by existing law, while only 361 designations are in effect might lead to the conclusion that there is no necessity for increasing the number. The margin between the number authorized and the number designated is probably due in part to the designation of libraries on the population basis and in part to the fact that many libraries received government publications from departmental mailing lists.

All Congressional designations are filled in nine States—California, Colorado, Iowa, Montana, New Hampshire, New Mexico, Ohio, South Dakota, and Utah. No Congressional designations are in effect in two States—Nevada and Wyoming. In the other States the ratio of vacancies ranges from 10 per cent in Kansas to 80 per cent in Mississippi, the number of vacancies varying from one in eight States (Connecticut, Delaware, Kansas, Maine, North Dakota, Oregon, Vermont, and Washington) to twenty in New York.

The present distribution of depositories is defective because some important centers have

no depositories, and in some States the depositories are not well distributed. Thus, there is no depository at Springfield, Mass., but there are two at Amherst—the Massachusetts Agricultural College and Amherst College. Notwithstanding the fact that there are seven vacancies among the depositories of Massachusetts, the Springfield Library cannot be designated, as the designations must be made by districts. In Vermont all the depositories are in the northern part of the State, the southernmost being a college at Middlebury. In Wyoming the two depositories are close together in the southeast corner. Neither is a general public library, one being the State library at Cheyenne and the other the University of Wyoming Library at Laramie.

The designation of depositories under the present system is a failure because it is almost entirely based on population, which is not a guide to the necessity for depository designations. Furthermore, an examination of the list of depositories discloses the fact that Senators and Representatives do not always use good judgment in the selection of the institutions. It is evident that personal or political influence plays a part, and that institutions of minor importance are often designated. No data are available regarding the distribution made directly on the order of the departments, but it is probably safe to say that it is extensive, and perhaps greater than the depository distribution. There is no question that libraries offer an excellent method of making government publications available to many persons, but if publications are sent automatically without request on the part of the recipient, there is a tendency for some librarians to acquire books regardless of whether they are useful to their readers.

We must all recognize that libraries, like all other institutions, vary in usefulness and efficiency. There is also a wide difference in the method of handling government publications; some catalog and classify properly, but it is reported that in others government publications are merely lumped without cataloging, and the only classification is the series. The physical form of the publications adds to the difficulty; most are unbound; some have paper covers; other fair-sized books are wire-stitched and without covers, with the result that the first and last pages are torn off unless the pamphlet is placed in a binder. How should the distribution be regulated in order to avoid waste? Should each library be allowed to become a recipient of any class of publication it selects? How can the government tell whether the publications are properly shelved and cataloged, or whether they are piled in

an obscure place and eventually sold for waste paper? To what extent should universities and colleges be allowed to become depositories? These are baffling and perplexing questions.

In the first place, I believe that the distribution to libraries by the separate departments should be discontinued and that the entire library distribution should be made by the Superintendent of Documents. I might add in passing that the departments should not as a rule distribute any publications free of charge, and that the general public should obtain publications by purchase from the Superintendent of Documents.

One reason for centralizing the designation of libraries is the desirability of ascertaining the number of libraries receiving publications and the cost of this service. At present it is practically impossible to obtain any data on the extent of library distribution by the departments. If we are to have only one distribution to libraries, what limit shall be established. A bill (S. 725) introduced in the present Congress proposes a maximum of 2000 libraries. While the provisions of this bill do not restrict the departmental distribution, I think the number is far too high. I propose that the maximum number of libraries be placed at 1500, but that not more than 1000 copies of each book be distributed. The smaller number of books is based on the theory that all the libraries will not want the same book. At times 1000 books will not be sufficient, and some of the librarians will have to purchase publications.

In order to make an adequate and fair distribution, it is recommended that the libraries be divided into the three following classes: (1) Twenty central depositories, which shall agree to keep two copies of each publication. (2) Five hundred general depositories, which shall have the privilege of selecting in advance the classes of publications to be received. (3) One thousand restricted depositories, which shall be entitled to receive publications on application within three months after the issuance of *The Monthly Catalog*, in which the books are listed.

The twenty central depositories in class one are designated to make government publications available in all parts of the United States.¹ These depositories should agree to keep a complete file of two copies of each publication—one to remain in the library for reference purposes, and one to be sent to other libraries, as requested for use by its patrons. With twenty

central depositories any library within the territory of a central depository should be able to receive a book within forty-eight hours. The central depositories should be allowed to circulate government publications free of postage under the penalty label. In consideration of the service rendered to the government, each central depository should be paid a reasonable compensation. In view of the shelf space required for duplicate copies of all publications, and the labor of mailing and charging publications, only a strong institution could undertake this service. It is doubtful whether Congress would appropriate sufficient funds to interest the libraries. The proposal might be classed as desirable but not feasible.

The second class—the general depository libraries, of which there would be 500—would receive books in the same manner as existing depositories. They would select the books by classes in advance and receive them as soon as issued. Only two classes of libraries should be entitled to be general depositories, namely, public libraries and university libraries. The class “public libraries” should include only such libraries as are known to be open to all persons without restriction for at least forty-eight hours a week. It should not include libraries maintained by subscription or libraries operated primarily for the benefit of a small group, even though the collection may be available on special application. The classification “university libraries” should include only universities where graduate research work is undertaken. There should be excluded institutions which are universities in name only, but which in fact are colleges, and libraries of colleges and of all educational institutions of a lower grade than a college. There are many colleges on the present list and a few high schools and normal schools. The land grant colleges should be omitted, as there appears to be no reason why they should be singled out from other institutions.

The omission of educational institutions lower than the university is predicated on the assumption that depository libraries are maintained in order to make government publications available for the use of the general public. It is assumed that it is not their purpose to furnish collateral reading for undergraduates or to provide desirable books which instructors may use in the preparation of their courses. If government publications are needed for these purposes, they should be purchased the same as other books. From the beginning the depository laws have emphasized the feature of public use, which is not attained through a college library. Doubtless the casual visitor without special credentials would obtain

¹In 1922, Mr. George F. Winchester, Librarian of the Paterson Public Library, suggested that a depository for loaning books be established in the capitol of each State. *LIBRARY JOURNAL*, 47:1067, December 15, 1922.

service at a college library, but few persons not connected with a college would think of availing themselves of the facilities of such an institution.

Some of these objections might be urged against university libraries, but their inclusion is advocated as important research work carried on by students and members of the faculty, and the facilities of university libraries are generally known to be available to serious investigators. If it is deemed desirable to subsidize scholastic education to the extent of allowing the colleges to select government publications for their libraries, that purpose should be frankly recognized in the law. There should be set up another class of depositories known as "educational depositories," so that the distribution and the cost will be a matter of separate record.

State libraries, as a rule, should be omitted, except perhaps a few which are well organized and have extensive collections. The State libraries should be on a special list for slip laws, session laws, statutes at large, decisions of the Supreme Court, and all publications dealing in any way with the particular State.

In only the large centers having well known libraries should there be more than one depository. In Chicago there are now five depositories: The University of Chicago, the John Crerar Library, the Newberry Library, the Public Library and St. Ignatius High School. The three general libraries and the university library should be continued, but the high school library should be eliminated. In Helena, Mont., there are two depositories—the Public Library and the historical society. The Public Library should offer sufficient facilities in a city of this size. In July, 1928, there were 111 cities having public libraries in which the depository was not the public library. In a few of these the depository was a university library, but in the greater number it was a college library. In eight States not a public library is listed as a depository. In the designation of depositories geographic location should be taken into account, and so far as possible the depositories should be in easily accessible centers and should be fairly well scattered over each State.

The following additional limitations are also suggested for general depositories: (1). The library shall have at least 15,000 volumes. (2). It should have an annual budget for personal services of at least a specified amount which it is suggested be fixed at \$5,000 per annum. (3). It shall agree promptly to catalog and shelve all publications retained. (4). It shall agree that publications received and not cataloged and shelved shall be returned

promptly to the Superintendent of Documents; and that all publications in good condition withdrawn from shelves shall be returned.

The size and budget requirements are placed at a low figure, as there are many small libraries which do excellent work. The requirement to catalog and shelve needs no comment, as this work is essential to adequate library administration. The provision that publications not utilized shall be returned promptly arises from the fact that the selection is made by series, and one series may contain publications of no value to many libraries.

There is grave doubt whether selection in advance by series, as is the present practice, is desirable. Series are not homogeneous, and at times no doubt the entire series is ordered with a view to obtaining a few publications that are of interest. The inevitably results in waste. It is worth considering whether all libraries, except the central depositories, should not be required to order publications with the exception of periodicals, from the weekly and monthly lists published by the Superintendent of Documents. This would give the libraries the work of making the selections, and the publications would be on a par with commercially printed books.

The third class, restricted depositories, should be required to request the books after publication. The following limitations are suggested for restricted depositories. (1). The library shall have at least 5000 volumes. (2) It must be open at least 24 hours a week. (3). It should have an annual budget for personal services of at least a specified amount, which it is suggested be fixed at \$2,000. (4). It shall agree promptly to catalog and shelve all publications retained. (5). Publications in serviceable condition withdrawn from shelves shall be returned to the Superintendent of Documents.

The plan outlined above provides for 1000 books for 1520 depositories. This number is believed to be sufficient as not all the depositories will want the same books. It is possible that at times some of the restricted depositories will not be able to obtain a publication because the supply will be exhausted. This can be prevented only by printing a copy for each depository, which will undoubtedly result in waste. All requests from restricted depositories should be filled in the order in which received. The requirement of ordering books should not be burdensome. Commercially printed books must be obtained through a formal order, and there seems to be no reason why this procedure should not be followed in the case of government publications. At the

end of three months after the libraries receive notice, all publications not requested by depositories should be transferred to the sale stock.

The plan recommended above will cost more than the present one, as it provides for a more liberal distribution. It will, however, cost less than the pending bill providing for 2000 depositories. While the cost of depository distribution as such will be increased, it is doubtful whether the total cost will be greater, as the plan contemplates the discontinuance of library distribution by the several departments. The distribution to restricted depositories after request will result in more work in the Office of the Superintendent of Documents than if the classes were selected in advance, but it is believed that the total cost will be less than an automatic distribution under the selective plan. The proposed plan, like the existing system, is defective in that it makes no allowance for changing economic and social conditions, which will make additional designations desirable. If all the designations should be filled in the near future, it will be impossible to add additional institutions.

There appear to be three methods of meeting this situation, none of which is entirely satisfactory. One method is not to fix any definite number, but allow the system to expand with the general library development. It does not seem likely that Congress will agree to an indefinite number and therefore it is hardly worth while to consider this proposal. The second plan is to allow the situation to develop

and to meet conditions with additional legislation when the necessity arises. This would be a sensible procedure, as it cannot be expected that any plan would last for all time without change. The objection is that Congress is so overburdened that legislation on a matter such as this is postponed from session to session, and action is not taken until long after the need for it develops. The third plan is to adopt some expedient which will insure a fair geographical distribution throughout the country. A geographical distribution must be based on area, and area alone is no better than population as a guide to library needs. It is extremely unlikely that Nevada, with an area of 110,000 square miles, mostly desert, will ever approach the library needs of Pennsylvania, with an area of only 45,000 square miles.

In order to insure a reasonable geographic distribution it is suggested that all designations on the general depository list be not made until there are at least ten depositories in Texas, eight in Montana, eight in California, and four in each other State. This would result in 198 general depositories being allocated to particular States and 302 being available for designation according to library needs. This plan does not necessarily make provision for future growth, but it does insure a reasonable geographic distribution. The Superintendent of Documents should be given sufficient personnel to analyze library requirements and conditions, and to make inspections of the libraries from time to time.

The Care of Maps and Atlases in the Library

By Willard P. Lewis

Librarian, Wesleyan University, Middletown, Conn.

WHEN the new Olin Library at Wesleyan University was planned, a map room was included to contain especially rare and valuable maps belonging to the library. Since that time the scope of the room has been broadened to include most of the maps in the library collections except the roller maps in definite use in the history classrooms. Furthermore, a definite project was started to increase in size and usefulness the library's map collection through the senior member of the history faculty and members of the Board of Trustees. A lucky purchase brought Mitchell's 1756 map of North America in eight sections; the publications of the London Topographical Society were secured and a large collection of English maps and atlases from Stoneham of Walbridge, London, which included an almost complete file of

ordnance survey maps for Ireland, Wales and the southern half of England were obtained; the various college departments were consulted as to what maps in the Library of Congress collections would be of value in their work, and a list was made of these and another group added of those maps relating to the growth and development of North America. By special arrangement photostat copies of these maps totalling 151 items on 384 sheets were made by a Washington photographer; they were all negatives, which cost about half of what the positives would. The average cost for the photostat work was 55 cents per sheet, with 30 cents per sheet additional for mounting on a light grade of muslin. The sheets averaged in size 21 x 15 inches.

It is planned later to secure for the map room

photostat copies of maps in European libraries relating to the history and growth of North America through Professor Karpinski of the University of Michigan, who has made a special collection of these. Another large general collection of maps and atlases is under consideration. In addition to the ones already noted,

versity Library, New York Public Library, Dartmouth College Library and several smaller institutions. Perhaps the most immediate essential was a series of horizontal files or map cases containing from eight to ten drawers each, and from 3½ to 4 feet wide, for the loose folded and unfolded maps. These are

the library has a good sized collection of large and small atlases, miscellaneous single maps of many sizes, roller maps, topographic sheets, geological survey maps, weather maps, etc. The different varieties of maps and atlases required different methods of handling and different containers. I hold no brief, of course, for any special manufacturer, but will simply outline the varieties of equipment which have been the most satisfactory for our purpose. Visits were made to the map rooms of the American Geographical Society, Columbia Uni-

versity Library, New York Public Library, Dartmouth College Library and several smaller institutions. Perhaps the most immediate essential was a series of horizontal files or map cases containing from eight to ten drawers each, and from 3½ to 4 feet wide, for the loose folded and unfolded maps. These are

available in metal from the Art Metal Company, in wood from several wood-working houses, where they must be made to order, and in cardboard with wood frames from the H. P. Ulich Company, of 20 Prince Street, New York. These last are much the cheapest and are used to a considerable degree in the various New York libraries visited. For the Wesleyan map room, however, metal equipment had been determined upon and the Art Metal plan drawers were selected. Art Metal also offered in lieu of a plan drawer a new file, called a "Plan-

available in metal from the Art Metal Company, in wood from several wood-working houses, where they must be made to order, and in cardboard with wood frames from the H. P. Ulich Company, of 20 Prince Street, New York. These last are much the cheapest and are used to a considerable

file," which would file single maps, plans, etc., in vertical fashion between special folders and the pressure of metal binders. The "Plan-file" was rejected because it was almost twice as expensive as the plan drawer, and because it did not adequately care for maps of varying sizes. A smaller edition of the "Plan-file" in two drawer units was afterward selected for the topographic sheets of the Geological Survey, almost all of uniform size. The Globe-Wernicke Company manufactures a vertical filing unit for maps, plans and sheets called the Cello-Clip Map and Plan-File. The maps and sheets are hung from a metal framework by means of cello clips, and the whole enclosed in a metal cabinet. This device apparently affords ease of access and saves space, and is certainly worthy of an investigation. It was not found in operation in any of the libraries investigated.

For large and small atlases (volumes larger than octavo books) the roller shelf unit of Art Metal seemed to offer the best solution. For the few atlas volumes in the reference room the Library Bureau smaller atlas case with sliding shelves was chosen. If the library acquires a large number of atlases of octavo size or smaller for the map room, the 12-inch depth oversize bookshelf unit will be added. For very rare atlases where the binding is at all worn the plan drawer will be used rather than the roller shelf unit. As mentioned before, for

the topographic sheets of the U. S. Geological Survey, a smaller edition of the Plan-file has been selected with two drawer units. Dartmouth uses a jumbo size regular two drawer Art Metal vertical file for these with heavy metal index guides and followers. This arrangement takes care of the topographic sheets which are of uniform size, except for some of the earlier ones; the "Plan-file" will accommodate the earlier ones as well. For roller maps we adopted a large wooden case, which we found in use at Columbia, with a sloping top divided into squares. Varying length maps can be accommodated in this case; they can be filed vertically and index marks can be placed on tags attached to the top end of each roller. The case has a cover protecting the maps from dust. One of the best ways to protect single maps is to mount them on muslin at an approximate cost of 15 cents per square foot. They may also be folded in heavy paper when placed in the horizontal plan drawers to protect the maps and prevent creasing.

In displaying maps, especially valuable ones may be framed under glass, like pictures, or in glass museum cases. Others may be displayed on the Multiplex Display Fixture, either under glass or not. In conclusion let me say that this is a report of progress rather than a final summing up, for preparations are not entirely complete.

The Graham Room for Boys and Girls

By Caroline M. Lewis

Librarian, West Haven Public Library, Conn.

THE ROOM for boys and girls at the West Haven Library was opened early in September, 1929. When the Carnegie building was put up in 1909, there was not enough of the funds to fit up the semi-basement room for library use later on. A few years ago the front part of this room was partitioned off and finished with fireproof walls, a metal ceiling, and linoleum floor, and used for open meetings and meetings of the directors.

When the reading room on the main floor became too crowded, we looked around for a place for the children, and as we could not afford an addition, it was decided to use this room, especially as it had an entrance on a side street. Low book shelves were installed and more juvenile books added.

About this time Miss Marguerite Graham made the library a gift of \$1,000, to furnish

the boys' and girls' room as a memorial to her father, the late Senator Charles E. Graham. This money was used for more bookshelves and suitable furniture. One hundred and thirty-two borrowers belonging to school grades from three to seven were transferred to this room, and the Graham Room for Boys and Girls became a busy place. In less than two months the borrowers rose in number from 132 to over 800, and the number is steadily growing. The librarian was anxious to establish a Picture Hour on Saturday afternoons instead of the usual Story Hour. Once more Miss Graham came forward and gave the money for a Baloptican lantern, and now on Saturday afternoons, seated on the floor, are from 80 to 100 children enjoying pictures of Children of Other Lands, and others, instructive as well as entertaining.

Bexley Public Library

THE DESIGN of the exterior of the Bexley Public Library, Ohio, was studied from a number of minor French buildings of the seventeenth century. The walls are of local limestone liberally pointed with mortar and the

prevent too much light. The ceiling lights give a soft, indirect light, and each table has a bronze reading lamp.

The walls in the delivery lobby are painted gray and panelled, and in the reading room are painted to harmonize with the wood-work of waxed oak. The floor throughout is covered with a Tread-lite tile, which is kept waxed.

The bookcases in the reading rooms are recessed; in the children's room the two upper shelves are closed by a cork-covered door on which book covers and pictures may be exhibited. The chairs in the adult reading room are Windsors, and in the children's room the larger chairs are ladder-backs with rush seats. Two small tables have Windsors, and there are two slope-top tables with benches. The stack shelving is Library Bureau wooden shelving. The furniture was furnished by the Diehl Equipment Company (of Columbus). The librarian's office and the work room are back of the

The Children's Room in the Bexley Public Library

dressings are of Old Gothic limestone. The roof is covered with tiles produced by the Heinz Company in Denver, and has the quality of many old European roofs; it is flashed on the hips and ridges with wide covers of lead.

The entrance door of bronze and the lamp above it are interesting. The usual entrance hall has been enlarged and is used as a miniature art gallery, in which it is hoped that representative work will be shown. The floor of the gallery is of black and gray marble, and the walls, painted gray, make an excellent background for paints. The delivery lobby is reached from the gallery. The adult reading room on one side and the children's room on the other are easily supervised from the delivery desk. The stack room is to the rear of the delivery room, and the stairway to the basement directly behind the desk.

The building is exceptionally light. The reading rooms have four large casement windows and one extra large one. As these windows are equipped with Venetian blinds, it is possible to

The Adult Reading Room has an open reading porch directly behind it

children's room. The basement has toilet facilities, store rooms and the heating plant, and ample provision for future stack rooms. An interesting feature of the plan is the open reading porch directly behind the adult reading room. As a comprehensive scheme for landscape development has been prepared, this porch will overlook the garden.

Bexley Public Library. The design studied from French buildings of seventeenth century

The architects for this building, built and furnished at a cost of \$68,000, are Mr. O. C. Miller and Mr. R. R. Reeves of Columbus, Ohio.

Library of The Florida State College for Women

THE DEDICATION of the new library building at Florida State College for Women, Tallahassee, June 2, marked the culmination of many years of planning and work on the part of the librarian and the college authorities. One wing of the building was completed in 1925 but within a year this proved wholly inadequate to the needs of the college. The remainder of the building, begun in May, 1928, is now completed and stands as the most beautiful building on the campus and the center of its intellectual life.

Made of brick, stone and reinforced concrete, the building is a T-shaped structure, three stories high. The first floor provides for a large reserved-book reading room, a storage and unpacking room, work room, janitor's room and five large seminary rooms which are being

used temporarily for classes. The second and main floor consists of the reference room, periodical reading and reference room, cataloging room, offices, staff room and lobby, in which is located the charging desk. This desk is easily accessible to the various reading and reference rooms as well as the stacks and offices. The seating capacity on this floor is 500, while that of the entire library is 750, or more than 48 per cent of the present enrollment.

The stack room is equipped with all-steel stacks with marble floors. It is designed to contain five tiers of Standard Library Bureau stacks, two tiers of which have been installed. The stack capacity when completed will be 180,000 volumes. The walls of the stack room are finished in pale gray glazed brick which can be easily cleaned without injuring the sur-

face. The finish blending with the light gray finish of the stacks proper insures a maximum of light in the stacks.

The walls of the building are finished in light tan rough plaster, harmonizing with the finish of the wood-work throughout the building. The ceilings are cream. The lobby and reference room have ornamental plaster ceilings with a good deal of color worked into their design. This, in

contrast to the large gray stone pillars, gives a very restful, pleasing effect. The floors of all reading rooms and offices are covered with tan battleship linoleum, bordered with dark

brown, while those of the lobby and halls are of rubber tile in two shades of marbled brown.

The stairways and entrance to the main floor are of Georgia pink marble. All woodwork in the building is hand-finished, quarter-sawn oak, each door being a work of art in itself.

The building is wired throughout for telephone service, fans, frigidaires, drinking fountains, and modern cleaning apparatus. Read-

ing rooms, cataloging room, seminary rooms and offices are furnished as completely as possible with the best library equipment available. It is the most beautiful building on the campus.

Florida State College for Women Library. Built in T-shape and three stories high

The Popularity of American Magazines

By Alfred Decker Keator

Librarian, Reading Public Library, Pa.

FEW OF US realize how small a part the reading of books, especially library books, plays in the total amount of reading done by the American people. A late estimate numbers the combined circulation of library books as 237,888,282.¹ Allowing generously for possible increase to date, let us say 250,000,000 for 1929. The twenty-five most popular magazines alone issued 850,000,000 copies during the year, and the totals of the others would bring these figures to well over a billion. 13,233,000,000 daily and 1,530,000,000 Sunday newspapers were sold during the same period. So, without even considering the tons of pamphlets and sales literature read by the public or books privately purchased, it is not surprising to learn that less than 2 per cent of our national reading is done through the agency of our organized libraries. There are over 7,200 magazines (as distinct from newspapers) published in the United States and Canada. They deal with nearly

every conceivable subject, ranging from asbestos to nut culture, rifle shooting to roadside selling, counterfeit money to so-called "matrimonial." We may divide our periodicals into three rough groups, according to the aims of their publishers:

1. To foster the interests of knowledge, e.g., *Journal of Bacteriology*, *Educational Administration and Supervision*.

2. To foster the interest of a trade, profession, or society, e.g., *Iron Trade Review*, *Journal of the National Education Association*, *Rotarian*. The propaganda or "bug" type of magazine is an extreme example of this class.

3. Money making ventures (not always!) or just "ventures." This is the large group of magazines of a general nature, intended by the publishers to have a popular appeal, and naturally divides into several types, although the inter-type gradations are often minute and even confusing.

a) Literary or belles-lettres, e.g., *Atlantic*, *Dial*, *Century*.

¹ Library Extension, a Study of Public Library Conditions, A.L.A., 1926, Apx.

b) Fiction and short story, e.g., *Cosmopolitan*, and the various ephemeral cheap magazines that clutter up the news stands.

c) Features, e.g., *American*, *Liberty*, *Collier's*.

d) News and comment, e.g., *Outlook*, *Literary Digest*, *Time*.

e) Reviews, e.g., *Nation*, *Yale Review*, *American Mercury*.

f) Family or women's magazines.

g) Juveniles.

h) Humorous.

We might, however, adopt the arrangement suggested several years ago by a contributor to B. L. T.'s famous column in *The Chicago Tribune*, dividing the human race into four groups, each with the designation of his favorite recreation, food, taste in art, literature, etc. There was the high highbrow, the low highbrow, the high lowbrow, and the low lowbrow.

Our libraries, owing to their limited funds (and for other good and sufficient reasons) keep on their shelves reading suitable for only the two upper classes. In the hushed sanctum of the library reading room, one will meet the blue-blooded *Atlantic* or *Grandma Outlook*, but never such rowdy scapegraces as *Jim-Jam-Jems*, the *Calgary Eye-Opener*, the *Smokehouse*, or *Captain Billy's Whizbang*. We need to be concerned with what our lowbrows read, because we desire to consider what according to observers is actually being read by the majority of our citizens.

There have been several studies made lately of what certain student or locality groups have been reading. One of the most extensive of this kind was published in 1925 by the Milwaukee Vocational School, with its 7,000 students.

An American Library Association news release in summarizing this depressing report says: "Three sources of reading interest were studied and compared—books, magazines and newspapers. The survey shows that the newspaper, and in particular the sensational newspaper, leads the list in point of interest. The magazine holds second place, and both boys and girls list as their favorite magazine one of the most sensational and lurid type which lays a false and exaggerated emphasis upon the sex interest."² A questionnaire submitted to the students in a Columbus (Ohio) high school showed a more encouraging report. The majority of both boys and girls indicated the *American* as their favorite magazine, with the *National Geographic* second in choice. Other choices were *American Boy*, *Boy's Life* (favorite of three girls, also!), *Saturday Evening*

Post, *Short Story Magazine*, and *Good Housekeeping*. The survey showed that this group of students read chiefly what was found in their own homes.

In the December 22, 1928, issue of *Liberty* appeared a characteristic article featuring, among other answers to a questionnaire, the reading habits of the office staff. The majority preferred *The Saturday Evening Post*, with the *Cosmopolitan* a close second, especially favored by the girl stenographers. A report on the magazines preferred by the rural boys of Berks County (Pa.) schools, fourth to ninth grade, is fairly reassuring. The two receiving the highest number of votes were naturally the *Boy's Life* and the *American Boy*, but the next choices were, in order, *National Geographic*, *Popular Mechanics*, *Popular Science*, *Nature Magazine*, *Farm Journal*, *Country Gentleman*, *Saturday Evening Post* and *Child Life*. *True Story Magazine* ranked eleventh, with less than one-third the number of votes the leaders received.

A word about popular reading tastes as shown by the display and reports from our news stands. These are perhaps indicative of the taste of the great commuting and traffic-jammed reading public of large cities like New York, but not of the reading public at large. There is a remarkably good article on this subject in the January, 1929, issue of the *Debunker*, an iconoclastic magazine formerly known as the *Haldeman-Julius Monthly*. Agnes Repplier says: "Our literary foreground is congested with monthlies and weeklies that perish over night and are replaced with sanguine successors. On every news stand they confront us in bewildering array. Somebody buys them, so somebody must be able to tell them apart. Somebody knows the female head on one cover from the female head on the other cover, though to the uninitiated they look exactly alike."³

Thank goodness this display is not representative of the reading taste of our great American public. Our news stands are plastered with magazines that range from the merely stupid to the frankly pornographic, masquerading under the names of "art," "science," "truth," "know thyself," etc. A few titles like *Adventure*, *Western Stories*, *Aviation Stories*, serve the literary taste for hectic adventure, but many others are vicious in their influence. The adjective "snappy," "spicy," "droll," "peppy" are overworked. Then there are the all-story magazines "written to satisfy an unuplifted moronia," as C. R. Walker expresses it.⁴ Probably the best example is Bernarr MacFadden's *True Story Magazine*, with its enormous cir-

² Rasche, W. F. *Reading Interests of Young Workers*. Milwaukee, 1925.

³ *Yale Review*. Jan., 1927.

culution. The fact that a committee of ministers is said to pass upon its stories before printing does not prevent a flavor of sexiness that is unwholesome, to say the least. Uncle Sam refuses the mails to the most flagrantly pornographic magazines, and there are spasmodic attempts to clean up the news stands in New York, yet the evil will persist as long as the public will allow this contaminating condition. Not all our direct sale periodicals are cheap or evil, however. One is constantly surprised to see the odd titles sold in our busiest news stands, and the enormous quantities of the other periodicals mentioned below.

The most reliable index to popular magazine reading for the whole country is the sworn circulation statistics as given for advertising purposes to the editors of *Standard Rate and Data Service*, or the *American Newspaper Annual*. There are twenty-five distinct magazines having more than 1,000,000 circulation, according to the figures of December, 1929, aggregating a combined circulation of over 43,000,000, or one to every third person in the United States.

GENERAL PERIODICALS HAVING MORE THAN ONE MILLION CIRCULATION, ACCORDING TO LATEST AVERAGE FIGURES OF DECEMBER, 1929.

Appeal primarily to women.....	9
Appeal primarily to men.....	4
Appeal to both.....	3
Published in New York.....	14
Published in Philadelphia.....	4
Published in Chicago.....	1
Published in Des Moines.....	3
Published elsewhere.....	3
Combined yearly circulation.....	846,252,000

A perusal of this list brings out several interesting facts. The most widely read periodical

is a weekly, but there are only three other weeklies in this class: *Collier's*, *Liberty* and the *Literary Digest*. The remainder are monthlies. At least sixteen are family magazines, including seven of the rural or agricultural type, and nine with special appeal to women readers. Only five can be by a generous classification be called men's magazines; *Saturday Evening Post*, *American*, *Collier's*, *Liberty* and the *Literary Digest*. *Hearst's Cosmopolitan* and *True Story Magazine* probably have a majority of girl readers, while the *National Geographic* is enjoyed by all.

Two big publishing groups are represented. The Curtis Publishing Company of Philadelphia by the *Saturday Evening Post*, the *Ladies' Home Journal* and *Country Gentleman*; and the Crowell Publishing Company of New York by the *Woman's Home Companion*, *American Magazine*, *Collier's*, and *Country Home* (formerly *Farm and Fireside*). The MacFadden group is represented by *True Story Magazine*, and the Hearst interests by *Hearst's International Cosmopolitan*. New York is the main center of periodical publishing as well as that of books, although Philadelphia and Des Moines make a good showing. Strange to say, Chicago has only one magazine in the millionaire class. Whether there is any connection between this fact, and that Chicago boasts the largest newspaper in the country is uncertain. Chicago may well claim *Liberty*, however, as that remarkable publication was started as a New York venture in 1924 by *The Chicago Tribune*.

Newspapers are outside the scope of this paper, but we might make mention of the *American Weekly*, a syndicated hybrid magazine section, published in connection with some seventeen widely scattered newspapers. It claims (unofficially) a circulation of 4,464,000. The Street & Smith series, and the Vickery & Hill list are groups of cheap magazines syndicating their advertising. *McCall's Style News*, not to be confounded with *McCall's Magazine*, reaches over 5,000,000 primary buyers, and certainly many times that number of readers. Still, we should hardly call this a reading periodical, rather one for reference.

We do not need to be pessimistic about the reading habits of our people as demonstrated by the circulation figures of our most popular magazines. The intelligentsia may criticize this list and call it the reading of our "Babbity," but the fact remains that any nation whose great majority continues to read such sane-minded and conservative periodicals as the *Saturday Evening Post*, the *American*, the *Ladies' Home Journal*, or the *Literary Digest* is not going to the dogs immediately, at least.

Selecting Readers and Primers for Use in Library Children's Rooms

By Elizabeth D. Briggs

Head of Lewis Carroll Room, Cleveland Public Library

NOT THE least difficult task which falls to the lot of the children's librarian is that of selecting the readers and primers to be placed upon the shelves of the library children's room. In her own heart she doubtless wishes that the dull looking and cheaply covered text books might be eliminated entirely. *Johnny Crow's Garden*, *The Tale of Peter Rabbit* and others of their kind are infinitely more appealing in every way and are enjoyed by children of kindergarten age. A glance at the pages, however, with their long and complicated words and phrases shows clearly that simpler text is needed for the average child's beginning reading books. Consequently it is not a matter of choice but a matter of common sense—the books are needed and the only problem is that of selection.

What standards should be set as a basis in selecting readers to be used for library purposes? The committee, appointed last year by the Section for Library Work with Children of the American Library Association to make a study of this subject, made a first attempt at an outline of standards. This outline is divided into four main parts—subject matter, language, mechanics and method. Each part is given a percentage rating, indicating the relative value for use in a library, not a classroom. Obviously, subject matter and language are of greatest importance, and each is given a score of 35 per cent, mechanics 20 per cent and method, which is of special consideration in a text for school, but not for library use, is given 10 per cent only.

Under "Subject Matter," the first two points are, "Will it stimulate a desire to read?" and "Will it lead to good taste in reading?" Let us consider these two points.

In the *Handbook of Children's Literature*, by Gardner and Ramsey, the question is asked, "What are the interests of young children that have to do with the appreciation of literature?" The authors answer it in this way: "The little child lives in the immediate present. He does not trouble himself about his own past; he is not looking forward to any future. His everyday world is a place of such marvels and mystery to him, that living for him is exploration of the actual. It follows quite naturally that he prefers to hear about the things that belong to his environment, that have to do with whatever he sees, or hears, or handles. . . . We can help him best to an appreciation of the im-

aginative by keeping close to what is actual for him. This is particularly true during the first two years in school. This does not mean that we shall banish fairy tales. Far from it! But we shall avoid the blunder of bringing them too early into the child's experience for his fullest enjoyment of them. . . . It is in the simple story of actual child experience that the adult will find his surest guidance in choosing the literature that is suited to the interests of young children."

A study of the most recently published readers for first and second grades shows a definite tendency to avoid the use of the old familiar folk tales, which a few years ago formed almost the entire content of some of the standard readers. Now, many of the primers and first readers are devoted largely to realistic stories about children and animals, and factual material within their range of interests and comprehension. Purely imaginative literature is introduced in the second or third readers when the children's ability to read is sufficient to permit them to understand versions which have not lost their beauty by being retold in words of one syllable and when, to quote again from Gardner and Ramsey, "the children's sense of objective reality is strong enough to help them to realize that there is a fairy world."

The list compiled by the committee includes several series of readers based on folklore, among them the well-established Treadwell and Free *Reading Literature* series which gives an excellent selection and presentation of folk tales and poetry. Among the series containing a variety of material might be mentioned the *Child Story Readers* by Freeman, Storm and Johnson. The primer contains realistic stories about two children and their dog. The same characters appear in Volume I, with additional stories about birds, toys and outdoor activities, firemen and policemen. Volume II is largely devoted to folk and fairy tales and stories of animals and insects.

The *Social Science Readers*, by Read, are of an entirely different type, and are especially good for library use. Each volume presents a different subject of special interest to the modern child; farm life, railroad engines, airplanes and boats. The vocabulary naturally includes a considerable number of words not found in the usual word lists, but the sentences are short, the phrasing simple, and the pictures illustrate the text so clearly that the books are not too

difficult for good readers in the first and second grades.

The preceding comments upon the readers are illustrative of other points brought out under "Subject Matter" in the outline of standards. "Is it literary in style? Is it fitted to the child's experience? Is informational material included? If so, is it of a type desired by the child? Are the stories new or retold? If new, are they original in style and subject matter? Are they well constructed? If retold, is the spirit and character retained?" One other point, "Are the animals real or humanized?" deserves special mention. *Baby Animal*, by Troxell and Dunn, which appears in the "List of easy reading books of the reader and primer type recommended for use in library collections," presents an excellent variety of animal stories. It contains stories about puppies, kittens, fawns, baby opossums and other wild animals, most of them unobtrusively giving considerable information. But in contrast to many of the animal story books for little children, the animals are not personified. They are real and alive but never lose their character as animals. The doe makes known her desires to the fawn in the way that one deer communicates with another in the forest, and dogs and puppies, cats and kittens, converse in the fashion known to every observer of household pets.

Some of the points under "Language," the second section of the outline of standards are: "Is it correct? Is the vocabulary well chosen? Is the arrangement of the words such as to be readily comprehended? Is it pleasing in style? Is unity preserved?" These points are doubtless clear and need no explanation. "Is it free from useless repetition?" however, brings up the question of what is meant by "useless repetition." We know that words must be repeated in order that the child may learn to recognize them and that children enjoy repetitive stories such as *Little Black Sambo*, but repetition of words and phrases need not be of the sort known as "deadly." A familiar Mother Goose rhyme found in his own reading book brings delight to the small reader, but when it is followed by twelve pages of the same rhyme repeated without rhythm in every conceivable form, including questions and answers, it loses its charm. Nor is the reader's pleasure in *Henny Penny* enhanced by finding, in the same book, two other stories built upon the same plan. The best of the readers show that repetition is possible without monotony. Words and possibly phrases are repeated but not ideas; the story progresses with each sentence; there is unity and continuity of thought which teaches clear thinking; the child's curiosity is intrigued, and frequently an element of surprise adds the final touch which makes the child really want

to read the story again and to share it with his classmates.

The points under "Mechanics" are "Paper," "Print," "Pictures," "Sentences" and "Binding." The questions concerning these are fairly obvious and would be considered by any children's librarian in judging a reader, with the possible exception of the following point under "Sentences": "Is the arrangement of the page conducive to good eye movement?" In the best beginning readers care has been taken to end each line at a point where a pause would not be awkward. The eye moves naturally from line to line and is not distracted by small pictures and decorations interspersed in the text.

The fourth point in the outline, "Method," is of least importance to children's librarians so long as the reader under consideration is not a study reader composed largely of questions and suggestions for activities. These may be excellent for use in a classroom, but are not essentially library material.

One type of material which children's librarians agree should be included in readers has not been brought out in this discussion of the outline of standards. The increasing demand for poetry in most libraries proves that children have a genuine liking for it. But is there not some question as to the advisability of asking first-grade children to read for themselves even such simple poems as those found in the *Child's Garden of Verses* and *Sing Song*?

The authors of one of the newer series have included a variety of poems which are entirely too hard for the first grader's own reading but quite within his comprehension when read to him. In the preface they have explained that these should be read aloud by the teacher for the pupils' enjoyment, but not attempted by the children until they can be read with sufficient ease to give pleasure to both the reader and the listener. The singing quality of

"Piping down the valleys wild,
Piping songs of pleasant glee,
On a cloud I saw a child,
And he laughing said to me:
'Pipe a song about a lamb!'
So I piped with merry cheer.
'Piper, pipe that song again;'
So I piped: he wept to hear."

would be utterly lost if read aloud by a faltering reader but, on the other hand, would give infinite pleasure if read understandingly. The reading of poetry offers the teacher and librarian one of their greatest opportunities for introducing and cultivating an appreciation of literature.

The study of readers and primers is still going on. Last year's committee merely made a beginning which a new group of librarians in children's rooms and school libraries is carrying forward.

THE LIBRARY JOURNAL

June 1, 1930

Editorial Forum

HALF-WAY mark has been reached in the campaign for raising an additional million dollars endowment for the A. L. A., which if completed will in all probability assure a grant of a further million, in which case the association will be in shape to maintain and extend the remarkable work which has been done with the help of the revenue from its 13,000 members, the interest on endowments so far obtained and the annual grants from the Carnegie Corporation which, in accordance with the original plan, are to diminish from year to year until the expiration of the allotted period now almost at hand. If then the half million dollars so far assured can be made a million, and a permanent grant of another million from a friendly corporation is obtained, the A. L. A. will be on a permanent basis for the maintenance and expansion of its work—a work which must be considerable so long as a large percentage of the population of the nation is not reached by local library facilities. It may readily be seen that no other national association has covered so wide a domain in its field. With adequate permanent endowments and consequent revenue danger of unwise expansion or overlapping work has been provided against by the appointment of a committee outside the official staff which shall from time to time report upon the activities of the association with frank criticism and fearless suggestion.

A USEFUL by-product of sustaining membership is that it has interested in library work prominent citizens throughout the country who heretofore have been only in indirect or local touch with library work. For instance, one of the recent accessions on the sustaining membership roll is Mr. J. P. Morgan 2nd, who has placed the great private library initiated by his father and greatly developed by himself at the service of the scholarly public as a quasi public

library, supported by private funds. Among other recent accessions are Adolph S. Ochs, chief proprietor of the *New York Times* and the generous donor of the half million which has made possible the great *Dictionary of American Biography*; George P. Brett, Jr., the future head of the Macmillan Co. and thus an important link with the publishing trade; Mortimer Schiff, the prominent banker of New York; Washington Flexner and Charles H. Worcester, leading citizens of Chicago, and other notable people. Each of these \$100 yearly subscriptions on the 5 per cent basis means \$2,000 toward the million which it is planned to raise, although it is hoped that considerable endowments may be obtained from wealthy private citizens, thus completing the fund by obtaining the additional million without waiting the slower process of obtaining 250 additional sustaining members at \$100 each or the larger number at \$25 each. The meeting of the National Association in California should give especial motive to the citizens of the golden State to do their part and make this year 1930 another year of Golden Jubilee by placing the Association on a permanently assured financial basis. The California Library Association has set a good example by becoming collectively a sustaining member.

NOTHING is to be left undone to make the Los Angeles Conference one of the most notable in the history of the A. L. A. Previously and incidentally to the special train from the East, there is to be a stopover at the old Spanish capitol of Santa Fé, notable in American history in the Spanish days before the American Republic was dreamed of, and a pre-conference session at the Grand Canyon, which will be made an Arizona State meeting with Governor John M. Phillips giving an address of welcome and with attention to the various library activities in that enterprising "top of the country" State. The most notable session at Los Angeles will be that given exclusively to California itself, at which Mr. Ferguson, before taking his new position at the East, will, as it were, make his swan-song and parting bow to the State with which he has so long and honorably been connected. The Special Library Association will have already held its 1930 conference in California at San Francisco, but most of the other national library societies will hold their annual meeting at Los Angeles, and there will be no less than forty different meetings from those of the national societies down to the round tables on an unusual variety of topics, one of them relating to western books and book buying.

Librarian Authors

MARGARET WIDDEMER, after passing what one of the instructors said was the most brilliantly passed examination at the Pratt Institute Library School, went through Drexel Institute Library School and worked for two years at her profession. She spent the year following her graduation cataloging rare books for the eminent collector Dr. A. S. W. Rosenbach, going from him to the catalog department of the University of Pennsylvania, where she spent one winter. The poem which was the beginning of her reputation as a poet, *The Factories*, was directly due to her cataloging experience at the University of Pennsylvania.

"I was given a milk report to do," says Miss Widdemer, "and found a footnote to the effect that thousands of babies died avoidably in English factory districts because their mothers went back to the factory work and could not nurse them. The last stanza of *The Factories* built itself from that:

"I have robbed my sister of the lips against her breast

(For a coin, for the weaving of my children's lace and lawn—)

Feet that pace beside the loom, hands that cannot rest,

How shall she know motherhood, whose strength is gone?"

"This may perhaps explain why there were so many red ink marks on my catalog cards! I suppose poetry and cataloging are really not to be carried on together with fairness to both. . . . For sometime I cherished hopes of being a reference librarian, but I ended by making more trouble for librarians by writing books than by being a librarian myself."

Miss Widdemer was born in Doylestown, near Philadelphia, where her father was rector of the Episcopal church. She was taught to read at four, given a certain amount of guidance and turned loose in a wonderful old-fashioned library. Besides this, until she was ten, her grandmother saw to it that she had about five hours of intensive teaching every day. The rest of the time she spent reading, playing the piano, or taking the family's cards up to the public library on the hill for more

books. Her first volume of verse, *The Factories*, published in 1917 by Henry Holt & Company, attracted instant attention throughout the country by the earnest passion of its message and the singing qualities of its music.

Her second book, *The Old Road to Paradise*, also published by Henry Holt & Company, shared the \$500 Pulitzer prize for the best volume of verse in 1918; *Cross Currents*, published in 1921 by Harcourt Brace, showed the music and dreaminess of her earlier work, but with a firmer touch; and *A Tree with a Bird in It*, Harcourt Brace, was given the New York *Evening Post* prize for the best satiric literary work of 1922. Among her many novels, to mention a few, are *The Rose-Garden Husband*, built on experiences in Philadelphia libraries; *Graven Image*, published in 1923 by Harcourt Brace; *Charis Sees It Through*, 1924, Harcourt Brace; *Rhinestones*, 1929, Harcourt Brace, and the last book, *Loyal Lover*, published in April by Farrar & Rinehart.

"My first volume of verse," says Miss Widdemer, "was issued almost simultaneously with my first girlish novel, *The Rose-Garden Husband*. Both went dazzlingly well . . . curiously enough, however, until quite lately I seem to have had two distinct publics, the people who have known and cared for my verse and have known little about my novels, and vice versa. I suppose this may be because the romance-reading public is, after all, not on the whole a poetry-reading public. However, of late, since my books have taken a more serious note, I have noticed the two publics have coalesced."

Miss Widdemer lives in New York City in what she calls "a delightful menagerie for authors and artists, called the Hotel des Artistes." Besides her writing, she does a certain amount of reading her poetry and talking about poetry and poems. A camp in the Adirondacks gives her a chance to do a great deal of her writing in the summer. She recently sailed for England. She is on the Executive Board of the Poetry Society of America, an honorary member of the Browning Society, and has membership in several other clubs.

Book Selection on World Affairs, X

Modern British History

The World Peace Foundation Mobilizes the Opinions of Experts
Throughout the United States

Ward, Sir Adolphus, and Gooch, George. *Cambridge History of British Foreign Policy*. 3v. (9 votes) Macmillan. 1922. v. 1, \$6; v. 2, 3, ea. \$7.50.

"An excellent survey of British foreign policy based upon results of latest research."

Recommended as Advanced by Brand, Chase, Gutsch, Lunt, Meyer, Reynolds, Smith; as Intermediate by Dennis.

Lunt, William E. *History of England*. (8 votes) Harper. 1928. \$5.

"The best organized and most easily adaptable textbook in English history."

Recommended as Advanced by Hoskins, Meyer; as Intermediate by Gittinger; as Elementary by Dennis, Gutsch, Lunt, Reynolds, Wood.

Trevelyan, George M. *History of England*. (8 votes) Longmans, Green. 1926. \$4.25.

"A thoughtful and interpretative history. Very stimulating . . ."

Recommended as Advanced by Jackson, Meyer; as Intermediate by Dennis, Gittinger; as Elementary by Brand, Gutsch, Lunt, Wood.

Hall, Walter P. *Empire to Commonwealth*. (7 votes) Holt. 1928. \$3.60.

"A very recent, impartial study of the relations of the dominions and their growth to the problem of empire."

Recommended as Advanced by Chase, Clokie, Jackson, Meyer, Reynolds, Wood.

Trevelyan, George M. *British History in the Nineteenth Century*. (7 votes) Longmans, Green. 1922. \$4.
